

DEPARTMENT OF THE AIR FORCE  
HEADQUARTERS 910<sup>TH</sup> AIRLIFT WING

28 May 2004

**MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)**

**FROM:** 757 AS/DOS ((b) (6)) ; FAX 346-1616)

**SUBJECT:** Capability and Concept of Operations for Aerial Spray Characterization at Langley AFB

1. **Purpose/Objectives/Benefits:** Characterize Ultra Low Volume (ULV) spray with fuselage configuration for control of mosquitoes operating at Langley AFB VA.

2. **Capability:** Spray Aircraft Available 1-5 June 2004.

3. **Concept of Operations:**

**01 JUN (Tuesday):**

1000: Show at KYNG  
1200: Depart KYNG  
1330: Land KLF1  
1345: Safety Briefing  
1400: Weather Decision  
1430: Load Dibrom  
1800: Spray Sortie  
2030: Land

**2 JUN (Wednesday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1800: Spray Sortie  
2030: Land

**3 JUN (Thursday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1800: Spray Sortie  
2030: Land

**4 JUN (Friday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1800: Spray Sortie  
2030: Land

**5 JUN (Saturday):**

0800: Report

TBA: Outbrief

1000: Depart KLFI

1130: Land KYNG

**4. Spray Parameters:**

**4. Spray Parameters:**

- a. Booms -- Fuselage only.
- b. Nozzles -- 8008 TeeJet
- c. Number of Nozzles -- 4 on left side and 3 on right side ( 7 total) oriented straight down
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 150' above ground level.
- f. Wind --Crosswind component.
- g. Flow Rate -- 3.6 gallons/minute
- j. Aircraft Tail Number: 99105; Mission Identifier: QZNRKA153
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Aircraft/Mission Commander: Major (b) (6)**

**6. Support required at Langley AFB has been requested via FAX message.**

**7. If you have any questions concerning this mission please contact the Aerial Spray Office, DSN (b) (6) .**

//Signed//

(b) (6)

Capt, USAFR  
Aerial Spray Flight, Chief Entomologist  
757 AS/DOS

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 01 - 05 JUN 2004

**Purpose/Objectives/Benefits:** Characterize Ultra Low Volume (ULV) spray with fuselage configuration for control of mosquitoes operating at Langley AFB VA

#### 1. 910 AW PARTICIPANTS:

- a. **Aircrew:**
  - (1) Mission Commander: MAJ (b) (6)
  - (2) Pilots: MAJ (b) (6) , MAJ (b) (6)
  - (3) Navigators: MAJ (b) (6)
  - (4) Flight Engineers: MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6) , MSG (b) (6) , TSG (b) (6)
- b. **Maintenance:**
  - (1) Spray Maintenance: MSG (b) (6) , TSG (b) (6) , TSG (b) (6)
  - (2) Crew Chiefs: SSG (b) (6) , SRA (b) (6)
- c. **Certified Pest Management Professionals:** LTC (b) (6) , MAJ (b) (6) , CPT (b) (6)  
(b) (6) , CPT (b) (6)

**Gov Vehicles: 2 ea 9 pax van, 1 staff, 1 pick-up truck provided by Langley AFB**

#### 2. SCHEDULE: (All times local)

##### 01 JUN (Tuesday):

**PPR # 0601AL03**

1000: Show at KYNG  
1200: Depart KYNG  
1330: Land KLFJ  
1345: Safety Briefing  
1400: Weather Decision  
1430: Load Dibrom  
1800: Spray Sortie  
2020: Sunset  
2030: Land

##### 2 JUN (Wednesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1800: Spray Sortie  
2020: Sunset  
2030: Land

##### 3 JUN (Thursday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1800: Spray Sortie  
2021: Sunset  
2030: Land

**4 JUN (Friday):**

TBA: Daily meeting for PMP/MC in the hotel lobby

1400: Show Time / Weather Decision

1430: Load Dibrom

1800: Spray Sortie

2022: Sunset

2030: Land

**5 JUN (Saturday):**

0800: Report

TBA: Outbrief

1000: Depart KLFI

1130: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass,  
Pest Safety Binder, UHF Radio,  
Satloc Ground Tracker and Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops phone 878-3588
  - (2) Tower phone 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int:** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9 or 348.6** (phone 877-0221 ops)
  - (2) Tower – **124.9 or 280.1** (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - (4) CTAF – **118.7**
- c. **Langley AFB:** Tower OIC MSG (b) (6) Lt (b) (6) 1st OSS SQ
  - (1) Tower - **125.0 or 253.5** (phone 4-5326)
  - (2) Ground - **121.7 or 275.8**
  - (3) Clearance – **118.85 or 271.3**
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld):** Tower - **124.3, 126.375, 340.2, 318.7**
- e. **Spray Ground:** Primary 392.2; Secondary: 308.6

**7. IN-BRIEFING:** TBA

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV
- b. **Nozzle Tips/Orientation:**
- c. **Aircraft:** 99105

**9. SPRAY PARAMETERS:** See section 11

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Aero Club Ramp
- c. **When:** 1430 hrs each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

**11. SPRAY TEST:**

Mission Protocols:

- a. Purpose: Swath Characterization as delivered for a simulated mosquito adulticide spray using the fuselage ULV configuration. Glass slides will be used to collect droplets bioassays of live mosquitoes for efficacy testing. Ten sampling stations will be setup on Craney Island. Direction of sampling line will depend on wind direction, we will adjust our fly over (spray) point to be perpendicular to the prevailing wind. Additionally, we need the average winds to be below 10 mph.
- b. Aircrew: We need the system to have stabilized prior to reaching the sampling points. Twenty seconds prior to the sampling point and 20 seconds after should be sufficient (40 seconds total), please be advised that this value could change. Spray Operators: Please record the MASS pressure at 5 second intervals and of course total spray-on time (when spray is on). Navigator: Please record winds at altitude every ten seconds during the spray-on period.
- c. Microscope slides will be retrieved 20 minutes after the plane has passed. If conditions allow, please give ground crew up to 40 minutes to set up for a second pass. Number and size of the droplets will be determined as well as mosquito mortality, the following day.
- d. If the of 8008 size nozzle test is completed, 8005s will be examined.

**12. CONTACTS:** LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX

- a. **LANGLEY AFB VA:**
  - Wing Commander: , DSN 574-5321
  - Mission Support Group Commander: DSN 574-7995
  - Civil Engineer:
  - Deputy Chief/Civil Engineer: (b) (6)
  - Environmental Coordinator: (b) (6) , DSN (b) (6) ; FAX 3503
  - Base Operations: DSN 574-2504
  - Langley Control Tower: , DSN 574-5326

**MEMORANDUM FOR HQ AFRC/DOOM** (FAX: 497-0198)

**FROM:** 757 AS/DOS (b) (6) ; FAX 346-1616)

**SUBJECT:** Capability and Concept of Operations for Aerial Spray Mission (1-5 Apr 02)

1. **Purpose/Objective:** Oil spill exercise and training with the West Coast US Coast Guard Oil Spill Response Team at Santa Barbara Municipal Airport, Santa Barbara CA.
2. **Capability:** Spray aircraft 105 available 1-5 April 2002
3. **Concept of Operations:**
  - a. **1 Apr (Monday):**
    - 0800 Show at KYNG
    - 1000 Take-Off KYNG
    - 1600 Land KAST
    - A/R Safety Brief
  - b. **2 Apr (Tuesday): (Meeting/Ground Training Day)**
    - 0830 In-Flight Safety Briefings/MS will Configure A/C
    - 1600-1700 Show and Tell
    - 1730-1900 Social Hour
  - c. **3 Apr (Wednesday):**
    - 0830 Show Time
    - 1000-1130 1<sup>st</sup> Sortie
    - 1200-1300 2<sup>nd</sup> Sortie
    - 1400-1530 3<sup>rd</sup> Sortie
  - d. **4 Apr (Thursday): Training/Clean Up Day**
  - e. **5 Apr (Friday):**
    - 0800 Show Time
    - 1000 Depart KAST
    - 1700 Land KYNG

4. **Spray Parameters for Over Water Exercise:**
  - a. Nozzles – Raindrop nozzles oriented straight back
  - b. 8 (16 total) on each fuselage boom; evenly spaced
  - c. Booms – fuselage only
  - d. Airspeed – 170 knots ground speed
  - e. Altitude – 100 feet above water
  - f. Application Rate – 7 Gal/Acre
  - g. Flow Rate – 277 Gal/Min
  - h. Spray – water only
  - i. Number of passes – 6 per sortie. Do not decrease flow rate in order to increase passes
  - j. Pressure – 40 psi
5. **Mission Commander:** Capt (b) (6)
6. Support required at Santa Barbara CA is provided by the West Coast US Coast Guard Oil Spill Response Team.
7. If you have any questions concerning this mission please contact DSN (b) (6) .

0800: Show Time  
1000: Depart KYNG  
1600: Land KSBA  
1630: Safety Briefing

##### 2 Apr (Tuesday): Meeting/Ground Training Day

0830: In-Flight Safety Briefings; MX Will Configure A/C  
1600-1700: Show & Tell  
1730-1900: Social Hour

##### 3 Apr (Wednesday):

0830: Show Time  
1000-1130: 1<sup>st</sup> Sortie  
1200-1300: 2<sup>nd</sup> Sortie  
1400-1530: 3<sup>rd</sup> Sortie  
1600: De-Brief

##### 4 Apr (Thursday): Training/Clean Up Day

##### 5 Apr (Friday):

0800: Show Time  
1000: Depart  
1700: Land

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Cellular Phone, Wind Gauge, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit, Ground Loading Station, Spray Booms for Testing and Oil Spill Exercise

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Tower:** (805) 681-0534
- b. **Base Ops:** (503) 861-6201

**5. PARKING PLAN:** The Forest Service Ramp, west end of Santa Barbara Regional Airport

**6. RADIO FREQUENCIES Call Sign:**

- a. **US Coast Guard Air Station Ops Center Radio Frequency:**
- b. **US Coast Guard Air Station Ops Center Call Sign:**
- c. **Spray Ground: Primary / Secondary**

**7. IN-BRIEFING:** Required. See the Schedule, or as determined by Mission Commander.

**8. SPRAY CONFIGURATION:**

- a. **MASS – SP2G**
- b. **Aircraft Number: 105**
- c. **Mission Identifier: QZNRKA**

**9. SPRAY PARAMETERS:**

**FOR OVERWATER EXERCISE**

- a. **Nozzles –** Raindrop nozzles oriented straight back.
- b. **8 (16 total) on each fuselage boom; evenly spaced.**
- c. **Booms –** fuselage only
- d. **Airspeed –** 170 knots ground speed.
- e. **Altitude –** 100 feet above water.
- f. **Application Rate –** 7 Gal/Acre
- g. **Flow Rate –** 277 Gal/Min
- h. **Spray --** water only.
- i. **Number of passes –** 6 per sortie. Do not decrease flow rate in order to increase passes.
- j. **Pressure –** 40 psi

**10. LOADING: Water**

- a. How Much:** To be determined
- b. Where:** Forest Service Ramp
- c. When:** 3 Apr 02
- d. Furnished by Installation:**
  - (1) Water
  - (2) Truck
  - (3) Two B-5 or B-1 Stands

**11. TRANSPORTATION: BUDGET RENTAL CAR AGENCY**

2 Mini-Vans \$51 a day: SSG (b) (6)/RES #10758149US3, TSG (b) (6) /RES #10761155US6  
2 Full Size \$40 a day: TSG (b) (6) / RES #10828541US3, MSG (b) (6)/RES #10828399US1  
4 Mid-Size/\$37 a day: Capt (b) (6) /RES #10991619US2, CMS (b) (6) /RES #10760765US2  
TSG (b) (6)/RES #10760920US2, LTC (b) (6) /RES #10761054US3

**12. QUARTERS: JTR Lodging/\$114, Meals/\$36, Max/\$152**

- Holiday Inn (805) 964-6241; FAX (805) 964-8467

**13. CONTACTS:**

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft 89-9108 available 1-5 Aug 05

**3. Concept of Operations:**

**1 Aug (Monday)**

0900: Showtime

1100: Depart KYNG

1300: Land KGFK/Safety Briefing

1500: Spray In Brief (CPMP, MC, AC) Customs Bldg, where plane is parked.

**2 Aug (Tuesday):**

1630: Show time

1700 Load Chemical

1830: Take off KGFK (Adulticide Spray Sortie)

2102: Sunset

**3 Aug (Wednesday):**

1630: Show time

1700 Load Chemical

1830: Take off KGFK (Adulticide Spray Sortie)

2101: Sunset

**4 Aug (Thursday):**

1630: Show time

1700 Load Chemical

1830: Take off KGFK (Adulticide Spray Sortie)

2100: Sunset

**5 Aug (Friday):**

1000: Show time

1200: Take off KGFK

1500: Land KYNG

**1 Jul (Friday):**

0900: Show time

1100: Take off KGFK

1500: Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 150' AGL for Adulticide swaths when no trees are present.
- b. **Swath Width.** 2000 feet for ULV or as determined by the CPMP
- c. **Flow Rate.** 4.36 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 21,767 acres

**5. Mission Commander:**

**6. Aircraft Commander:**

7. Support including Security Forces for the aircraft parking at Grand Forks Intl Airport due to Grand Forks AFB runway closure required at Grand Forks AFB ND is coordinated with the organization's Environmental/Spray Coordinator Ms Linda Olson, DSN 362-4655.

// Signed //

AERIAL SPRAY CHIEF

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 1-5 Aug 05

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6)
- (2) Pilots: CPT (b) (6), LTC (b) (6)
- (3) Navigators: LTC (b) (6)
- (3) Flight Engineers: MSG (b) (6)
- (4) Spray Operators: MSG (b) (6), MSG (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6), TSG (b) (6), TSG (b) (6)
- (2) Crew Chief(s): TSG (b) (6), SSG (b) (6)
- (3) Avionics: MSG (b) (6)

##### c. Entomologists/Ground Support: CPT (b) (6)

#### 2. PPR: Not Required, landing/parking at Grand Forks Intl in front of Fire Dept and Customs.

#### 3. SCHEDULE: (All Local Times)

##### 1 Aug (Monday)

0900: Showtime  
1100: Depart KYNG  
1300: Land KGFK/Safety Briefing  
1500: Spray In Brief (CPMP, MC, AC) Customs Bldg, where plane is parked.

##### 2 Aug (Tuesday):

1630: Show time  
1700 Load Chemical  
1830: Take off KGFK (Adulticide Spray Sortie)  
2102: Sunset

##### 3 Aug (Wednesday):

1630: Show time  
1700 Load Chemical  
1830: Take off KGFK (Adulticide Spray Sortie)  
2101: Sunset

##### 4 Aug (Thursday):

1630: Show time  
1700 Load Chemical  
1830: Take off KGFK (Adulticide Spray Sortie)  
2100: Sunset

##### 5 Aug (Friday):

1000: Show time  
1200: Take off KGFK  
1500: Land KYNG

#### 4. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder, 1 UHF Radio, 1 Measuring wheel, Project Notebook, Entomologist's Tool Kit
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

**5. RADIO FREQUENCIES: Air To Ground Primary** UHF 392.2; VHF 123.45  
KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. Nozzle Tips/Orientation:** ULV (adulicide): 8005 Tee Jet oriented straight down
- c. Number:** ULV: 11 8005s total (6 left; 5 right)
- e. Aircraft:** 89-9108
- f. Mission Identifier:** QZNRKA653213

**7. SPRAY PARAMETERS:**

**a. Adulicide**

- (1) **Area to be treated:** 36,806 acres (Grand Forks AFB, City of GF, East Grand Forks)
- (2) **Altitude:** 150' for Adulicide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 4.72 gallons/minute ULV
- (5) **Application Rate.** 0.65 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION:** Some 5 vehicle combination of vans and 6 packs provided by 319 CES. Transportation provided to lodging, vehicles will be picked up there.

**10. LODGING: On Base Billeting:** DSN 362-3070/6189 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844

PMP'S POST-MISSION REPORT  
Grand Forks AFB, ND (1-5 August 2005)**

**1. MISSION BASICS:**

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: August 2005
- c. Purpose of Application: Control nuisance and vector mosquitoes (adult stage)
- d. Application Date: 2 August 2005
- e. Time of Application (Local): 1915- 2150
- f. Acres Treated: 10,332
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) , Environmental Officer,  
DSN (b) (6)
- h. Date Spray Map Last Approved: 1 August 2005
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 1 August 2005; GF International Airport  
MAJ (b) (6) , CAPT (b) (6) , (b) (6) , (b) (6) .

**2. OPERATIONAL:**

- a. Mission Commander: MAJ(b) (6)
- b. Certified PMP/s (Category 11): CAPT (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: CAPT (b) (6)
  - (2) CoPilot: LTC (b) (6)
  - (3) Navigator: LTC (b) (6) (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
- d. Spray Operators: MSG (b) (6) , MSG (b) (6) , MSG (b) (6)
- e. Safety Briefer: CAPT (b) (6)
- f. Spray Maintenance: SMS (b) (6) , SSG (b) (6) TSG (b) (6)
- g. Spray Ground Monitors: CAPT (b) (6)
- h. Crew Chiefs: TSG (b) (6) , SSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 1/1.8 Ferry Sorties/Hours: 2/5.8

**3. PESTICIDES:**

- a. Trade Name (% Active Ingredient): Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-548127
- c. Gallons Pesticide Loaded: 70 (2 August)
- d. Pesticide Applied: 67 (2 August)
- e. Other Additives Used: none
- f. Gallons and Name of Flush Used: 150 gallons water
- g. Application Rate: 0.83 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 89-9108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005
- e. Nozzle Orientation & Number Used: 14 straight down
- f. Pressure (PSI): 19-24
- g. Flow Rate: 6.0 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 knots (338 feet/second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 170°/3-7 knots
  - (2) Altitude: 170°/14 knots
- b. Temperature: 85-89 °F
- c. Dew Point: 52-55 °F
- d. Cloud Cover: Clear
- e. Source: Ground/altitude observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Techniques and results:

The Air Force Base (GFAFB) conducts adult mosquito trapping. Daily trap counts were 2690 on August 2, prior to the aerial spray, and 357, 2158, and 1928 one, three and four days respectively following the aerial spray.

**8. REMARKS:** Originally planned as a 2 night spray including both the Air Force base and the city of Grand Forks, only the AirForce base was successfully sprayed because the winds for the remainder of the week exceeded label maximums. Control was not as successful as in past missions, despite the increase in application rate. Speculation abounds as to the reason(s), but probably most prominent was the fact that the insecticide was sprayed when it was quite warm and humid when mosquito activity may have been reduced, and that the spray date was followed by days with high winds, potentially blowing mosquitoes in from outside the treatment zones.

- d. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/2.0
  - (2) Ferry Sorties/Hours: 2/4.5

3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Anvil® 10+10 (10% Sumithrin and 10% Piperonyl Butoxide)
- b. EPA Registration Number: 1021-1688-8329
- c. Gallons Pesticide Loaded: 49 gal Anvil® (3 May)
- d. Gallons Pesticide Applied: 47 gal (3 May)
- e. Gallons and Name of Flush Used: 8 gal/marvel oil
- f. Application Rate: 0.62 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8003 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 30-55 p.s.i.
- g. Flow Rate: 2.25 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 3000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS (19 Apr):**

- a. Winds (Direction/Speed):
  - (1) Ground: 280-320°/4-7 Knots
  - (2) Release Altitude: 310° /12 Knots
- b. Temperature (Degrees Fahrenheit): 86° F dropping to 83° F
- c. Relative Humidity: 38-45%
- d. Cloud Cover: Partly Cloudy
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Techniques used: oil sensitive cards; bioassay cages of mosquitoes; visual observation of aircraft course (GPS)
  - (2) Results: Best coverage achieved on downwind side of the spray block. Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Weekly and daily collections of midges and mosquitoes with carbon-dioxide
  - (2) Results: Midge populations were very low following the spray but may have been decreasing naturally.

**8. REMARKS AND RECOMMENDATIONS:** This application was the second evaluation of the insecticide, Anvil 10+10, for biting midge and mosquito control (see report for 17-20 April 06 for background info). To determine efficacy of this insecticide, wild mosquitoes were collected the night before the scheduled mission and separated into bioassay cages to be exposed in open locations during the spray (approximately 20 mosquitoes per cage). The compound's functionality against biting midges was assessed using weekly and daily trapping before and after the application. Percent mortality for bioassays is shown by location in attachment 1. Daily trap collections are shown in attachment 2. Unfortunately, mission events and naturally decreasing midge populations made a final definitive analysis on the impact of the insecticide impossible. An aircraft repair issue cancelled the scheduled spray flight the evening of 2 May, and while quick action on the part of maintenance personnel remedied the situation by the next evening, low numbers of wild mosquitoes on the evening of 2 May made it necessary to use the previous nights' mosquito collections. These mosquitoes were likely stressed from holding conditions because mortality in the control groups averaged 29%. High control group mortality nullifies the validity of observed mortality in the treatment groups (see attachment 1). Furthermore, overall biting midge densities decreased naturally in both the treatment and control areas from 25 April through the spray date (3 May) and remained low

throughout the remainder of the sampling period (7 May) [attachment 2]. No statistical difference was found between spray/no-spray areas prior to spray areas prior to spray [(F.05 [3.43]) F=2.04] or following spray [(F.05 [9.28]) F=1.26].

Recommendation: Since the results of this test were inconclusive, an additional application of Anvil is recommended to further evaluate the value of this insecticide for biting midge control at Parris Island MCRD.

The next spray mission is tentatively scheduled for later September early October timeframe with an option for an application during the summer months dependant on pest populations and aircraft availability.

**DoD CERTIFIED PEST MANAGEMENT PROFESSIONAL**

**Attachment 1. Flight path of aircraft while making an Anvil insecticide application, 3 May 06. Percent markers indicate percent mortality of caged mosquitoes exposed during the application.**

**Attachment 2.** Daily midge density monitored on Parris Island and a non-spray area (Spring Island). Orange vertical line indicates spray date (3 May 2006). Midge numbers decreased naturally from 25 April through the spray date (3 May) and remained low throughout the remaining sampling period. No statistical difference was found between spray/no-spray areas and relative midge densities.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Parris Island MCRD SC

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft 89-9105 available on 1-4 May 2006

3. Concept of Operations:

**1 May (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

0800: Show Time

1000 Take Off YNG

1200\* Arrive Dobbins ARB

1500\*\* Depart MGE

1630 Land KNBC

1700: Safety Briefing

\*CDC will present award to 757AS for the work performed during Hurricane relief

\*\*Departure time will be dependent upon completion of CDC Award presentation

**2 May (Tuesday):**

1500: Showtime

1530: Load Chemical/Wx Decision

1700: Take off KNBC

2005: Sunset

**3 May (Wednesday):** Wx back up, training flight or redeploy to YNG

1500: Showtime

1530: Load Chemical/Wx Decision

1700: Take off KNBC

2005: Sunset

**4 May (Thursday): Return to YNG**

1000: Show Time

1200: Take off KNBC

1400: Land KYNG

4. Spray Parameters:

a. Acreage: 7,500 Acres (Only areas determined by PMP)

b. Altitude: 150 Ft AGL

c. Pesticide: Anvil® 10+10

d. Deploy: 2.0 Hrs

e. Re-Deploy: 2.0 Hrs

f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Maj (b) (6)

6. Mission Commander: Maj (b) (6)

7. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator (b) (6) DSN (b) (6)

Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 1-5 May 2006

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: MC-MAJ (b) (6) , MAJ (b) (6) , CPT (b) (6) ,
- (2) Navigators: MAJ (b) (6)
- (3) Flight Engineers: MSG (b) (6)
- (4) Spray Operators: SMS (b) (6) , Msg (b) (6) , Msg (b) (6) , Tsg (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6) , MSG (b) (6) , TSG (b) (6) ,
- (2) Crew Chiefs: MSG (b) (6) , SSG (b) (6)
- (3) Avionics: MSG (b) (6)

##### c. Pest Management Professionals/Entomologist: CPT (b) (6) (In place)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car keys and vehicles at Base Ops.

#### 2. PPR REQUIREMENTS: 121-01

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### 1 May (Monday): see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

1330: Show Time  
1530 Take Off YNG  
1700 Land KNBC  
1800: Safety Briefing

Rifle Range No night fire planned any evenings

##### 2 May (Tuesday):

1430: Showtime  
1500: Load Chemical/Wx Decision  
1700: Take off KNBC  
2005: Sunset

Rifle Range: None

##### 3 May (Wednesday): Wx back up, training, or redeploy to YNG

1430: Showtime  
1500: Load Chemical/Wx Decision  
1700: Take off KNBC  
2006: Sunset

Rifle Range None

##### 4 May (Thursday): Wx back up, training, or redeploy to YNG

1430: Showtime  
1500: Load Chemical/Wx Decision  
1700: Take off KNBC  
2006: Sunset

Rifle Range None

##### 5 May (Friday):

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) 20 Rooms reserved at Hampton Inn, ensure no rooms charged on Current Ops Credit card.
- (2) Mission Commander Cell Phone

- b. **Entomologist/CPMP:**
  - (1) Wind Gauge & Compass
  - (2) UHF/VHF Radios and Cellular Phone
  - (3) Pesticide Safety Binder
- c. **Navigators:**
  - (1) Maps
  - (2) Templates
- d. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 6 open for ULV spray; 6 8003's oriented straight down (3 per side)
- d. **Differential GPS:** Installed
- e. **Aircraft:** 89-9108
- f. **Mission Identifier:** QZNRKA296121

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Anvil® 10+10
  - Sumithrin (synthetic pyrethrin) and Piperonyl Butoxide
  - Signal Word: Caution
  - Antidote: not applicable
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.62 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,400 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 2.25 gallons/Minute

- 7. AMOUNT OF SPRAY MATERIAL AVAILABLE: :** There are approx. 50 gallons of Anvil available for this mission. We will spray 35 gallons per application. See entomologist for amount to load, it is possible that we may have to retreat the area during the mission.

- 8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
 Hilton Head Arpt: 118.8 CTAF  
 Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

- 10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

- 11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC:** (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX

**910 AW AERIAL SPRAY UNIT**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S POST-MISSION REPORT**  
**PARRIS ISLAND MCRD, SC 1-5 OCT 2007**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 1-5 OCT 2007
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 1 Oct 2007
- e. Time/s of Application (Local): 2125-2320
- f. Acres Treated: 5967
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) (b) (6)  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 1 Oct 2007
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 1 Oct; Assistant Chief of Staff,  
Installations and Logistics, Maj (b) (6), Major (b) (6), LTC (b) (6)  
Maj (b) (6)

**2. OPERATIONAL:**

- a. **Mission Commander:** MAJ (b) (6)
- b. **Aircrew:**
  - (1) Pilots: LTC (b) (6), Maj (b) (6)
  - (2) Navigators: Maj (b) (6)
  - (3) Flight Engineers: MSG (b) (6) (b) (6)
  - (4) Spray Operators: Msgt (b) (6), Msgt (b) (6)
- c. **Maintenance:**
  - (1) Spray Maintenance: TSG (b) (6), TSG (b) (6), SSGT (b) (6)
  - (2) Crew Chiefs: TSG (b) (6), A1C (b) (6)
  - (3) Avionics: SRA (b) (6)
- d. **Entomologist:** MAJ (b) (6)
- e. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.9
  - (2) Ferry Sorties/Hours: 2/4.7

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup> (10 Oct)
- e. Gallons Pesticide Applied: 36 Gal (10 Oct)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 8 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 0.77 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 909107
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 8 oriented straight down
- f. Pressure: 41 p.s.i.
- g. Flow Rate: 2.72 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 3000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS (1 Oct):**

- a. Winds (Direction/Speed):
  - (1) Ground: 060°/Average 7.6; gusts to 12 knots
  - (2) Release Altitude: 060° /13-18 knots
- b. Temperature (Degrees Fahrenheit): 78° F
- c. Relative Humidity: 56%
- d. Cloud Cover: Scattered Clouds
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

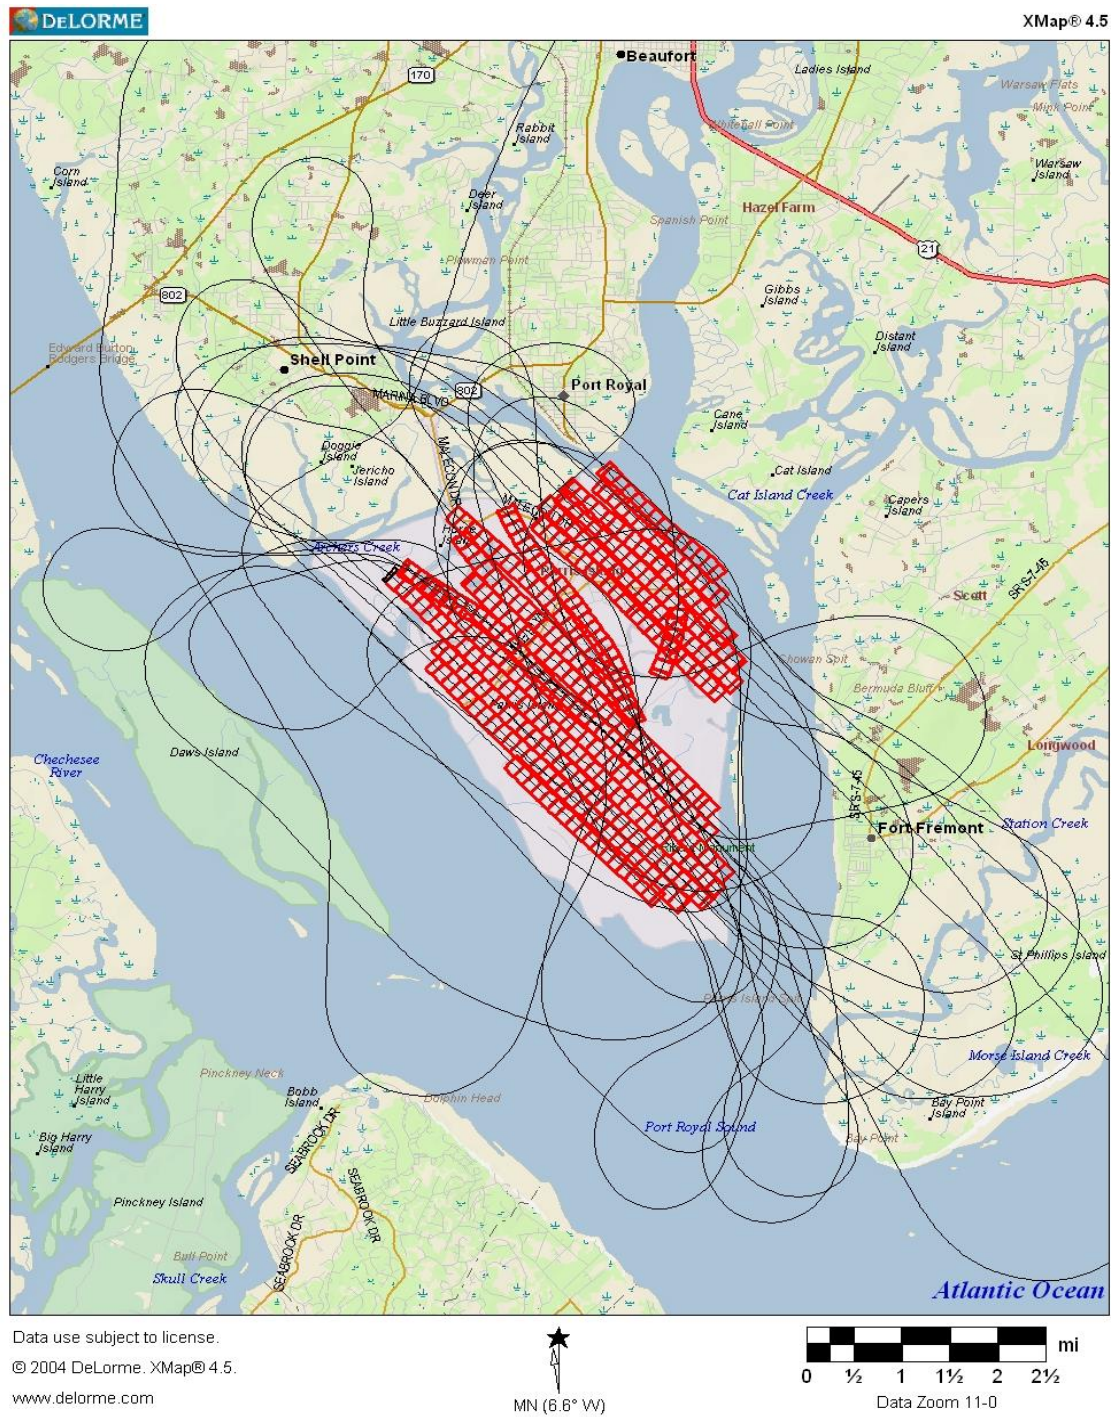

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: visual observation of aircraft course (GPS)
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Weekly collections of gravid mosquitoes with attractant-baited traps and landing rates in regions frequented by recruits involved in training.
  - (2) Results: Good control was noted in all areas sampled.

**8. REMARKS:** A single application was made over the Parris Island MCRD on 1 Oct 07 for control of biting midges (sandfleas) and mosquitoes. The application began approximately 2 hours prior to sunset to correspond with the peak activity period of the pests. The actual application required about 1.9 hours. Meteorological conditions at the time of application were suboptimal. Wind speeds were relatively high (approximately 7.6 knots at the surface). However, Parris island reported low trap counts the day following the spray application, and immediately after the spray, toxic effects of the pesticide were noted on mosquitoes and several other species of flying insects at various locations on the island. This mission was to originally coincide with a mission to Kings' Bay Georgia. However, spray activities had to be cancelled for the remainder of the week because of extremely poor weather conditions. The path of the aircraft is shown in attachment 1. The next and Parris Island mission is project to take place in the middle of October, 2007, with mission parameters remaining unchanged.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 1-6 APR 2001

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LtC (b) (6)
- (2) Pilots: Maj (b) (6), Capt (b) (6)
- (3) Navigators: LtC (b) (6) is, LtC (b) (6)
- (4) Flight Engineers: CMS (b) (6)
- (5) Spray Operators: MSG (b) (6), MSG (b) (6), TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6), TSG (b) (6), MSG (b) (6), TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6), SSG (b) (6)
- (3) Avionics: SSG (b) (6)

##### c. Pest Management Professionals/Entomologist: LtC (b) (6), 1Lt (b) (6)

#### 2. PLANNED SEQUENCE OF EVENTS: (All times local)

##### 01 APR (Sunday):

- 1500: Take off KYNG
- 1700: Land KNBC
- 1730: Safety Briefing

**PPR # 091-01**

##### 02 APR (Monday):

- 1400: Load Chemical
- 1630: Take off KNBC
- 1900: Land KNBC
- 1943: Sunset

“First sortie of the year” HAN pre-spray boom flush.

##### 03 APR (Tuesday):

- 1400: Load Chemical
- 1630: Take off KNBC
- 1900: Land KNBC
- 1944: Sunset

##### 04 APR (Wednesday):

- 1400: Load Chemical

- 1900: Land KNBC
- 1946: Sunset

##### 06 APR (Friday):

- 1200: Take off KNBC
- 1400: Land KYNG

#### 3. ITEMS TO TAKE:

##### a. Entomologist/CPMP:

- (1) Wind Gauge, Compass, and Signal Mirrors
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) Calibration Tables
- (5) DGPS Computers & Maps
- (6) Oil Sensitive Papers
- (7) Trackstar Equipment

##### b. Navigators:

- (1) Maps
- (2) Templates
- (3) Laptop Computer
- c. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**4. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft Tail #:** 09108
- f. **Mission Identifier:** QZNRKA783091

**5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: HAN
- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

**6. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per sortie and 25 gallons HAN in flush tank.

**7. PPR REQUIREMENTS:** Required: PPR # 091-01

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 1-6 April 2001
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 2, 4-5 April 2001
- e. Time/s of Application (Local): 1610-1915 (02 Apr); 1615-1927 (04 Apr); 1629-1811 (05 Apr)
- f. Acres Treated: 8,460 (2 Apr) & 7,680 (4 Apr), 1,536 (5 Apr)
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) (b) (6) Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 2 April 2001
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-briefing: (When/Where/Briefer/s): 2 Apr; Assistant Chief of Staff, Installation and Logistics, COL (b) (6) (Office); Mr. (b) (6) LTC (b) (6) LTC (b) (6) CAPT (b) (6) & 1LT (b) (6)
- k. Installation Out-briefing: 6 Apr; Beaufort MCAS, COL (b) (6) LTC (b) (6) LTC (b) (6) Mr. (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11): LTC (b) (6) & 1LT (b) (6)
- c. Aircrew:
  - (1) Pilots: MAJ (b) (6) (A/C), CAPT (b) (6)
  - (2) Navigator(s): LTC (b) (6) & LTC (b) (6)
  - (3) Flight Engineer(s): CMS (b) (6)
  - (5) Spray Operators: MSG (b) (6) MSG (b) (6) , & TSG (b) (6)
- d. Safety Briefer: LTC (b) (6)
- e. Spray Maintenance: SMS (b) (6) , MSG (b) (6) , TSG (b) (6) , SSG (b) (6)
- f. Spray Ground Monitors: LTC (b) (6) , LTC (b) (6) , 1LT (b) (6)
- g. Crew Chiefs: MSG (b) (6) , SSG (b) (6)
- h. Avionics: SSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 3/8.0
  - (2) Ferry Sorties/Hours: 3/4.7

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup> (2 & 4 Apr); 120 gallons total
- e. Gallons Pesticide Applied: 60 Gal (2 Apr); 50 Gal (4 Apr); 12 Gal (5 Apr)
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: VM & P NAPHTHA
- h. Other Additives Used: None
- i. Application Rate: 1 Oz/Acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 40 (02 Apr), 40 (04 Apr) & 40 (05 Apr) PSI
- g. Flow Rate: 3.6 GPM

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off Set: 2500' (02 Apr); 2500' (04 Apr); 2500' (05 Apr)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 172° (02 Apr); 87° (04 Apr) & 97° (05 Apr)
  - (1) Ground (Knots): 2-5 (02 Apr); 2-8 (04 Apr) & 5-9 (05 Apr)
  - (2) Release Altitude: 6-12 Knots (02-05 Apr)
- b. Temperature (Degrees Fahrenheit): 61° (2 Apr); 63° (04 Apr); 64° (05 Apr)
- c. Relative Humidity: 52% (02 Apr); 76% (04 Apr); 63% (05 Apr)
- d. Cloud Cover: Partly Cloudy (02-05 Apr)
- e. Source: Ground observations at the MCRD rifle range using weather station.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1 meter dowels, OSC used in vertical test, also; spinners (rotating microscope slides)
  - (2) Results: Good coverage throughout spray area.
- b. Effectiveness:
  - (1) Technique/s Used: Landing counts taken at 5 localities during a two-hour period that corresponded with the previous day's spray sortie (Apr 3).
  - (2) Results: Reduced midge activity was confirmed in the locations sampled with a zero to 2 midges/min landing rate observed. One location, (Horse Island) had 4 midge/min landing rate. This portion of the spray block is directly behind the eagle's nest and difficult to treat. The efficacy of the second sortie was determined by the MCRD's Environmental Coordinator who reported finding much lower midge numbers on the Depot relative to the surrounding areas (e.g., Beaufort Marine Corps Air Station).

**8. REMARKS:** During the application we carried out a characterization study of the droplet spectrum distributed by the MASS. This test showed that our volume median diameter using Dibrom® is 32 microns (10-25 microns is the target size for mosquito control), this is approximately 20 microns below the industry average. These data are being used to construct a more accurate model to predict droplet dynamics dispensed at different parameters. We also tested the effective swath width of our application under field conditions to verify proper application practices. The next actual spray mission is scheduled 28 April - 04 May, 2001.

**MEMORANDUM FOR HQ AFRC/DOOM**

**FROM: 757 AS/DOS**

**SUBJECT: Concept of Operations for Aerial Spray at Naval Submarine Base Kings Bay, GA and Parris Island MCRD SC to control mosquitoes**

1. Objective/Purpose/Benefits of the Spray Mission. Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Kings Bay NSB, GA and Parris Island MCRD SC.

2. Capability: Spray Aircraft available on 1-6 OCT 07

3. Concept of Operations:

**1 OCT (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

Check Rifle Range: None

0900: Show Time  
1100: Take Off YNG  
1300: Land KNBC  
1300: Safety Briefing  
1430: Installation in-brief  
1530: Load chemical/Wx decision (2 drums)  
1745: Take off KNBC for spray sortie  
1911: Sunset

**2 OCT (Tuesday):** Adulticide spray at King's Bay:

1500: Showtime  
1530: Load Chemical/Wx Decision  
1745: Take off KNBC  
1910: Sunset

**3 OCT (Wednesday):** Swapout MASS for larvicide tanks

0800: Show Time  
1000: Take off KNBC  
1200: Land KYNG  
1400: Take off KYNG  
1600: Land KNBC

**4 OCT (Thursday):** Larvicide of Kings Bay

0530: Show time  
0700: Take off KNBC  
0721: Sunrise  
2 Lifts needed to complete spray area

**5 OCT (Friday):** Wx back up for larvicide of Kings Bay, or redeploy to YNG

0530: Show time  
0700: Take off KNBC  
0721: Sunrise  
2 Lifts needed to complete spray area

**6 OCT (Saturday):** Redeploy to Youngstown

0800: Show time  
1000: Take off KNBC  
12001:Land KYNG

4. Spray Parameters:
  - a. Acreage: 27,500 Acres (Only areas determined by PMP)
  - b. Altitude: 150 Ft AGL
  - c. Pesticide: Dibrom® Concentrate; Vectobac
  - d. Deploy: 2.0 Hrs
  - e. Re-Deploy: 2.0 Hrs
  - f. Spray Time: 16 Minutes per Sortie at PI; 20 minutes at Kings Bay
5. Aircraft Commander: Lt Col (b) (6)
6. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) , DSN (b) (6) . Support required at NSB, Kings Bay has been coordinated with Mr. (b) (6) , DSN (b) (6) and SWFLANT Security via Mr. (b) (6) , DSN(b) (6) .

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray of Musk Thistle Weed at Smoky Hill Air National Guard Range, Salina KS.

1. Purpose/Objective/Benefit: To control musk thistle weed at the Smoky Hill ANGR KS, to improve grazing areas, to eliminate the Range as a source of infestation to neighboring farms from wind-blown musk thistle seeds and to support state and local noxious weed control efforts.

2. Capability. Spray Aircraft Tail Number 99108 Available 1-7 Nov 2004 in addition to one support aircraft at the beginning and end of the mission.

3. Concept of Operations:

**a. SCHEDULE: (All Local) Times**

**1 NOV (Monday)**

1000: Show at KYNG

1200: Depart KYNG

1445: Land KSLN/Safety Briefing

A/R: Maintenance configures aircraft; Aircrew plan next day's mission

**2 NOV (Tuesday): 2 Spray Sorties**

0530: Show time

0658: Sunrise

0700: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

0900: Land KSLN

**3 NOV (Wednesday): 2 Spray Sorties**

0530: Show time

0659: Sunrise

0700: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

0900: Land KSLN

**4 NOV (Thursday): 1 or 2 Spray Sorties**

0530: Show time  
0700: Sunrise  
0700: Take Off KSLN  
: Range time (Coordinate MARSA as needed after 1100)  
0900: Land KSLN

**5 NOV (Friday): 1 or 2 Spray Sorties**

0530: Show time  
0701: Sunrise  
0700: Take Off KSLN  
: Range time (Coordinate MARSA as needed after 1100)  
0900: Land KSLN

**6 NOV (Saturday): 1 or 2 Spray Sorties**

0530: Show time  
0701: Sunrise  
0700: Take Off KSLN  
: Range time (Coordinate MARSA as needed after 1100)  
0900: Land KSLN

**7 NOV (Sunday):**

0712: Sunrise  
0730: Show time  
0900: Take Off KSLN  
1345: Land KYNG

**4. Spray Parameters:**

- a. Acreage: 4,608 Acres (approximately) (Only areas determined by PMP)
- b. Altitude: 100' AGL
- c. Ground Speed: 200 Knots
- d. Swath Width: 330 Feet
- e. Pesticide: Tordon® 22K
- f. Flow Rate: 307 Gallon/Minute
- g. Application Rate: 2 Gal spray/Acre (water with 1 Oz Control® & 10 Oz Tordon® 22K)
- h. Deploy: 3.4 Hrs
- i. Re-Deploy: 2.8 Hrs
- j. Spray Time: 10 Hrs (or as called by PMP)

**5. Mission Commander: Lt Col (b) (6)**

**6. Certified Pest Management Professional(s): LtC (b) (6) , Capt (b) (6) , and Capt (b) (6)**

**7. Support required at Smoky Hill ANGR KS has been coordinated with MSG (b) (6) , Smoky Hill ANGR Spray Coordinator, DSN (b) (6) , (b) (6) and Lt Col (b) (6) , Range Commander, DSN (b) (6) .**

8. HQ AFRC/DOOM approval along with AFMAN 24-204 Chap 3 waiver (see note) can be sent by email: (b) (6)

NOTE: The Aerial Spray team will be deploying to Salina Kansas from 1-7 November to conduct aerial spraying operations which will aide Smokey Hill Bombing range in the control/eradication of musk thistle. This mission is imperative to the Air Force as we are mandated by the state of Kansas to control the musk thistle on the range or be fined.

The mission requires us to deploy our own support equipment and a Raven security team as we park on a civilian airport ramp which provides no support or security. With this being said, this mission requires a support aircraft to airlift our support equipment and personnel necessary for the mission. Upon reviewing requirements for the equipment which will be loaded on the support aircraft it was discovered that unless this mission is determined to be a Chapter 3 mission IAW AFMAN 24-204 we experience the need for additional airlift support and personnel to prepare the equipment (draining and purging) for the return trip home. The following explains the 2 scenarios which are possible to support this mission and as you can see the added costs and manpower.

### **Chapter 3 AFMAN 24-204**

**Aircraft 1-** (spray aircraft) is loaded with: a full spray system (3 modules), 1 mob bin and fill station. Aircraft will have 7 aircrew personnel and 2 crew chiefs. NOTE: No additional room available for pax or equip.

**Aircraft 2-** Support aircraft is loaded with: 1ea -86 power cart with TR pack, 1ea nitrogen generator, 2ea heaters, 2ea B1 stands stacked and a small mobility kit for raven team. Aircraft will carry 8ea mx personnel, 4ea Raven team members and 2ea Entomologists.

Both aircraft depart KYNG 1 Nov 2004 for Salina. Support aircraft returns KYNG 2 Nov 2004. Support aircraft departs KYNG for Salina 6 Nov 2004. Both aircraft return to KYNG 7 Nov 2004.

### **Non- Chapter 3**

**Aircraft 1-** (spray aircraft) is loaded with: a full spray system (3 modules), 1 mob bin and fill station. Aircraft will have aircrew of 7 personnel and 2 crew chiefs. NOTE: No additional room available for pax or equip.

**Aircraft 2-** Support aircraft is loaded with: 1ea -86 power cart with TR pack, 1ea nitrogen generator, 2ea heaters, 2ea B1 stands stacked and a small mobility kit for raven team. Aircraft will carry 9ea mx personnel, 4ea Raven team members and 2ea Entomologists. NOTE: ALL EQUIPMENT DRAINED AND PURGED

Both aircraft depart KYNG 1 Nov 2004 for Salina. Support aircraft returns KYNG 2 Nov 2004. Support aircraft departs KYNG for Salina 6 Nov 2004. Both aircraft return to KYNG 7 Nov 2004. NOTE: SUPPORT AIRCRAFT WILL ONLY HAVE 13 PERSONNEL AND 1 RAVEN MOBILITY KIT AS SUPPORT EQUIPMENT IS BEING DRAINED AND PURGED ON THE 7<sup>TH</sup> AND 8<sup>TH</sup> by 2 mx personnel.

**Aircraft 3-** Support aircraft departs KYNG on 8 Nov 2004 for Salina, arrives Salina and loads all support equipment and 2 pax. Support aircraft returns to KYNG 8 or 9 Nov 2004. If aircraft returns the 9<sup>th</sup> we will need a raven team again for overnight security.

As you can see if this mission is not designated a contingency the units costs will escalate significantly due to additional manpower, time and aircraft needed to support this mission. By getting the Chap 3 waiver, saves money, manpower, need for third aircraft, and time. We do not have the capability to support a third aircraft.

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### SMOKY HILL ANGR, KS 1-7 NOV 2004

#### 1. MISSION BASICS:

- a. **Installation Sprayed:** Smoky Hill ANGR, Salina KS
- b. **Mission Duration:** 1-7 Nov 04
- c. **Purpose of Application:** Control of Musk Thistle (*Cardus nutans*) on Smoky Hill, ANGR.
- d. **Application Date/s:** 3-6 Nov 04  
**Time/s of Application (Local):** 0910-1025 (3 Nov); 0830-1020 (4 Nov); 0810-0935, 1030-1055, 1105-1225 (5 Nov); 0735-0935 (6 Nov)
- e. **Acres Treated:** 3,072 (See attachment 1)
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** MSG (b) (6), Aerial Spray Coordinator, Smoky Hill ANGR, DSN (b) (6)
- g. **Date Spray Map Last Approved:** 1 Nov 04
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 1000 hrs, 1 Nov 04; Smoky Hill ANGR; LTC (b) (6)

#### 2. OPERATIONAL:

- a. **Mission Commander:** LTC (b) (6)
- b. **Certified PMP (Category 11):** LTC (b) (6), CPT (b) (6)
- c. **Aircrew:**
  - (1) Aircraft Commander/Pilot: MAJ (b) (6)
  - (2) Co-Pilot: CPT (b) (6)
  - (3) Navigator: MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6), MSG (b) (6)
- d. **Safety Briefer:** CPT (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** SMS (b) (6), TSG (b) (6), TSG (b) (6)
- f. **Spray Ground Monitors:** LTC (b) (6), LTC (b) (6); CPT (b) (6)
- g. **Crew Chief(s):** MSG (b) (6), A1C (b) (6)
- h. **Avionics:** TSG (b) (6)
- i. **AGE:** TSG (b) (6)
- j. **Engine:** MSG (b) (6)
- k. **Ground Support/CPM Professionals:** LTC (b) (6), CPT (b) (6)
- l. **Security Police:** MSG (b) (6), SSG (b) (6), SRA (b) (6) and SSG (b) (6)
- m. **Flying Data:**
  - 1. Spray Sorties/Hours: 1/1.3 (3 Nov); 1/1.8 (4 Nov); 3/3.1 (5 Nov); 1/2.0 (6 Nov); total 6/8.2
  - 2. Ferry Sorties/Hours:
    - (a) Spray A/C 909108 Ferry Sorties/Hours: 1/3.7 (1 Nov); 1/2.7 (7 Nov)
    - (b) Support A/C 899101 Sorties/Hours: 2/6.4 (1 Nov);
    - (c) Support A/C 909106 Sorties/Hours: 2/5.7 (6,7 Nov)

#### 3. PESTICIDE:

- a. **Trade Name (% Active Ingredient):** Tordon® 22K
- b. **EPA Registration Number:** 62719-6
- c. **Formulation Sprayed:** Tordon® 22K mixed with water and Control®
- d. **Gallons Pesticide Loaded:** 240 gallons Tordon® 22K
- e. **Gallons Pesticide Applied:** 240 gallons Tordon® 22K

- f. **Gallons and Name Diluent Used:** 5,856 gallons of water
- g. **Gallons and Name of Flush Used:** 200 gallons of water
- h. **Other Additives Used:** 24 gallons of AirexDC®
- i. **Application Rate:** 2 gallons spray/acre (water with 1 oz. of Control® & 10 oz. of Tordon®)

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** 909108
- b. **Spray System (Modules Used) and System ID #:** 3-Module system
- c. **Spray System Configuration:** Full Wing and Fuselage Booms
- d. **Nozzle Type/Size:** 8070 Flat Fan TeeJet®
- e. **Nozzle Orientation & Number Used:** 60 (15 each side/Fuselage +15 each side/Wing);  
After 3 Nov, 40 fuselage (20 each side)
- f. **Pressure:** 28-58 PSI
- g. **Flow Rate:** 307 GPM (3 Nov); 279 GPM (4-5 Nov); 186 GPM/279 GPM (6 Nov)

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 330' (3 Nov), 300' (4-5 Nov); 200'/300' (6 Nov)
- b. **Spray Off Set:** 1-2 swath widths
- c. **Spray Release Altitude:** 100-150 depending on wind speed
- d. **Ground Speed:** 200 Knots

**6. WEATHER OBSERVATIONS:**

- a. **Winds (Direction/Speed):**  
Ground: 330°/4-5 KT (3 Nov); 360/10-12 KT (4-5 Nov); 270/5-10 KT (6 Nov)
- b. **Temperature Range During Application (°F):** 44°- 60°
- c. **Cloud Cover:** 95% (3 Nov); 0% (4-6 Nov)
- d. **Source:** Ground observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Pattern:**  
(1) Ground monitors observed/confirmed swath width from ground positions
- b. **Effectiveness:**  
(1) Technique/s Used: Visual field observations will be carried out in the spring by the Smoky Hill Staff.

- 8. REMARKS:** This mission marks the return of aerial applications at the Smoky Hill Range. Musk thistle has been reduced to the point that spray flights are not required every year; which speaks highly of the effectiveness of prior missions in controlling thistles. Early morning frost forced relatively late take-offs for most of our sorties. Consequently, this cut into our range times and protracted the mission. Additionally, a spot weld failed (3 Nov) on the diverter box which allows for shifting flow between the left and right wing booms. This resulted in a spray mixture leak inside the airframe of approximately 10 gallons. The airframe was landed and Spray Maintenance cleaned the MASS surfaces. The majority of the spill was limited to the MASS secondary containment pan. After drying any residual product we continued with the mission on 4 Nov, using only the fuselage booms with the maximum available nozzle sites which reduced our flow rate and swath width (see above). Our current POC for Smoky Hill ANGR will be retiring and Mr. (b) (6) (b) (6) will be overseeing the spray project henceforth. It is unknown whether they will request a spray next year but the range is still an option for spray training throughout the year.

## SMOKY HILL ANG RANGE

# AERIAL SPRAY OPERATIONAL SCHEDULE

## SMOKY HILL ANG RANGE, KS

### 1-7 NOV 2004

**PURPOSE/OBJECTIVE/BENEFIT:** to control musk thistle at the Smoky Hill ANGR, to improve grazing areas, to eliminate the Range as a source of infestation to neighboring farms from wind-blown musk thistle seeds and to support state and local noxious weed control efforts.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: MAJ (b) (6) , CPT (b) (6) (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6)

##### b. Maintenance:

- (1) Spray MX: SMS (b) (6) , TSG (b) (6) , TSG (b) (6) , TSG (b) (6) ,  
TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , A1C (b) (6)
- (3) Avionics: TSG (b) (6)
- (4) Age: TSG (b) (6)
- (5) Engine: MSG (b) (6)

##### c. Ground Support/CPM Professionals: Capt (b) (6) , LtCol (b) (6)

##### d. Security Police: MSG (b) (6) , SSG(b) (6) , SRA (b) (6) and SSG(b) (6)

#### 2. SCHEDULE: (All Local) Times

##### 1 NOV (Monday)

0800: Show at KYNG  
1000: Depart KYNG  
1430: Land KSLN/Safety Briefing  
A/R: Maintenance configures aircraft; Aircrew plan next day's mission

##### 2 NOV (Tuesday): 2 Spray Sorties

0530: Show time  
0658: Sunrise  
0700: Take Off KSLN  
: Range time (Coordinate MARSA as needed after 1100)  
0900: Land KSLN

##### 3 NOV (Wednesday): 2 Spray Sorties

0530: Show time  
0659: Sunrise  
0700: Take Off KSLN  
: Range time (Coordinate MARSA as needed after 1100)  
0900: Land KSLN

##### 4 NOV (Thursday): 1 or 2 Spray Sorties

0530: Show time  
0700: Sunrise  
0700: Take Off KSLN  
: Range time (Coordinate MARSA as needed after 1100)  
0900: Land KSLN

**5 NOV (Friday): 1 or 2 Spray Sorties**

0530: Show time

0701: Sunrise

0700: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

0900: Land KSLN

**6 NOV (Saturday): 1 or 2 Spray Sorties**

0530: Show time

0701: Sunrise

0700: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

0900: Land KSLN

**7 NOV (Sunday):**

0712: Sunrise

0730: Show time

0900: Take Off KSLN

1345: Land KYNG

**3. ITEMS TO TAKE:**

**a. Mission Commander:** Hand Held GPS, 1 Cellular Phone

**b. Entomologist:** 1 Cellular Phone, Wind Gauge, 2 Compasses, 1 UHF Radio,  
Pest Safety Binder, 2 Signal Mirrors, 10 Packs Water Sensitive Cards,  
3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel  
2 Toshiba Computers, 1 SATLOC Manual, Project Notebook,  
2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries

**c. Navigator:** Maps/Map Bag, Validation Map,

**d. Spray Operator:** Safety Gear, Calibration Tables

**e. Spray Maintenance:** Deployment Kit, Stake Bed Truck, Support Equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION:** None Required.

**5. PARKING PLAN:** North Ramp (same as last time) Highway Patrol Ramp (by the Civil Air Patrol Hangar). A10s will be using same ramp area.

**6. RADIO FREQUENCIES:**

**a. Air To Ground:** Primary 392.2

**b. Salina:** CTAF: 119.3, UNICOM: 122.95, ATIS: 120.15, TWR: 119.3 / 257.7, GND: 121.9 /  
397.9, NG OPS: 49.95 / 304.6

**c. Smoky Hill:** Primary 316.9, Secondary 304.9; Victor Freq: 139.7 Smoky Hill departure. Expect IFR clearance from KCC on 363.2 UHF 134.9 VHF. Advise them you are departing R3601

**7. IN-BRIEFING:** Upon Arrival.

**8. SPRAY CONFIGURATION:** (Note: File support a/c Chap 3 to AFJI 24-204)

**a. System:** SP-3G

**b. Nozzle Tips/Orientation:** 8070 Flat Fan TeeJet/90° straight back

**c. Number:** Wing. 30 Total (15 each side)/Fuselage. 30 Total (15 each side)

**d. Booms:** Full Wing and Fuselage Booms with ball valves so downwind wing boom can be turned off.

**e. Aircraft:** 89-9108 **Mission Identifier:** QZNRKA140306

**f. Profile:** Planned LV Profile

## 9. SPRAY PARAMETERS:

- a. **Altitude:** 100' AGL
- b. **Swath Width.** 330 feet.
- c. **Flow Rate.** 307 Gallons/Minute (approximately 3,201 acres to be sprayed)
- d. **Application Rate.** 2 Gal spray/Acre (water with 1 Oz of Control® & 10 Oz of Tordon®)
- e. **Ground Speed:** 200 Knots

## 10. SPRAY MIXING AND LOADING:

- a. **Composition of Each Gallon:**
  - (1) 5 Ounces of Tordon® 22K
  - (2) 1 Ounce of AirexDC® Drift Retardant
  - (3) 122 Ounces of Water
- b. **First Load (4 Tanks of 425 Gallons Each + Sump of 70 Gallons)**
  - (1) Fill to 425 Gal Water/Tank using the pump on the water tanker truck.  
This is done by putting the filler hose into the rear tank with all tanks open to the common sump.  
Total water in tanks = 1700 Gal.
  - (2) 70 Gal/Water in Sump
  - (3) Total Water Added = 1,770 Gallons
  - (4) Upload 17.25 Gal/Tordon® 22K/Tank (69 Gallons Total for 4 Tanks + sump) with the ULV uploading system.
  - (5) Add 3.5 GalAirexDC®/Tank (14 Gallons Total for 4 Tanks + sump) while agitating approximately 15 min
  - (6) Total Quantity Mix. 1853 Gallons
- c. **Subsequent Loads (2)**
  - (1) Fill to 425 Gal/Water/Tank. Total Water = 1700 Gal
  - (2) Add 16.5 Gal/Tordon 22K/Tank. Total Tordon 22K = 66 Gal
  - (3) Add 3.25 Gal AirexDC®/Tank. Total AirexDC® = 13 Gal
  - (4) Total quantity Mix. 1779 Gallons (does not include 70 Gal already mixed in Sump)
- d. **Final (fourth) Load**
  - (1) Fill to 253 Gal/Water/Tank. Total Water = 1012 Gal
  - (2) Add 10 Gal/Tordon 22K/Tank. Total Tordon 22K = 40 Gal
  - (3) Add 2 Gal AirexDC®/Tank. Total AirexDC® = 8 Gal
  - (4) Total quantity Mix. 1060 Gallons (does not include 70 Gal already mixed in Sump)
- e. **Total gallons of spray mixture for the spray project is 6471. Tordon 22K required is 241 Gal. AirexDC® required is 48 Gal.**
- f. **Mixing Time/Load.** Agitate by recirculating each mix for approximately 15 minutes.

## 11. SPRAY MONITORING OR TESTING: Performed by the CPMPs

### NOTES:

- Ideal to have westerly wind to spray west boundary.
- Ideal to have easterly wind to spray east boundary.
- (November winds expected to be predominately from the north)

## 12. CONTACTS:

- a. **Quarters:** JTR Rate Lodging/\$60 Meals/\$28

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. Area Sprayed: Eastern Virginia and Eastern North Carolina
- b. Mission Duration: 1-27 OCT 99
- c. Purpose of Application: Mosquito control following Hurricane Floyd
- d. Application Date(s) and time(s): see Attachment A
- e. Acres Treated: see Attachment A
- f. Project Coordinator/s (Name/Rank, Title, Phone #):  
FEMA, State of North Carolina, Commonwealth of Virginia
- g. Installation In-Briefing: (When/Where/Briefer/s): 2 Oct 99, 1100/Conference Room of the  
FEMA Operations, Hampton, VA; LTC Davis & LTC Terry Biery

## 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11) and Entomologists: LTC (b) (6) , LTC (b) (6) , MAJ (b) (6) , CPT (b) (6) & 1LT (b) (6)
- c. Aircrew:
  - (1) Pilots: MAJ (b) (6) , LTC (b) (6) , CPT (b) (6) , MAJ (b) (6) , MAJ (b) (6) , 1LT (b) (6) , CPT (b) (6) , MAJ (b) (6) , MAJ (b) (6)
  - (2) Navigators: MAJ (b) (6) , MAJ (b) (6) , LTC (b) (6) , MAJ (b) (6)
  - (3) Flight Engineers: MSG (b) (6) , CMS (b) (6) (b) (6) MSG (b) (6) , MSG (b) (6) , MSG (b) (6) , SMS (b) (6)
  - (4) Spray Operators: MSG (b) (6) (b) (6) , MSG (b) (6) , MSG (b) (6) , MSG (b) (6) , TSG (b) (6) , MSG (b) (6) , TSG (b) (6) , MSG (b) (6) , & MSG (b) (6)
- d. Safety Briefer: LTC (b) (6)
- e. Liaison Officer: MSG (b) (6)
- f. Spray Maintenance/Pesticide Loaders: TSG (b) (6) , SSG (b) (6) , TSG (b) (6) , SSG (b) (6) , SSG (b) (6) , SSG (b) (6) , & MSG (b) (6)
- g. Crew Chief(s): SSG (b) (6) , TSG (b) (6) , TSG (b) (6) , TSG (b) (6) , SRA (b) (6) , TSG (b) (6) , TSG (b) (6) , SRA (b) (6) & SSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours : 31 sorties; 112.1 hours
  - (2) Ferry Sorties/Hours: 7 ferries; 7.1 hours

## 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled; EPA Registration
- b. Number: 59639-16-2A), Anvil<sup>®</sup> (10% Sumithrin, 10% Piperonyl Butoxide; EPA Registration Number 1021-1688-8329)
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Applied: 2,607 gallons of Dibrom<sup>®</sup>; 5,453 gallons of Anvil<sup>®</sup>
- e. Gallons and Name of Flush Used: 55 Gal of HAN
- f. Application Rate: 0.5-1.0 oz/acre (Dibrom<sup>®</sup>); 0.62 oz/acre (Anvil<sup>®</sup>)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (909105, 909106, 909108)
- b. Spray System (Modules Used) and System ID #: SP2G Modules 1 and 2
- c. Spray System Configuration: ULV Wing Booms
- d. Nozzle Type/Size: TeeJet<sup>®</sup> Flat Fan 8008s (Dibrom<sup>®</sup>); TeeJet<sup>®</sup> Flat Fan 8003s (Anvil<sup>®</sup>)
- e. Nozzle Orientation & Number Used: Straight down, 8 (Dibrom<sup>®</sup>), 16 (Anvil<sup>®</sup>)
- f. Pressure: 40 psi
- g. Flow Rate: 4.5 gpm (Dibrom<sup>®</sup>) and 5.6 gpm (Anvil<sup>®</sup>)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2500 feet
- b. Spray Off Set: varied with wind speed
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots

**6. WEATHER OBSERVATIONS:** Within spray parameters when spraying was conducted.**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil-sensitive cards were used in Virginia to verify deposition and determine offset. Deposition tests were carried out in North Carolina, at the Tarboro Airport, with Anvil<sup>®</sup> using spinners and live caged mosquitoes.
  - (2) Results: Deposition was appropriate for mosquito control using ultra-low volume techniques.
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito populations were sampled using landing rates as an indicator of abundance. Spray blocks were sampled for mosquitoes one day prior to pesticide application and again approximately 12-24 hours afterward. Sampling was done by Air Force and State entomologists.
  - (2) Results: Some variation in efficacy was encountered as would be expected given the mixed terrain, use of two products, and fluctuating weather patterns over the duration of the mission. Mosquito control professionals from both states were pleased with the level of control.

**8. REMARKS:** Our participation in the relief effort was particularly exciting for us in that this was our largest spray effort to date. Three C-130 aircraft working in two different states provided our unit a chance to effectively control mosquitoes over a large area (1.7 million acres) in a short time frame (less than 3 weeks).

**910 AW AERIAL SPRAY UNIT**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S POST-MISSION REPORT**  
**PARRIS ISLAND MCRD, SC 17-20 APR 2006**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 2-3 OCT 2006
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 2 Oct 2006
- e. Time/s of Application (Local): 1815-1920
- f. Acres Treated: 7,400
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6)  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 2 Oct 2006
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 2 Oct; Assistant Chief of Staff, Installations and Logistics, COL (b) (6) ; briefed by Maj (b) (6) /Maj (b) (6)

**2. OPERATIONAL:**

- a. **Mission Commander:** Maj (b) (6)
- a. **Aircrew:**
  - (1) Pilots: Capt (b) (6) , Maj (b) (6)
  - (2) Navigators: LTC (b) (6)
  - (3) Flight Engineers: MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) , MSG (b) (6) , SRA (b) (6)
- b. **Maintenance:**
  - (1) Spray Maintenance: TSG (b) (6) , TSG (b) (6) , TSG (b) (6)
  - (2) Crew Chiefs: MSG (b) (6) , TSG (b) (6)
  - (3) Avionics: MSG (b) (6)
- c. **Pest Management Professionals/Entomologist:** Maj (b) (6)
- d. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.1
  - (2) Ferry Sorties/Hours: 2/4.2

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup> (2 Oct)
- e. Gallons Pesticide Applied: 44 Gal (19 Oct) (approximately 12 gallons downloaded)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 8 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 10 oriented straight down
- f. Pressure: 55 p.s.i.
- g. Flow Rate: 5.4 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray Off-set: none
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS (2Oct):**

- a. Winds (Direction/Speed):
  - (1) Ground: 110°/2-5 Knots ; variable
  - (2) Release Altitude: 085-115° /5-10 Knots
- b. Temperature (Degrees Fahrenheit): 69° F dropping to 63° F
- c. Relative Humidity: 60-67%
- d. Cloud Cover: Partly Cloudy
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: visual observation of aircraft course (GPS)
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Weekly collections of gravid mosquitoes with attractant-baited traps and landing rates in regions frequented by recruits involved in training.
  - (2) Results: Excellent control was noted in all areas sampled.

**8. REMARKS:** A single application was made over the Parris Island MCRD on 2 Oct 06. Mosquito populations were high and *Aedes taeniorhynchus* was the target pest for this application. Biting midge (sandflea) activity levels were moderate-low based on personal observations. This spray sortie was confined to 1.25 hours prior to sunset to correspond with peak flight period of the pests. The path of the aircraft is shown in attachment 1. The relative efficacy will be determined by trap collections the following week. Mosquito landing rates the morning following the application were zero, thus the initial interpretation of the results of this spray are quite favorable. The next Parris Island mission is scheduled for 10-12 October 2006.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at King's Bay NSB, GA

1. Objective/Purpose/Benefits of the Spray Mission. Contingency spray controlling biting midge and mosquito populations with aerial spray insecticide application reducing the negative impact of insect bites on outdoor training King's Bay NSB.

2. Capability: Spray Aircraft available on 2-4 NOV

3. Concept of Operations:

**2 NOV (Friday)**

1600 Show  
1800 Depart YNG  
2100 Land KNIP  
2130 Safety Brief

**3 NOV (Saturday)**

TBD Brief  
1430 Weather call/Crew show  
1500 Load Chemical  
1630 Depart KNIP  
Sunset: 1839

**4 NOV (Sunday)** \*\*If weather cancellation on Saturday, Sunday schedule will mirror Saturday, everything else will slip to Monday.

1030 Show time  
1230 Depart KNIP  
1530 Land YNG

4. Spray Parameters:

- a. Acreage: 15000 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate;
- d. Deploy: 3.0 Hrs/ Redeploy: 3.0
- f. Spray Time: 30 Minutes

5. Aircraft Commander TBD

6. Support required at Kings Bay NSB has been coordinated with Mr. Billy Griner 573-4651.

## **KINGS BAY NSB, GA**

### **2-4 NOV 2007**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Kings Bay NSB, GA.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Pilots: LTC (b) (6) , Capt (b) (6) , LTC (b) (6) (MC)
- (2) Navigators: Maj (b) (6)
- (3) Flight Engineers: Msgt (b) (6)
- (4) Spray Operators: Msgt (b) (6) , MSgt (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: TSgt (b) (6) , TSgt (b) (6) , Msgt (b) (6)
- (2) Crew Chiefs: Ssgt (b) (6) , Amn (b) (6)
- (3) Avionics: TSgt (b) (6)

##### **c. Pest Management Professionals/Entomologist: Maj (b) (6) (Kings Bay)**

#### **2. PPR REQUIREMENTS: 110202**

#### **3. PLANNED SEQUENCE OF EVENTS:** (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### **2 NOV (Friday)**

1600 Show  
1800 Depart YNG  
2100 Land KNIP  
2130 Safety Brief

##### **3 NOV (Saturday) :** Aircraft will squawk 5107 prior to entering P-50. Ensure pilots are given this squawk from ATC!!

TBD Brief  
1430 Weather call/Crew show  
1500 Load Chemical  
1630 Depart KNIP  
Sunset: 1839

##### **4 NOV (Sunday) \*\*If weather cancellation on Saturday, Sunday schedule will mirror Saturday only 1 hour earlier due to time change, everything else will slip to Monday.**

1000 Show time  
1200 Depart KNIP  
1500 Land YNG

#### **4. ITEMS TO TAKE/NOTES:**

##### **a. Mission Commander:**

- (1) Mission Commander Cell Phone

##### **b. Entomologist/CPMP:**

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

##### **c. Navigators:**

- (1) Maps

(2) Templates

**d. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** size = 8005; 10 open for 3.72 FR; 8 open for 2.72 FR); oriented straight down.
- d. **Differential GPS:** Installed
- e. **Aircraft:** 90-9107
- f. **Mission Identifier:** QZNRKA193306

**6. Adult Spray Parameters: (Kings Bay)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 1.0 oz/acre or 0.75 oz/acre see entomologist
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 15000 Acres
- g. **Spray-On Time:** 32 Minutes
- h. **Flow Rate:** 3.72 gallons/Minute or 2.72 see entomologist

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 5 drums of Dibrom for Kings Bay.

**8. PARKING PLAN NAS Jacksonville, FL**

**9. AIR TO GROUND RADIO FREQUENCIES:**

Navy Jax Ops-	310.2	Tower	120.0/340.2
Ground	128.6/336.4	<b>Spray Ground:</b>	<b>123.45 VHF</b>
ATIS	281.0		

**10. TRANSPORTATION:**

Enterprise Car Rental: 904-772-7007	Hubert
3 FS Cars (1 Ops O's, 1 MC/Ent, 1 Crew Chiefs)	\$38/day+5gov policy
2 Mini Vans (1 Ops E's, 1 Maint)	\$59/day+5gov policy

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP and by NSB Kings Bay pest control.

**12.. Quarters:**

Hampton Inn Jacksonville-Orange Park (904)-777-5351 \$77/night  
6135 Youngerman Circle, Jacksonville, FL 32244

**910 AW AERIAL SPRAY UNIT**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S POST-MISSION REPORT**  
**NAVAL SUBMARINE BASE, KINGS BAY, GA 2-4 NOV 2007**

**1. MISSION BASICS:**

- a. Installation Sprayed: Naval Submarine Base, Kings Bay, Georgia
- b. Mission Duration: 2-4 Nov 2007
- c. Purpose of Application: To control pestiferous populations of mosquitoes (specifically salt marsh mosquitoes) and biting midges (*Culicoides* spp.)
- d. Application Date: 3 November 2007
- e. Time/s of Application (Local): 1640-1840 hrs
- f. Acres Treated: 15,360 acres
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) Public Works, Aerial Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 2 October 2007
- i. Date of Waste Generation Letter: 30 October 2007
- j. Installation In-Briefing: (When/Where/Briefer/s): via telephone with CMR (b) (6) briefed by Maj (b) (6) <sup>(b)</sup>

**2. OPERATIONAL:**

- a. **Mission Commander:** LTC (b) (6)
- b. **Aircrew:**
  - (1) Pilots: LTC (b) (6) , Capt (b) (6)
  - (2) Navigators: Maj (b) (6)
  - (3) Flight Engineers: Msgt (b) (6)
  - (4) Spray Operators: Msgt (b) (6) , MSgt (b) (6)
- c. **Maintenance:**
  - (1) Spray Maintenance: TSgt (b) (6) , Tsgt (b) (6) , Msgt (b) (6)
  - (2) Crew Chiefs: Ssgt (b) (6)
  - (3) Avionics: Tsgt (b) (6)
- d. **Entomologists:** Maj (b) (6) (safety briefer), LTC (b) (6)
- e. **Flying Data:**
  - (1) Spray Sorties/Hours: 2.0
  - (2) Ferry Sorties/Hours: 2/5.3

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 120 Gal Dibrom<sup>®</sup>
- e. Gallons Pesticide Applied: 120 Gal Dibrom<sup>®</sup>
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 8 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 1.0 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 20 oriented straight down
- f. Pressure: 35-40 p.s.i.
- g. Flow Rate: 7.4 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray Off-set: 2000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 220°/3-8 knots
  - (2) Release Altitude: 230°/8 knots
- b. Temperature (Degrees Fahrenheit): 70°F
- c. Relative Humidity: 41%-50%
- d. Cloud Cover: clear – slightly hazy
- e. Source: Ground observations and the aircraft self-contained navigational system.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

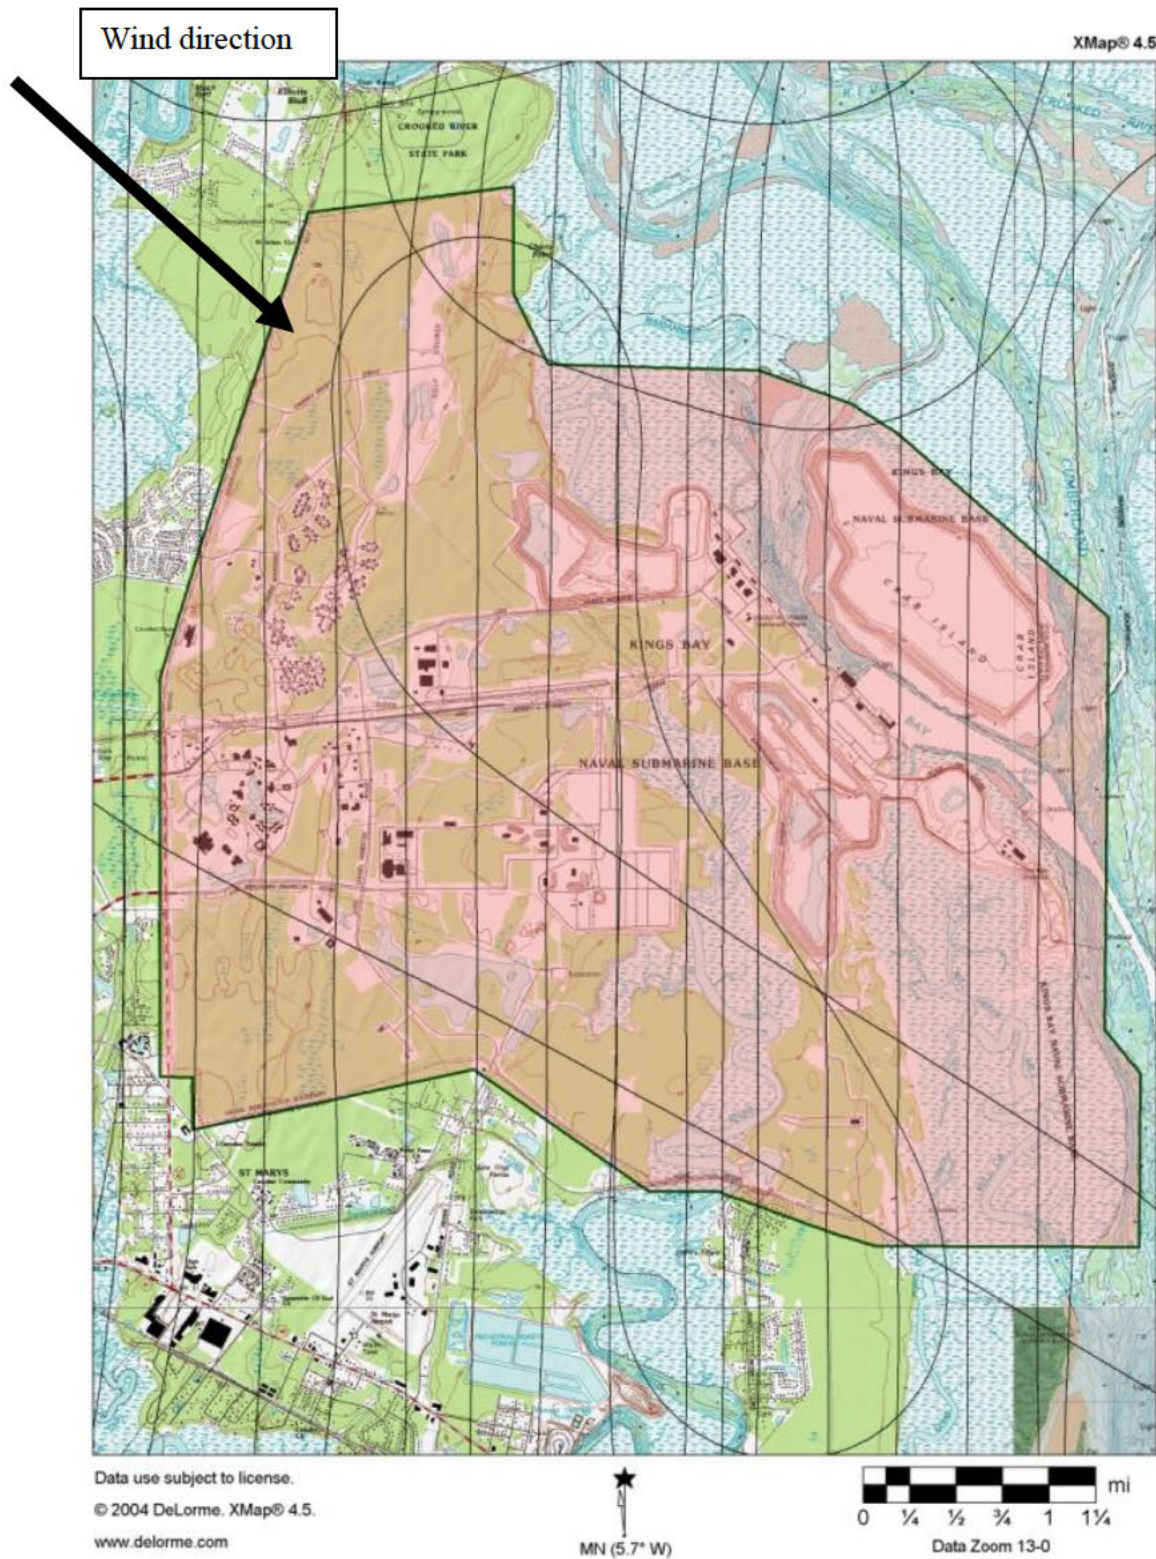

- a. Deposition Pattern:
  - (1) Technique/s Used: GPS system monitoring of aircraft flight pattern (see Attachment 1).
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Navy Entomology Center of Excellence (NECE) has been conducting mosquito surveillance and reported trap counts high enough to warrant aerial mosquito control.
  - (2) Results: When available NECE will forward post-spray surveillance results. (b) (6) reported zero mosquito complaints and no noticeable mosquito activity, the week following the application.

8. **REMARKS:** This mission was conducted at the request of NSB Kings Bay for emergency mosquito control (Attachment 2) and subsequently approved by the Air Force Reserve Command (Attachment 3). Dredge spoils on the Sub-base are hypothesized to be producing large numbers of mosquitoes when rainwater collects in these nutrient rich areas. Additionally, the salt marsh habitat which surrounds the eastern side of the installation is a natural breeding ground for mosquitoes and biting midges. Extremely large numbers of mosquitoes have plagued Sub-base operations on many levels including posing a threat to public health, morale, and quality of life. The high security of the area makes civilian aerial mosquito control difficult (prohibited airspace, P-50) and lends this mission to military spray operations. A previous attempt at aerial spray operations was foiled by poor weather conditions (1-5 Oct) but the 3 November spray had excellent spray conditions and the application went precisely as planned. Spray operations were conducted out of Naval Air Station Jacksonville (NAS JAX). Many thanks to the individuals and agencies which gave excellent support to make this mission, not only happen, but a roaring success: NAS JAX flight line, NECE (esp. (b) (6)), FAA, and JAX Center (b) (6). It is our understanding that NSB Kings Bay is in the process of completing the paperwork to become established as a pre-approved aerial spray mission for larval and adult mosquito control. The Air Force Spray Flight looks forward to this excellent training opportunity and hopefully a continuing professional relationship. Considering all environmental requirements are met, we project a return to NSB Kings Bay in early spring 2008.

Attachment 2. Request for Contingency Aerial Spray Application.

DEPARTMENT OF THE NAVY

NAVAL SUBMARINE BASE  
1063 USS TENNESSEE AVENUE  
KINGS BAY, GEORGIA 31547-2606

IN REPLY REFER TO:

6250  
Ser PRKB23/1443  
13 Sep 2007

From: Commanding Officer, Naval Submarine Base, Kings Bay  
To: Air Force Reserve Command Headquarters/A2A3

Subj: AERIAL SPRAY REQUEST

1. Request contingency aerial spray to control adult and larval mosquitoes to be scheduled for Naval Submarine Base (NSB), Kings Bay, GA on or about October 1 through 4, 2007.

2. The adulticide Trumpet will be applied according to label instructions. The mosquito larvicide Vectobac 12AS or Vectobac DWG will be applied to specified locations according to label instructions. Pesticide applications will be predicated on local weather conditions and target insect population levels.

3. Naval Submarine Base, Kings Bay is processing environmental assessment and statement of need for pre-approved routine mosquito and midge control by Air Force Spray Flight (757AS) in FY08. Logistical coordination for the aerial spray is proceeding at NSB Kings Bay.

4. Security concerns and permission to over fly the Strategic Weapons Facility, Atlantic (SWFLANT) area must be addressed by your command with SWFLANT Security prior to the over flight. The point of contact for this matter is (b) (6) Supervisory Security Specialist, Strategic Weapons Facility, Atlantic at (b) (6) DSN (b) (6) or email (b) (6)

5. My point of contact is (b) (6) at (b) (6), or email (b) (6)

(b) (6)

#### **MEMORANDUM FOR COMMAIDING OFFICER NAVAL SUB BASE KINGS BAY GA**

**FROM:** AFRC/A2A3

155 Richard Ray Blvd

Robins AFB GA 31098-1635

**SUBJECT:** Aerial Spray Request

1. Your request for Aerial Spray support to control adult and larval mosquitoes at Naval Submarine Base (NSB), King Bay, Ga. is approved. The 910AW Aerial Spray Unit at Youngstown, OH will provide support. The spray support will be run in conjunction with other mosquito control sorties conducted at Paris Island, 1-6 Oct 07. Details regarding this mission are being worked between the 910AW Chief Entomologist, Maj (b) (6), and (b) (6) at Kings Bay.

2. My POC for additional questions regarding this support is SMSgt (b) (6) at DSN:(b) (6) or Com: (b) (6) and Maj (b) (6), Entomologist DSN (b) (6).

**4 OCT (Thursday):** Larvicide of Kings Bay

0530: Show time

0700: Take off KNBC  
0721: Sunrise  
1200: Operations must be terminated

2 Lifts needed to complete spray area

**5 OCT (Friday):** Wx back up for larvicide of Kings Bay, or redeploy to YNG

0530: Show time  
0700: Take off KNBC  
0721: Sunrise  
1200: Operations must be terminated  
2 Lifts needed to complete spray area

**6 OCT (Saturday):** Redeploy to Youngstown (Beaufort MCAS is closed on Sat, we must request the airfield open for a Saturday launch.

0800: Show time  
1000: Take off KNBC  
1200: Land KYNG

**4. ITEMS TO TAKE/NOTES:**

**a. Mission Commander:**

(1) Mission Commander Cell Phone

**b. Entomologist/CPMP:**

(1) Wind Gauge & Compass  
(2) UHF/VHF Radios and Cellular Phone  
(3) Pesticide Safety Binder

**c. Navigators:**

(1) Maps  
(2) Templates

**d. Spray Maintenance:**

(1) Spill Kit  
(2) Safety Equipment  
(3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. Mass:** 2-Module System (PI)
- b. Booms:** Stainless Steel ULV Fuselage Booms
- c. Nozzles:** size = 8005; 10 open for 3.72 FR; 8 open for 2.72 FR); oriented straight down. For Larvicide: Raindrop nozzles; 15 nozzles
- d. Differential GPS:** Installed
- e. Aircraft:** 90-9108
- f. Mission Identifier:** QZNRKA026274

**6. Adult Spray Parameters: (Parris Island MCRD SC & Kings Bay)**

**a. Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: Marvel Mystery Oil

- b. Application:** 1.0 oz/acre or 0.75 oz/acre see entomologist
- c. Spray Altitude:** 150 Feet
- d. Swath Width:** 1,000 Feet
- e. Ground Speed:** 200 Knots (338 Feet/Second)
- f. Acreage:** 7,500 Acres

- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.72 gallons/Minute or 2.72 see entomologist

**a. Larvicide**

- (1) **Area to be treated:** approx. 1,060 acres
- (2) **Altitude:** 100' for Larvicide application
- (3) **Swath Width.** 200 feet
- (4) **Flow Rate.** 280 gallons/minute

**b. Application Rate.** 3 gallons/acre (water with 24 oz of Vectobac®)

**c. Ground Speed:** 200 Knots

**8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)**

**a. Composition of each Gallon:**

- (1) 24 ounces of Vectobac®
- (2) 0.64 ounces of AirexDC™ drift retardant
- (3) Water

**b. Typical load:** (2 tanks of 400 gallons each)

- (1) Fill with 400 gallons of water/tank. Total water in tanks = 800 gal.
- (2) Total water added = 800 gallons
- (3) Add 28 gallons of Vectobac® per tank (56 gallons total).
- (4) Total quantity mix. Approx. 856 gallons

**c. Final Load for complete flush**

- (1) Fill tanks with the amount of water necessary for a proper system flush

**d. Mixing Instructions:**

SHAKE WELL BEFORE USING. Vectobac® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 72 hours; always agitate before spraying.

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom for PI and 5 drums for Kings Bay; 100 gallons of Vectobac should be on hand.

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
 Hilton Head Arpt: 118.8 CTAF  
 Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: 123.45 VHF**

**10. TRANSPORTATION:**

Enterprise Car Rental: contact Laura for pick-up upon arrival

Rental vehicles: 2 mini-vans; 1 full-size; 1-compact (entomologist).

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP &Parris Island MCRD Project Coordinator and by NSB Kings Bay pest control.

**12. CONTACTS:**

**a. Parris Island MCRD SC: (MCRD/MCAS Com: (843) 228-XXXX); DSN 335-xxxx**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 2-5 OCT 2007 DRAFT

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: LtCol Richard Elder, Maj (b) (6)
- (2) Navigators: LTC (b) (6)
- (3) Flight Engineers: Msgt (b) (6)
- (4) Spray Operators: Msgt (b) (6), Msgt (b) (6), SRA (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6), TSG (b) (6), TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6), TSG (b) (6)
- (3) Avionics: MSG (b) (6)

##### c. Pest Management Professionals/Entomologist: Maj (b) (6)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car keys and vehicles at Base Ops.

#### 2. PPR REQUIREMENTS: 275-01

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

**10 SEP (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc Check Rifle Range: None

0900: Show Time  
1100: Take Off YNG  
1300: Land KNBC  
1300: Safety Briefing  
1430: Installation in-brief  
1530: Load chemical/Wx decision  
1745: Take off KNBC for spray sortie (begin spraying 1.5 hrs prior to sunset)  
1937: Sunset

**11 SEP (Tuesday):** Wx back up, training, or redeploy to YNG

1500: Showtime  
1530: Load Chemical/Wx Decision  
1745: Take off KNBC  
1936: Sunset

**12 SEP (Wednesday):** Wx back up, training, or redeploy to YNG

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

1430: Land KYNG

## 4. ITEMS TO TAKE/NOTES:

### a. Mission Commander:

- (1) Mission Commander – use Breidenbaugh's cell phone: 330-360-1936

### b. Entomologist:

- (1) Wind Gauge & Compass
- (2) VHF Radios
- (3) Pesticide Safety Binder

### c. Navigators:

- (1) Maps
- (2) Templates

- d. **Spray Maintenance:**  
(1) Spill Kit  
(2) Safety Equipment  
(3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System  
b. **Booms:** Stainless Steel ULV Fuselage Booms  
c. **Nozzles:** size = 8005; 20 open for 7.4 flow rate; 15 open for 5.5; oriented straight down.  
d. **Differential GPS:** Wingman Installed  
e. **Aircraft:** 89-9105  
f. **Mission Identifier:** QZNRKA151227

**6. Adult mosquito control spray Parameters: (Kings Bay)**

- a. **Pesticide:**  
Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: Marvel Mystery Oil  
b. **Application:** 1.0 oz/acre or 0.75 oz/acre see entomologist  
c. **Spray Altitude:** 150 Feet  
d. **Swath Width:** 2,000 Feet  
e. **Ground Speed:** 200 Knots (338 Feet/Second)  
f. **Acreage:** 15,000 Acres  
g. **Spray-On Time:** 32 Minutes  
h. **Flow Rate:** 7.4 gallons/minute or 5.55 gal/min see entomologist

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 3 or 4 drums of Dibrom for Kings Bay (see entomologist).

**8. PARKING PLAN:** Parking will be on the T-33 Line at NAS Jacksonville, FL.

**9. AIR TO GROUND RADIO FREQUENCIES:**

Navy Jax Ops-	310.2/134.775	Tower	120.0/340.2
Ground	128.6/336.4	Spray Ground:	123.45 VHF
ATIS	281.0	St Marys:	122.8 VHF

**10. TRANSPORTATION:** Enterprise Car Rental: 904-772-7007 \$40/day+5gov policy  
5 Full Size Cars ((b) (6)) Keys will be at base ops.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP and by NSB Kings Bay pest control.

**12. BILLETING:** Hampton Inn Jacksonville-Orange Park, 6135 Youngerman Circle, 904-777-5313  
16 rooms blocked confirmation # 85742030 \$79/night

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft Available 2 – 5 September 2003

**3. Concept of Operations:**

**2 Sep (Tuesday)**

0730: Show at KYNG  
0930: Depart KYNG  
1200: Land KRDR/Safety Briefing  
1430: In-brief

**3 Sep (Wednesday):**

0611: Sunrise  
1630: Show time  
1830: Take off KRDR (Adulticide Spray Sortie)  
2056: Sunset

**4 Sep (Thursday):**

0612: Sunrise  
1630: Show time  
1830: Take off KRDR (Adulticide Spray Sortie)  
2055: Sunset

**5 Sep (Friday):**

TBA: Out-brief  
1100: Take Off KRDR  
1500: Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 150' AGL for Adulticide swath when no trees are present.
- b. **Swath Width.** 2000 feet for ULV or as determined by the PMP
- c. **Flow Rate.** 4.35 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet<sup>®</sup>), ULV
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 40,000 acres

**5. Mission Commander/Aircraft Commander:** Major (b) (6)

6. Support required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6), DSN (b) (6)
8. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 2-5 SEPTEMBER 2003

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: Capt (b) (6)
- (3) Navigators: LTC (b) (6)
- (4) Flight Engineers:
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) iels, TSG (b) (6) , SSG (b) (6) , TSG (b) (6)
- (2) Crew Chief(s):
- (3) Avionics:
- (4) Com/Nav: MSG (b) (6)

##### c. Entomologists/Ground Support: Capt (b) (6) , (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 2 SEP (Tuesday)

0730: Show at KYNG  
0930: Depart KYNG  
1200: Land KRDR/Safety Briefing  
1430: In-brief

##### 3 SEP (Wednesday):

0611: Sunrise  
1530: Show time  
1700: Take off KRDR (Adulticide Spray Sortie)  
2006: Sunset

##### 4 SEP (Thursday):

0612: Sunrise  
1500: Show time  
1700: Take off KRDR (Adulticide Spray Sortie)  
2004: Sunset

##### 5 SEP (Friday):

TBA: Out-brief  
1100: Take Off KRDR  
1500: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder, 1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries, Kodak Camera
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

4. **PPR:** 0730-01

5. **RADIO FREQUENCIES:** Air To Ground Primary 392.2; VHF 123.45  
KRDR Tower 124.9 V; Grand Forks Int'l 118.4 V

### 6. CONFIGURATION: SP2G

- a. **System:** 2-Module System/Stainless Steel ULV Wing Booms and Fuselage Booms
- b. **Nozzle Tips/Orientation:**  
ULV (adulticide): 8008 TeeJet oriented straight down  
Larvicide: Raindrop nozzles straight back
- c. **Number:**  
ULV: wing only, 8 8008s total (4 each side)  
Larvicide: fuselage only, 10 total (5 each side) straight back
- d. **Booms:** Full Wing and fuselage
- e. **Aircraft:** #9107
- f. **Mission Identifier:** QZNRKA243217

### 7. SPRAY PARAMETERS:

- a. **Adulticide**
  - (1) **Area to be treated:** 40,000 acres (Approximately)
  - (2) **Altitude:** 150' for Adulticide application
  - (3) **Swath Width.** 2000 feet for ULV or as determined by the PMP
  - (4) **Flow Rate.** 4.35 gallons/minute ULV
  - (5) **Application Rate.** 0.60 oz/acre Trumpet, ULV
  - (6) **Ground Speed:** 200 Knots
- b. **Larvicide**
  - (1) **Area to be treated:**
  - (2) **Altitude:** 100' for Larvicide application
  - (3) **Swath Width.** 200 feet
  - (4) **Flow Rate.** 186 gallons/minute
- c. **Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)
- d. **Ground Speed:** 200 Knots

### 8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)

- a. **Composition of each Gallon:**
  - (1) 0.375 ounces of Altosid® 20
  - (2) 0.08 ounces of Control® drift retardant
  - (3) Water
- b. **Typical load:** (2 tanks of 450 gallons each)
  - (1) Fill with 445.3 gallons of water/tank. Total water in tanks = 890.6 gal.
  - (2) Total water added = 890.6 gallons
  - (3) Add 1.32 gallons of Altosid® per tank (2.64 gallons total).
  - (4) 3.375 gal AirexDC per tank (6.75 Gal total) while agitating approximately 15 min
  - (5) Total quantity mix. 903 gallons

**c. Final Load for complete flush**

- (1) Fill tanks with the amount of water necessary for a proper system flush

**d. Mixing Instructions:**

SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

**9. TRANSPORTATION: 2 Vans & 1 Staff provided by 319 CES**

**10. CONTACTS:**

**a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

- (1) **Base Operations:** (b) (6) Airfield Manager or 1 LT (b) (6) , DSN (b) (6)

12 MAY 2008

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray MEXUS Oil Spill Exercise

**1. Objective/Purpose/Benefit:** Joint Operational Exercise with the US Coast Guard and Mexican Navy simulating an Oil Spill Clean up operation near the boundary of our 2 countries. Aerial application of simulated oil dispersant using water will be performed working with both US CG and Mexican Navy ships and aircraft. Exercise activities should result in further refinement of MOU's between Mexico and US, as well as enhance the working relationship between the Mexican Navy, US Coast Guard, Border Control Authorities (both US and Mexican), and the USAFR in border environmental/disaster relief operations.

**2. Capability:** Spray Aircraft available 2-6 JUN 2008

**3. Concept of Operations:**

**2 JUNE (Monday)**

1300: Showtime

1500: Depart KYNG

1730: Land KBRO/Safety Briefing

**3 JUN (Tuesday):**

Briefings 0800-1600: Dispersants, JRC Set up, ICS

**4 JUN (Wednesday):**

\*\*0800: Alert/Show time

ASAP after show: Load Chemical

2 Hours after Show: Take off KBRO

1.5 Hours after Take off/Reload for next flight

**5 JUN (Thursday):**

0800: Show time

0830 Load Chemical

0930: Take off KBRO

1100 Land KBRO

1300-1700: Debrief with all exercise personnel

**6 JUN (Friday):**

0800 Show

1000 Depart KRBO

1630 Land KYNG

**4. Spray Parameters:**

- a. Altitude:** 100' AGL
- b. Swath Width.** 100 feet for UHV or as determined by the CPMP
- c. Flow Rate.** 277 gallons/minute
- d. Application Rate.** 7/acre
- e. Ground Speed:** 200 Knots
- f. Proposed spray area:** Exercise area TBD by CG

**5. Mission Commander:** CAPT (b) (6)

6. Coordination between US State Department and Mexican Government are being worked by the Coast Guard for approval to disperse water over Mexican Coastal Water Territory. In the event approval is not obtained prior to mission, the spray will be confined to US territory only. Please contact me if you have any questions.

// Signed //

(b) (6), CAPT, USAFR  
Assistant Chief Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MEXUS OIL SPILL

### 2-6 JUN 2008

**Purpose/Objectives and Proposed Benefits:** Joint Operational Exercise with the US Coast Guard and Mexican Navy simulating an Oil Spill Clean up operation near the boundaries of our 2 countries. Aerial application of simulated oil dispersant using water will be performed working with both US CG and Mexican Navy ships and aircraft.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) MC: Capt (b) (6)
- 2) Pilots: LTC (b) (6) , Capt (b) (6) , Capt (b) (6)
- 3) Navigators: LTC (b) (6)
- 4) Flight Engineers: Msgt (b) (6) , Tsgt (b) (6)
- 5) Spray Operators: Msgt (b) (6) , Msgt (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: Msgt (b) (6) , Msgt (b) (6) , Msgt (b) (6) Ssgt (b) (6)
- 2) Crew Chief(s): Ssgt (b) (6) , Ssgt (b) (6)
- 3) Avionics: Msgt (b) (6)

##### c. Scientific Advisor: Maj (b) (6)

#### 2. SCHEDULE: (All Local Times) \*\*Spray Flight Times Subject to Change depending upon the Oil Spill Scenario

##### 2 JUNE (Monday)

1200: Showtime  
1400: Depart KYNG  
1730: Land KBRO/Safety Briefing

##### 3 JUN (Tuesday):

Briefings 0800-1600: Dispersants, JRC Set up, ICS

##### 4 JUN (Wednesday):

\*\*0700: Alert/Show time  
ASAP after show: Load Chemical  
0845 Take off KBRO to be at spill location at 0900  
Mexican site times TBD.  
1.5 Hours after Take off/Reload for next flight

##### 5 JUN (Thursday):

0800: Show time  
0830 Load Chemical  
0930: Take off KBRO  
1100 Land KBRO  
1300-1700: Debrief and Hotwash with entire exercise group

##### 6 JUN (Friday):

0800 Show  
1000 Depart KRBO  
1530 Land KYNG

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cell Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 VHF Radio, Project Notebook, Entomologist's Tool Kit
- c. **Navigator:** Maps/Map Bag, Laptop
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

#### 4. Spray Planning: Currently there are 2 spray locations planned: 1 in the US and 1 in Mexico.

US site will be ½ nm off the shore near N26 07.00/W097 10.0. Location will be viewable from the JRC beach. Ships should be in position near the simulated spill location. Plan to be at spray location at 0900.

Mexico Site will be ½ nm off the shore at N25 14 19.10/W 097 24 41.05 (N25 14.32/W097 24.68) Mexican Identification of zone and ground radio contact TBD.

**5. RADIO FREQUENCIES: TBD by the Air Operations Planner at the JRC**

Air To Ground Primary VHF 123.45; secondary UHF 392.2;  
KBRO TWR 118.9V

**6. CONFIGURATION: SP2G**

- a. **System:** 2-Module System/ Fuselage Booms
- b. **Aircraft:** 899107
- c. **Mission Identifier:** QZNRKA485154

**7. SPRAY PARAMETERS:**

- a. **Nozzles – Raindrop nozzles oriented straight back.**
- b. **8 (16 total) on each fuselage boom; evenly spaced.**
- c. **Booms – fuselage only**
- d. **Airspeed – 200 knots ground speed.**
- e. **Altitude – 100 feet above water.**
- f. **Application Rate – 7 Gal/Acre**
- g. **Flow Rate – 277 Gal/Min**
- h. **Spray -- water only.**
- i. **Number of passes – 6 per sortie. Do not decrease flow rate in order to increase passes.**
- j. **Pressure – 40 psi**

**8. LOADING:**

- a. **900 -1000 gallons of water to be loaded for each lift. Loading process still TBD. Still uncertain of Hydrant availability and Fire Department support. Plan on hot turns if the Hydrant is available. At least 1 hot turn for practice should be planned.**

**9. TRANSPORTATION: 5 full size cars from Dollar (956-982-2027) at a rate of \$21 + tax and fees. Pick them up at M terminal.**

**Reservations: T2964064, T2964110, T2964141, T2964155, T2964165, all under Capt Townsend's name.**

- 1-MC Townsend**
- 2-Aircrew (Whittenberger, Young, Adams)**
- 1-Spray MX (Hefner)**
- 1-Crew Chiefs & Specialists (Torba)**

**10. LODGING:**

Holiday Inn Express Brownsville \$99/night  
(956)550-0666  
1985 N Expressway  
Brownsville, TX 78520

**11. CONTACTS:**

See MEXUS planning guide for contact information.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Langley AFB, VA.

1. Objective/Purpose/Benefits of the Spray Mission: Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes around LFI and the surrounding communities.

2. Capability: Aerial Spray C-130 Aircraft available 2-6 SEP 08

3. Concept of Operations:

**02 SEP (Tuesday): Deploy to LFI**

1000: Show time  
1200: Takeoff YNG  
1330: Land LFI w/safety briefing immediately following  
1430: Installation briefing

**03 SEP (Wednesday): Spray LFI**

1530: Show time  
1600: WX decision, load Dibrom  
1730: Takeoff LFI  
1930: Sunset

**04 SEP (Thursday): Spray LFI**

1530: Show time  
1600: WX decision, load Dibrom  
1730: Takeoff LFI  
1929: Sunset

**05 SEP (Friday): Spray LFI**

1530: Show time  
1600: WX decision, load Dibrom  
1730: Takeoff LFI  
1927: Sunset

**06 SEP (Saturday): Redeploy to YNG**

1000: Show time  
1200: Takeoff LFI  
1400: Land KYNG

4. Spray Parameters:

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom<sup>®</sup> Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Approximately 125,000 acres on the peninsula
- g. **Swath Width:** 2000 foot

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

FROM: 757 AS/DOS (346-1111/1531; FAX 346-1616)

SUBJECT: Concept of Operations for Aerial Spray Training at Avon Park AFR/MacDill AFB FL

1. Purpose/Objectives/Benefits: To fulfill training requirements for squadron personnel and evaluate new drift control agent for enhanced application of aerially applied products.
2. Capability: Spray Aircraft Available 3-7 Dec 01.
3. Concept of Operations:
  - a. **3 Dec (Monday):**
    - 0930 Show at KYNG
    - 1100 Take-Off KYNG
    - 1400 Land KMCF
    - 1415 Safety Brief
  - b. **4 Dec (Tuesday):** 0730-0930 and 1100-1400 Range Times
    - 0600 Show Time/Weather Decision/Load Water
    - 0715 Depart KMCF/Call Tower & Fire Department at AGR
    - 0740-0930 Spray water over designated area of the Avon Park Bombing Range
    - 1000 Land KMCF
    - 1030 Depart KMCF/Call Tower & Fire Department at AGR
    - 1100-1400 Spray water over designated area of the Avon Park Bombing Range
    - 1445 Land KMCF
  - c. **5 Dec (Wednesday):** 0730-0930 and 1100-1400 Range Times
    - 0600 Show Time/Weather Decision/Load Water
    - 0715 Depart KMCF/Call Tower & Fire Department at AGR
    - 0740-0930 Spray water over designated area of the Avon Park Bombing Range
    - 1000 Land KMCF
    - 1030 Depart KMCF/Call Tower & Fire Department at AGR
    - 1100-1400 Spray water over designated area of the Avon Park Bombing Range
    - 1445 Land KMCF
  - d. **6 Dec (Thursday):** 0730-0930 and 1100-1400 Range Times
    - 0600 Show Time/Weather Decision/Load Water
    - 0715 Depart KMCF/Call Tower & Fire Department at AGR
    - 0740-0930 Spray water over designated area of the Avon Park Bombing Range
    - 1000 Land KMCF
    - 1030 Depart KMCF/Call Tower & Fire Department at AGR
    - 1100-1400 Spray water over designated area of the Avon Park Bombing Range
    - 1445 Land KMCF

**e. 7 Dec (Friday):**

0900: Report  
0930: Out-Briefing  
1000: Depart KMCF  
1200: Land KYNG

4. Spray Parameters:
  - a. Acreage: N/A
  - b. Altitude: 100 Ft AGL
  - c. Ground Speed: 200 Knots
  - d. Pesticide: N/A (Training with dyed water only)
  - e. Application Rate: 500 Gallons of water
  - f. Flow Rate: Approximately 200 Gallons per minute at psi 40
  - g. System: SP2G – MASS ULV; Modules 1 and 2
  - h. Nozzle Tips/Number/Orientation: 8070 Flat Fan oriented straight back
  - i. Aircraft Tail Number: 99106
  - j. Deploy/Re-Deploy Time: 3.5 hrs
  - k. Spray Time: 2 hrs (or as called by Mission Commander)
5. Mission Commander: Major Timothy Austin
6. Support required at MacDill AFB and Avon Park Bombing Range AFB have been approved via telephone conversations with MacDill AFB Ops and the Range Manager at Avon Park AFRB.
7. If you have any questions concerning this mission please contact DSN (b) (6)

(b) (6), Major, USAFR  
Chief, Aerial Spray  
757 AS/DOS

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **MACDILL AFB / AVON PARK, FL**

### **TRAINING & EVALUATION**

#### **3 - 7 DEC 2001**

**PURPOSE/OBJECTIVE/BENEFIT:** To fulfill training requirements for squadron personnel and evaluate new drift control agent for enhanced application of aerially applied products.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: Maj (b) (6) Capt (b) (6)
- (3) Navigators: Maj (b) (6) , Maj (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , TSG (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: MSG (b) (6) , MSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) TSG (b) (6)
- (3) Avionics: MSG (b) (6)

##### **c. Certified Pest Management Professionals:** Lt Col (b) (6) , Capt (b) (6)

##### **d. Ground Support:** TSG (b) (6)

Enterprise #152170: \$75 Vans: (b) (6) ; \$45 Full Size: (b) (6) ; \$41 Mid Size: (b) (6)

#### **2. SCHEDULE: (All time Local)**

03 DEC (Monday): No range time.

**PPR # - 337 RJ1**

0800: Show at KYNG

1000: Depart YNG

1400: Land MCF

04 DEC (Tuesday): Range Times 0730-0930 and 1100-1400, call AGR Tower & Fire Dept

0600: Show Time

0715: Depart MCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

0930: land MCF

1045: Depart MCF

1400: Land MCF

05 DEC (Wednesday): Range Times 0730-0930 and 1100-1400, call AGR Tower & Fire Dept

0600: Show Time

0715: Depart MCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

0930: land MCF

1045: Depart MCF

1400: Land MCF

06 DEC (Thursday): Range Times 0730-0930 and 1100-1400, call AGR Tower & Fire Dept

0600: Show Time

0715: Depart MCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

0930: land MCF

1045: Depart MCF

1400: Land MCF

07 DEC (Friday):

0900: Depart MCF

1200: Land YNG

#### **3. PURPOSE OF THIS MISSION.** Compare drift retardant capabilities of Garrco Control® with those of Airex DC™

#### **4. ITEMS TO TAKE:**

- a. **Navigator:** Maps with “No-Spray” Areas Marked and Laptop Computer
- b. **Certified Pest Management Professionals:**
  - (1) 18 Packs of Water-Sensitive Cards
  - (2) 5 Boxes of Plastic Card Holders & Index Cards
  - (3) 2 Signal Mirrors
  - (4) 2 Spot Lights
  - (5) 1 Engineer Wheel
  - (6) Swath Kit Weather Station and Image Analyzer
  - (7) UHF Radio with Antenna and VHF Radio
  - (8) Ground Maps
  - (9) Laptop Computer
  - (10) Digital Camera
  - (11) SATLOC Trackstar Equipment

#### **5. AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s)
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

#### **6. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 99106
- c. Mission Identifier: QZNRKA393337

#### **7. SPRAY PARAMETERS:**

- a. Booms -- Wing and fuselage with restrictor.
- b. Nozzles -- 8070 Flat Fan oriented straight back.
- c. Number of Nozzles -- 30 Total; 10 on each wing and 5 on each fuselage boom.
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 100' above ground level 4-5 Dec; 6 Dec alternate between passes 150-175' AGL.
- f. Spray -- Water with either Garrco Control® or Airex DC™.
- g. Wind -- Headwind/tailwind.
- h. Flow Rate -- 200 Gallons per minute at 40 psi.

#### **8. LOADING, MIXING AND APPLICATION:**

- a. 4 DEC 01 – Sortie 1
  - Mix 8 ounces of Control® with 500 gallons of water.
  - Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.
- b. 4 DEC 01 – Sortie 2
  - Mix 4 ounces of Control® with 500 gallons of water.
  - Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.

- c. 5 DEC 01 – Sortie 1 – 0.5% solution  
Mix 2.5 gallons of Airex DC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.
- d. 5 DEC 01 – Sortie 2 – 1.0% solution  
Mix 5 gallons of Airex DC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.
- e. 6 DEC 01 – Sortie 1 – 0.5% solution  
Mix 2.5 gallons of Airex DC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.  
Fly at 150' AGL on odd numbered passes and at 175' AGL on even numbered passes.
- f. 6 DEC 01 – Sortie 2  
Aircrew Training

## 9. CONTACTS:

- a. Quarters: **MacDill Lodging**: DSN: 968-4259, FAX 2660 (Gp 968-2617/2594)  
-- **Radisson Riverwalk Hotel, 200 North Ashley Dr Tampa FL (813) 223-2222**

3 January 2002

**MEMORANDUM FOR 757 AS/DO**

**FROM: 757 AS/DOS (LtC Spears)**

**SUBJECT: Avon Park Drift Retardant Comparison Mission, 3-7 December 2001**

1. Purpose: Compare spray deposition from Garrco Control® and AirexDC™ drift retardants.
2. Traveler(s): The participants are listed in Attachment 1, the Avon Park Operational Schedule for 3-7 December 2001.
3. Itinerary: The itinerary is listed in the Avon Park Operational Schedule (Attachment 1).
4. Aerial Spray Flight Data:

a. 3 Dec 01: Ferry	KYNG-KMCF 1505-1805Z	Flight Hours: 3.0
b. 4 Dec 01: Spray Sortie	KMCF-KMCF1315-1502Z	Flight Hours: 1.8
c. 4 Dec 01: Spray Sortie	KMCF-KMCF1610-1710Z	Flight Hours: 1.5
d. 5 Dec 01: Spray Sortie	KMCF-KMCF1226-1446Z	Flight Hours: 2.4
e. 5 Dec 01: Spray Sortie	KMCF-KMCF1605-1726Z	Flight Hours: 1.4
f. 6 Dec 01: Spray Sortie	KMCF-KMCF1230-1600Z	Flight Hours: 3.5
g. 7 Dec 01: Ferry	KYNG-KMCF 1500-1800Z	Flight Hours: 3.0

5. Discussion:

a. StaPut® and Control® are drift retardants used previously, with Control® proving to be more effective than StaPut®. AirexDC™ is a new product that became available in mid-2001. It forms a protective coating around a spray droplet to prevent evaporation as opposed to the previous materials that mixed with and thickened the spray solution.

b. Trials of Control® were conducted at the rates of 4 ounces and 8 ounces per 500 gallons of water. Trials of AirexDC™ were conducted at the rates of 0.5% (2.5 gallons) and 1.0% (5 gallons) per 500 gallons of water. AirexDC™ was used at a higher rate because it is a much less concentrated material than Control®.

## 6. Results:

a. Using AirexDC™ resulted in more than twice as much recovery in ounces per acre as Control® (Figure 1). Although the number of droplets collected (drops/cm<sup>2</sup>) was similar, the volume median diameter (DV50) was larger accounting for increased deposition.

b. The higher rates for both materials showed less deposition than the lower rates. This is because they were flown during afternoon sorties when the temperature was higher and the humidity lower than when the lower rates were flown. This resulted in increased evaporation, and thus, less recovery.

## 7. Conclusions and Recommendations:

a. AirexDC™ proved to be the best material (Figure 2) resulting in more recovery on the ground, larger volume median diameter and, therefore, less drift. Using this material will give us better recovery and control of spray deposition in future missions.

b. We need to conduct additional characterization trials comparing a higher rate of Control® with AirexDC™. This will allow us to determine if we can improve results with Control®.

(b) (6) Lt Col, USAFR  
Research Entomologist

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB ND  
Control of Mosquitoes

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft Available 3 Jun 2002

**3. Concept of Operations:**

**3 JUNE (Monday)**

0800: Show at KYNG  
1100: Depart KYNG  
1330: Land KRDR/Safety Briefing  
1430: In-brief

**4 JUNE (Tuesday):**

0530: Show time  
0532: Sunrise  
0640: Take off KRDR (Field opens at 0630); Larvicide spray -- aiming for two lifts  
2122: Sunset

**5 JUNE (Wednesday):**

0530: Show time  
0531: Sunrise  
0640: Take off KRDR (Field opens at 0630); Larvicide spray -- aiming for two lifts  
2123: Sunset/Land

**6 JUNE (Thursday):**

0530: Show time  
0531: Sunrise  
0640: Take off KRDR (Field opens at 0630); Larvicide spray  
2123: Sunset

**7 JUNE (Friday):**

0530: Show time  
0530: Sunrise  
0640: Take Off KRDR (Field opens at 0630); Larvicide spray  
2124: Sunset

**8 JUNE (Saturday)**

0530: Show time

0530: Sunrise

0640: Take off KRDR

2125: Sunset

**9 JUNE (Sunday)**

TBA: Out-brief

1100: Take Off KRDR

1500: Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 100' AGL for larvicide swath when no trees are present.
- b. **Swath Width.** 200 feet for larvicide
- c. **Flow Rate.** 186 gallons/minute larvicide
- d. **Application Rate.** 2 gal/acre (water with 0.75 oz of Altosid®)
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 1790 acres (this size area will require 4 Sorties)
- g. **Spray-on time:** 19.5 minutes

**5. Mission Commander:** LtC (b) (6)

**6. Aircraft Commander:** LtC (b) (6)

**7.** Support required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator (b) (6), DSN (b) (6).

**8.** HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

(b) (6), Major, USAFR  
Chief, Aerial Spray Operations

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **GRAND FORKS AFB, ND**

### **03-09 JUNE 2002**

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: LTC (b) (6) , MAJ (b) (6)
- (3) Navigators: LTC (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , TSG (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: TSG (b) (6) , TSG (b) (6) , SSG (b) (6)
- (2) Crew Chief(s): TSG (b) (6) & SSG (b) (6) (b) (6)
- (3) Avionics: TSG (b) (6) , TSG (b) (6)

##### **c. Entomologists/Ground Support: LTC (b) (6) , LTC (b) (6)**

#### **2. SCHEDULE: (All Local Times)**

##### **3 JUNE (Monday)**

0800: Show at KYNG  
1100: Depart KYNG  
1330: Land KRDR/Safety Briefing  
1430: In-brief

##### **4 JUNE (Tuesday):**

0530: Show time  
0532: Sunrise  
0640: Take off KRDR (Field opens at 0630); Larvicide spray -- aiming for two lifts  
2122: Sunset

##### **5 JUNE (Wednesday):**

0530: Show time  
0531: Sunrise  
0640: Take off KRDR (Field opens at 0630); Larvicide spray -- aiming for two lifts  
2123: Sunset/Land

##### **6 JUNE (Thursday):**

0530: Show time  
0531: Sunrise  
0640: Take off KRDR (Field opens at 0630); Larvicide spray  
2123: Sunset

##### **7 JUNE (Friday):**

0530: Show time  
0530: Sunrise  
0640: Take Off KRDR (Field opens at 0630); Larvicide spray  
2124: Sunset

**Note: Four sorties are required for the spray block. Plus, a final sortie will be needed for a complete flush of the system followed by spray equipment inspection**

### **8 JUNE (Saturday)**

0530: Show time

0530: Sunrise

0640: Take off KRDR

2125: Sunset

### **9 JUNE (Sunday)**

TBA: Out-brief

1100: Take Off KRDR

1500: Land KYNG

### **3. ITEMS TO TAKE:**

- a. Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder, 2 Signal Mirrors, 1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries, Kodak Camera
- c. Navigator:** Maps/Map Bag, Validation Map
- d. Spray Operator:** Safety Gear, Calibration Tables
- e. Spray Maintenance:** Deployment Kit, Support Equipment, Control®

**4. PPR:** Not required weekdays

**5. RADIO FREQUENCIES:** Air To Ground Primary 392.2; VHF 123.45

### **6. CONFIGURATION:**

- a. System:** 2-Module System and Fuselage Booms
- b. Nozzle Tips/Orientation:**
  - (1) Larvicide: Raindrop nozzles straight back
- c. Number:**
  - (1) Larvicide: Fuselage only, 10 total (5 each side) straight back
- d. Booms:** Fuselage Booms
- e. Aircraft:** 107
- f. Mission Identifier:** **QZNRKA**

### **7. SPRAY PARAMETERS:**

- a. Altitude:** 100' AGL for larvicide swath when no trees are present
- b. Swath Width.** 200 feet
- c. Flow Rate.** 186 gallons/minute
- d. Application Rate.** 2 gal/acre (water with 0.75 oz of Altosid®)
- e. Ground Speed:** 200 Knots
- f. Proposed spray area:** Approximately 1790 acres (this size area will require 4 sorties)
- g. Spray-on time:** 19.5 minutes

## 8. SPRAY MIXING AND LOADING:

### a. Composition of each Gallon:

- (1) 0.375 ounces of Altosid® 20
- (2) 0.08 ounces of Control® drift retardant
- (3) Water

### b. Typical load: (2 tanks of 450 gallons each)

- (1) Fill with 450 gallons of water/tank. Total water in tanks = 900 gal.
- (2) Total water added = 900 gallons
- (3) Add 1.32 gallons of Altosid® per tank (2.64 gallons total).
- (4) Add 1 bottle of Control®/tank while agitating approximately 15 min
- (5) Total quantity mix. 903 gallons

### c. Final Load for complete flush

- (1) Fill tanks with the amount of water necessary for a proper system flush

### d. Mixing Instructions:

SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

## 9. TRANSPORTATION: 2 Vans & 1 Staff provided by 319 CES

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 3-7 June 2002
- c. Purpose of Application: Control nuisance and vector mosquitoes (larval stages)
- d. Application Date/s: 4 and 5 Jun 02
- e. Time/s of Application (Zulu): 1155-1605Z (4 Jun); 2230-0105Z (5 Jun); 1810-1910Z (6 Jun)
- f. Acres Treated: 893
- g. Project Coordinator/s (Name/Rank, Title, Phone #):(b) (6) , Environmental Officer, DSN (b) (6) and SSG (b) (6) , NCOIC Pest Management Shop, DSN (b) (6)
- h. Date Spray Map Last Approved: 3 Jun 02
- i. Installation In-Briefing: (When/Where/Briefer/s): 1600 local 3 Jun 02/Grand Forks AFB CE Conference Room/LTC (b) (6) and LTC (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11): LTC (b) (6) , LTC (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: LTC (b) (6)
  - (2) CoPilot: Maj (b) (6)
  - (3) Navigator(s): LTC (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6) , TSG(b) (6)
- d. Safety Briefer: LTC (b) (6)
- e. Spray Maintenance: TSG (b) (6) , TSG(b) (6) , SSG (b) (6)
- f. Spray Ground Monitors: LTC (b) (6) , LTC (b) (6)
- g. Crew Chiefs: TSG (b) (6) , SSG (b) (6)
- h. Avionics: TSG (b) (6) , TSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 3/7.8
  - (2) Ferry Sorties/Hours: 2/6.9

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Altosid® Liquid Larvicide Concentrate (20% methoprene)
- b. EPA Registration Number: 272446
- c. Gallons Pesticide Loaded: 5
- d. Gallons Pesticide Applied: 5
- e. Gallons and Name of Flush Used: 198 gallons of water and 2 gallons of Remove®.
- f. Other Additives Used: 1850 gallons water and 1 gallon of Control® drift retardant.
- g. Application Rate: 2 gallons per acre (water with 0.75 oz Altosid®)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 909107
- b. Spray System (Modules Used) and System ID #: 3
- c. Spray System Configuration: 2-Module System/Stainless Steel Fuselage Booms
- d. Nozzle Type/Size: Raindrop nozzles rated at 20 gallons per minute.
- e. Nozzle Orientation & Number Used: Fuselage only oriented straight back; 5 each side
- f. Pressure (PSI): 40
- g. Flow Rate: 93 GPM on 4 Jun 02 and 186 GPM on 5 Jun 02

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 100 Feet on 4 Jun 02 and 200 Feet on 5 Jun 02
- b. Spray Off Set: None on 4 Jun 02 and 600 Feet on 5 Jun 02
- c. Spray Release Altitude: 150 Feet on 4 Jun 02 and 100 Feet on 5 Jun 02
- d. Ground Speed: 200 Knots (337.5 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: Light and variable on 4 Jun 02 and 240° at 5 knots on 5 Jun 02
  - (2) Release Altitude: Calm on 4 Jun 02 and 190° at 8 knots on 5 Jun 02
- b. Temperature (Degrees Fahrenheit): 60° on 4 Jun 02 and 74° on 5 Jun 02
- c. Humidity (percent): 55 % on 4 Jun 02 and 28 % on 5 Jun 02.
- d. Cloud Cover: 40 % on 4 Jun 02 and 15 % on 5 Jun 02.
- e. Source: Ground observations and Aircraft Radar

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Visual observation of aircraft spray pattern.
  - (2) Results: Excellent.
- b. Effectiveness:
  - (1) Technique/s Used: Bioassay of mosquito larvae.
  - (2) Results: The insecticide is a growth regulator and will take several days to produce results. Therefore, results will be determined later.

**8. REMARKS:** There was not enough wind on 4 Jun 02 to produce a 200' wide swath, so a 100' swath was used. The 5 Jun 02 sortie was flown in the evening rather than in the morning because the aircraft was being repaired in the morning. The flush sortie was flown in the morning on 6 Jun 02. The original acreage of 1790 acres planned for spraying was reduced to 893 acres because of drought conditions causing lack of larval mosquito habitat. Therefore, two spray sorties were flown rather than four.

(b) (6) , Lt Col, USAFR  
Certified Pest Management Professional

# AERIAL SPRAY OPERATIONAL SCHEDULE

## AVON PARK, FL

### 3-10 Dec 04

**PURPOSE/OBJECTIVE/BENEFIT:** Characterize the droplet spectrum for several TeeJet flat fan nozzles using the ULV fuselage configuration and a pyrethroid stimulant

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: \*MAJ (b) (6), MAJ (b) (6)
- (2) Navigators: LTC (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: \*MSG (b) (6), SMS (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6), \*TSG (b) (6), MSG(b) (6)
- (2) Avionics: TSG (b) (6)
- (3) Crew Chiefs: SSG (b) (6), \*TSG (b) (6)

##### c. Entomologists: \*\*\*Capt (b) (6), Capt (b) (6)

### 3. ITEMS TO TAKE:

- a. **Navigator:** Maps with “No-Spray” Areas Marked
- b. **Certified Pest Management Professionals:**
  - (1) Water-Sensitive Cards
  - (2) 1 Signal Mirror
  - (3) 1 Spot Light
  - (4) 1 Engineer Wheel
  - (5) Ground Maps
  - (6) Laptop Computer
  - (7) Digital Camera
  - (8) Oil-sensitive cards
  - (9) Spinners
  - (10) Wooden dowels

### 4. AIR TO GROUND FREQUENCIES:

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s) Hrs 0700-2300 M-F, S-S per flying schedule  
DSN 968-7138
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

### 5. SPRAY CONFIGURATION:

- a. MASS – SP2G
- b. Aircraft Number: 99105
- c. Mission Identifier: QZNRKA288388

### 6. MISSION PROTOCOLS:

#### Avon Park Spray Testing Itinerary 3-10 Dec 04

- a. Purpose: Characterization of droplet spectrum produced using fuselage ULV configuration with different nozzle types. We propose to characterize the following TeeJet flat fan nozzles: 8008, 8005, 8003, and 8001.
- b. Spray Parameters (Please note that only the number and type of nozzle will change during this mission):
  - 1. Booms -- Fuselage only
  - 2. Nozzles – 8008 = 6 nozzles/3 per side; 8005 = 8 nozzles/4 per side; 8003 = 14 nozzles/7 per side; 8001 = 42 nozzles/21 per side
  - 3. Number of Nozzles – 8 nozzles 4 per side
  - 4. Airspeed -- 200 knots ground speed
  - 5. Altitude -- 100’ above ground level
  - 6. Wind – Into the wind test
  - 7. Flow Rate – 4.5 gallons/minute

c. Mission Protocols:

1. Purpose: Determine droplet spectrum as delivered for a simulated mosquito adulticide spray using the fuselage ULV configuration. Teflon-coated microscope slides will be used to collect droplets. Eleven sampling stations will be setup along a stretch of road in the Avon Park Bombing Range. Depending on wind direction, the likely locations will be Smith Road (east-west) or Oliver Road (north-south). Other options are possible but will be determined on-site. Additionally, we need the average winds to be below 10 mph.
2. Aircrew: We need the system to have stabilized prior to reaching the sampling points. This is an into the wind test (see figure 1 below). Please turn the spray system on 20 seconds prior to the sampling point and until 10 seconds. **Spray Operators:** Please record the spray-on time and pressure at 5 second intervals. **Navigator:** Please record winds at altitude every ten seconds. If conditions are stable (little variation in wind direction and speed) two spray-on passes will be used for each test (e.g. nozzle configuration).

Figure 1. Into the Wind test.

3. Microscope slides will be retrieved 20 minutes after the plane has passed. Number and size of the droplets will be determined. Please depart the area or land so as to avoid contamination of the slides.

7. **CONTACTS:**

14 December 2004

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

SUBJECT: Swath Characterization Test and Training Mission

**1. Purpose:** The purpose of this series of tests was to characterize the droplet spectrum for several TeeJet flat fan nozzles using the ULV fuselage configuration and a pyrethroid stimulant (BVA oil is the carrier for the product Anvil, thus, the application was essentially Anvil minus the active ingredient). Knowledge of the different droplet sizes produced from the fuselage booms when using different nozzle sizes confirms the functionality of this configuration and will help us choose the most appropriate nozzles when spraying a pyrethroid insecticide operationally. These tests were flown "into the wind" (e.g. zero cross-wind component if possible), which gives the minimum swath width and allows the entire droplet spectrum to be measured. The accepted convention states that droplets in the 10 – 25 micron size range are most effective at adhering to mosquitoes. TeeJet nozzles used by the Aerial Spray Flight produce droplets in a wide range. This work determined the range of droplet sizes as well as the median size for two nozzle types.

**2. Participants:** A list of test participants are included in attachment I.

**3. Spray Configuration:**

Mass-SP2G  
Aircraft Number: 99105  
Mission Identifier: QZNRKA288388

**4. Spray Parameters:**

Booms—Fuselage only.  
Nozzles—8005, 8001 TeeJet  
Number of Nozzles—4 per side (8005); 20 per side (8001), oriented straight down  
Airspeed—200 knots ground speed  
Altitude—150'  
Wind—Applied directly into the wind

**5. Itinerary:**

3 December: Personnel Arrive at Avon Park Air Force Range, FL. Total ferry time was 3.1 hours.

4 December: One testing sortie was flown for a total flight time of 1.4 hours. Nine spinning impingers ("spinners") were placed in an east-west orientation on Smith Road which is south of Bravo Range (Figure 1). Spinners stations were positioned in an array with each station separated 200 feet apart and spanning 800 feet left of the center station and 800 feet right of

the center spinner station. Each station was equipped with Teflon-coated microscope slides to document droplet size. The center station served as the flight line for the aircraft which flew into the wind at an altitude of 150 feet, perpendicular to the line of spinners, using 8005 size TeeJet nozzles. Two passes were made to increase the number of droplets collected. Spray-on time for the oil was 26 seconds, 15 seconds which was dispensed prior to the aircrafts' point of intersection with Smith Road. The purpose of the lead in spray-on time was to allow the MASS pressure and flow rate to equilibrate. Microscope slides were collected 15 minutes after the second pass. Ground wind conditions were 2.0 knots at 010° while winds were recorded at altitude as 8-9 knots at 010°. Flow rate was 4.5 gpm and 26 psi. Drops were counted and measured under compound microscopes. A target of 100 drops per slide or 200 drops per station were measured. Volume median diameter (VMD) was calculated using the method described by Yeomans (1949), and droplet density was determined by dividing the number of drops counted by the number of microscope fields viewed times the area of each field (=drops per centimeter squared), and finally divided by the number of spray passes.

5 December: One training sortie was flown/data collection continued from previous day's test.

6 December: One testing sortie was flown with 3 passes over target area. Test emulated the scenario described for 4 December (i.e., served as a replication) except that the sampling line was setup on Old Bravo Road in a north-south orientation. Microscope slides were collected 15 minutes after the third pass. Ground wind conditions were light and variable making the test difficult. A hand held anemometer showed 0-4.0 knots at 070-130° and winds were recorded at altitude as consistent with 11 knots at 120°. Flow rates were recorded and ranged from 4.4 to 6.4 gpm at 85 to 95 psi. Temperature was 78°F and relative humidity 59%. Total flight time was 1.2 hours.

7 December: One training sortie was flown and data was collected from previous day's test.

8 December: One testing sortie was flown with 3 passes over target area. Test parameters and set-up were identical to that on 4 December except that the 8-8005 nozzles were replaced by 40-8001 nozzles. Flight trajectory was from north to south, intercepting Smith Road at the center data station. Microscope slides were collected 15 minutes after conclusion of the third spray pass. Winds at altitude were 170-184° at 7-9 knots. System flow rates for both passes ranged from 4.3 to 4.4 gpm at 90 to 95 psi. Winds on the ground were steady and recorded as 180° at 2-6 knots. Temperature was 76°F and relative humidity 79%. Total flight time was 1.0 hours.

9 December: One training sortie was flown and data was collected from previous day's test.

10 December: Mission complete. Personnel return to Youngstown ARS. Total ferry time 3.2 hours.

**6. Results:** A total of 5,400 drops were measured during the data analysis portion of this mission. Two "into the wind" tests were completed using 8005 size nozzles along with a single test with 8001 nozzles. Volume median diameter (VMD) is defined as the diameter of the droplet that divides the entire spray spectrum in half by volume. In other words, it is the size droplet where 50% of the total volume of spray is in droplets larger

than the VMD and 50% in droplets with a diameter less than the VMD. This calculation allows the industry to discuss droplet size using a standard convention. Volume median diameter ranged from 3.73 - 62.16 microns for 8005 size nozzles, with an overall average of 23.32 microns. For the 8001 nozzles, VMD ranged from 5.59 - 40.11 microns, with an overall average of 18.42 microns. Figures 2 & 3 show VMD values obtained at each station for 8005 and 8001 nozzle droplet spectra along with associated droplet densities.

**7. Conclusions:** Inside a wind tunnel with controlled environmental parameters, the relative VMD values obtained at each station would be expected to emulate a normal distribution. Working outdoors with varying wind speeds and direction, we did not record such a perfect distribution during these tests. However, since mosquito sprays are carried out in the real world, our work reported here should be indicative of what actually takes place in an operational setting. The product label for Anvil states that applications will be made with equipment which produce a median diameter droplet of 50 microns or less and where fewer than 2% of the drops are larger than 100 microns. Both nozzle configurations tested here meet this condition.

Following the determinations made here, 8001 nozzles would be most suitable choice to deliver droplets in the appropriate size range for mosquito control. However, the smaller nozzles are prone to clogging. In the 08 December test, 3 of the 40 nozzles clogged almost immediately after spray commenced. While this did not appear to negatively affect the test, if additional nozzles clogged, decreased flow or excessive pressure could force an incomplete spray sortie. Another replication with the 8001 nozzles is needed and whether the nozzles clog again will be noted. Furthermore, an evaluation of the performance of 8003 nozzles is also needed, since this size may serve as a medium between the large drops produced by 8005 nozzles and the clogging prone 8001 nozzles. Such a test is planned at Avon Park during February 05'. The next spray mission is scheduled for 10-16 January 2005 at Avon Park. Downwind drift of droplets released from an altitude of 300' altitude will be measured, as part of the development of a profile for nighttime aerial spray sorties.

4. Spray Configuration:
  - a. MASS – SP2G
  - a. Aircraft Number: 89-9105
  - b. Mission Identifier: QZNRKA288388
5. Mission Protocols: Avon Park Spray Testing Itinerary  
3-10 Dec 04
  - a. Purpose: Characterization of droplet spectrum produced using fuselage ULV configuration with different nozzle types. We propose to characterize the following Tee Jet flat fan nozzles: 8008, 8005, 8003, and 8001.
  - b. Spray Parameters: (Please note that only the number and type of nozzle will change during this mission):
    1. Booms -- Fuselage only
    2. Nozzles – 8008 = 6 nozzles/3 per side; 8005 = 8 nozzles/4 per side; 8003 = 14 nozzles/7 per side; 8001 = 42 nozzles/21 per side
    3. Number of Nozzles – 8 nozzles 4 per side
    4. Airspeed -- 200 knots ground speed
    5. Altitude -- 100' above ground level
    6. Wind – Into the wind test
    7. Flow Rate – 4.5 gallons/minute
  - c. Protocols:
    1. Purpose: Determine droplet spectrum as delivered for a simulated mosquito adulticide spray using the fuselage ULV configuration. Teflon-coated microscope slides will be used to collect droplets. Eleven sampling stations will be setup along a stretch of road in the Avon Park Bombing Range. Depending on wind direction, the likely locations will be Smith Road (east-west) or Oliver Road (north-south). Other options are possible but will be determined on-site. Additionally, we need the average winds to be below 10 mph.
    2. Aircrew: We need the system to be stabilized prior to reaching the sampling points. This is an into the wind test. Turn the spray system on 20 seconds prior to the sampling point and until 10 seconds. **Spray Operators:** Record the spray-on time and pressure at 5 second intervals. **Navigator:** Record winds at altitude every ten seconds. If conditions are stable (little variation in wind direction and speed) two spray-on passes will be used for each test (e.g. nozzle

configuration).

3. Microscope slides will be retrieved 20 minutes after the plane has passed. Number and size of the droplets will be determined. Please depart the area or land so as to avoid contamination of the slides.
6. Aircraft Commander: Major (b) (6)
7. Support required at Avon Park Bombing Range is Range Manager at Avon Park.
8. If you have any questions concerning this mission please contact DSN (b) (6) .

## December 4-8 2006 Avon Park 500ft release with bioassays Mission Protocols

**Purpose:** To determine the effectiveness and swath characterization of a 500' release of adulticide (Dibrom) using a bioassay and droplet analysis. These tests will be a continuation of tests conducted in early 2006 at Avon Park, FL and continued in August at Langley AFB, to determine the proper methods for night spray operations at 500 feet.

### Proposed methods:

10 Sampling stations will be placed along a 5 mile transect. Sampling stations will be located approximately ½ mile apart. Each sampling station will be composed of a slide spinner mounted on a wood dowel pole, equipped with 2 teflon slides. In addition, each sampling station will be equipped with a mosquito cage containing 20 field collected adult mosquitoes.

Two trials will be conducted each consisting of a single pass application dispensed at a rate of 1.0 ounces per acre (based on a 2000 foot swath). This translates into a flow rate of 7.2 gallons per minute. The sampling transect will be positioned parallel to the prevailing wind and the flight path of the aircraft will be perpendicular to the transect. Depending on prevailing wind velocity, the flight path (offset) of the aircraft will be from 1000 to 2000 feet upwind of the first sampling station.

TeeJet nozzles (8005) will be used for both trials. In both tests, fluorescent dye will be added to the spray tanks (0.25% Uvitex OB) to facilitate droplet counting and sizing using UV microscopy. Spray will be turned on 30 seconds prior to coming abeam of the sampling line and will be turned off 30 seconds after coming abeam of the sampling line. Bioassay controls will be placed in a non-treated area for the duration of the test. 30 minutes after each application, cages and slides will be collected and returned to the laboratory. Caged mosquitoes will be transferred to clean holding containers furnished with sugar water. Mortality counts will be conducted at 2, 12, and 24 hour intervals. Spray droplets will be counted and sized with a UV microscope equipped with a reticle. 100 drops (if available) will be counted on each slide and the total area counted will be calculated.

### Materials/Resources required:

240 adult mosquitoes/trial. Total=480 mosquitoes

30 gallons Dibrom

Readily accessible, fairly open 5 mile long transects (N-S and E-W)

24 insect cages with hairclips

25 insect cups

10 spinners/20 teflon slides/10 wooden dowels

UV microscope

Mosquito aspirators (2)

5-10 collaborators

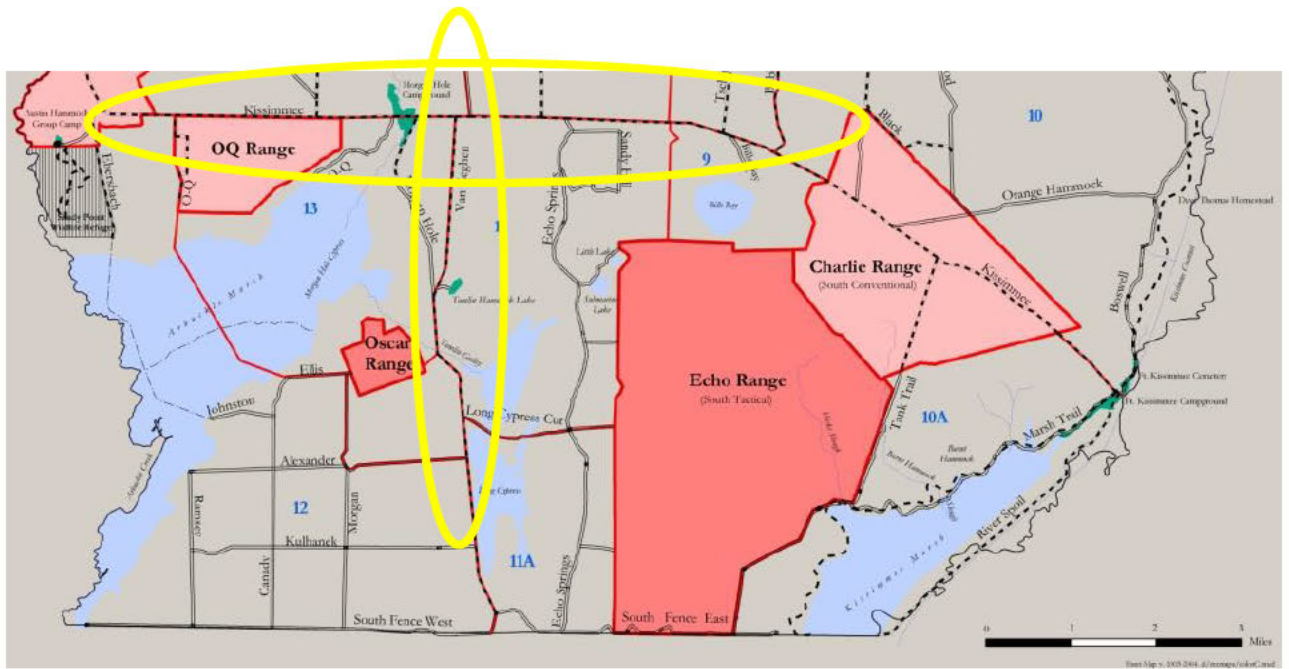

2-3 large ice chests

1 Signal Mirror

1 Spot Light

1 Engineer Wheel

Ground Maps

**TEST LOCATION:** Yellow ovals mark locations proposed for 500ft altitude sprays of Dibrom along Kissimmee Road and Van Eeghen Road on the south range. All traffic will be confined to established roads. Please note that sprays need to avoid the OQ range per our agreement with US Fish & Wildlife, in order to protect the Florida Grasshopper Sparrows.

DEPARTMENT OF THE AIR FORCE  
HEADQUARTERS 910<sup>TH</sup> AIRLIFT WING

28 Sep 2004

**MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)**

**FROM:** 757 AS/DOS (346-1965/1412; FAX 346-1616)

**SUBJECT:** Capability and Concept of Operations for Aerial Spray Characterization at Langley AFB

1. **Purpose/Objectives/Benefits:** Characterize Ultra Low Volume (ULV) spray with fuselage configuration for control of mosquitoes operating at Langley AFB VA.

2. **Capability:** Spray Aircraft 89-9107 Available 4-8 Oct 2004.

3. **Concept of Operations:**

**4 Oct (Monday):**

**PPR: 1004PB02**

1000: Show at KYNG  
1200: Depart KYNG  
1315: Land KLFJ  
1400: In-brief with Langley Staff  
1500: Show Time / Weather Decision  
1530: Load Dibrom  
1630: Spray Sortie  
1843: Sunset  
1900: Land

**5 Oct (Tuesday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1630: Spray Sortie  
1842: Sunset  
1900: Land

**6 Oct (Wednesday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1630: Spray Sortie  
1840: Sunset  
1900: Land

**7 Oct (Thursday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1630: Spray Sortie  
1839: Sunset

1900: Land

**8 Oct (Friday):**

1000: Show Time

1200: Depart Langley

1330: Land YNG

**4. Spray Parameters:**

- a. Booms -- Fuselage only.
- b. Nozzles -- 8008 TeeJet
- c. Number of Nozzles -- 4 on left side and 3 on right side ( 7 total) oriented straight down
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 150' above ground level.
- f. Wind --Crosswind component.
- g. Flow Rate -- 3.6 gallons/minute
- j. Aircraft Tail Number: 89-9107; Mission Identifier: QZNRKA
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Aircraft/Mission Commander: LTC (b) (6)**

**6.** Support required at Langley AFB has been requested via FAX message.

**7.** If you have any questions concerning this mission please contact the Aerial Spray Office, DSN (b) (6) .

AERIAL SPRAY CHIEF

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 4-8 Oct 2004

**Purpose/Objectives/Benefits:** Control nuisance and vector mosquitoes in order to improve working conditions and lower the incidence of arthropod borne illness for members operating at Langley AFB and surrounding communities. Characterize Ultra Low Volume (ULV) spray with fuselage configuration.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: MAJ (b) (6), CPT (b) (6), CPT (b) (6)
- (3) Navigators: MAJ (b) (6), MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6),
- (5) Spray Operators: MSG (b) (6), TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6), TSG (b) (6), TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) (b) (6) MSG (b) (6) (b) (6)
- (3) Com Nav: SSG (b) (6) (b) (6)

##### c. Certified Pest Management Professionals: MAJ (b) (6), CPT (b) (6) CPT (b) (6)

**Gov Vehicles: 2 ea 9 pax van, 1 staff, 1 pick-up truck provided by Langley AFB**

#### 2. SCHEDULE: (All times local)

##### 4 Oct (Monday):

**PPR: 1004PB02**

1000: Show at KYNG  
1200: Depart KYNG  
1315: Land KLF  
1400: In-brief with Langley Staff  
1500: Show Time / Weather Decision  
1530: Load Dibrom  
1630: Spray Sortie  
1843: Sunset  
1900: Land

##### 5 Oct (Tuesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1630: Spray Sortie  
1842: Sunset  
1900: Land

##### 6 Oct (Wednesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom

1630: Spray Sortie  
1840: Sunset  
1900: Land

**7 Oct (Thursday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1630: Spray Sortie  
1839: Sunset  
1900: Land

**8 Oct (Friday):**

1000: Show Time  
1200: Depart Langley  
1330: Land YNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass,  
Pest Safety Binder, UHF Radio,  
Satloc Ground Tracker and Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops phone 878-3588
  - (2) Tower phone 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9** or 348.6 (phone 877-0221 ops)
  - (2) Tower – **124.9** or 280.1 (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB: Tower SMSgt. (b) (6) (b) (6)**
  - (1) Tower - **125.0** or 253.5 (phone 4-5326)
  - (2) Ground - **121.7** or 275.8
  - (3) Clearance – **118.85** or 271.3
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld): Tower – 125.7 or 124.3**
- e. **Spray Ground: Primary 392.2; Secondary: 308.6**

**7. IN-BRIEFING:** 1400 Base CE Building

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** Eight (8) 8008's oriented straight down
- c. **Aircraft:** 89-9107
- d. **Mission Identifier:** QZNRKA045278

## 9. **SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute at Langley and Craney island areas
- f. **Acreage:** 125008 Ac peninsulas; 4904 Ac Craney Island
- g. **Swath Width:** 2,000 Feet

## 10. **PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 1430 hrs each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

## 11. **SPRAY TEST (Please note that this test will be accomplished concurrently or after peninsula is sprayed):**

### Mission Protocols:

- a. Purpose: Swath Characterization as delivered for a simulated mosquito adulticide spray using the fuselage ULV configuration. Glass slides will be used to collect droplets coupled with bioassays of live mosquitoes for efficacy testing. Ten sampling stations will be setup on Craney Island. Direction of sampling line will depend on wind direction; we will adjust our fly over (spray) point to be perpendicular to the prevailing wind. Additionally, we need the average winds to be below 10 mph.
- b. Navigator: We need the system to have stabilized prior to reaching the sampling points. Ten seconds prior to the sampling point and 10 seconds after should be sufficient (20 seconds total), please be advised that this value could change. Please record winds at altitude every ten seconds during the spray-on period. Spray Operators: Please record the MASS pressure at 5 second intervals and of course total spray-on time (when spray is on).
- c. Microscope slides will be retrieved 20 minutes after the plane has passed. If conditions allow, please give ground crew up to 40 minutes to set up for a second pass. Number and size of the droplets will be determined as well as mosquito mortality, the following day.
- d. If the of 8008 size nozzle test is completed, 8005s will be examined.

## 12. **CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT LANGLEY AFB, 4-8 OCT 2004

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB
- b. Mission Duration: 4-8 Oct 2004
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date(s) and time(s) (Local): 6 Oct (1605-1835); 7 Oct (1545-1800)
- e. Acres Treated: 6 Oct, 33,792; 7 Oct, 22,272 (Total = 56,064 acres)
- f. Project Coordinator/s (Name/Title, Phone #): (b) (6), (b) (6)
- g. Date Spray Map Last Approved: 4 Oct 2004
- h. Date of Waste Generation Letter: 4 April 1996
- i. Installation In-Briefing: 1 CE Conference Room, Langley AFB; Lt Col (b) (6) & Maj (b) (6)
- j. Mission identifier: QZNRKA045278

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11): MAJ (b) (6), Capt (b) (6), Capt (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander/Pilot: CAPT (b) (6)
  - (2) Co-Pilot(s): MAJ (b) (6), Capt (b) (6)
  - (3) Navigator: MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6), (b) (6)
- d. Safety Briefer: Capt (b) (6)
- e. Spray Maintenance/Pesticide Loaders: SMS (b) (6), TSG (b) (6), TSG (b) (6)
- f. Crew Chief(s): MSG (b) (6), MSG (b) (6)
- g. Avonics: SSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 2/4.8
  - (2) Ferry Sorties/Hours: 2/3.0

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 154 (6 Oct); 90 (7 Oct)
- e. Gallons Pesticide Applied: 132 (6 Oct); 87 (7 Oct)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 18 gallons marvel oil
- h. Other Additives Used: n/a
- i. Application Rate: 0.5 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99108)
- b. Spray System (Modules Used) and System ID #: System SP2G - MASS ULV; Modules 1 and 2
- c. Spray System Configuration: ULV Wing Booms; Modules 1 and 2/MASS ULV
- d. Nozzle Type/Size: 8008 TeeJet<sup>®</sup> Flat Fan
- e. Nozzle Orientation & Number Used: 8 8008's oriented straight down
- f. Pressure: 20-33 psi
- g. Flow Rate: 3.6 gallons/minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 ft on Langley Peninsula
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet AGL
- d. Ground Speed: 200 knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Speed/Direction): 8 mph/050 (6 Oct); 7 mph/050 (7 Oct)
- b. Temperature (Degrees Fahrenheit): 64°F (6 Oct); 68°F (7 Oct)
- c. Relative Humidity: 45%, 29 Sep; 46%, 7 Oct;
- d. Cloud Cover: sunny/Haze 6-7 Oct
- e. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
  - (2) Results: DGPS shows spray block completed.
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: Communities did not report numerical figures but reported that mosquito densities had dropped significantly.

**8. REMARKS:**

This was the last project spray of the season at Langley AFB. While this has been a record year in regard to the number of Hurricanes to hit the U.S. mainland the Tidewater region has not reported unusually high mosquito counts. In fact, some areas reported low numbers of mosquitoes and consequently were not sprayed during this mission. The east side of the peninsula still had high numbers of saltmarsh mosquitoes and these areas were sprayed along with "hotspots around the area. Continuing fuselage swath width characterization was done at Craney Island with excellent support from the Portsmouth Mosquito Control Staff. The communities of York Co. and Hampton City reported that mosquito counts were significantly depressed following the applications.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MACDILL AFB / AVON PARK, FL

### TRAINING AND TEST

### 3 - 7 DEC 2001

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander:
- (2) Pilots:
- (3) Navigators:
- (4) Flight Engineers:
- (5) Spray Operators:

##### b. Maintenance:

- (1) Spray Maintenance:
- (2) Crew Chiefs:
- (3) Avionics:
- (4) Comm Shop:

##### c. Certified Pest Management Professionals: LTC Brian Spears

##### d. Ground Support:

#### 2. SCHEDULE: (All time Local)

03 DEC (Monday): No range time.

**PPR # -**

0930: Show at KYNG

1100: Depart YNG

1400: Land MCF

04 DEC (Tuesday)

0900-1100: Range Time

0845: Depart MCF

1115: Land MCF

Call Tower and Fire Dept at AGR

General lands at 0900, range time begins after

Coordinated with CAPT(b) (6) / Sgt (b) (6) <sup>(b)</sup>

05 DEC (Wednesday):

0900-1200: Range Time

0845: Depart MCF

1200: Land MCF

06 DEC (Thursday):

1100-1300: Range Time

1045: Depart MCF

1315: Land MCF

07 DEC (Friday):

0900: Depart MCF

1200: Land YNG

#### 3. PURPOSE OF THIS MISSION. To determine spray pattern and drift in light crosswinds from different spray boom sections mounted on a C-130 aircraft

#### 4. ITEMS TO TAKE:

- a. **Navigator:** Maps with “No-Spray” Areas Marked and Laptop Computer
- b. **Certified Pest Management Professionals:**
- (1) 18 Packs of Water-Sensitive Cards
  - (2) 3 Boxes of Plastic Card Holders & Index Cards
  - (3) 2 Signal Mirrors
  - (4) 2 Spot Lights

**MEMORANDUM FOR 757 AS/DO**

**FROM: 757 AS/DOS (LtC (b) (6) )**

**SUBJECT: Avon Park High Volume Test Mission, 4-10 December 2000**

1. Purpose: Compare spray deposition from upwind wing, downwind wing, inboard wing, outboard wing, and fuselage booms of a C-130 aircraft configured for aerial spray. Five spray sorties totaling 11.5 hours and two ferry sorties totaling 6.1 hours were flown for the comparisons.
2. Traveler(s): The participants are listed in Attachment 1, the Avon Park Operational Schedule for 4-10 December 2000.
3. Itinerary: The itinerary is listed in the Avon Park Operational Schedule (Attachment 1).
4. Discussion:
  - a. Previous spray characterization tests were done without separating boom sections. Uneven patterns and gaps in crosswind spray deposition along with observations of spray falling from aircraft spray booms indicated that spray from different sections of our spray booms deposited in different areas downwind of the aircraft. Therefore, spray passes were flown with different sections of the booms turned on, and the deposition was collected on the ground using water sensitive cards.
  - b. Previous experience also indicated that spray volume from fuselage booms was more than from wing booms. All nozzle sites were open for each boom section, and 40 psi of pressure was used in all boom sections. High volume raindrop nozzles rated at 20 gallons per minute at 40 psi were used in order to determine maximum flow rate with each boom section.
5. Conclusions and Recommendations:
  - a. The use of the upwind wing boom for high volume deposition sprays does not provide for a wider swath width in a crosswind than using fuselage booms alone. The upwind wing booms could be used to provide more volume if more is needed than can be produced from the fuselage booms. All spray droplets from wing booms were pulled into the wingtip vortices whether the boom was inboard or outboard. The vortice lifts spray above the airplane and makes it more susceptible to wind drift. Spray from both the upwind inboard and upwind outboard booms began to deposit downwind in the same place as that from the fuselage booms (Table 1). The winds were 10 mph for the test conducted on 5 December 2000. In this case, part of the spray from the upwind wing booms deposited farther downwind than the downwind end of the spray

deposition from the fuselage booms, but the amount was not enough for good spray coverage in an actual spray project. Therefore, this would have been unwanted spray drift. Most of the spray deposited in the same place as that of the fuselage booms. In wind speeds of 5 mph and below, the spray from the upwind wing boom deposited in the same place as spray from the fuselage booms.

- b. Spray from downwind wing booms drifted downwind further before it began to deposit than spray from the fuselage booms or upwind wing booms. (Table 1). In a 10 mph crosswind there is no gap in spray deposition between the upwind and downwind booms. However, the deposition is lighter on the downwind side of the swath. In wind speeds of 5 mph and less, there is a decrease in deposition between that from the upwind wing boom and fuselage booms and that from the downwind wing boom. Figure 1 shows three water sensitive cards. The first shows the beginning of deposition from the upwind wing boom, 100 feet from the aircraft centerline. The second shows small droplets from the upwind wing boom 350 feet downwind from the aircraft centerline. The third shows small droplets from the upwind wing boom and large droplets from the most upwind deposition from the downwind wing boom 400 feet from the aircraft centerline.
- c. The furthest deposition from both upwind and downwind wing booms appeared to be similar in all wind speeds. However, more total spray appeared to be recovered from the downwind wing boom, the droplet density appeared to be higher, and the volume median diameter appeared to be larger, particularly the farther downwind the deposition. The crosswind blows spray from upwind wing booms towards prop wash winds and engine exhaust. Perhaps the prop wash drives spray from the upwind booms downward so that most of it deposits in the same area as that of the fuselage booms. Also, the heat from the engine exhaust could cause higher evaporation of the droplets, resulting in less spray recovered and smaller droplets than spray from the downwind wing booms blown away from prop wash and engine exhaust by the crosswind. Figure 2 shows spray from the upwind wing boom trailing nearly straight back from the airplane in a 5 mph crosswind while that from the downwind wing boom trails at an angle down wind.
- d. The effective swath width for each of the different boom sections was 300-350 feet with a 10 mph crosswind, and 150 feet with a 5 mph crosswind. With a crosswind of less than 1 mph, the effective swath for each of the different spray boom sections was less than 100 feet. The card spacing for this test was 50 feet, so it was difficult to determine effective swath for the lowest wind speed, but results from a previous test indicate that it is 60 to 75 feet.
- e. Flow rates for inboard and outboard sections of the wing boom averaged 125 gallons per minute per wing. The flow rate for the number of nozzles open should have been 440 gallons per minute. This indicates that the spray line through the wings is not large enough in diameter to carry the amount of liquid that could flow through the nozzle

openings. When both inboard and outboard booms were used at the same time, the flow rate was only increased to 135 gallons per minute. The nozzles would have supported 920 gallons per minute. With both wing booms open, the flow rate was 270 gallons per minute. The nozzles would have supported 1840 gallons per minute. Flow rate from the fuselage booms was over 500 gallons per minute. The nozzles on the fuselage booms should have supported 800 gallons per minute.

- f. We need to repeat the test using a drift retardant. The same test also needs to be done at 150 feet above ground level instead of 100 feet, in a head wind as opposed to a crosswind, and with wider fuselage booms.
- g. Plumbing and pump capacity may need to be upgraded to support high volume missions such as those for mosquito larviciding and oil spill dispersal. If changes are made for increased flow rates, tank capacity would need to be increased also.

(b) (6), Lt Col, USAFR  
Research Entomologist

## **PMP'S POST-MISSION REPORT**

### **Grand Forks AFB, ND (5-6 July 2005)**

#### **1. MISSION BASICS:**

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 5-6 July 2005
- c. Purpose of Application: Control nuisance and vector mosquitoes (adult stage)
- d. Application Date: 5 July 2005
- e. Time of Application (Local): 1859- 2142
- f. Acres Treated: 25,600
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) , Environmental Officer,  
DSN (b) (6)
- h. Date Spray Map Last Approved: 27 June 2005
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 27 June 2005; GF International Airport  
MAJ (b) (6) , CAPT (b) (6) , (b) (6)(b) (6) , (b) (6) .

#### **2. OPERATIONAL:**

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMP/s (Category 11): CAPT (b) (6) , CAPT (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: CAPT(b) (6)
  - (2) CoPilot: MAJ (b) (6)
  - (3) Navigator: MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
- d. Spray Operators: MSG (b) (6) , MSG (b) (6)
- e. Safety Briefer: CAPT (b) (6)
- f. Spray Maintenance: MSG (b) (6) fner, TSG (b) (6) , SSG (b) (6)
- g. Spray Ground Monitors: CAPT(b) (6)
- h. Crew Chiefs: TSG (b) (6)
- i. Avionics: TSG (b) (6)
- j. Flying Data:
  - (1) Spray Sorties/Hours: 2/3.4 (0.7 is a flush sortie on 6 July)
  - (2) Ferry Sorties/Hours: 2/6.2

#### **3. PESTICIDES:**

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-548127
- c. Gallons Pesticide Loaded: 120 (5 July)
- d. Pesticide Applied: 120 (5 July)
- e. Other Additives Used: none
- f. Gallons and Name of Flush Used: 150 gallons water
- g. Application Rate: 0.60 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 909106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8008
- e. Nozzle Orientation & Number Used: 8 straight down
- f. Pressure (PSI): 14-18
- g. Flow Rate: 4.4 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 knots (338 feet/second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 150°/5 knots
  - (2) Altitude: 150°/7 knots
- b. Temperature: 76-71 °F
- c. Dew Point: 52-55 °F
- d. Cloud Cover: Clear
- e. Source: Ground/altitude observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Techniques and results:

The City of Grand Forks (CGF) and the Air Force Base (GFAFB) conduct adult mosquito trapping. GFAFB public health reported trap counts 30, 330, 1125 mosquitoes respectively on the morning of 5 July in traps at locations on the base. Trap counts were not submitted for the day following the application. The CGF reported the following mosquito counts from a single trap: 4 July (159), 5 July (77), 6 Jul (43), 7 Jul (59).

**8. REMARKS:** This single evening spray follows a disappointing previous week of attempted sprays that were foiled first by a mechanical issue and then inclement spray weather. The 5 July application was executed as planned with the priority area of GFAFB covered first. Swaths were flown north-south over CGF because the setting sun, insects on the windshield, and GF international airport traffic combined to make an east-west application pattern potentially dangerous (Attachment 1). Efficacy reporting was less than desirable (see 7-a). (b) (6) from CGF reported that results within the City were much better than the single surveillance trap showed (see 7-a). We would like to see greater depressions of mosquito numbers, however, and propose to increase the application rate from the minimum label rate to near the mid-range rate. The next scheduled mission to Grand Forks AFB will be an adult mosquito control mission 1-5 August 2005.

Assistant Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 5-8 May 2008

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: LTC (b) (6) , CAPT (b) (6)
- (2) Navigator: LTC (b) (6) ,
- (3) Flight Engineer: Cmsgt(b) (6)
- (4) Spray Operators: Smsgt (b) (6) , MSgt (b) (6) , Tsgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: Msgt (b) (6) , Tsgt (b) (6) , Tsgt (b) (6) , SRA (b) (6)
- (2) Crew Chiefs: Tsgt (b) (6) , SRA (b) (6)
- (3) Avionics: Ssgt (b) (6)

##### c. Entomologist: Maj (b) (6)

#### 2. PPR REQUIREMENTS: 126-02

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

**5 May (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

- 1100: Show Time/Load system
- 1300: Take Off KYNG
- 1400: Land KNBC
- 1430: Safety Briefing

**6 May (Tuesday):** Adulticide/training sortie at Parris Island Wx/backup

- 1400 Installation Brief---Brief CNX due to CC TDY
- 1500: Showtime
- 1530: Load Chemical/Wx Decision
- 1800: Take off KNBC (Start Spray 1.5 hrs prior to Sunset)
- 2008: Sunset

**7 May (Wednesday)**

- 1500: Showtime
- 1530: Load Chemical/Wx Decision
- 1800: Take off KNBC (Start Spray 1.5 hrs prior to Sunset)
- 2008: Sunset

**8 May (Thursday) Redeploy to YNG**

- 1000: Show Time
- 1200: Take off KNBC
- 1400: Land KYNG

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander Cell Phone

##### b. Entomologist/CPMP:

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

##### c. Navigators:

- (1) Maps
- (2) Templates

- d. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 11 open for 8005's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 90-9105
- f. **Mission Identifier:** QZNRKA253126

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 8 Minutes
- h. **Flow Rate:** 2.7 gallons/Minute

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Beaufort Tower: 119.05 MCAS TWR  
 Beaufort Approach 123.7  
 Hilton Head Arpt: 118.975 Tower, 123.0 CTAF (tower open until 0100 hrs Z)  
 Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 123.4 V**

**10. TRANSPORTATION:** Parris Island will provide vehicles for transportation to and from quarters and for messing. Vehicles will be at Base Operations.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP &Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC: (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island MCRD, South Carolina
- b. Mission Duration: 5-8 May 2008
- c. Purpose of Application: Control of biting midges and adult mosquitoes
- d. Application Dates: 6 May 2008
- e. Times of Application (Local): 1800-1930 Local
- f. Acres Treated: 6758
- g. Project Coordinator (Name, Phone #): (b) (6) (b) (6)
- h. Date Spray Map Last Approved: 06 May 2008
- i. Date of Waste Generation Letter: 10 April 2000.
- j. Installation In-Briefing: 06 May 2008; Maj (b) (6)
- k. Mission identifier: QZNRKA253126

**2. OPERATIONAL:**

- a. Mission Commander: LTC (b) (6)
- b. Certified PMPs (Category 11): MAJ (b) (6)
- c. Aircrew:
  - (1) Pilots: LTC (b) (6) , CPT (b) (6)
  - (2) Navigator(s): LTCOL (b) (6)
  - (3) Flight Engineer: CMS (b) (6)
  - (4) Spray Operators: SMS (b) (6) , SGT (b) (6) MSG (b) (6)
- d. Safety Briefer: Maj (b) (6)
- e. Spray Maintenance: TSG (b) (6) MSG (b) (6) , TSG (b) (6) , SRA (b) (6)
- f. Crew Chiefs: TSG (b) (6) , SRA (b) (6)
- g. Avionics: SSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 1/1.6 (6 May)
  - (2) Ferry Sorties/Hours: 2/2.1 (5 May), 2.0 (8 May)
  - (3) Training Sorties/Hours: 1/1.2 (7 May)

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 60
- e. Gallons Pesticide Applied: 37.0
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 12 Gallons Marvel Oil
- h. Other Additives Used: n/a
- i. Application Rate: 0.70 oz/acre

#### **4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 90-9106
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles
- e. Nozzle Orientation & Number Used: 7 straight down; 4 left, 3 right
- f. Pressure (PSI): 40
- g. Flow Rate: approx 2.7 gpm

#### **5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000 feet
- b. Spray Off Set: 1000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

#### **6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): Ground; 121 @ 6.0 knots average; airplane 115 @ 10 knots average.
- b. Temperature (°F): Ground; 77° at 1800
- c. Humidity: Ground; 55% at 1800
- d. Cloud Cover: 30%
- e. Source: Ground observations/at altitude during spray

#### **7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization.
- b. Effectiveness:
  - (1) Technique/s Used: light traps were used to monitor biting midge and mosquito densities pre- and post-treatment.
  - (2) Results: Post mission trap counts showed insignificant insect abundance as per Parris island Environmental staff.

#### **8. REMARKS**

**From a purely operational standpoint this mission was quite successful. Flying and application activities went smoothly. There was no loss of function in the MASS system, and actual rates (0.71 oz/acre) were very close to desired application rates (0.75 oz/acre), despite the difficulty of getting the system stabilized for such a low flow rate.**

**Though we have not received actual results yet, ground observers noticed a significant decrease in the number of midge bites received from pre to post application dates. Casual observers (golfers) also noticed a significant reduction in bites post-spray.**

**This mission did encounter several problems. First, we continued to have trouble with the new GPS system. No-spray areas did not display with the defined spray areas, making it difficult for the navigator to identify no spray/no fly areas. Also, upon successive “re-booting” of the system, other parts of the mission file disappeared from the display. While the reliability of the hardware seems quite good, the utility and reliability of the software seems questionable. The second problem encountered was a pesticide leak occurring during system calibration. Apparently, upon pressurization, the diaphragms on 2 nozzles failed, resulting in a small stream of Dibrom being discharged from both of these sites, which were located on the left fuselage boom.**

TSGT (b) (6) immediately shut down the system and took steps to control the leakage by applying absorbent material at both sites. TSGT (b) (6) was wearing full personal protective gear (PPG) at the time, including a full-face respirator, face shield, face protector, Tyvek suit, and pesticide-resistant gloves and shoes. However, while reaching up to contain the leak, several drops of Dibrom dripped down his glove into his Tyvek suit, contacting the skin on his forearm. TSGT (b) (6) immediately removed his PPG and thoroughly cleansed the affected area. From that time forward, TSGT (b) (6) was relieved from further chemical loading and calibration activities and placed under observation for any sign of observable pesticide exposure symptoms. TSGT (b) (6) claimed to feel fine, and did not exhibit any of the classic organophosphate (OP) poisoning symptoms such as sweating, nausea, or depressed motor activity. Although it is obvious TSGT (b) (6) received an insignificant dose, it would probably be prudent to have his cholinesterase levels checked against baseline, despite the fact that any OP adsorbed will have been enzymatically removed from his system at the time of bloodwork.

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB, VA
- b. Mission Duration: 5-9 August 2001
- c. Purpose of Application: Control nuisance and vector mosquitoes
- d. Application Date/s: 6-9 August 2001
- e. Time/s of Application (Local): 1700-2010 (6 Aug); 818-2039 (7 Aug);  
1730-1940 (8 Aug); 1715-1915L (9 Aug)
- f. Acres Treated: 47,872 (6 Aug); 15,360 (7 Aug); 39,936 (8 Aug); 5,120 (9 Aug);  
108,288 acres total
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6), DSN (b) (6)
- h. Date Spray Map Last Approved: 6 Aug 2001
- i. Installation In-Briefing: (When/Where/Briefer/s): 6 Aug 2001; CE Conference Room, MAJ  
(b) (6) & MAJ (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: Maj (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): Maj (b) (6) & 1Lt (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: Maj (b) (6)
  - (2) CoPilot: Maj (b) (6)
  - (3) Navigator(s): LtC (b) (6), Capt (b) (6)
  - (4) Flight Engineer(s): SMS (b) (6), MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6), MSG (b) (6), TSG (b) (6),  
TSG (b) (6) anken
- d. Safety Briefer: 1LT (b) (6)
- e. Spray Maintenance: MSG (b) (6), TSG (b) (6), TSG (b) (6)  
TSG (b) (6)
- f. Spray Ground Monitors: Maj (b) (6), 1LT (b) (6)
- g. Crew Chiefs: TSG (b) (6), TSG (b) (6)
- h. Avionics: : TSG (b) (6)

### 3. FLYING DATA:

- (1) Spray Sorties/Hours: 4/9.7
- (2) Ferry Sorties/Hours: 2/3.2

### 4. PESTICIDES:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Gallons Pesticide Loaded: 423
- d. Gallons Pesticide Applied: 423
- e. Gallons and Name of Flush Used: VM & P NAPHTHA
- f. Application Rate: .50 oz/acre

**5. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 909108; Mission Identifier: QZNRKA809217
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 8008 7 straight down
- f. Pressure (PSI): 40-60 (6-9 Aug)
- g. Flow Rate: 3.6 GPM

**6. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000' ULV
- b. Spray Off Set: 2000' (6-7, 9 August); none (8 Aug)
- c. Spray Release Altitude: 150' ULV
- d. Ground Speed: 200 Knots (338 Feet/Second)

**7. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): SW-WSW (6-9 Aug)
  - 1) Ground: 4-6 knots (6 Aug); 2-6 knots (7-9 Aug)
  - 2) Release Altitude: 7-10 knots (6-7, 9 Aug); 5 Knots (8 Aug)
- b. Temperature (Degrees Fahrenheit): 88-97° (5-9 Aug)
- c. Cloud Cover: Partly Cloudy/Haze (6-9 Aug)
- d. Source: Ground observations and NAOA

**8. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Langley AFB Pest Management serves as the facilitator between local mosquito abatement districts by assimilating insect trap data gathered by these municipalities. Pre-treatment trap counts had exceeded the accepted nuisance levels for the peninsula, indicating a need for mosquito control.
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito traps; oil sensitive cards
  - (2) Results: All municipalities reported to Langley AFB that mosquito numbers were significantly reduced following the application.

- 9. REMARKS:** This is the first spray application at Langley AFB in 2001, unusually warm and dry weather conditions had reduced normal mosquito production negating the need for aerial spray earlier in the year. Warm temperatures did not appear to negatively affect the application as mosquito activity was depressed significantly following the spray. The Aerial Spray Group received excellent support from the Langley Pest Management Shop and Civil Engineer Squadron. The next application at Langley AFB, VA will be coordinated based on mosquito activity and 757 AS availability during the next two months.

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **AVON PARK, FL**

### **5-9 MAR 2007**

**PURPOSE/OBJECTIVE/BENEFIT:** Aircraft will deploy to Warner-Robbins for AFRC-ALC engineering to view aircraft SATLOC configuration and future Wingman configuration and determine equipment configuration essentials for aerial spray DGPS systems. Aircrew training will follow on to Avon Park for Copilot initial, navigator currency, and loadmaster qualification ULV, LV sorties. Mission commander/AC will determine the priority and training plan.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

1. Pilots: M/C-Maj (b) (6) , Maj (b) (6) , Maj (b) (6)
2. Navigators: LtCol (b) (6) , Maj (b) (6)
3. Flight Engineers: MSgt (b) (6)
4. Spray Operators: SMSgt (b) (6) , MSgt (b) (6) , MSgt (b) (6)

##### **b. Maintenance:**

1. Spray Maintenance: TSgt (b) (6) , MSgt (b) (6) , TSgt (b) (6) ,  
TSgt (b) (6)
2. Avionics: MSgt (b) (6)
3. Crew Chiefs: TSgt (b) (6) (b) (6) Sra (b) (6)

##### **c. Entomologists: None**

##### **d. Admin Support: None**

#### **2. SCHEDULE: (All time Local) All times and sequence of events are subject to change depending upon the needs of the testing and training.**

**SHAF-TAM 1:** Taxiway C closed. Use Taxiway A to main ramp in front of Tower. Construction and maintenance on end of Rwy 23, land and take off beyond the barrier. Tower will clear personnel when aircraft lands or take off. Rapid upload will commence using the fire hydrant next to the control tower, tower (Tom) authorized blocking the taxiway during upload.

**SHAF-TAM 2:** Golden Nights airdropping is de-conflicted with Tower. Their drop zone is the grassy field next to big hanger, runway side.

5 Mar (Monday)

0700: Show Time KYNG      **WRB PPR: LW05-01**  
0900: Depart KYNG  
1100: Land KWRB – WRB Engineers to review Wingman DGPS Evaluation.  
1620: Depart KWRB  
1800: Land KAGR

6 Mar (Tuesday) Range Times 1130-1330

1000: Show Time  
1130: Take off KAGR – Aircrew training  
1330: Land KAGR

7 Mar (Wednesday) Range Times 1300-1500

1130: Show Time  
1300: Take off KAGR – Aircrew training  
1500: Land KAGR

8 Mar (Thursday) Range Time 1300-1500  
1130: Show Time  
1300: Take off KAGR – Aircrew training  
1500: Land KAGR

9 Mar (Friday) Range Times 0900-1200  
0830: Show Time  
1000: Depart KAGR  
1300: Arrive KYNG

**3. ITEMS TO TAKE:**

- a. **Navigator:** Avon Park Range Maps

**4. AIR TO GROUND FREQUENCIES:**

- a. **Spray: Primary 392.2;** Secondary 340.8  
b. Interplane: Primary 123.45; Secondary 122.9  
c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2  
d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s) Hrs 0700-2300 M-F, S-S per flying schedule **DSN 968-7138**  
e. MacDill: TWR-123.7; GND-118.575; ATIS-133.825; CMD POST-311.0; PTD-372.2

**5. SPRAY CONFIGURATION:**

- a. MASS – SP2G  
b. Aircraft Number: 99107  
c. Mission Identifier: QZNRKA680064

**6. MISSION PROTOCOLS:**

- a. Mission Requirements: Wingman DGPS mock up for WRB-ALC and aircrew initial/currency, and continuing training.

**7. CONTACTS:**

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Parris Island  
MCRD SC for Control of Sandfly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft Available on 5-9 October 2003

3. Concept of Operations:

a. 5 Oct 03 (Sunday):

1000 Show Time  
1200 Take Off KYNG  
1400 Land KNBC  
1430 Safety Briefing

b. 6 Oct 03 (Monday):

1400 Load Chemical  
1630 Take Off KNBC  
1900 Land KNBC

c. 7 Oct 03 (Tuesday):

1400 Load Chemical  
1645 Take Off KNBC  
1900 Land KNBC

d. 8 Oct 03 (Wednesday):

1400 Load Chemical  
1645 Take Off KNBC  
1900 Land KNBC

e. 9 Oct 03 (Thursday):

1200 Take Off KNBC  
1400 Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate (naled)
- d. Deploy: 1.6 Hrs
- e. Re-Deploy: 1.6 Hrs
- f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: LTC (b) (6)

6. Mission Commander: Major (b) (6)

7. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator (b) (6) , DSN (b) (6) .

8. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

(b) (6) , Major, USAFR  
Chief of Aerial Spray

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **PARRIS ISLAND MCRD, SC**

### **5-9 OCT 09**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Pilots: Maj (b) (6) , Maj (b) (6)
- (2) Navigators: Maj (b) (6)
- (3) Flight Engineers: CMSgt (b) (6)
- (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6) , MSgt (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: TSgt (b) (6) , TSgt (b) (6) , MSgt (b) (6)
- (2) Crew Chiefs: TSgt (b) (6) , SSgt (b) (6)
- (3) Avionics: TSgt (b) (6)

##### **c. Pest Management Professionals/Entomologist:** Maj (b) (6) , Maj (b) (6) (MC)

##### **d. Public Affairs:** Maj (b) (6) , TSgt (b) (6)

#### **2. PPR REQUIREMENTS: 278-01**

**3. PLANNED SEQUENCE OF EVENTS:** (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### **5 OCT (Monday): Deploy to KNBC**

0900: Show Time  
1100: Takeoff KYNG  
1300: Land KNBC  
1315: Safety Briefing

##### **6 OCT (Tuesday): Adulticide Spray**

TBD Installation Brief  
1600: Show Time/WX Decision  
1600: Load Chemical  
1730: Takeoff KNBC  
1901: Sunset

##### **7 OCT (Wednesday): WX Backup**

1600: Show Time/WX Decision  
1600: Load Chemical  
1730: Takeoff KNBC  
1859: Sunset

##### **8 OCT (Thursday): Adulticide Spray**

1600: Show Time/WX Decision  
1600: Load Chemical  
1730: Takeoff KNBC  
1858: Sunset

##### **9 OCT (Friday): Redeploy to KYNG**

1130: Show Time  
1330: Takeoff KNBC  
1530: Land KYNG

**4. ITEMS TO TAKE/NOTES:**

- a. **Mission Commander:**
  - (1) Mission Commander Cell Phone
  - (2) Blue Force Tracker
- b. **Entomologist/CPMP:**
  - (1) New and Improved Wind Gauge & Compass
  - (2) VHF Radios and Cellular Phone
  - (3) Pesticide Safety Binder
- c. **Navigators:**
  - (1) Maps
  - (2) Templates
- d. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 15 open for 8003's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 89-9106
- f. **Mission Identifier:** QZNRKA013278

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Duet -- Prallithrin (1%); Sumithrin (5%); Piperonyl Butoxide (5%)
  - Signal Word: Caution
  - Flushing Agent: BVA oil
- b. **Application:** 1.24 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 4.5 gallons/Minute

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 2.5 drums of Duet

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 118.8 CTAF  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 123.45 Secondary 130.30**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing. (1 Van for MX, 1 Van for Aircrew E's, Staff Car for O's)

**11. SPRAY MONITORING/TESTING:** This is an evaluation test of Duet for control of mosquitoes and biting midges. Please see Entomologist for application parameters. There will be caged mosquitoes and droplet collection devices used. Ms. (b) (6) and Mr. (b) (6) of Clarke Mosquito Control will be participating.

**12. CONTACTS:**

- a. **Parris Island MCRD SC:** (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX

**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S**  
**POST-MISSION REPORT (replaces AFRC Form 55)**  
**PARRIS ISLAND MCRD, SC 5-9 Oct 2009**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 5-9 October 2009
- c. Purpose of Application: Biting midge control
- d. Application Date: 6 October 2009
- e. Time/s of Application (Local): 1730-1930
- f. Acres Treated: 6,013
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6)  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 6 October 2009
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 6 Oct; Assistant Chief of Staff,  
Installations and Logistics, COL (b) (6) briefed by Maj (b) (6) /Maj (b) (6)
- k. Mission Identifier: QZNRKA013278

**2. OPERATIONAL:**

- a. Mission Commander: Maj (b) (6)
- b. Aircrew:
  - (1) Pilots: Maj (b) (6) , Maj (b) (6)
  - (2) Navigators: Maj (b) (6)
  - (3) Flight Engineers: CMSgt (b) (6)
  - (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6) , MSgt (b) (6)
- c. Maintenance:
  - (1) Spray Maintenance: TSgt (b) (6) , TSgt (b) (6) , MSgt (b) (6)
  - (2) Crew Chiefs: TSgt (b) (6) , SSgt (b) (6)
  - (3) Avionics: TSgt (b) (6)
- d. Entomologists: Maj (b) (6) , Maj (b) (6)
- e. Public Affairs: Maj (b) (6) TSgt (b) (6)
- f. Flying Data:
  - (1) Spray Sorties/Hours: 2.0
  - (2) Ferry Sorties/Hours: 2/4.2

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Duet®
- b. EPA Registration Number: 1021-1795-8329
- c. Formulation Sprayed: Prallithrin (1%); Sumithrin (5%); Piperonyl Butoxide (5%)
- d. Gallons Pesticide Loaded: 70 gal
- e. Gallons Pesticide Applied: 58 gal
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 10 gal/BVA oil
- h. Other Additives Used: None
- i. Application Rate: 1.24 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8003 Flat Fan
- e. Nozzle Orientation & Number Used: 16 oriented straight down
- f. Pressure: 35 p.s.i.
- g. Flow Rate: 4.5 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 2000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 270-330°/3-0 Knots
  - (2) Release Altitude: 300° /5-3 Knots
- b. Temperature (Degrees Fahrenheit): 75° F
- c. Relative Humidity: 76-87%
- d. Cloud Cover: Partly Cloudy
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: glass microscope slides; caged mosquitoes
  - (2) Results: coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito and midge numbers were determined prior to and after spraying using CO<sub>2</sub>-baited traps, landing counts, and caged mosquitoes.
  - (2) Results: Inconclusive based on poor sites (golf course & village housing) was 90% two days following application, marked improvement was reported by other personnel on the Depot.

**8. REMARKS:** A relatively new public health pesticide for mosquito control (Duet) was analyzed for its effect on biting midges. This insecticide boasts a low mammalian toxicity and contains an insect irritant that, in theory, will excite biting flies to take to the wing where contact with the active ingredient component is more likely. Considerable effort was input into this trial from the Marine Corps, Air Force, and the Manufacturer in regard to pre- and post-analysis of the spray. Mosquitoes and midge numbers were closely monitored and identified to species. Unfortunately, environmental conditions were extremely poor during the application. Wind speed was initially good but dropped to zero within 10 minutes of beginning the application. While there were reasonable mosquito mortalities in the exposed cages, trap collections and landing rates of biting midges showed little to no effect. It is important that this pesticide receive a thorough and fair examination, thus, one or two applications will be repeated in the spring.

**31 July 2001**

**MEMORANDUM FOR HQ AFRC/DOOM** (FAX: 497-0198)

**FROM:** 757 AS/DOS (346-1111/1531; FAX 346-1616)

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Langley AFB

1. **Purpose/Objectives/Benefits:** Control nuisance and vector mosquitoes in order to improve working conditions for members operating at Langley AFB VA.
2. **Capability:** Spray Aircraft Available 5-10 August 2001.
3. **Concept of Operations:**
  - a. **5 Aug (Sunday):**
    - 1030 Show at KYNG
    - 1330 Take-Off KYNG
    - 1500 Land KLFI
    - 1515 Safety Brief
  - b. **6 Aug (Monday)**
    - 1000 Briefing with the Craney Island personnel
    - 1100 Briefing with Langley AFB, CE Conference Room
    - 1400 Show Time/Weather Decision
    - 1430 Load Chemical
    - 1700 Take-Off KLFI, Spray Areas Designated by PMP
    - 2000 Land KLFI
  - c. **7 Aug (Tuesday):**
    - 1400 Show Time/Weather Decision
    - 1430 Load Chemical
    - 1700 Take-Off KLFI, Spray Areas Designated by PMP
    - 2001 Land KLFI
  - d. **8 Aug (Wednesday):**
    - 1400 Show Time/Weather Decision
    - 1430 Load Dibrom
    - 1700 Depart KLFI, Spray Areas Designated by PMP
    - 2000 Land KLFI
  - e. **9 Aug (Thursday):**
    - 1400 Show Time/Weather Decision
    - 1430 Load Chemical
    - 1700 Take-Off KLFI, Spray Areas Designated by PMP
    - 1915 Enhanced Flush & Purge
    - 2000 Land KLFI

- f. **10 Aug (Friday):**  
0830: Report  
0900: Out-Briefing  
1000: Depart KLFI  
1130: Land KYNG

**4. Spray Parameters:**

- a. Acreage: approximately 114,000 Acres
- b. Altitude: 150 Ft AGL
- c. Ground Speed: 200 Knots
- d. Pesticide: Dibrom<sup>®</sup> Concentrate
- e. Application Rate: 0.5 Ounce per Acre
- f. Flow Rate: 1.8 Gal per Minute at Craney Island; 4.5 Gallons per Minute for 2500' swaths and 3.6 Gallons per Minute for 2000' swaths on the Peninsula
- g. Swath Width: 1000' swaths at Craney Island; 2000' to 2500' swaths at Langley AFB designated spray areas
- h. System: SP2G – MASS ULV; Modules 1 and 2
- i. Nozzle Tips/Number/Orientation: 8008/8 oriented straight down for 2500' swaths; 8008/7 oriented straight down for 2000' swaths; 8008/5 oriented straight down for 1000' swaths; if temperatures are above 85 degrees use 8010/6 for 2500' swaths and 2 – 3 for 1000' swaths all oriented straight down.
- j. Aircraft Tail Number: 99106
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Mission Commander:** Major (b) (6)

6. Support required at Langley AFB has been requested via FAX message.

7. If you have any questions concerning this mission please contact DSN (b) (6) .

Chief, Aerial Spray  
757 AS/DOS (DSN 346-1531)

10 August 2001

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

SUBJECT: Langley AFB/Craney Island VA Aerial Spray Mission After Action Report

**1. PURPOSE:** The purpose of this mission was to spray the designated areas of Langley AFB and Craney Island VA for mosquito control (6-9 Aug 01). The designated areas to be sprayed were to be determined by the Langley AFB Entomologists/Pest Management Professionals.

**2. SPRAY EVENTS:**

**a. 5 Aug 01 (Sun):** The C-130 departed KYNG 1814Z and landed at KLFJ 2000Z. Aircraft Serial #909108, Mission ID: QZNRKA809217. A total of 1.8 hrs of Flight Time was logged.

**b. 6 Aug 01 (Mon):** One Spray Sortie was conducted over Langley AFB. (2100Z-0010Z). A total of 31 spray swaths were flown over 50,150 acres and 187 gallons of pesticides were applied. A total of 3.2 hrs Flight Time was logged.

**c. 7 Aug 01 (Tues):** One Spray Sortie was conducted over the designated areas of Langley AFB and Portsmouth VA. (2218Z-0039Z). A total of 16 spray swaths were flown over 15,360 acres and 60 gallons of pesticides were applied. A total of 2.4 hrs Flight Time was logged.

**d. 8 Aug 01 (Wed):** One Spray Sortie was conducted over Langley AFB VA. (2135Z-2340). A total of 13 spray swaths were flown over 39,936 acres, and 156 gallons of pesticides were applied. A total of 2.1 hrs Flight Time was logged.

**e. 9 Aug 01 (Thurs):** One Spray Sortie was conducted over the designated areas of Portsmouth and Poquoson Counties VA. A total of 11 spray swaths were flown over 6,912 acres, and 27 gallons of pesticides were applied. A total of 2.0 hrs Flight Time was logged.

**f. 10 Aug 01 (Fri):** The mission was completed and the C-130 departed KLFJ 1400Z, arriving at KYNG 1530Z.

**g.** The DGPS was used throughout the mission and proved invaluable as we went from one designated spray target to the next.

**3. TRAINING.**

**a. Pilot Training.** Maj (b) (6) received currency ULV and LV training.

**b. Nav Training.** Capt (b) (6) received his first LFI orientation and survey flight over the targeted areas before actually performing the spray mission.

**c. Flight Engr Training.** SMS (b) (6) received recurrent training.

d. Loadmaster/Spray Operators Training. MSG (b) (6) , TSG (b) (6) and TSG (b) (6) received Spray Operator's/Loadmaster qualification training.

e. Spray Maintenance personnel wore their PPE during this mission with no problems and received continuous spray maintenance qualification training.

**4. QUARTERS/TRANSPORTATION:** Quarters were fine. Transportation was well coordinated.

(b) (6) , Major, USAFR  
Chief, Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 2-5 SEPTEMBER 2003

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander:
- (2) Pilots:
- (3) Navigators:
- (4) Flight Engineers:
- (5) Spray Operators:

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) , TSG (b) (6) , SSG (b) (6) , TSG (b) (6)
- (2) Crew Chief(s):
- (3) Avionics:

##### c. Entomologists/Ground Support: Maj (b) (6) , Capt (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 2 SEP (Tuesday)

0730: Show at KYNG  
0930: Depart KYNG  
1200: Land KRDR/Safety Briefing  
1430: In-brief

##### 3 SEP (Wednesday):

0611: Sunrise  
1630: Show time  
1830: Take off KRDR (Adulticide Spray Sortie)  
2056: Sunset

##### 4 SEP (Thursday):

0612: Sunrise  
1630: Show time  
1830: Take off KRDR (Adulticide Spray Sortie)  
2055: Sunset

##### 5 SEP (Friday):

TBA: Out-brief  
1100: Take Off KRDR  
1500: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder, 1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries, Kodak Camera
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

4. **PPR:** 0730-01

5. **RADIO FREQUENCIES:** Air To Ground Primary 392.2; VHF 123.45  
KRDR Tower 124.9 V; Grand Forks Int'l 118.4 V

### 6. CONFIGURATION: SP2G

- a. **System:** 2-Module System/Stainless Steel ULV Wing Booms and Fuselage Booms
- b. **Nozzle Tips/Orientation:**  
ULV (adulticide): 8008 TeeJet oriented straight down  
Larvicide: Raindrop nozzles straight back
- c. **Number:**  
ULV: wing only, 8 8008s total (4 each side)  
Larvicide: fuselage only, 10 total (5 each side) straight back
- d. **Booms:** Full Wing and fuselage
- e. **Aircraft:** #9107
- f. **Mission Identifier:** QZNRKA243217

### 7. SPRAY PARAMETERS:

- a. **Adulticide**
  - (1) **Area to be treated:** 40,000 acres (Approximately)
  - (2) **Altitude:** 150' for Adulticide application
  - (3) **Swath Width.** 2000 feet for ULV or as determined by the PMP
  - (4) **Flow Rate.** 4.35 gallons/minute ULV
  - (5) **Application Rate.** 0.60 oz/acre Trumpet, ULV
  - (6) **Ground Speed:** 200 Knots
- b. **Larvicide**
  - (1) **Area to be treated:**
  - (2) **Altitude:** 100' for Larvicide application
  - (3) **Swath Width.** 200 feet
  - (4) **Flow Rate.** 186 gallons/minute
- c. **Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)
- d. **Ground Speed:** 200 Knots

### 8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)

- a. **Composition of each Gallon:**
  - (1) 0.375 ounces of Altosid® 20
  - (2) 0.08 ounces of Control® drift retardant
  - (3) Water
- b. **Typical load:** (2 tanks of 450 gallons each)
  - (1) Fill with 445.3 gallons of water/tank. Total water in tanks = 890.6 gal.
  - (2) Total water added = 890.6 gallons
  - (3) Add 1.32 gallons of Altosid® per tank (2.64 gallons total).
  - (4) 3.375 gal AirexDC per tank (6.75 Gal total) while agitating approximately 15 min
  - (5) Total quantity mix. 903 gallons

**c. Final Load for complete flush**

- (1) Fill tanks with the amount of water necessary for a proper system flush

**d. Mixing Instructions:**

SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

**9. TRANSPORTATION: 2 Vans & 1 Staff provided by 319 CES**

**10. CONTACTS:**

**a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

- (1) **Base Operations:** (b) (6) Airfield Manager or 1 LT (b) (6) DSN (b) (6)

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 5-10 Aug 2002
- c. Purpose of Application: Control nuisance and vector mosquitoes
- d. Application Dates: 7 Aug 02 & 9 Aug 02
- e. Time/s of Application (Local): 1910-2120 (7 Aug); 1930-2100 (9 Aug)
- f. Acres Treated: 13,226 (7 Aug); 17,120 (9 Aug)
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Environmental Officer, DSN (b) (6) and (b) (6), NCOIC Pest Management Shop, DSN (b) (6)
- h. Date Spray Map Last Approved: 5 Aug 02
- i. Installation In-Briefing: (When/Where/Briefer/s): CE Conference Room, LtC (b) (6), Maj (b) (6), (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LtC (b) (6)
- b. Certified PMP/s (Category 11): Maj (b) (6), Capt (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: Maj (b) (6)
  - (2) Pilot(s): LtC (b) (6) Maj (b) (6)
  - (3) Navigator: LtC (b) (6)
  - (4) Flight Engineer: SMS (b) (6)
  - (5) Spray Operators: CMS (b) (6) (b) (6) MSG (b) (6) (b) (6) TSG (b) (6) (b) (6)
- d. Safety Briefer: Capt (b) (6)
- e. Spray Maintenance: MSG (b) (6) (b) (6) TSG (b) (6) (b) (6) SSG (b) (6) (b) (6)
- f. Spray Ground Monitors: Maj (b) (6) (b) (6) Capt (b) (6) (b) (6)
- g. Crew Chiefs: MSG (b) (6) (b) (6) SRA (b) (6) (b) (6)
- h. Avionics: MSG (b) (6) (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 2 sorties/ 4.4 hours
  - (2) Ferry Sorties/Hours: 2 sorties/6.3 hours

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-548127
- c. Gallons Pesticide Loaded: 90 (7 Aug); 75 (9 Aug) Trumpet® EC
- d. Gallons Pesticide Applied: 62 (7 Aug); 103 (9 Aug) Trumpet® EC
- e. Gallons and Name of Flush Used: 48 gallons water
- f. Other Additives Used: none
- g. Application Rate: 0.6-0.7 oz/acre Trumpet® EC

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 909106 Mission Identification # QZNRKA243217
- b. Spray System (Modules Used) and System ID #: Modules 1 and 2 of SP2G ULV
- c. Spray System Configuration: 2-Module System/Stainless Steel Wing & Fuselage Booms
- d. Nozzle Number & Orientation Used: 8 nozzles (8008); straight down
- e. Pressure (PSI): 60 (7 Aug); 35-50 (9 Aug)
- f. Flow Rate: 4.35 gallons/minute 2000' swaths; 3.3 gallons/minute 1500' swaths

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1500' (7 Aug); 2000' (9 Aug)
- b. Spray Off Set: 4000' (7 Aug); 2000' (9 Aug)
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - 1) Ground: 150-168°/6-8 knots (7 Aug); 160-180°/3-6 knots (9 Aug)
  - 2) Release Altitude: 150-168°/12 knots;
- b. Temperature (Degrees Fahrenheit): 84-78°
- c. Cloud Cover: cloudy
- d. Relative humidity: 60-64%
- e. Source: Direct observation

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Validation of spray area:
  - (1) Technique/Used: PMP onboard aircraft verified spray area
- b. Effectiveness:
  - (1) Technique/s Used: Trapping of mosquitoes by Public Health and 757 AS personnel
  - (2) Results: Significant decrease in mosquito activity following application

**8. REMARKS:**

This was a regularly scheduled application at Grand Forks AFB to control adult mosquitoes. However, West Nile Virus has recently been confirmed in Grand Forks County by the death of two horses and one crow (8 Aug). West Nile Virus is an encephalitis which naturally infects birds but can also be transmitted to humans. Such infections have resulted in at least 15 deaths in the U.S. since the virus was first detected in New York in 1999. Adverse weather conditions prevented sprays on the 6<sup>th</sup> & 8<sup>th</sup> of August, but successful sprays were completed on 7 & 9 August. Mosquito trapping is carried out at 4 locations on base and by the City of Grand Forks. Concrete results are pending the next trap collection counts but are expected to be quite favorable based on a single trap managed by 757<sup>th</sup> entomologists, which showed a 90% reduction in mosquitoes collected before and after the 7 Aug spray.

(b) (6)

(b) (6), Capt, USAFR  
Certified Pest Management Professional

31 July 2002

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft Available 5 August 2002 (A/C #9107, MSN ID: QZNRKA243217)

**3. Concept of Operations:**

**5 August (Monday)**

0730: Show at KYNG  
0930: Depart KYNG  
1200: Land KRDR/Safety Briefing  
1430: In-brief

**6 August (Tuesday):**

0611: Sunrise  
1630: Show time  
1830: Take off KRDR (Adulticide Spray Sortie)  
2056: Sunset

**7 August (Wednesday):**

0612: Sunrise  
1630: Show time  
1830: Take off KRDR (Adulticide Spray Sortie)  
2055: Sunset

**8 August (Thursday):**

0614: Sunrise  
1630: Show time  
1830: Take off KRDR (Adulticide Spray Sortie)  
2053: Sunset

**9 August (Friday):**

0615: Sunrise  
1630: Show time  
1830: Take Off KRDR (Adulticide Spray Sortie)  
2051: Sunset

**10 August (Saturday) (Time permitting Schedule for Larvicide Spray Sorties)**

0616: Sunrise  
TBA: Show time To be determined by PMP or Mission Commander  
TBA: Take off KRDR

2050: Sunset  
**11 August (Sunday)**  
TBA: Out-brief  
1100: Take Off KRDR  
1500: Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 150' AGL for Adulicide swath when no trees are present.
- b. **Swath Width.** 2000 feet for ULV or as determined by the PMP
- c. **Flow Rate.** 4.35 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet<sup>®</sup>), ULV
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 40,000 acres

**5. Mission Commander:** Lt Col (b) (6)

**6. Aircraft Commander:** Lt Col (b) (6)

**7.** Support required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator (b) (6), DSN (b) (6).

**8.** HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

(b) (6), Major, USAFR  
Aerial Spray Operations Scheduler

30 October 2001

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497-0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray of Musk Thistle Weed at Smoky Hill Air National Guard Range, Salina KS.

1. Purpose/Objective/Benefit: To control musk thistle weed at the Smoky Hill ANGR KS, to improve grazing areas, to eliminate the Range as a source of infestation to neighboring farms from wind-blown musk thistle seeds and to support state and local noxious weed control efforts.
2. Capability. Spray Aircraft Tail Number 99106 Available 5-11 November 2001
3. Concept of Operations:
  - a. 5 Nov 01 (Monday):
    - 1200 Take Off YARS
    - 1445 Land Salina Airport KS
  - b. 6 Nov 01 (Tuesday): (Two spray sorties planned)
    - 0700 Take-Off
    - 0703-1100 Range Time (CSAR Exercise 1100-1500)
  - c. 7 Nov 01 (Wednesday): (Two spray sorties planned)
    - 0700 Take Off
    - 0704-1100 Range Time (CSAR Exercise 1100-1500)
  - d. 8 Nov 01 (Thursday): (One or two spray sorties planned)
    - 0700 Take-Off
    - 0705-1100 Range Time (CSAR Exercise 1100-1500)
  - e. 9 Nov 01 (Friday): WX Day/Flush Day
    - 0700 Take-Off YNG
    - 0706-1100 Range Time (CSAR Exercise 1100-1500)
  - f. 10 Nov 01 (Saturday): WX Day/Clean-Up/Pack
    - 0700 Take-Off
    - 0707-1100 Range Time (additional range times available on case-by-case basis)
  - g. 11 Nov 01 (Sunday):
    - 0730 Show Time
    - 0900 Take-Off

1345 Land KYNG

4. Spray Parameters:

- a. Acreage: 4,608 Acres (approximately) (Only areas determined by PMP)
- b. Altitude: 100' AGL
- c. Ground Speed: 200 Knots
- d. Swath Width: 330 Feet
- e. Pesticide: Tordon® 22K
- f. Flow Rate: 307 Gallon/Minute
- g. Application Rate: 2 Gal spray/Acre (water with 1 Oz Control® & 10 Oz Tordon® 22K)
- h. Deploy: 3.4 Hrs
- i. Re-Deploy: 2.8 Hrs
- j. Spray Time: 10 Hrs (or as called by PMP)

5. Mission Commander:

- a. 5 - 11 Nov 01: Lt Col (b) (6)
- b. Certified Pest Management Professional(s): LtC (b) (6) and LtC (b) (6)

6. Support required at Smoky Hill ANGR KS has been coordinated with MSG(b) (6), Smoky Hill ANGR Spray Coordinator, DSN (b) (6), (b) (6) and Lt Col (b) (6), Range Commander, DSN (b) (6).

7. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616 or DSN 346-1161, ATTN: 757 AS/DOS.

0700: Take Off KSLN

0707-1100: Range time (additional range times available on case-by case basis)

0900: Land KSLN

**11 NOV (Sunday):**

0708: Sunrise

0730: Show time

0900: Take Off KSLN

1345: Land KYNG

**3. ITEMS TO TAKE:**

**a. Mission Commander:** Hand Held GPS, 1 Cellular Phone

**b. Entomologist:** 1 Cellular Phone, Wind Gauge, 2 Compasses, 1 UHF Radio, Kodak Camera, Pest Safety Binder, 2 Signal Mirrors, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries

**c. Navigator:** Maps/Map Bag, Validation Map, 1 Panasonic Computer

**d. Spray Operator:** Safety Gear, Calibration Tables

**e. Spray Maintenance:** Deployment Kit, Stake Bed Truck, Support Equipment, Control®

**4. NOTIFICATION NECESSARY FOR THIS MISSION:** None Required.

**5. PARKING PLAN:** Highway Patrol Ramp (by the Civil Air Patrol Hangar).

**6. RADIO FREQUENCIES:**

**a. Air To Ground:** Primary 392.2

**b. Salina:** CTAF: 119.3, UNICOM: 122.95, ATIS: 120.15, TWR: 119.3 / 257.7, GND: 121.9 / 397.9, NG OPS: 49.95 / 304.6

**c. Smoky Hill:** Primary 316.9, Secondary 304.9; Victor Freq: 139.7

**7. IN-BRIEFING:** Upon Arrival.

**8. SPRAY CONFIGURATION:**

**a. System:** SP-3G

**b. Nozzle Tips/Orientation:** 8070 Flat Fan TeeJet/90° straight back

**c. Number:** Wing. 68 Total (34 each side)/Fuselage. 16 Total (8 each side) with 3" restrictor

- d. **Booms:** Full Wing and Fuselage Booms
- e. **Aircraft:** 106 **Mission Identifier:** QZNRKA201309
- f. **Profile:** Planned LV Profile

## 9. SPRAY PARAMETERS:

- a. **Altitude:** 100' AGL
- b. **Swath Width.** 330 feet.
- c. **Flow Rate.** 307 Gallons/Minute (approximately 4,608 acres to be sprayed)
- d. **Application Rate.** 2 Gal spray/Acre (water with 1 Oz of Control® & 10 Oz of Tordon®)
- e. **Ground Speed:** 200 Knots

## 10. SPRAY MIXING AND LOADING:

- a. **Composition of Each Gallon:**
  - (1) 5 Ounces of Tordon® 22K
  - (2) 0.08 Ounces of Control® Drift Retardant
  - (3) Water
- b. First Load (4 Tanks of 443.3 Gallons Each + Sump of 70 Gallons)
  - (1) Fill to 425.05 Gallons of Water/Tank using the pump on the water tanker truck.  
This is done by putting the filler hose into the rear tank with all tanks open to the common sump.  
Total water in tanks = 1700.2 Gal.
  - (2) 70 Gallons of Water in Sump
  - (3) Total Water Added = 1,770.2 Gallons
  - (4) Upload 18 Gallons of Tordon® 22K/Tank (72 Gallons Total for 4 Tanks) with the ULV uploading system.
  - (5) Add 1 Quart of Control®/Tank while agitating approximately 15 min  
(1 Gallon total for four tanks)
  - (6) Total Quantity Mix. 1843.2 Gallons
- c. Subsequent Loads (4)
  - (1) Fill to 442.55 Gallons of Water/Tank. Total Water = 1770.2 Gal
  - (2) Add 18 Gallons of Tordon 22K/Tank. Total Tordon 22K = 72 Gal
  - (3) Add 1 Quart of Control/Tank. Total Control = 1 Gal
  - (4) Total quantity Mix. 1,843.2 Gallons (does not include 70 Gal already mixed in Sump)
- d. **Mixing Time/Load.** Agitate by recirculating each mix for approximately 15 minutes.

## 11. SPRAY MONITORING OR TESTING: Performed by the CPMPs

### NOTES:

- Ideal to have westerly wind to spray west boundary.
- Ideal to have easterly wind to spray east boundary.
- (November winds expected to be predominately from the north)

## 12. CONTACTS:

- a. **Quarters:** JTR Rate Lodging/\$55 Meals/\$28
  - **Fairfield Inn \$55+tax, (785) 823-6900 FAX (785) 823-0996**

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. **Installation Sprayed:** Smoky Hill ANGR, Salina KS
- b. **Mission Duration:** 5-11 Nov 01
- c. **Purpose of Application:** Management of Musk Thistle on ANGR.
- d. **Application Date/s:** 6,7,9,10 Nov 01  
**Time/s of Application (Zulu):** 1300-1335 and 1355-1516 (6 Nov); 1315-1505 (7 Nov); 1405-1510 and 1600-1715 (9 Nov); 1515-1546, 1325-1440 and 1550-1725 (10 Nov)
- e. **Acres Treated:** 4572 (See attached map)
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** MSG (b) (6), Aerial Spray Coordinator, Smoky Hill ANGR, DSN (b) (6), x110; LTC (b) (6), LTC (b) (6)
- g. **Date Spray Map Last Approved:** 5 Nov 01
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 0630, 6 Nov 01; Smoky Hill ANGR; LTC (b) (6)

## 2. OPERATIONAL:

- a. **Mission Commander:** LTC (b) (6)
- b. **Certified PMP (Category 11):** LTC (b) (6), LTC (b) (6)
- c. **Aircrew:**
  - (1) Aircraft Commander: Pilot: LTC (b) (6)
  - (2) Co-Pilot: CAPT (b) (6)
  - (3) Navigator: MAJ (b) (6) (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6), MSG (b) (6)
- d. **Safety Briefer:** LTC (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** TSG (b) (6); TSG (b) (6), SSG (b) (6), SMS (b) (6)
- f. **Spray Ground Monitors:** LTC (b) (6), LTC (b) (6)
- g. **Crew Chief(s):** MSG (b) (6), MSG (b) (6)
- h. **Avionics:** SMS (b) (6)
- i. **AGE:** TSG (b) (6)
- j. **Security Force:** TSG (b) (6), TSG (b) (6), SRA (b) (6), SRA (b) (6)
- k. **Flying Data:**
  - (1) Spray Sorties/Hours: 2/2.0 (6 Nov); 1/1.8 (7 Nov); 2/2.2 (9 Nov), 2/2.9 (10 Nov)
  - (2) Ferry Sorties/Hours:
    - (a) Spray A/C 899106 Ferry Sorties/Hours: 1/3 (5 Nov); 1/2.8 (11 Nov)
    - (b) Support A/C 899102 Sorties/Hours: 1/3 (5 Nov); 1/2.8 (11 Nov)

## 3. PESTICIDE:

- a. **Trade Name (% Active Ingredient):** Tordon® 22K
- b. **EPA Registration Number:** 62719-6
- c. **Formulation Sprayed:** Tordon® 22K mixed with water and Control®
- d. **Gallons Pesticide Loaded:** 9,214 gal of Tordon® 22K/water loaded (357 gal Tordon® 22K)
- e. **Gallons Pesticide Applied:** 357 gallons
- f. **Gallons and Name Diluent Used:** 8,854.5 gallons of water
- g. **Gallons and Name of Flush Used:** 595 gallons of water & 5 gallons Remove®
- h. **Other Additives Used:** 2.5 gallons of Control®
- i. **Application Rate:** 2 gallons spray/acre (water with 0.03 oz. of Control® & 10 oz. of Tordon®)

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** 899106
- b. **Spray System (Modules Used) and System ID #:** 3-Module system
- c. **Spray System Configuration:** Full Wing and Fuselage Booms
- d. **Nozzle Type/Size:** 8070 Flat Fan TeeJet®
- e. **Nozzle Orientation & Number Used:** 68; Wing: 34 each side;  
Fuselage: 16 (8 each side) with 3" Restrictor
- f. **Pressure:** 40 PSI
- g. **Flow Rate:** 307 GPM

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 330'
- b. **Spray Off Set:** 990' (6 Nov); 1220' (7 Nov); 660' (9 Nov); 330' (10 Nov)
- c. **Spray Release Altitude:** 100'
- d. **Ground Speed:** 200 Knots

**6. WEATHER OBSERVATIONS:**

**(Ground Wind Direction (degrees)/Speed (knots)/Temperature °F/Humidity %/Cloud Cover %)**

- a. **6 Nov:** 190/7-8 with gusts to 10 at beginning; 12 gusts to 15 at end of spray/61/76/0
- b. **7 Nov:** 200/7-11/53/68/10
- c. **9 Nov:** 140/4-6.5/35/56/0 first sortie; 140/5-8/52/33/0 second sortie
- d. **10 Nov:** 245/4/42/54/0 first sortie; 260/4/54/33/0 second sortie

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Pattern:**
  - (1) Technique/s Used: Ground Observation
  - (2) Results: Spray off-set determined each day
- b. **Effectiveness:**
  - (1) Technique/s Used: Visual field observations
  - (2) Results: (See Remarks)

- 8. REMARKS:** Results will be determined during the next growing season in the Spring of 2002 for musk thistle. The upwind wing boom and fuselage booms were used for application. The downwind wing boom was not used.

**CERTIFIED PEST MANAGEMENT PROFESSIONAL**

(b) (6) , PhD, Lt Col, USAFR

Filename: d:\mydocuments\reports\smoky\5-11 Nov 01 PMP Report

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

5-10 August 2001

**Purpose/Objectives/Benefits:** Control nuisance and vector mosquitoes in order to improve working conditions for members operating at Langley AFB and Craney Island VA.

### 1. 910 AW PARTICIPANTS:

#### a. Aircrew:

- (1) Mission Commander/Co-Pilot: Maj (b) (6)
- (2) Aircraft Commander/Pilot: Maj (b) (6)
- (3) Navigator: Capt (b) (6), LtC (b) (6) (6-10)
- (4) Flight Engineer: MSG (b) (6), SMS (b) (6)
- (5) Spray Operator: MSG (b) (6), TSG (b) (6),  
MSG (b) (6), TSG (b) (6)

#### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6), MSG (b) (6), TSG (b) (6), TSG (b) (6)
- (2) Crew Chief: TSG (b) (6), TSG (b) (6)
- (3) Avionic: TSG (b) (6)

#### c. Ground Support/CPMP: Lt Mark (b) (6) <sup>(b)</sup> & Maj (b) (6)

### 2. SCHEDULE: (All times Local)

#### 5 AUG (Sunday):

1030: Show at KYNG  
1330: Depart KYNG  
1500: Land KLFI  
1515: Safety Briefing

PPR # 0805TM01

#### 6 AUG (Monday):

1000: Morning meeting with Craney Island personnel in the Pest Control Work Shop  
1100: In-Briefing with Langley CE personnel  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Depart KLFI  
2000: Land KLFI  
2007: Sunset

#### 7 AUG (Tuesday):

1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Depart KLFI  
2000: Land KLFI  
2006: Sunset

#### 8 AUG (Wednesday):

1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Depart KLFI  
2000: Land KLFI  
2005: Sunset

#### 9 AUG (Thursday):

1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Depart KLFI  
1915: Enhanced Flush & Purge  
2000: Land KLFI  
2004: Sunset

#### 10 AUG (Friday):

0830: Report  
0900: Out-Briefing  
1000: Depart KLFI  
1130: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Entomologist:** Cellular Phones, Wind Gauge, Compass, UHF Radio, Pest Safety Binder, Signal Mirrors, Satloc Ground Tracker
  - b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
  - c. **Spray Operator:** Safety Gear, Calibration Tables
  - d. **Spray Maintenance:** Deployment Kit
4. **NOTIFICATION NECESSARY FOR THIS MISSION:**
  - a. **Langley Tower:** DSN 574-5326 (Contacted, DSN 574-2508)
  - b. **Langley Base Ops:** DSN 574-2504 (Contacted)
5. **PARKING PLAN:** as directed.
6. **RADIO FREQUENCIES:**
  - a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
    - (1) Ops phone 878-3588
    - (2) Tower phone 878-3530
    - (3) Flight Service 122.2
  - b. **Newport News-Williamsburg Int:** (Operating Hours 1000Z-0200Z)
    - (1) Ground - **121.9 or 348.6** (phone 877-0221 ops)
    - (2) Tower – **118.7 or 280.1** (phone 877-2962)
    - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
    - (4) CTAF – **118.7**
  - c. **Langley AFB:** Tower OIC MSG (b) (6) ; Lt(b) (6) 1st OSS SQ (23665)
    - (1) Tower - **125.0 or 253.5** (phone 4-5326)
    - (2) Ground - **121.7 or 275.8**
    - (3) Clearance – **118.85 or 271.3**
    - (4) Metro - **239.8**
  - d. **Norfolk NAS (Chambers Fld): Tower - 124.3, 126.375, 340.2, 318.7**
  - e. **Spray Ground: Primary 392.2 / 308.6** Secondary
7. **IN-BRIEFING:** Required; IAW the schedule above or as determined by PMP.
8. **SPRAY CONFIGURATION:**
  - a. **System:** SP2G - MASS ULV; Modules 1 and 2
  - b. **Nozzle Tips/Orientation:** 8 8008's for 2500' swaths; 7 8008's for 2000'; and 5 8008's for 1000' swaths (temperatures above 85 degrees then use 8010's – 6 for 2500' swaths and 2 or 3 for 1000' swaths); All oriented down.
  - c. **Aircraft:** 99108
9. **SPRAY PARAMETERS:**
  - a. **Altitude:** 150' AGL depending upon weather conditions
  - b. **Ground Speed:** 200 KNOTS
  - c. **Pesticide:** Dibrom® Concentrate
  - d. **Application Rate:** 0.5 Ounce/Acre
  - e. **Flow Rate:** 1.8 Gallons/Minute at Craney Island; 4.5 Gallons/Minute for 2500' swaths; 3.6 Gallons/Minute for 2000' swaths on the Peninsula
  - f. **Acreage:** Approximately 114,000 Acres
  - g. **Swath Width(s):** 1,000 Feet at Craney Island; 2,000 to 2,500 Feet at Langley AFB areas
10. **PESTICIDE LOADING:**
  - a. **How Much Pesticide:** Approx 460 Gallons required for 114,000 acres; daily amounts vary
  - b. **Where:** Aero Club Ramp
  - c. **When:** 1430 Hours each day
  - d. **Furnished by Installation:**
    - (1) Pesticide
    - (2) Loading Equipment/Crew
    - (3) Hazardous Waste Disposal
    - (5) Two B-5 or B-1 Stands

**11. SPRAY MONITORING OR TESTING:**

The local mosquito control districts will put out cages of live mosquitoes and oil-sensitive cards to monitor the control. Trap data and biting count data will be collected pre- and post-spray by LFI and the mosquito control districts' personnel to determine spray effectiveness.

**12. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

2 Sep 05

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: **CHANGE 1.** Capability and Concept of Operations for Aerial Spray at Parris Island MCRD SC for Control of Sand fly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes..

2. Capability: Spray Aircraft 89-9107 available on 6-8 Sep 05

3. Concept of Operations:

**6 Sep (Tuesday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

1000: Show Time  
1200: Take off KYNG  
1400: Land KNBC  
1415: Safety Briefing  
1530: Load Chemical/Wx Decision  
1700: Take off KNBC  
1939: Sunset

**7 Sep (Wednesday):** Wx back up or redeploy to YNG

1500: Showtime  
1530: Load Chemical/Wx Decision  
1700: Take off KNBC  
1939: Sunset

**8 Sep (Thursday):** Return YNG

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate
- d. Deploy: 2.0 Hrs
- e. Re-Deploy: 2.0 Hrs
- f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Maj (b) (6)

6. Mission Commander: Maj

7. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator (b) (6) DSN (b) (6)

// SIGNED //  
(b) (6), Major, USAFR  
Chief of Aerial Spray

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **PARRIS ISLAND MCRD, SC**

### **6-8 Sep 2005**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Pilots: MC-MAJ (b) (6) , MAJ (b) (6)
- (2) Navigators: MAJ (b) (6)
- (3) Flight Engineers: CMS (b) (6) , SMS (b) (6)
- (4) Spray Operators: MSG (b) (6) , MSG (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , TSG (b) (6)
- (3) Avionics: MSG (b) (6)

##### **c. Pest Management Professionals/Entomologist:** CPT (b) (6)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car keys and vehicles at Base Ops.

#### **2. PPR REQUIREMENTS: 24901**

#### **3. PLANNED SEQUENCE OF EVENTS:** (All times local)

**6 Sep (Tuesday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

1000: Show Time  
1200: Take off KYNG  
1400: Land KNBC  
1415: Safety Briefing Rifle Range Clear  
1530: Load Chemical/Wx Decision  
1700: Take off KNBC  
1939: Sunset

**7 Sep (Wednesday):** Wx back up or redeploy to YNG Rifle Range Live Fire starting 2000L

1500: Showtime  
1530: Load Chemical/Wx Decision  
1700: Take off KNBC  
1939: Sunset

**8 Sep (Thursday):** Return YNG

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

#### **4. ITEMS TO TAKE:**

##### **a. Mission Commander:**

- (1) 14 Rooms reserved at Hampton Inn, ensure no rooms charged on Current Ops Credit card.

##### **b. Entomologist/CPMP:**

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) DGPS Computers & Maps

##### **c. Navigators:**

- (1) Maps

(2) Templates

d. **Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

5. **SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** Open for ULV spray; 8 8005's oriented straight down (4 per side)
- c. **Differential GPS:** Installed
- d. **Aircraft:** 89-9107
- e. **Mission Identifier:** QZNRKA911249

6. **SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 2.72 gallons/Minute

7. **AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission. Depending on coverage we will likely have some material left over. Spray maintenance will download; save for next mission.

8. **PARKING PLAN:** Beaufort MCAS Ramp

9. **AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 118.8 CTAF  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

10. **TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

11. **SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

12. **CONTACTS:**

# Ellington Field/Galveston Texas Oil Spill Response Exercise

## AERIAL SPRAY OPERATIONAL SCHEDULE

**6-9 Nov 06**

**PURPOSE/OBJECTIVE:** Oil spill emergency response exercise and training with the Texas General Land Office, NOAA, USCG and MSRC.

### 1. 910 AW PARTICIPANTS:

#### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6)
- (2) Pilots: MAJ (b) (6), CAPT (b) (6), 1LT (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: , MSG (b) (6), MSG (b) (6), MSG (b) (6)  
(b) (6)

#### b. Spray Maintenance:

- (1) Spray Maintenance: TSG (b) (6), TSG (b) (6), TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6), TSG (b) (6)

#### c. CPMP: MAJ (b) (6), MAJ (b) (6)

#### d. Public Affairs: TSG (b) (6)

### 2. SCHEDULE: (All times Local)

#### 6 NOV (Monday):

1300: Show Time  
1500: Depart KYNG  
1900: Land KEFD

#### 7 NOV (Tuesday):

0800 Pilot Brief/planning  
1000 T/O EFD practice sortie  
1200 Land EFD  
1400-1600 Media events

#### 8 NOV (Wednesday):

0900: Show Time  
1145: Depart KEFD  
1200-1300 Oil Spill Response exercise  
1400: Land KEFD

#### 9 NOV (Thursday):

0800: Debrief, USCG, MSRC, and other participants  
1030 Show at KEFD  
1200 Depart KEFD  
1800 Arrive KYNG

**3. PARKING PLAN: Aircraft will park at Southwest FBO.**

**4. IN-BRIEFING:** Safety Brief upon landing, air operations plan brief to be determined but should take place Tues. evening,

**5. COMMUNICATIONS PLAN:**

TBD Upon Arrival with other members

**VHF** 143.85 / 142.6

**UHF** 349.35 / 305.225

**HF** 6872.35 / 9262.35

**6. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 909107
- c. Mission Identifier: QZNRKA220310

**7. SPRAY PARAMETERS:**

- a. Altitude: 100' AGL
- b. Ground Speed: 200 Knots (338 feet/second)
- c. Simulant: Water/Dyed Water
- d. Application Rate: 5 Gal/Acre
- e. Flow Rate. 307.0 GPM
- f. Nozzles – 16 Raindrop nozzles oriented straight back (eight per side); fuselage booms.
- g. Number of passes – approximately 3 passes requested for the exercise. All material must be sprayed from the tanks and flushed with water.

**8. LOADING:**

a. Plan to load 600 gallons of water. Additionally 1 gallon of Rhodamine will be provided by Texas A&M University and loaded at Ellington Field. Contact Ellington Fire Department upon arrival to coordinate water upload.

**b. Furnished by Installation:**

- (1) Power cart
- (2) B1 Stand

**9. TRANSPORTATION: ENTERPRISE RENTAL CAR AGENCY-pick up at Base Ops**

- #713452 confirmation, 2 minivans \$69.99 and 4 Full Size \$49.99 per day

281-922-6857, (b) (6) (Sp?)

- (b) (6) FS

    - Mission Commander (b) (6)
    - PMP Ground Support (b) (6)
    - Spray Maintenance (b) (6)
    - (b) (6) cell (b) (6)

Location of exercise. The location of the exercise will be at 29011.1'N latitude by 94045.6'W longitude. This would put us 6 miles off the beach, 5 miles from the nearest platform, and 10 miles SW of the channel. This position is also 2.5 miles outside the fairway anchorage so we should be clear of any ships that might be anchored offshore.

757 AIRLIFT SQUADRON  
3976 KING GRAVES RD UNIT 26  
VIENNA OH 44473-5926

26 OCT 2006

MEMORANDAM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Oil Spill exercise 6-9 NOV 2006

1. **Objective/Purpose/Benefit:** Oil spill response exercise and training 7-9 NOV 2006 with Texas Land Company in association with Marine Spill Response Corporation, US Coast Guard and Texas A&M University operating out of Ellington Field, TX. The 757AS will be participating in an aerial spray oil spill exercise performing High Volume (HV) spray sorties on 8 NOV 06 simulating an oil spill located off of the Gulf Coast of Texas.
2. **Capability:** Spray Aircraft 89-9106, Available 6-9 Nov 06.
3. **Concept of Operations:**
  - 6 NOV (Monday):
    - 1300: Show Time
    - 1500: Depart KYNG
    - 1900: Land KEFD
  - 7 NOV (Tuesday):
    - 1300-1700 Oil Spill exercise planning meeting and Media events
  - 8 NOV (Wednesday):
    - 0930: Show Time
    - 1130: Depart KEFD
    - 1200-1300 Oil Spill Response exercise
    - 1400: Land KEFD
  - 9 NOV (Thursday):
    - 0800: Debrief, USCG, MSRC, and other participants
    - 1030 Show at KEFD
    - 1200 Depart KEFD
    - 1800 Arrive KYNG
4. **Spray Parameters:**
  - a. Nozzles – Raindrop nozzles oriented straight back.
  - b. 8 (16 total) on each fuselage boom; evenly spaced.
  - c. Booms – fuselage only
  - d. Airspeed – 200 knots ground speed.
  - e. Altitude – 100 feet above water.
  - f. Application Rate – 5 Gal/Acre
  - g. Flow Rate – 225 Gal/Min
  - h. Spray – 600 gallons water combined with 1 gal Rhodamine
  - i. Number of passes – 3 per sortie. Do not decrease flow rate in order to increase passes.
  - j. Pressure – 40 psi
5. **Mission Commander:** Maj (b) (6)
6. **Aircraft Commander:** Capt (b) (6) Maj (b) (6)
7. Any questions concerning this mission please contact the Aerial Spray Office, DSN (b) (6)

Assistant Chief Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 6-9 OCT 2003

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: LTC (b) (6) , LTC (b) (6)
- (3) Navigators: LTC (b) (6)
  - (a) Flight Engineers: MSG (b) (6)
  - (a) Spray Operators: MSG (b) (6) , TSG (b) (6) , TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6) , TSG (b) (6) , SSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , TSG (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Pest Management Professionals/Entomologist: LTC (b) (6) , CPT (b) (6) (in place), (b) (6)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car

#### 2. PLANNED SEQUENCE OF EVENTS: (All times local)

##### 5 Oct (Sunday):

- 1300: Show Time
- 1500: Take off KYNG
- 1830: Land KNBC **PPR # 278-01**
- 1900: Safety Briefing

##### 6 OCT (Monday): see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

- 1300: Show Time
- 1400: Load Chemical
- 1600: Take off KNBC
- 1801: Sunset

##### 7 OCT (Tuesday):

- 1300: Show Time
- 1400: Load Chemical
- 1600: Take off KNBC
- 1800: Sunset

##### 8 OCT (Wednesday):

- 1300: Show Time
- 1400: Load Chemical
- 1600: Take off KNBC
- 1859: Sunset

##### 9 OCT (Thursday):

- 0800: Show Time
- 1000: Take off KNBC
- 1200: Land KYNG

**3. ITEMS TO TAKE:**

**a. Entomologist/CPMP:**

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) DGPS Computers & Maps
- (5) Oil Sensitive Papers
- (6) Trackstar Equipment

**b. Navigators:**

- (1) Maps
- (2) Templates
- (3) Laptop Computer

**c. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**4. SPRAY CONFIGURATION: SP-2G**

- a. Mass:** 2-Module System (PI)
- b. Booms:** Stainless Steel ULV Wing Booms
- c. Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. Differential GPS:** Installed
- e. Aircraft:** 108; **Mission Identifier:** QZNRKA 019 293

**5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

**a. Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: HAN

**b. Application:** 1 Ounce Dibrom®/Acre

**c. Spray Altitude:** 150 Feet

**d. Swath Width:** 1,000 Feet

**e. Ground Speed:** 200 Knots (338 Feet/Second)

**f. Acreage:** 7,500 Acres

**g. Spray-On Time:** 16 Minutes

**h. Flow Rate:** 3.634 Gallons/Minute

**6. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission and 25 gallons HAN in flush tank.

**7. PPR REQUIREMENTS:** Required:

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**12. CONTACTS :**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 6-9 Oct 2003
- c. Purpose of Application: Biting Midge (*Culicoides* spp.) and Mosquito Control
- d. Application Date/s: 6 & 8 October 2003
- e. Time/s of Application (Local): 1705-1845 (6 Oct 03); 1810-1905 (8 Oct 03)
- f. Acres Treated: 7,301 (6 Oct 03); 4,139 (8 Oct 03)
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) ,  
Environmental/Spray Coordinator, DSN(b) (6)
- h. Date Spray Map Last Approved: 6 October 2003
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 6 Oct; Assistant Chief of Staff,  
Installation and Logistics, Capt (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: Maj (b) (6)
- b. Certified PMP/s (Category 11): Lt Col (b) (6) , Capt (b) (6)
- c. Entomologist: (b) (6)
- d. Aircrew:
  - Pilots: Lt Col (b) (6) , Lt Col (b) (6)
  - (2) Navigator: Lt Col (b) (6)
  - (3) Flight Engineer(s): MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- e. Safety Briefer: Lt Col (b) (6)
- f. Spray Maintenance: SMS (b) (6) , TSG (b) (6) , TSG (b) (6)(b) (6) TSG (b) (6)
- g. Spray Ground Monitor: Capt (b) (6)
- h. Crew Chiefs: TSG (b) (6) TSG (b) (6)
- i. Avionics: TSG (b) (6)
- j. Flying Data:
  - (1) Spray Sorties/Hours: 2 Sorties/3.2 Hrs
  - (2) Ferry Sorties/Hours: 2 Ferry(s)/4.3 Hrs

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: gal Dibrom<sup>®</sup> (6 Oct); 60 gallons (8 Oct) 30 gallons= 90 Total Gallons
- e. Gallons Pesticide Applied: 58 gal (6 Oct), 32 gal (8 Oct) = 90 Total Gallons
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 50 gallons VM & P NAPHTHA
- h. Other Additives Used: None
- i. Application Rate: 1 Oz/Acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 40 PSI
- g. Flow Rate: 3.6 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000
- b. Spray Off Set: 3000 feet (6 Oct), 2000 feet (8 Oct)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 95-105/6 MPH (6 Oct); 30-50/2 MPH (8 Oct)
  - (2) Release Altitude: 110/8 Knots (6 Oct); 47/7 Knots (8 Oct)
- b. Temperature (Degrees Fahrenheit): 76° F (6 Oct); 72° F (8 Oct)
- c. Humidity: 58 – 64 % (6 Oct); 77% (8 Oct)
- d. Cloud Cover: 75 % on both 6 and 8 Oct.
- e. Source: Ground observations at the MCRD Marina on 6 Oct and at the small arms range on 8 Oct. Observations at spray altitude are from Doppler radar on the aircraft.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1-meter dowels.
  - (2) Results: Good coverage throughout spray area; swath determination was based on historical conditions.
- b. Effectiveness: (see remarks).

**8. REMARKS:** Both biting midges and mosquitoes were targets of this aerial spray. The mosquitoes were targets because of West Nile Virus positive mosquito pools. On October 6<sup>th</sup> conditions for aerial spray were excellent, and the entire island with the exception of the no-spray area around the eagle nest was treated. Thunderstorms were in the area on the afternoon of October 8<sup>th</sup>. Following the thunderstorm, spray conditions came within parameters, but there was only enough daylight left to spray half of the Island. Only priority areas including the rifle range, golf course, and areas around living quarters and offices were treated. Despite the abbreviated spray, the 757<sup>th</sup> Airlift Squadron achieved a 97% reduction in biting midge populations and an 87% reduction in mosquito populations overall.

(b) (6) , Lt Col, USAFR  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL**

**910 AW AERIAL SPRAY UNIT**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S**  
**POST-MISSION REPORT (replaces AFRC Form 55)**  
**LANGLEY AFB, VA 6-10 JUL 2009**

**1. MISSION BASICS:**

- a. Installation Sprayed: Langley AFB, VA and surrounding communities.
- b. Mission Duration: 6-10 Jul 2009
- c. Purpose of Application: Adult mosquito control
- d. Application Dates: 7 July 09
- e. Times of Application (Local): 1825-2036 (7 July); 1805-2030 (8 July); 1830-1942 (9 July)
- f. Acres Treated: 98,559 total: 41,472 (7 July); 51,175 (8 July); 5,912 (9 July)
- g. Project Coordinator (Name, Phone #): (b) (6)
- h. Date Spray Map Last Approved: 7 July 2009
- i. Date of Waste Generation Letter: 4 April 1996
- j. Installation In-Briefing: 1 CE Conference Room, Langley AFB; 6 Jul 09; Lt Col (b) (6), Maj (b) (6) Maj (b) (6)
- k. Mission identifier: QZNRKA543187

**2. OPERATIONAL:**

**910 AW PARTICIPANTS:**

**a. Aircrew:**

- (1) Mission Commander: Lt Col (b) (6)
- (2) Pilots: Lt Col (b) (6), Maj (b) (6)
- (3) Navigator: Lt Col (b) (6)
- (4) Flight Engineers: SSgt (b) (6)
- (5) Spray Operators: MSgt (b) (6), MSgt (b) (6), SSgt (b) (6)

**b. Maintenance:**

- 1. Spray Maintenance: TSgt (b) (6), TSgt (b) (6) SRA (b) (6)
- 2. Crew Chiefs: SSgt (b) (6)
- 3. Avionics: MSgt (b) (6)

**c. Entomologists: Maj (b) (6)**

**d. Flying Data:**

- (1) Spray Sorties/Hours: 3/6.0 [2.3 (7 July); 2.5 (8 July); 1.2 (9 July);
- (2) Ferry Sorties/Hours: 2/3.1 [1.6 (6 July); 1.6 (10 July)]

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 390 total; 240 (7 July); 150 (8 July)
- e. Gallons Pesticide Applied: 390 total; 164 (7 July); 200 (8 July); 26 (9 July);
- f. Gallons and Name Diluent Used: none
- g. Gallons and Name of Flush Used: 10 gallons marvel oil
- h. Other Additives Used: n/a
- i. Application Rate: 0.50 oz/acre (7-8 July); 0.56 (9 July)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 90-9107
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles
- e. Nozzle Orientation & Number Used: 9 straight down; 4 left, 5 right (7 July);  
11 (8-9 July)
- f. Pressure (PSI): 70 psi (7 July); 53 psi (8-9 July)
- g. Flow Rate: 3.6 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 1000 ft (7 July); 4000 feet (8-9 July)
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): 140-220°/4-11 (7 July); 040-110°/7-11 (8 July) on Langley Peninsula, 060-080°/4 ground and 090-100 aircraft (9 July) on Craney Island
- b. Temperature (°F): 82-80 (7 July) 75 (8 July); 73-71 (9 July)
- c. Cloud Cover: mostly sunny (7-8 July), overcast (9 July)
- d. Source: Ground observations and at altitude during spray sorties

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:  
(1) n/a
- b. Effectiveness:

(1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment by the various community and Base mosquito control professionals.

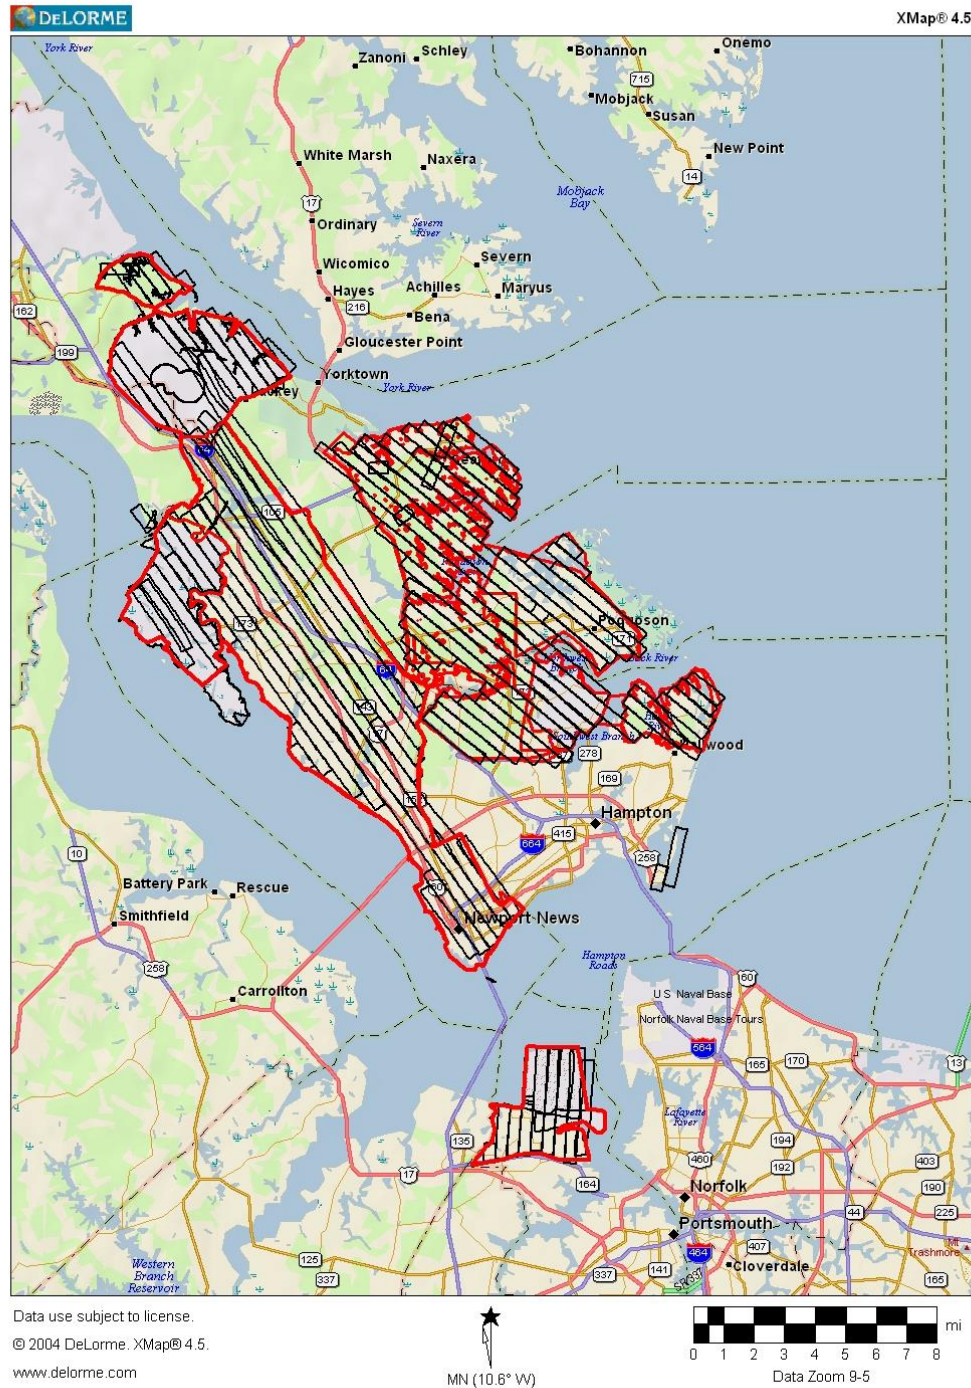

(2) Results: Langley pest management reported a 96% reduction post-spray; York Co. biologist reported no mosquitoes flying the day after the application and resident compliments. Ft. Eustis reported 151 females in traps pre-spray and 2 females in traps post-spray; no data was available from Portsmouth at time of publication.

8. **REMARKS:** Rainfall has produced significant mosquito problems along the Atlantic coast this year. A schedule cancellation by Homestead AFB allowed the Spray Flight to come to Langley AFB. Our thanks to (b) (6), of AMVAC (the manufacturers of Dibrom), who arrived before the flights and tested all drums of Dibrom for corrosion prior to any loading. Subsequently, we experienced no problems associated with Dibrom and we continue the multi-faceted approach to eliminating this issue: enhanced cleaning of the MASS and load station, filtering with 100-mesh screen, and using oldest stock first. Additionally, AMVAC is developing new closed-system delivery components to eliminate any potential corrosion issues. 910<sup>th</sup> Spray Operators received continuation training and upgrade training during this mission. (b) (6) has recently accepted the Entomology Shop Supervisor position (1 CES) at Langley AFB and is our new POC for this mission. We received excellent support from Langley AFB, 1 CES to make this mission a success. On a final note, Lt Col (b) (6) (b) (6) a former Chief of Spray, was navigator on this mission which will be, sadly, his final aerial spray operation as he is retiring in Aug 09. Thank you Lt Col (b) (6) for your excellent leadership to the Air Force and to the aerial spray mission! Lt Col (b) (6) received the coveted Air Force Entomology coin from the "Bug-Docs" as a symbol of our appreciation.

//Signed//

(b) (6), Maj, USAFR  
Entomologist and Certified Applicator

**Attachment 1. Map depicting sprayed areas over Langley AFB and surrounding communities, 7-9 July 2009. Red outline were spray areas directed by participating communities. Black shaded portions show actual areas treated; Ft. Monroe was sprayed using visual parameters. Some communities reduced their spray areas based on low mosquito presence for those regions.**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 6-10 JULY 09

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes at LFI and the surrounding communities.

**1. 910 AW PARTICIPANTS:**

**a. Aircrew:**

- (1) Pilots: Maj (b) (6) , LTC (b) (6) , MC LTC (b) (6)
- (2) Navigator: LTC (b) (6)
- (3) Flight Engineers: SSgt (b) (6)
- (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6) , SSgt (b) (6)

**b. Maintenance:**

- 1. Spray Maintenance: TSgt (b) (6) , TSgt (b) (6) , SRA (b) (6)
- 2. Crew Chiefs: MSgt (b) (6) , SSgt (b) (6)
- 3. Avionics: MSgt (b) (6)

**c. Entomologist: Maj (b) (6)**

**2. Vehicles:** Langley will supply us with 2x9pax vans and 2 cars

- **MC / Entomologist:** One Car
- **Ops:** One van (9 pax), One car
- **Mx:** One Van (9 pax)

**3. Billeting:** 15 rooms @ Holiday Inn, 1815 W Mercury Blvd, Hampton, VA (800)713-4219 POC: (b) (6)

**4. PPR:** 0706MT01

**5. SCHEDULE: (All times local)**

**6 Jul (Monday): Deploy to LFI**

- 1500: Show time
- 1700: Takeoff YNG
- 1830: Land LFI w/safety briefing immediately following

**7 Jul-9 Jul (Tuesday-Thursday): Spray LFI** \*keep these takeoff and land times for local flying deconfliction\*

- 1400: Station In-brief (Tuesday only)
- 1615: Show time
- 1645: WX decision, load Dibrom
- 1815: Takeoff LFI
- 2028: Sunset
- 2045: Land LFI

**10 Jul (Friday): Redeploy to YNG**

- 1000: Show time
- 1200: Takeoff LFI
- 1330: Land KYNG

**6. ITEMS TO TAKE:**

- a. Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. Navigator:** Maps/Map Bag, Validation Map
- c. Spray Operator:** Safety Gear, Calibration Tables
- d. Spray Maintenance:** Deployment Kit/Supply Kit

**7. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. Langley Tower:** DSN 574-5326
- b. Langley Base Ops:** DSN 574-2504
- c. Camp Perry:** (757) 229-2121 ext 2263
- d. Consideration calls:**
  - i. Newport News
  - ii. Ft Eustis/Felker AAF Tower
  - iii. Norfolk NS/Chambers Tower

8. **PARKING PLAN:** Taxiway Foxtrot with the North Ramp as the alternate if construction is not complete
9. **RADIO FREQUENCIES:**
- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
    - (1) Ops phone DSN 826-3588
    - (2) Tower phone DSN 826-3530
    - (3) Flight Service 122.2
  - b. **Newport News-Williamsburg Int: CTAF – 118.7 or 257.9(Operating Hours 1000Z-0200Z)**
    - (1) Ground – **121.9** or 348.6 (phone 877-0221 ops)
    - (2) Tower – **118.7** (phone 877-2862) voice mail 7-2962
    - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - c. **Langley AFB: Tower DSN 574-7999**
    - (1) Tower - **125.0** or 253.5
    - (2) Ground - **121.7** or 275.8
    - (3) Clearance – **118.85** or 257.625
    - (4) Metro - **239.8**
    - (5) ATIS – 270.1
  - d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15, Base Ops, DSN 262-3419, will transfer to TWR**
  - e. **Norfolk Approach: 118.9 or 353.7**
  - f. **Spray Ground: 123.4**
10. **IN-BRIEFING:** 1400 hrs on Tuesday in the CE Conference Room
11. **SPRAY CONFIGURATION:**
- a. **System:** SP2G - MASS ULV; Fuselage booms
  - b. **Nozzle Tips/Orientation:** 9 8005 nozzles -- straight down (4 left - 5 right)
  - c. **Aircraft:** 90-9107
  - d. **Mission Identifier:** QZNRKA543187
12. **SPRAY PARAMETERS:**
- a. **Altitude:** 150' AGL
  - b. **Ground Speed:** 200 KNOTS
  - c. **Pesticide:** Dibrom® Concentrate
  - d. **Application Rate:** 0.5 oz/acre
  - e. **Flow Rate:** 3.6 Gallons/Minute
  - f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
  - g. **Swath Width:** 2000 foot
13. **PESTICIDE LOADING:**
- a. **How Much Pesticide:** see entomologist
  - b. **Where:** Taxi Way F Aero Club Ramp or North Ramp if constructions isn't complete
  - c. **When:** 1645 hrs each day pending weather and heat index. \*\*Calibration performed unless otherwise directed by the Entomologist or Mission Commander
  - d. **Furnished by Installation:**
    - (1) Pesticide
    - (2) Loading Equipment/Crew
    - (3) Hazardous Waste Disposal
    - (4) Two B-5 or B-1 Stands

**14. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray of Musk Thistle Weed at Smoky Hill Air National Guard Range, Salina KS.

1. Purpose/Objective/Benefit: To control musk thistle weed at the Smoky Hill ANGR KS, to improve grazing areas, to eliminate the Range as a source of infestation to neighboring farms from wind-blown musk thistle seeds and to support state and local noxious weed control efforts.
2. Capability. Spray Aircraft Tail Number 90-9107 Available 6-11 Nov 2005 in addition to one support aircraft at the beginning and end of the mission.
3. Concept of Operations:

**SCHEDULE: (All Local) Times**

**6 NOV (Sunday)**

0800: Show at KYNG

1000: Depart KYNG

1430: Land KSLN/Safety Briefing

A/R: Maintenance configures aircraft; Aircrew plan next day's mission

**7 NOV (Monday): 2 Spray Sorties**

0530: Show time

0704: Sunrise

0705: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

1100: Land KSLN

**8 NOV (Tuesday): 2 Spray Sorties**

0530: Show time

0705: Sunrise

0705: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

1100: Land KSLN

**9 NOV (Wednesday): 1 or 2 Spray Sorties**

0530: Show time

0707: Sunrise

0710: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

1100: Land KSLN

**10 NOV (Thursday): 1 or 2 Spray Sorties**

0530: Show time

0708: Sunrise

0710: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

1100: Land KSLN

**11 NOV (Friday): Return**

0800: Show time

1000: Take Off KSLN

1230: Land KYNG

4. Spray Parameters:

a. Acreage: 2600 Acres (approximately) (Only areas determined by PMP)

b. Altitude: 100' AGL

c. Ground Speed: 200 Knots

d. Swath Width: 300 Feet

e. Pesticide: Tordon® 22K

f. Flow Rate: 279 Gallons/Minute

g. Application Rate: 2 Gal spray/Acre (water with 1 Oz Control® & 10 Oz Tordon® 22K)

5. Mission Commander: MAJ (b) (6)

6. Certified Pest Management Professional(s): LTC (b) (6) , LTC (b) (6) , and Capt (b) (6)

7. Support required at Smoky Hill ANGR KS has been coordinated with (b) (6) ,  
Smoky Hill ANGR Spray Coordinator, DSN (b) (6) , (b) (6) and LTC (b) (6) , Range  
Commander, DSN (b) (6) .

8. HQ AFRC/DOOM approval along with AFMAN 24-204 Chap 3 waiver (see note) can  
be sent by email: (b) (6)

**MEMORANDAM FOR HQ AFRC/DOOM**

**FROM:** 757 AS/DOS

**SUBJECT:** Concept of Operations for Safe Seas 2006 NOAA / USCG Oil Spill Exercise, 6-11 Aug 06

1. **Objective/Purpose/Benefit:** Oil spill exercise and training with NOAA, USCG, and California state environmental agencies at the USCG Station San Francisco. The 757AS will be dispersing water during a High Volume (HV) spray sortie on 9 Aug 06 for the exercise simulating an oil spill located on the below attachment.
2. **Capability:** Spray Aircraft 89-9106, Available 6-11 Aug 06.
3. **Concept of Operations:**
  - 6 Aug (Sunday):
    - 1000: Show Time
    - 1200: Depart KYNG
    - 1630: Land KNUQ (Moffitt Field NAS)
    - 1630: Safety Briefing
  - 7-8 Aug (Mon-Tues): Safe Seas NOAA / USCG Oil Spill Planning Meeting
    - 0900: Planning / Safety Briefings
    - 1100: 2 Day Dispersant Application Short Course, USCG San Francisco.
      - Entomologists, Pilots, Spray Maintenance
  - 9 Aug (Wednesday):
    - 1000: Show Time
    - 1200: Depart KNUQ - Safe Seas NOAA / USCG Oil Spill Exercise
    - 1500: Land KNUQ
  - 10 Aug (Thursday):
    - 0900: Safe Seas NOAA / USCG Debrief, USCG San Francisco
  - 11 Aug (Friday):
    - 0600: Show Time
    - 0800: Depart KNUQ
    - 1730: Land KYNG
4. **Spray Parameters:**
  - a. Nozzles – Raindrop nozzles oriented straight back.
  - b. 8 (16 total) on each fuselage boom; evenly spaced.
  - c. Booms – fuselage only
  - d. Airspeed – 170 knots ground speed.
  - e. Altitude – 100 feet above water.
  - f. Application Rate – 7 Gal/Acre
  - g. Flow Rate – 277 Gal/Min
  - h. Spray – water only.
  - i. Number of passes – 6 per sortie. Do not decrease flow rate in order to increase passes.
  - j. Pressure – 40 psi
5. **Mission Commander:** Maj (b) (6)
6. **Aircraft Commander:** Maj (b) (6)
7. **Reference Attachments:** Safe Seas 2006 Fact Sheet and below
8. Any questions concerning this mission please contact the Aerial Spray Office, DSN (b) (6)

# SAFE SEAS 2006 EMERGENCY RESPONSE

## AERIAL SPRAY OPERATIONAL SCHEDULE

SAN FRANCISCO, CA

6-11 AUG 06

**PURPOSE/OBJECTIVE:** Oil spill emergency response exercise and training with NOAA / USCG.

### 1. 910 AW PARTICIPANTS:

#### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6)
- (2) Pilots: MAJ (b) (6), MAJ (b) (6)
- (3) Navigators: LTC (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6)(b) (6), MSG (b) (6)

#### b. Spray Maintenance:

- (1) Spray Maintenance: TSG (b) (6), TSG (b) (6), TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6), A1C (b) (6)

#### c. CPMP: MAJ (b) (6)

#### d. Public Affairs: CPT (b) (6)

### 2. SCHEDULE: (All times Local)

#### 6 Aug (Sunday): PPR 0702

1000: Show Time  
1200: Depart KYNG  
1630: Land KNUQ  
1630: Safety Briefing

#### 7 Aug (Monday):

1200-1500: Safe Seas Media Day, Piers 30-32 on Fisherman's Wharf  
(b) (6), (b) (6) (b) (6) (b) (6) —all YNG  
personnel invited to attend

#### 8 Aug (Tuesday):

1400: Safe Seas 2006 Emergency Response Exercise Planning Meeting  
USCG San Francisco Air Station, Hanger Admin Bldg

#### 9 Aug (Wednesday):

0900: Show Time  
1030: Depart KNUQ - Safe Seas 2006 Emergency Response Exercise  
1115: Disperse Applications over simulated oil spill  
1230: Land KNUQ  
1830: Safe Seas 2006 Reception at Ft Mason Officers Club—all invited to  
attend

#### 10 Aug (Thursday):

1230: Safe Seas 2006 Emergency Response Exercise Hot Wash  
USCG San Francisco Air Station, Command Post

**11 Aug (Friday):**

0600: Show Time

0800: Depart KNUQ

1730: Land KYNG

3. **PARKING PLAN:** Moffett Federal Airfield, parking north of tower.
4. **IN-BRIEFING:** Required. See the Schedule, or as determined by Mission Commander.
5. **COMMUNICATIONS PLAN: See also the exercise CONOPS**
  - a. USCG SFO OPS: San Fran Air 345.0
  - b. Exercise VHF 122.85, UHF 345.0
  - c. Golden Gate Common 124.3
  - d. NORCAL App 135.1
  - e. Alternate YNG/AFRC Freq for exercise area if needed

**VHF** 143.85 / 142.6  
**UHF** 349.35 / 305.225  
**HF** 6872.35 / 9262.35
6. **SPRAY CONFIGURATION:**
  - a. MASS – SP2G
  - b. Aircraft Number: 106
  - c. Mission Identifier: QZNRKA025218
7. **SPRAY PARAMETERS:**
  - a. Nozzles – Raindrop nozzles oriented straight back.
  - b. 8 (16 total) on each fuselage boom; evenly spaced.
  - c. Booms – fuselage only
  - d. Airspeed – 200 knots ground speed.
  - e. Altitude – 100 feet above water.
  - f. Application Rate – 7 Gal/Acre
  - g. Flow Rate – 277 Gal/Min
  - h. Spray -- water only.
  - i. Number of passes – 6 per sortie. Do not decrease flow rate in order to increase passes.
  - j. Pressure – 40 psi
8. **LOADING:**
  - a. 1000 gallons of water loaded at Moffett Field.
  - b. **Furnished by Installation:**
    - (1) Power cart
    - (2) B-1 Stands
9. **TRANSPORTATION: ENTERPRISE RENTAL CAR AGENCY-pick up at Base Ops**
  - #079918 confirmation, 5 Full Size @ \$47 per day or \$282 per week, 650-934-0760, poc (b) (6)
  - (b) (6)

- (b) (6)
- (b) (6)
- (b) (6)
- (b) (6)
- (b) (6)        -SUV

## 10. **QUARTERS: Lodging Rate \$99.50, per diem rate \$101.**

- Quality Inn Mountain View, 650-934-0155, (b) (6) , Confirmations 122081-122097

**FROM: 757 AS/DOS**

**SUBJECT: Capability and Concept of Operations for Aerial Spray of Musk Thistle Weed at Smoky Hill Air National Guard Range, Salina KS.**

**1. Capability:** Spray Aircraft Tail Number 99107 Available 6-11 November 2000

**2. Concept of Operations:**

**a. 6 Nov 00 (Monday):**

1200 Take Off YARS

1400 Land Salina Airport KS

**b. 7 Nov 00 (Tuesday):**

**(additional times available on case-by-case basis)**

0700 Take-Off

0700-1040/1120-1220 Range available for Spray mission

**c. 8 Nov 00 (Wednesday):**

0700 Take Off

0700-1040/1120-1300 Range available for Spray mission

**d. 9 Nov 00 (Thursday):**

0700 Take-Off

0700-1040/1120-1300 Range available for Spray mission

**e. 10 Nov 00 (Friday): (Holiday)**

0700 Take-Off YNG

0700-1300 Range available for Spray mission

**f. 11 Nov 00 (Saturday):**

0730 Show Time

0900 Take-Off

1400 Land KYNG

**3. Spray Parameters:**

**a. Acreage:** 3,207 Acres (Only areas determined by PMP)

**b. Altitude:** 100' AGL

**c. Ground Speed:** 200 Knots

**d. Swath Width:** 330 Feet

**e. Pesticide:** Tordon® 22K

**f. Flow Rate:** 307 Gallon/Minute

**g. Application Rate:** 2 Gal spray/Acre (water with 1 Oz Control® & 10 Oz Tordon® 22K)

- h. Deploy:** 3.4 Hrs
- i. Re-Deploy:** 2.8 Hrs
- j. Spray Time:** 10 Hrs (or as called by PMP)

**4. Mission Commander:**

- a. 6 - 11 Nov 00:** Lt Col (b) (6)
- b. Certified Pest Management Professional(s):** LtC (b) (6) and LtC (b) (6)

**5.** Support required at Smoky Hill ANGR KS has been coordinated with TSG (b) (6) (b) (6) Smoky Hill ANGR Spray Coordinator, DSN (b) (6), ext (b) (6) and Lt Col (b) (6), Range Commander, DSN (b) (6)

**6.** HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616 or DSN 346-1161, ATTN: 757 AS/DOS.

(b) (6), Lt Col, USAFR  
Chief, Aerial Spray (757 AS/DOS)

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. **Installation Sprayed:** Smoky Hill ANGR, Salina KS
- b. **Mission Duration:** 6-11 Nov 00
- c. **Purpose of Application:** Management of Musk Thistle on ANGR.
- d. **Application Date/s:** 7-9 Nov 00  
**Time/s of Application (Zulu):** 1610-1745 (7 Nov); 1505-1630, 1810-1955 (8 Nov); 1715- 2025 (9 Nov); 1515-1546, 1855-2022 (10 Nov) Flush/Test
- e. **Acres Treated:** 3527 (See attached map)
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** MSG (b) (6) , Aerial Spray Coordinator, Smoky Hill ANGR, DSN (b) (6) ; LTC (b) (6) , LTC (b) (6)
- g. **Date Spray Map Last Approved:** 6 Nov 00
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 0600, 6 Nov 00; Smoky Hill ANGR; LTC (b) (6)

## 2. OPERATIONAL:

- a. **Mission Commander:** LTC (b) (6)
- b. **Certified PMP (Category 11) and Entomologist:** LTC (b) (6) , LTC (b) (6)
- c. **Aircrew:**
  - (1) Aircraft Commander/Pilot: LTC (b) (6)
  - (2) Co-Pilot: CPT (b) (6)
  - (3) Navigator: LTC (b) (6) yle
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6) , MSG (b) (6) TSG (b) (6)
- d. **Safety Briefer:** LTC (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** TSG (b) (6) , SSG (b) (6) , SSG (b) (6) , TSG (b) (6)
- f. **Spray Ground Monitors:** LTC (b) (6) , LTC (b) (6)
- g. **Crew Chief(s):** SRA (b) (6) , TSG (b) (6)
- h. **Avionics:** MSG (b) (6)
- i. **AGE:** TSG (b) (6)
- j. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.9 (7 Nov); 2/3.9 (8 Nov); 1/3.5 (9 Nov), 2/2.3 (10 Nov) Flush/Test;
  - (2) Ferry Sorties/Hours:
    - (a) Spray A/C 909107 Ferry Sorties/Hours: 1/3.5 (6 Nov); 1/2.7 (11 Nov)
    - (b) Support A/C 899101 Sorties/Hours: 2/6.3 (6 Nov); 1/3.7 (11 Nov); 2/3.3 (12 Nov)

## 3. PESTICIDE:

- a. **Trade Name (% Active Ingredient):** Tordon® 22K
- b. **EPA Registration Number:** 62719-6
- c. **Formulation Sprayed:** Tordon® 22K mixed with water and Control®
- d. **Gallons Pesticide Loaded:** 7,190 gal of Tordon® 22K/water loaded (562 gal Tordon® 22K)
- e. **Gallons Pesticide Applied:** 562 gallons
- f. **Gallons and Name Diluent Used:** 6,625.25 gallons of water
- g. **Gallons and Name of Flush Used:** 590 gallons of water & 5 gallons Remove®
- h. **Other Additives Used:** 2.75 gallons of Control®
- i. **Application Rate:** 2 gallons spray/acre (water with 1 oz. of Control® & 10 oz. of Tordon®)

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** 909107
- b. **Spray System (Modules Used) and System ID #:** 3-Module system
- c. **Spray System Configuration:** Full Wing and Fuselage Booms
- d. **Nozzle Type/Size:** 8070 Flat Fan TeeJet®
- e. **Nozzle Orientation & Number Used:** 68; Wing: 34 each side;  
Fuselage: 16 (8 each side) with 3" Restrictor
- f. **Pressure:** 40 PSI
- g. **Flow Rate:** 307 GPM

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 330'; spray blocks 10, 12, and 13 were flown with a 220' swath and flow rate of 204 GPM
- b. **Spray Off Set:** 660'
- c. **Spray Release Altitude:** 100'
- d. **Ground Speed:** 200 Knots

**6. WEATHER OBSERVATIONS:**

- a. **Winds (Direction/Speed):**  
Ground: W/8-12 mph (7 Nov); NE/6-8mph (8 Nov); N/4-8 mph (9 Nov)
- b. **Temperature Range During Application (°F):** 34°-42°
- c. **Cloud Cover:** 0%
- d. **Source:** Ground observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Pattern:**
  - (1) Technique/s Used: Ground Observation
  - (2) Results: Spray off-set determined each day
- b. **Effectiveness:**
  - (1) Technique/s Used: Visual field observations
  - (2) Results: (See Remarks)

- 8. REMARKS:** Results will be determined during the next growing season in the Spring of 2001 for musk thistle.

**CERTIFIED PEST MANAGEMENT PROFESSIONAL**

- f. **Spray Ground Monitors:** LTC (b) (6) , LTC (b) (6) ; CAPT (b) (6)
- g. **Crew Chief(s):** SSG (b) (6) ; TSG (b) (6)
- h. **Avionics:** TSG (b) (6)
- i. **AGE:** TSG (b) (6)
- j. **Engine:** None
- k. **Ground Support/CPM Professionals:** LTC (b) (6) , LTC (b) (6) ; CAPT (b) (6) (b) (6)
- l. **Security Police:** SRA (b) (6) TSG (b) (6) ; SSG (b) (6) ; SRA (b) (6)
- m. **Flying Data:**
  - 1. Spray Sorties/Hours: 1/1.9 (7 Nov); 1/2.2 (8 Nov); 1/1.4 (8 Nov); total 3/5.5
  - 2. Ferry Sorties/Hours:
    - (a) Spray A/C 909107 Ferry Sorties/Hours: 1/3.6 (6 Nov); 1/2.9 (11 Nov)
    - (b) Support A/C 923022 Sorties/Hours: 2/6.2 (6 Nov);
    - (c) Support A/C 923022 Sorties/Hours: 2/6.0 (10, 11 Nov)

**3. PESTICIDE:**

- a. **Trade Name (% Active Ingredient):** Tordon® 22K
- b. **EPA Registration Number:** 62719-6
- c. **Formulation Sprayed:** Tordon® 22K mixed with water and Airex DC/Valid
- d. **Gallons Pesticide Loaded:** 220 gallons Tordon® 22K
- e. **Gallons Pesticide Applied:** 220 gallons Tordon® 22K
- f. **Gallons and Name Diluent Used:** 5618 gallons of water
- g. **Gallons and Name of Flush Used:** 200 gallons of water

- h. **Other Additives Used:** 14 gallons of AirexDC® (Nov 7); 4.75 gallons of Valid (Nov 8)
- i. **Application Rate:** 2 gallons spray/acre (water with 10 oz. of Tordon® and Drift control)

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** 909107
- b. **Spray System (Modules Used) and System ID #:** 3-Module system
- c. **Spray System Configuration:** Fuselage Booms
- d. **Nozzle Type/Size:** 8070 Flat Fan TeeJet®
- e. **Nozzle Orientation & Number Used:** 40 Fuselage (20 each side, straight back)
- f. **Pressure:** 55-61 PSI (Nov 7); 51-59 PSI Nov 8
- g. **Flow Rate:** 236-273 GPM (7 Nov); 267-276 GPM (8 Nov)

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 300'
- b. **Spray Off Set:** 3 swath widths
- c. **Spray Release Altitude:** 100-150 depending on wind speed
- d. **Ground Speed:** 200 Knots

**6. WEATHER OBSERVATIONS:**

- a. **Winds (Direction/Speed):**  
Ground: 190°/7 KT (7 Nov); 170/10 KT (8 Nov)
- b. **Temperature Range During Application (°F):** 65°- 75°
- c. **Cloud Cover:** 0% (7 Nov); 0% (8 Nov)
- d. **Source:** Ground observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

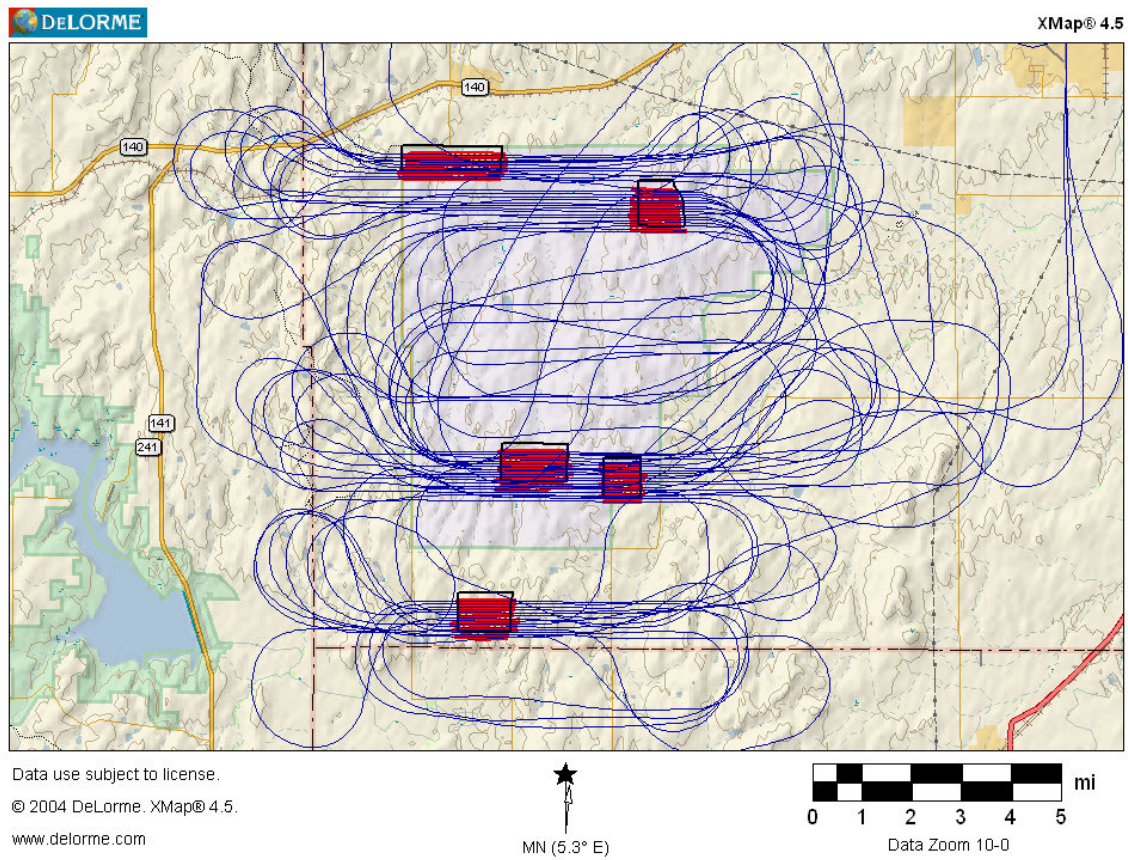

- a. **Deposition Pattern:**  
(1) Ground monitors observed/confirmed swath width from ground positions
- b. **Effectiveness:**  
(1) Technique/s Used: Visual field observations will be carried out in the spring by the Smoky Hill Staff.

- 8. REMARKS:** Musk thistle has been reduced to the point that spray flights are not required every year; which speaks highly of the effectiveness of prior missions in controlling thistles. This year moderate temperatures and lack of frost allowed for early takeoff times. This resulted in a significant amount of time being spent on-station, which, with the addition of extremely favorable meteorological spray conditions, allowed completion of the project in 3 lifts over the course of 2 days.

Attachment 1. Spray blocks, area treated and track of aircraft on spray sorties conducted 7 and 8 November 2005 at the Smokey Hill ANG Range, Salina Kansas.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## SMOKY HILL ANG RANGE, KS

### 6-11 NOV 2005

Change 1

**PURPOSE/OBJECTIVE/BENEFIT:** Control musk thistle at the Smoky Hill ANGR, to improve grazing areas, to eliminate the Range as a source of infestation to neighboring farms from wind-blown musk thistle seeds and to support state and local noxious weed control efforts.

##### c. Ground Support/CPM Professionals: CPT (b) (6), LTC (b) (6), LTC (b) (6)

##### d. Security Police: SRA (b) (6), TSG (b) (6), SSG (b) (6), SRA (b) (6)

#### 2. SCHEDULE: (All Local) Times

##### 6 NOV (Sunday)

0900: Show at KYNG  
1100: Depart KYNG  
1430: Land KSLN/Safety Briefing  
A/R: Maintenance configures aircraft; Aircrew plan next day's mission

##### 7 NOV (Monday): 2 Spray Sorties

0530: Show time  
0704: Sunrise  
0705: Take Off KSLN  
: Range time (Coordinate MARSA as needed after 1100)  
1100: Land KSLN

##### 8 NOV (Tuesday): 2 Spray Sorties

0530: Show time  
0705: Sunrise  
0705: Take Off KSLN  
: Range time (Coordinate MARSA as needed after 1100)  
1100: Land KSLN

**9 NOV (Wednesday): 1 or 2 Spray Sorties**

0530: Show time

0707: Sunrise

0710: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

1100: Land KSLN

**10 NOV (Thursday): 1 or 2 Spray Sorties**

0530: Show time

0708: Sunrise

0710: Take Off KSLN

: Range time (Coordinate MARSA as needed after 1100)

1100: Land KSLN

**11 NOV (Friday): Return**

0800: Show time

1000: Take Off KSLN

1230: Land KYNG

**3. ITEMS TO TAKE:**

- a. Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. Entomologist:** 1 Cellular Phone, Wind Gauge, 2 Compasses, 1 UHF Radio, Pest Safety Binder, 2 Signal Mirrors, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries
- c. Navigator:** Maps/Map Bag, Validation Map,
- d. Spray Operator:** Safety Gear, Calibration Tables
- e. Spray Maintenance:** Deployment Kit, Stake Bed Truck, Support Equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION:** None Required.

**5. PARKING PLAN:** North Ramp (same as last time) Highway Patrol Ramp (by the Civil Air Patrol Hangar). A10s will be using same ramp area.

**6. RADIO FREQUENCIES:**

- a. Air To Ground:** Primary 392.2
- b. Salina:** CTAF: 119.3, UNICOM: 122.95, ATIS: 120.15, TWR: 119.3 / 257.7, GND: 121.9 / 397.9, NG OPS: 49.95 / 304.6
- c. Smoky Hill:** Primary 316.9, Secondary 304.9; Victor Freq: 139.7 Smoky Hill departure. Expect IFR clearance from KCC on 363.2 UHF 134.9 VHF. Advise them you are departing R3601

**7. IN-BRIEFING:** Upon Arrival.

**8. SPRAY CONFIGURATION:** (Note: File support a/c Chap 3 to AFJI 24-204)

- a. System:** SP-3G
- b. Nozzle Tips/Orientation:** 8070 Flat Fan TeeJet/90° straight back
- c. Number:** Fuselage. 40 Total (20 each side)
- d. Booms:** Fuselage Booms.
- e. Aircraft:** 90-9107
- f. Mission Identifier:** QZNRKA184310

## 9. SPRAY PARAMETERS:

**Altitude:** 100' AGL

**Swath Width.** 300 feet.

**Flow Rate.** 279 Gallons/Minute (approximately 2702 acres to be sprayed)

**Application Rate.** 2 Gal spray/Acre (water with 2 Oz of AirexDC® & 10 Oz of Tordon®)

**Ground Speed:** 200 Knots

## 10. SPRAY MIXING AND LOADING:

### a. Composition of Each Gallon:

- (1) 5 Ounces of Tordon® 22K
- (2) 1 Ounce of AirexDC® Drift Retardant
- (3) 122 Ounces of Water

### b. First Load (4 Tanks of 425 Gallons Each + Sump of 70 Gallons)

- (1) Fill to 425 Gal Water/Tank using the pump on the water tanker truck.  
This is done by putting the filler hose into the rear tank with all tanks open to the common sump.  
Total water in tanks = 1700 Gal.
- (2) 70 Gal/Water in Sump
- (3) Total Water Added = 1,770 Gallons
- (4) Upload 17.25 Gal/Tordon® 22K/Tank (69 Gallons Total for 4 Tanks + sump) with the ULV uploading system.  
Add 3.5 GalAirexDC®/Tank (14 Gallons Total for 4 Tanks + sump) while agitating approximately 15 min
- (6) Total Quantity Mix. 1853 Gallons

### c. Subsequent Loads (2)

- (1) Fill to 425 Gal/Water/Tank. Total Water = 1700 Gal
- (2) Add 16.5 Gal/Tordon 22K/Tank. Total Tordon 22K = 66 Gal
- (3) Add 3.25 Gal AirexDC®/Tank. Total AirexDC® = 13 Gal
- (4) Total quantity Mix. 1779 Gallons (does not include 70 Gal already mixed in Sump)

### d. Final (fourth) Load

- (1) Fill to 253 Gal/Water/Tank. Total Water = 1012 Gal
- (2) Add 10 Gal/Tordon 22K/Tank. Total Tordon 22K = 40 Gal
- (3) Add 2 Gal AirexDC®/Tank. Total AirexDC® = 8 Gal
- (4) Total quantity Mix. 1060 Gallons (does not include 70 Gal already mixed in Sump)

**e.** Total gallons of spray mixture for the spray project is **5412**. Tordon 22K required is **211** Gal.  
AirexDC® required is **41** Gal.

**f.** Mixing Time/Load. Agitate by recirculating each mix for approximately 15 minutes.

## 11. SPRAY MONITORING OR TESTING: Performed by the CPMPs

### NOTES:

Ideal to have westerly wind to spray west boundary.

Ideal to have easterly wind to spray east boundary.

(November winds expected to be predominately from the north)

## 12. CONTACTS:

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

FROM: 757 AS/DOS (346-1111/1531; FAX 346-1616)

SUBJECT: Capability and Concept of Operations for Aerial Spray at Langley AFB

1. **Purpose/Objectives/Benefits:** Control nuisance and vector mosquitoes in order to improve working conditions for members operating at Langley AFB VA.
2. **Capability:** Spray Aircraft Available 6-11 Oct 2002.
3. **Concept of Operations:**
  - a. **6 Oct (Sunday):**
    - 1200 Show at KYNG
    - 1400 Take-Off KYNG
    - 1530 Land KLFI
    - 1545 Safety Brief
  - b. **7 Oct (Monday):**
    - 0900 In-Briefing with Langley AFB, CE Conference Room
    - 1400 Show Time/Weather Decision
    - 1430 Load Chemical
    - 1700 Take-Off KLFI, Spray Areas Designated by PMP
    - 2030 Land KLFI
  - c. **8 Oct (Tuesday):**
    - 1100 Daily meeting for PMP/MC in the hotel lobby
    - 1400 Show Time/Weather Decision
    - 1430 Load Dibrom
    - 1700 Take-Off KLFI, Spray Areas Designated by PMP
    - 2030 Land KLFI
  - d. **9 Oct (Wednesday):**
    - 1100 Daily meeting for PMP/MC in the hotel lobby
    - 1400 Show Time/Weather Decision
    - 1430 Load Dibrom
    - 1700 Depart KLFI, Spray Areas Designated by PMP
    - 2030 Land KLFI

**e. 10 Oct (Thursday):**

1100 Daily meeting for PMP/MC in the hotel lobby  
1400 Show Time/Weather Decision  
1430 Load Dibrom  
1700 Depart KLFI, Spray Areas Designated by PMP  
2030 Land KLFI

**f. 11 Oct (Friday):**

0900 Report  
1100: Depart KLFI  
1230: Land KYNG

**4. Spray Parameters:**

- a. Acreage: approximately 86,000 Acres
- b. Altitude: 150 Ft AGL
- c. Ground Speed: 200 Knots
- d. Pesticide: Dibrom® Concentrate
- e. Application Rate: 0.5 Ounce per Acre
- f. Flow Rate: 1.8 Gal per Minute at Craney Island; 3.6 Gallons per Minute for Langley AFB designated areas
- g. Swath Width: 1000' swaths at Craney Island; 2000' to 2500' swaths at Langley AFB
- h. System: SP2G – MASS ULV; Modules 1 and 2
- i. Nozzle Tips/Number/Orientation: 8008/8 oriented straight down for 2000' swaths; 8008/4 oriented straight down for 1000' swaths oriented straight down
- j. Aircraft Tail Number: 99105; Mission Identifier: QZNRKA020279
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Aircraft/Mission Commander: Major (b) (6)**

**6. Support required at Langley AFB has been requested via FAX message.**

**7. If you have any questions concerning this mission please contact DSN (b) (6) .**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 6 – 11 October 2002

**Purpose/Objectives/Benefits:** control nuisance and vector mosquitoes in order to improve working conditions and lower the incidence of arthropod borne illness for members operating at Langley AFB and surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Major (b) (6)
- (2) Pilots: Maj (b) (6) , Major (b) (6) , LtC (b) (6) (6-9 Oct)
- (3) Navigators: Maj (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: CMS (b) (6) , MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , TSG (b) (6)
- (3) Avonics: SSG (b) (6)

##### c. Certified Pest Management Professionals: LtC (b) (6) , Maj (b) (6) , CPT (b) (6)

**Gov Vehicles: 2 ea 9 pax van, 1 staff, 1 pick-up truck**

#### 2. SCHEDULE: (All time Local)

##### 6 Oct (Sunday):

**PPR # 1006DW01**

1200: Show at KYNG  
1400: Depart KYNG  
1530: Land KLF  
1545: Safety Briefing

##### 7 Oct (Monday):

0900: In-Briefing at CE Conference Room  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1840: Sunset

##### 8 Oct (Tuesday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1839: Sunset

##### 9 Oct (Wednesday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1837: Sunset

##### 10 Oct (Thursday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision

1430: Load Dibrom  
1700: Spray Sortie  
1836: Sunset

**11 Oct (Friday):**

0900: Report  
1100: Depart KLFI  
1230: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Cellular Phones, Kestrel Weather Monitor, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker and Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326/5327 Tower Manager
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops - 878-3588
  - (2) Tower - 878-3530
  - (3) Firing Range - 878-4412/5053 Range Tower
  - (4) Flight Service - 122.2
- b. **Newport News-Williamsburg Int:** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9 or 348.6** (phone 877-0221 ops)
  - (2) Tower – **124.9 or 280.1** (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - (4) CTAF – **118.7**
- c. **Langley AFB:** Tower OIC MSG (b) (6) Lt (b) (6) 1st OSS SQ
  - (1) Tower - **125.0 or 253.5** (phone 4-5326)
  - (2) Ground - **121.7 or 275.8**
  - (3) Clearance – **118.85 or 271.3**
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld):** Tower - **124.3, 126.375, 340.2, 318.7**
  - (1) Base Ops DSN 262-3419
  - (2) Tower DSN 262-3440
- e. **Spray Ground: Primary 392.2 / 308.6 Secondary**

**7. IN-BRIEFING:** Required; IAW the Schedule above.

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Modules 1 and 2
- b. **Nozzle Tips/Orientation:** 8 8008's for 2000' swathes and 4 8008's for 1000' swathes oriented straight down.
- c. **Aircraft:** 99105 **Mission Identifier:** QZNRKA020279

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 1.8 Gallons/Minute at Craney Island; 3.6 Gallons/Minute at Langley areas
- f. **Acreage:** Approximately 86,000 Acres
- g. **Swath Width:** 1,000 Feet at Craney Island; 2,000 Feet at Langley areas.

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** 334 Gallons for 86,000 acres sprayed.
- b. **Where:** Aero Club Ramp
- c. **When:** 1430 hrs each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

**11. SPRAY MONITORING OR TESTING:**

The local mosquito control districts and Langley Pest Control will conduct mosquito surveillance using either trapping or biting count pre- and post-spray data to determine spray effectiveness. Oil sensitive cards will be used to confirm application within the spray blocks.

**12. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB
- b. Mission Duration: 6-11 October 2002
- c. Purpose of Application: Adult Mosquito Control
- d. Application Dates and times (Local): 7 Oct 1600-1900; 9 Oct 1545-1748; 10 Oct 1540-1710
- e. Acres Treated: 58,880 (7 Oct); 47,360 (9 Oct); 7,680 (10 Oct)
- f. Project Coordinator (Name/Title): (b) (6), Pest Control Manager
- g. Date Spray Map Last Approved: 22 Jul 02
- h. Date of Waste Generation Letter: 4 April 1996
- i. Installation In-Briefing: (When/Where/Briefer/s): CE Conference Room, Langley AFB;  
MAJ (b) (6), MAJ (b) (6)

## 2. OPERATIONAL:

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMP's (Category 11): LTC (b) (6), MAJ (b) (6) CPT (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander/Pilot: MAJ (b) (6)
  - (2) Co-Pilot(s): LTC (b) (6), LTC (b) (6)
  - (3) Navigator: MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: CMS (b) (6), MSG (b) (6)
- d. Safety Briefer: CPT (b) (6)
- e. Spray Maintenance/Pesticide Loaders: MSG (b) (6), TSG (b) (6), TSG (b) (6)
- f. Crew Chief(s): MSG (b) (6), TSG (b) (6)
- g. Avonics: SSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 3 Sorties; 6.6 Hours
  - (2) Ferry Sorties/Hours: 2 Ferries; 3.1 Hours

## 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom® Concentrate (97% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom® Concentrate (neat)
- d. Gallons Pesticide Loaded: 310 (7 Oct); 105 (9 Oct); 30 (10 Oct)
- e. Gallons Pesticide Applied: 230 (7 Oct); 185 (9 Oct); 30 (10 Oct)
- f. Gallons and Name of Flush Used: Aromatic Naptha; 75 gallons (25 gallons/sortie)
- g. Application Rate: 0.5 ounce/acre

4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): C-130, 99105
- b. Spray System (Modules Used) and System ID #: System SP2G - MASS ULV; Modules 1 & 2
- c. Spray System Configuration: ULV Wing Booms; Modules 1 and 2/MASS ULV
- d. Nozzle Type/Size: 8008 TeeJet (Flat Fan)
- e. Nozzle Orientation & Number Used: 8 Nozzles oriented straight down
- f. Pressure: 33-38 psi
- g. Flow Rate: 3.6 Gal/Min for 2000' swathes

5. APPLICATION PARAMETERS:

- a. Swath Width Flown: 2000'
- b. Spray Off Set: 2000-4000' depending on wind speed
- c. Spray Release Altitude: 150' AGL
- d. Ground Speed: 200 knots

6. WEATHER OBSERVATIONS:

- a. Winds (Direction/Speed): 240°/6 kts (7 Oct); 240°/6 kts (9 Oct); 140°/5 kts (10 Oct)
- b. Temperature (Degrees Fahrenheit): 69°F (7 Oct); 63°F (9 Oct); 68°F (10 Oct)
- c. Relative Humidity: 74-83% (7 Oct); 73-88% (9 Oct); 78-94% (10 Oct)
- d. Cloud Cover: mostly cloudy (7 Oct); mostly cloudy (9 Oct); cloudy (10 Oct)
- e. Source: direct observations

7. SPRAY MONITORING (Pre- and Post-Treatment):

- a. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities
  - (2) Results: A significant reduction in mosquito activity was observed in all treated areas.

8. REMARKS: The tidewater region has been experiencing one of the worst mosquito outbreaks in some time and consequently, an application during this time frame was well substantiated. Traps counts were indeed high with Langley Pest Control reporting over 100 mosquitoes collected during a single trap night; Portsmouth reported collecting more than 2000 mosquitoes in one trap night. Three spray sorties were flown and a 0.5 oz/acre application rate was used over the entire spray area. Following the application, all sources reported a significant reduction in nuisance mosquitoes (*Ochlerotatus* spp. mosquitoes were the target pest). Langley Pest Management reported a 98% decrease in *Ochlerotatus* spp. (pre- vs post-spray numbers). York County reported ~90% reduction in numbers. This spray represents the final scheduled spray at Langley AFB for CY2002, however, it also represents the first spray mission for FY 03 (1 Oct 02-30 Sep 03). The 757 AS Aerial Spray Unit received excellent support again this year from Langley Pest Control (Civil Engineering) with mosquito surveillance as well as with directing coordination between local mosquito control agencies. There has been plenty of West Nile Virus activity around Virginia this year and it is worth noting that Langley AFB did not find any positive birds or mosquitoes. If the virus is found next year, we know we have an excellent integrated program already in place to deal with the vectors.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## SMOKY HILL ANG RANGE, KS

### 6– 11 NOV 2000

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: LTC (b) (6) ; CPT (b) (6)
- (3) Navigators: \*LTC (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: \*\*MSG (b) (6) , MSG (b) (6) , TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6) , \*\*SSG (b) (6) , SSG (b) (6) ,  
TSG (b) (6)
- (2) Crew Chiefs: \*\*SRA (b) (6) so, TSG (b) (6)
- (3) Avionics: MSG (b) (6)
- (4) AGE: TSG (b) (6)

##### c. Ground Support/CPM Professionals: \*LTC (b) (6) , LTC (b) (6)

##### d. Security Police: SSG (b) (6) , SSG (b) (6)

\* = 3 each Mid-Size rental cars : (b) (6) & Security Personnel (LtC (b) (6) at Airport)  
\*\* = 3 each rental vans: (b) (6) ,

#### 2. SCHEDULE: (All Local) Times

##### 6 NOV (Monday)

1000: Show at KYNG

1200: Depart KYNG

1400: Land KSLN/Safety Briefing

A/R: Maintenance configures aircraft; Aircrew plan next day's mission

##### 7 NOV (Tuesday):

0530: Show time

0705: Sunrise

0700: Take Off KSLN

0700-1040/1120-1220: Range time (additional range available on a case-by-case basis)

0900: Land KSLN

##### 8 NOV (Wednesday):

0530: Show time

0706: Sunrise

0700: Take Off KSLN

0700-1040/1120-1300: Range time (additional range available on a case-by-case basis)

0900: Land KSLN

##### 9 NOV (Thursday):

0530: Show time

0707: Sunrise

0700: Take Off KSLN

0700-1040/1120-1300: Range time (additional range available on a case-by-case basis)

0900: Land KSLN

**10 NOV (Friday): (HOLIDAY)**

0530: Show time

0708: Sunrise

0700: Take Off KSLN

0700-1300: Range time (additional range available on a case-by-case basis)

0900: Land KSLN

**11 NOV (Saturday):**

0730: Show time

0709: Sunrise

0700-1300: Range time (additional range available on a case-by-case basis)

0900: Take Off KSLN

1400: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder, 2 Signal Mirrors, 1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries, Kodak Camera
- c. **Navigator:** Maps/Map Bag, Validation Map, 1 Panasonic Computer
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Stake Bed Truck, Support Equipment, Control®

**4. NOTIFICATION NECESSARY FOR THIS MISSION:** None Required.

**5. PARKING PLAN:** Highway Patrol Ramp (by the Civil Air Patrol Hangar).

**6. RADIO FREQUENCIES:**

- a. **Air To Ground:** Primary 392.2
- b. **Salina:** CTAF: 119.3, UNICOM: 122.95, ATIS: 120.15, TWR: 119.3 / 257.7, GND: 121.9 / 397.9, NG OPS: 49.95 / 304.6
- c. **Smoky Hill:** Primary 316.9, Secondary 304.9; Victor Freq: 139.7

**7. IN-BRIEFING:** Upon Arrival.

**8. SPRAY CONFIGURATION:**

- a. **System:** SP-3G
- b. **Nozzle Tips/Orientation:** 8070 Flat Fan TeeJet/45° back
- c. **Number:** Wing. 68 Total (34 each side)/Fuselage. 16 Total (8 each side) with 3" restrictor
- c. **Booms:** Full Wing and Fuselage Booms
- d. **Aircraft:** 99107 **Mission Identifier:** QZNRKA202311
- e. **Profile:** Planned LV Profile

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 100' AGL
- b. **Swath Width.** 330 feet.
- c. **Flow Rate.** 307 Gallons/Minute
- d. **Application Rate.** 2 Gal spray/Acre (water with 1 Oz of Control® & 10 Oz of Tordon®)
- d. **Ground Speed:** 200 Knots

## **10. SPRAY MIXING AND LOADING:**

- a. Composition of Each Gallon:
  - (1) 5 Ounces of Tordon® 22K
  - (2) 0.08 Ounces of Control® Drift Retardant
  - (3) Water
- b. First Load (4 Tanks of 457.5 Gallons Each + Sump of 70 Gallons)
  - (1) Fill to 439.5 Gallons of Water/Tank using the pump on the water tanker truck. This is done by putting the filler hose into the rear tank with all tanks open to the common sump. Total water in tanks = 1758 Gal.
  - (2) 70 Gallons of Water in Sump
  - (3) Total Water Added = 1,828 Gallons
  - (4) Upload 17.75 Gallons of Tordon® 22K/Tank (71 Gallons Total for 4 Tanks) with the ULV uploading system.
  - (5) Add 1 Quart of Control®/Tank while agitating approximately 15 min (1 Gallon total for four tanks)
  - (6) Total Quantity Mix. 1900 Gallons
- c. Subsequent Loads (2)
  - (1) Fill to 439 Gallons of Water/Tank. Total Water = 1756 Gal
  - (2) Add 17 Gallons of Tordon 22K/Tank. Total Tordon 22K = 68 Gal
  - (3) Add 1 Quart of Control/Tank. Total Control = 1 Gal
  - (4) Total quantity Mix. 1,825 Gallons (does not include 70 Gal already mixed in Sump)
- d. Final Load (4 tanks of 233.5 Gallons each)
  - (1) Fill to 224.4 Gallons of Water/Tank. Total water = 897.6 Gal
  - (2) Add 9 Gallons of Tordon® 22K/Tank. Total Tordon® 22K = 36 Gal
  - (3) Add 0.5 Quarts of Control®/Tank. Total Control® = 0.5 Gal
  - (4) Total Quantity Mix. 934 Gallons (Does not include 70 Gal already mixed in Sump)
- e. Mixing Time/Load. Agitate by recirculating each mix for approximately 15 minutes.

## **11. SPRAY MONITORING OR TESTING: Performed by the CPMPs**

### **NOTES:**

Ideal to have westerly wind to spray west boundary.

Ideal to have easterly wind to spray east boundary.

(November winds expected to be predominately from the north)

## **12. CONTACTS:**

- a. **Billeting:**
  - FairFild Inn, \$52, (785) 823-6900 FAX (785) 823-0996 (Tax Exempt if on Gov Orders)
  - Comfort Inn, (785) 826-1711
  - Ramada inn, (785) 825-8211
  - Hampton Inn (on Schilling Rd.); Phone (785) 823-9800
- b. **Transportation: Avis (785) 827-2054 (Shelly) / FAX (785) 827-2344**

**NOTE: Once a Credit Card has been put on a Contract AVIS will not change it**

  - (State Tax Exempt Forms accepted for State Tax, however, 3.2% Airport Access Tax and 3.5% Excise Tax is not exempted and will be charged to each vehicle; in order to get reimbursed for these two taxes you must itemize each in Block 16 of your Travel Voucher)
  - 150 miles per day allowed per vehicle
  - 3 Mini Vans & 3 Mid Size cars will be picked up at Moore's Aviation

Confirmation #'s: Vans (\$59/DAY)– 00448281US1, 00448233US2, 00448286US6  
Cars (\$39/DAY)– 00448299US5, 00448427US0, 00448428US1

# AERIAL SPRAY OPERATIONAL SCHEDULE

## NSB, KINGS BAY, GA

### 7-9 May 2009

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at NSB, Kings Bay, GA.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: : Maj (b) (6) , Maj(b) (6)
- (2) Navigators: Maj (b) (6)
- (3) Flight Engineers: SrA (b) (6)
- (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSgt (b) (6) SrA (b) (6) , SrA (b) (6) , SRA (b) (6)
- (2) Crew Chiefs: TSgt (b) (6) , SrA (b) (6)
- (3) Avionics: MSgt (b) (6)

##### c. Entomologist: MC Maj (b) (6) , LTC (b) (6)

#### 2. PPR REQUIREMENTS: 40701

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### 07 MAY (Thurs)

1500 Show  
1700 Depart YNG  
2000 Land KNIP  
2030 Safety Brief

##### 08 MAY (Friday) : Aircraft will squawk 5107 prior to entering P-50. Ensure pilots are given this squawk from ATC!!

Flight plan: KNIP – Kings Bay – KNIP at 3000' on IFR flight plan with delay at Kings Bay.

1300 In-Brief @ CO's Conference Room in Fluckey Hall  
1500 Weather call/Crew show  
1630 Load pesticide and calibrate system  
1815 Depart KNIP  
Sunset: 2010  
2030: Land at no later than @ KNIP

##### 09 MAY (Saturday)

0830 Show time  
1030 Depart KNIP  
1300 Land YNG

**\*\*No weather back up day available.**

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander Cell Phone use (b) (6)

##### b. Entomologist:

- (1) Wind Gauge & Compass
- (2) VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

##### c. Navigators:

- (1) Maps
- (2) Templates

- d. **Spray Maintenance:**  
(1) Spill Kit  
(2) Safety Equipment  
(3) Loading and Clean-up Equipment and Supplies

5. **SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System  
b. **Booms:** Stainless Steel ULV Fuselage Booms  
c. **Nozzles:** size = 8005; 18 open for 7.3 flow rate; oriented straight down.  
d. **Differential GPS:** Wingman Installed  
e. **Aircraft:** 89-9106  
f. **Mission Identifier:** QZNRKA020727

6. **Adult mosquito control spray Parameters: (Kings Bay)**

- a. **Pesticide:**  
Trumpet® EC (78% AI naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: Water  
b. **Application:** 1.0 oz/acre  
c. **Spray Altitude:** 150 Feet  
d. **Swath Width:** 2,000 Feet  
e. **Ground Speed:** 200 Knots (338 Feet/Second)  
f. **Acreage:** 15,000 Acres  
g. **Spray-On Time:** 16 minutes  
h. **Flow Rate:** 7.3 gallons/minute

7. **AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 4 drums of Trumpet for Kings Bay.

8. **PARKING PLAN NAS Jacksonville, FL**

9. **AIR TO GROUND RADIO FREQUENCIES:**

- a. Installation Sprayed: Naval Submarine Base, Kings Bay, Georgia
- b. Mission Duration: 7-9 May 2009
- c. Purpose of Application: To control pestiferous populations of mosquitoes (specifically salt marsh mosquitoes) and biting midges (*Culicoides* spp.)
- d. Application Date: 8 May 2009
- e. Time/s of Application (Local): 1845-2035 hrs
- f. Acres Treated: 15,360 acres
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) , Public Works, Aerial Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 8 May 2009
- i. Date of Waste Generation Letter: 30 October 2007
- j. Installation In-Briefing: (When/Where/Briefer): 8 May, CO's Conference Room in Fluckey Hall, Maj (b) (6) , Mr. (b) (6) , Ms. (b) (6) , Mr. (b) (6) .

**2. OPERATIONAL:**

- a. **Mission Commander:** Maj (b) (6) ugh
- b. **Aircrew:**
  - (1) Pilots: : Maj (b) (6) , Maj (b) (6)
  - (2) Navigators: Maj (b) (6)
  - (3) Flight Engineers: SrA (b) (6)
  - (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6)
- b. **Maintenance:**
  - (1) Spray Maintenance: TSgt (b) (6) , SrA (b) (6) , SrA (b) (6)
  - (2) Crew Chiefs: TSgt (b) (6) , SrA (b) (6)
  - (3) Avionics: MSgt (b) (6)
- c. **Entomologists:** Maj (b) (6) (safety briefer), LTC (b) (6)
- d. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.8
  - (2) Ferry Sorties/Hours: 2/5.4

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Trumpet® EC Concentrate
- b. EPA Registration Number: 59639-90-5481
- c. Formulation Sprayed: Emulsified Concentrate
- d. Gallons Pesticide Loaded: 120 Gal
- e. Gallons Pesticide Applied: 120 Gal
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 20 gal/water
- h. Other Additives Used: None
- i. Application Rate: 1.0 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 18 oriented straight down
- f. Pressure: 38 p.s.i.
- g. Flow Rate: 7.4 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray Off-set: 2000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 140-160°/4-8 mph
  - (2) Release Altitude: 140°/13 knots
- b. Temperature (Degrees Fahrenheit): 89-82°F
- c. Relative Humidity: 40%-54%
- d. Cloud Cover: clear
- e. Source: Ground observations and the aircraft self-contained navigational system.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: GPS system monitoring of aircraft flight pattern (see Attachment 1).
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: mosquito surveillance and reported trap counts high enough to warrant aerial mosquito control (New Jersey style trap collections were as high as 100 individuals in some locations)
  - (2) Results: (b) (6) reported zero mosquito complaints and only one or two individuals in traps the following Monday; control was greater than 95% reductions.

8. **REMARKS:** This was the first mosquito mission at NSB Kings Bay this FY and the first for the new POC there, Mr. (b) (6) . Our thanks to Mr. (b) (6) and Ms. (b) (6) for completing all of the various requirements to put this add-on mission together on short notice. While this mission is relatively new, many of the complicated logistics have already been resolved. The method of asking the driver to remain until the mission is over to receive any generated waste worked well this time, but if the spray aircraft returns after dark, the driver will need to return the following day. This is because Spray Maintenance should not flush and rinse the system after dark because of safety concerns associated with this activity (handling pesticides in low-light conditions). Attachment 1 shows the path of the aircraft with the light red color indicating where spraying or flushing occurred. There were good spray conditions during the 8 May application, and subsequently, over a 99% reduction in mosquitoes was reported. Additional thanks go to the individuals and agencies which gave excellent support to make this mission a success: NAS JAX flight line, FAA, and JAX Center (Mr. (b) (6) ). The next aircraft for a NSB Kings Bay spray mission is scheduled for 25-28 June 2009.

//signed//

(b) (6) , MAJ, USAFR  
DoD CERTIFIED PEST MANAGEMENT PROFESSIONAL

Attachment 1.

**DEPARTMENT OF THE AIR FORCE**  
**AIR FORCE RESERVE COMMAND (AFRC)**

6 May 09

**MEMORANDUM FOR HQ AFRC/DOOM**

**FROM:** 757AS/DOS  
3976 King Graves Rd  
Vienna Ohio 44473-0910

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Kings Bay NSB, GA

1. One C-130 will be available 7-9 May 09 for the requested spray aerial insecticide mission to control nuisance and vector mosquitoes and thus reducing the negative impact on outdoor duty.

2. Concept of Operations:

- a. 7 May (Thursday)  
1500 Show KYNG  
1700 Depart KYNG  
2000 Land KNIP
- b. 8 May (Friday)  
1630 Show KNIP  
1800 Depart KNIP  
1930 Land KNIP
- c. 9 May (Saturday)  
0730 Show KNIP  
0930 Depart KNIP  
1230 Land KYNG

3. Aerial Spray Training for pilots and maintenance support personnel will be accomplished.  
The following flight parameters will be utilized:

- a. Altitude – 150' AGL
- b. Swath width – 2000'
- c. Flow rate – 7.3 gal/min for an application rate of 1.0 oz/acre
- d. Chemical – Trumpet
- e. Approximate spray area – 15000 acres

4. Maj (b) (6) will act as Mission Commander.

5. Maj (b) (6) will act as Aircraft Commander

6. Support required at Kings Bay NSB, GA and Jacksonville NAS, FL has been completed.

(b) (6), Major, USAFR  
Assistant Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## NEW ORLEANS / GULF COAST TRAINING

### 07 - 11 FEB 2000

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: MAJ (b) (6) , MAJ (b) (6) MAJ (b) (6)
- (3) Navigators: LTC (b) (6)
- (4) Flight Engineers: SMS (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6) , SSG (b) (6) , SSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , SSG (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Ground Support/Certified Pest Management Professionals: 1LT (b) (6)

Full Size Car: LtC (b) (6) , Mid: LtC (b) (6) & SMS (b) (6) , Van: MX

#### 2. SCHEDULE: (All time Local)

##### 07 FEB (Monday)

0830: Show at KYNG Fly to New Orleans  
 1100: Depart KYNG  
 1315: Land KNBG

**PPR # - 01-02-07-00**

##### 08 FEB (Tuesday):

0800: Show at KNBG **DGPS** OIL SPILL SORTIE  
 1000: Depart KNBG **DAY** OVERWATER  
 1200: Land KNBG

##### 09 FEB (Wednesday):

0800: Show at KNBG  
 0930-1130: Range Time **VIS** DeSOTO MOA, SHELBY EAST RANGE  
 0900: Depart KNBG **DAY** SIMULATED DECON, ULV SORTIE  
 1200: Land KNBG

##### 10 FEB (Thursday):

0800: Show at KNBG  
 0930-1130: Range time **DGPS** DeSoto MOA, Shelby East Range  
 0900: Depart KNBG **DAY** Simulate ULV, LV/HV Sortie  
 1200: Land KNBG

##### 11 FEB (Friday):

0730: Show at KNBG **FLY HOME**  
 0900: Depart KNBG  
 1315: Land YNG

#### 3. ITEMS TO TAKE:

##### a. Navigator: Maps and Laptop Computer

##### b. Certified Pest Management Professionals:

- (1) Weather Monitoring Equipment
- (2) UHF Radio with Antenna and VHF Radio
- (3) Laptop Computers

- (4) Digital Camera
- (5) SATLOC Trackstar Equipment

**4. AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9

**5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 09107

**6. SPRAY PARAMETERS:** As required; in accordance with type of sortie to be flown

**7. LOADING AND MIXING:** Water

**8. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Unlimited.

**9. CONTACTS:**

- a. Quarters: **New Orleans Billeting:** DSN: 678-3841 COMM: (504) 392-1959 FAX

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

FROM: 757 AS/DOS (346-1111; FAX 346-1616)

SUBJECT: Concept of Operations for Aerial Spray Training at Avon Park AFR/MacDill AFB FL

1. Purpose/Objectives/Benefits: To fulfill training requirements for squadron personnel and evaluate new drift control agent for enhanced application of aerially applied products.
2. Capability: Spray Aircraft Available 7-11 Jan 02.
3. Concept of Operations:
  - a. **7 Jan (Monday):**
    - 1100 Show at KYNG
    - 1300 Take-Off KYNG
    - 1600 Land KMCF
    - 1415 Safety Brief
  - b. **8 Jan (Tuesday):** 0930-1130 Range Times
    - 0800 Show Time/Weather Decision/Load Water
    - 0915 Depart KMCF/Call Tower & Fire Department at AGR
    - 0930-1130 Spray water over designated area of the Avon Park Bombing Range
    - 1200 Land KMCF
  - c. **9 Jan (Wednesday):** 0930-1430 Range Times (2 Sorties possible)
    - 0800 Show Time/Weather Decision/Load Water
    - 0915 Depart KMCF/Call Tower & Fire Department at AGR
    - 0930-1130 Spray water over designated area of the Avon Park Bombing Range
    - 1200 Land KMCF (Second Sortie to be determined)
  - d. **10 Jan (Thursday):** 0700-0930 Range Times
    - 0630 Show Time/Load Water
    - 0645 Depart KMCF/Call Tower & Fire Department at AGR
    - 0700-0930 Spray water over designated area of the Avon Park Bombing Range
    - 1000 Land KMCF
  - e. **11 Jan (Friday):**
    - 0700: Report
    - 0800: Out-Briefing
    - 0900: Depart KMCF
    - 1200: Land KYNG
4. Spray Parameters:

- a. Acreage: N/A
  - b. Altitude: 100 Ft AGL
  - c. Ground Speed: 200 Knots
  - d. Pesticide: N/A (Training with dyed water only)
  - e. Application Rate: 500 Gallons of water
  - f. Flow Rate: Approximately 200 Gallons per minute at psi 40
  - g. System: SP2G – MASS ULV; Modules 1 and 2
  - h. Nozzle Tips/Number/Orientation: 8070 Flat Fan oriented straight back
  - i. Aircraft Tail Number: 99105
  - j. Deploy/Re-Deploy Time: 3.5 hrs
  - k. Spray Time: 2 hrs (or as called by Mission Commander)
5. Mission Commander: Major (b) (6)
6. Support required at MacDill AFB and Avon Park Bombing Range AFB have been approved via telephone conversations with MacDill AFB Ops and the Range Manager at Avon Park AFRB.
7. If you have any questions concerning this mission please contact DSN (b) (6) .

(b) (6) , Major, USAFR  
Deputy Chief of Aerial Spray  
757 AS/DOS (346-1652)

0630: Show Time

0645: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

1000: Land KMCF

11 JAN (Friday):

0900: Depart MCF

1200: Land YNG

#### **3. PURPOSE OF THIS MISSION.** Compare drift retardant capabilities of Garrco Control® with those of Airex DC™

#### **4. ITEMS TO TAKE:**

- a. **Navigator:** Maps with "No-Spray" Areas Marked and Laptop Computer

- b. **Certified Pest Management Professionals:**
- (1) 18 Packs of Water-Sensitive Cards
  - (2) 4 Boxes of Plastic Card Holders & Index Cards
  - (3) 1 Signal Mirrors
  - (4) 1 Spot Lights
  - (5) 1 Engineer Wheel
  - (6) Swath Kit Weather Station and Image Analyzer
  - (7) UHF Radio with Antenna and VHF Radio
  - (8) Ground Maps
  - (9) Laptop Computer
  - (10) Digital Camera
  - (11) SATLOC Trackstar Equipment

**5. AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s)
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

**6. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 105
- c. Mission Identifier: QZNRKA485007

**7. SPRAY PARAMETERS:**

- a. Booms -- Fuselage only.
- b. Nozzles -- 8070 Flat Fan oriented straight back.
- c. Number of Nozzles -- 30 Total; 15 on each fuselage boom.
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 100' above ground level.
- f. Spray -- Water with either Garrco Control® or Airex DC™.
- g. Wind -- Headwind/tailwind.
- h. Flow Rate -- 200 Gallons per minute at 40 psi.

**8. LOADING, MIXING AND APPLICATION:**

- a. 8 JAN 02 –  
Mix 16 ounces of Control® with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.
- b. 9 JAN 02 – 0.5% solution  
Mix 2.5 gallons of Airex DC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.
- c. 10 JAN 02 – 1.0% solution  
Mix 5 gallons of Airex DC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.

**9. CONTACTS:**

- a. Quarters:

**MEMORANDUM FOR 757 AS/DO**

**FROM: 757 AS/DOS (LtC Spears)**

**SUBJECT: Avon Park Drift Retardant Comparison Mission Report, 7-11 January 2002**

1. Purpose: Compare spray deposition from Garrco Control® and AirexDC™ drift retardants.
2. Traveler(s): The participants are listed in Attachment 1, the Avon Park Operational Schedule for 7-11 January 2002.
3. Itinerary: The itinerary is listed in the Avon Park Operational Schedule (Attachment 1).
4. Aerial Spray Flight Data:

a. 7 Jan 02: Ferry Sortie	KYNG-KMCF 1850-2155Z	Flight Hours: 3.1
b. 8 Jan 02: Spray Sortie	KMCF-KMCF 1429-1650Z	Flight Hours: 2.4
c. 9 Jan 02: Spray Sortie	KMCF-KMCF 1420-1555Z	Flight Hours: 1.6
d. 10 Jan 02: Spray Sortie	KMCF-KMCF 1320-1455Z	Flight Hours: 1.6
e. 11 Jan 02: Ferry Sortie	KMCF-KYNG 1415-1725Z	Flight Hours: 3.2
5. Discussion:
  - a. StaPut® and Control® are drift retardants used previously, with Control® proving to be more effective than StaPut®. AirexDC™ is a new product that became available in mid-2001. It forms a protective coating around a spray droplet to prevent evaporation as opposed to the previous materials that mixed with and thickened the spray solution. The initial tests comparing the two were conducted in December 2001.
  - b. Control® was tested at the rates of 4 ounces and 8 ounces per 500 gallons of water. AirexDC™ proved to be a better material at both 0.5% and 1.0%. During this trial, Control® was applied at 32 ounces per 500 gallons of water. Trials of AirexDC™ were conducted at the rates of 1.0% (5 gallons) and 0.75% (3.75 gallons) per 500 gallons of water. AirexDC™ was used at a higher rate since it is less concentrated than Control®.
6. Results:
  - a. Using AirexDC™ resulted almost twice as much recovery in ounces per acre as Control® (Figure 1). Although the number of droplets collected (drops/cm<sup>2</sup>) was similar for the higher rate of AirexDC™, the lower rate of AirexDC™ resulted in more droplets collected. The volume median diameter (DV50) for both rates of AirexDC™ was larger than for Control®, accounting for increased deposition.

- b. The higher rate for AirexDC™ showed less deposition than the lower rate. This is because the humidity was about 20% lower than when the lower rate was flown. This resulted in increased evaporation, and thus, less recovery.
- c. Effective swath width was widest with 0.75% AirexDC™ without an increase in total swath. The wider effective swath is important for us in optimizing our application by decreasing the number of swaths we need to fly and the amount of time to complete an application.

## 7. Conclusions and Recommendations:

- a. AirexDC™ proved to be the best material (Figure 2) resulting in more recovery on the ground, larger volume median diameter and, therefore, less drift. It also produced a wider effective swath without increasing the total swath. Using this material will give us better recovery and control of spray deposition in future missions.
- b. Control® at a rate of 32 ounces per 500 gallons of water produced a 30 ft wide effective swath that is unacceptably narrow for most applications. AirexDC™ at 1.0% was better, but the effective swath was only 48 ft. AirexDC™ at 0.75% produced the best effective swath at 65 ft. It may prove to be the best rate for our application and airplane.
- c. We need to conduct additional characterization trials with AirexDC™ comparing different nozzle configurations. This will allow us to determine the best nozzle configuration for different applications.

(b) (6), Lt Col, USAFR  
Research Entomologist

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MACDILL AFB / AVON PARK, FL

### 7 - 11 JAN 2002

**PURPOSE/OBJECTIVE/BENEFIT:** To fulfill training requirements for squadron personnel and evaluate new drift control agent for enhanced application of aerially applied products.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: Maj (b) (6), Lt Col (b) (6)
- (3) Navigators: Maj (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: CMS (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6), TSG (b) (6), SSG (b) (6)
- (2) Crew Chiefs: SSG (b) (6), SRA (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Certified Pest Management Professionals: Lt Col (b) (6), Capt (b) (6)

##### d. Ground Support: MSG (b) (6)

Enterprise #: \$75 Vans: (b) (6); \$45 Full Size: (b) (6); \$41 Mid Size: SSG (b) (6)

#### 2. SCHEDULE: (All time Local)

07 JAN (Monday): No range time.

**PPR # - 007-RJ1**

1100: Show at KYNG

1300: Depart KYNG

1600: Land KMCF

08 JAN (Tuesday): Range Times 0930-1130, call AGR Tower & Fire Dept

0800: Show Time

0915: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

1200: Land KMCF

09 JAN (Wednesday): Range Times 0930-1430, call AGR Tower & Fire Dept

0800: Show Time

0915: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

1430: Land KMCF

10 JAN (Thursday): Range Times 0700-0930, call AGR Tower & Fire Dept

0630: Show Time

0645: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

1000: Land KMCF

11 JAN (Friday):  
0900: Depart MCF  
1200: Land YNG

3. **PURPOSE OF THIS MISSION.** Compare drift retardant capabilities of Garrco Control® with those of Airex DC™

4. **ITEMS TO TAKE:**

- a. **Navigator:** Maps with “No-Spray” Areas Marked and Laptop Computer
- b. **Certified Pest Management Professionals:**
  - (1) 18 Packs of Water-Sensitive Cards
  - (2) 4 Boxes of Plastic Card Holders & Index Cards
  - (3) 1 Signal Mirrors
  - (4) 1 Spot Lights
  - (5) 1 Engineer Wheel
  - (6) Swath Kit Weather Station and Image Analyzer
  - (7) UHF Radio with Antenna and VHF Radio
  - (8) Ground Maps
  - (9) Laptop Computer
  - (10) Digital Camera
  - (11) SATLOC Trackstar Equipment

5. **AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s)
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

6. **SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 105
- c. Mission Identifier: QZNRKA485007

7. **SPRAY PARAMETERS:**

- a. Booms -- Fuselage only.
- b. Nozzles -- 8070 Flat Fan oriented straight back.
- c. Number of Nozzles -- 30 Total; 15 on each fuselage boom.
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 100' above ground level.
- f. Spray -- Water with either Garrco Control® or Airex DC™ .
- g. Wind -- Headwind/tailwind.
- h. Flow Rate – 200 Gallons per minute at 40 psi.

8. **LOADING, MIXING AND APPLICATION:**

- a. 8 JAN 02 –

Mix 16 ounces of Control® with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.

b. 9 JAN 02 – 0.5% solution

Mix 2.5 gallons of Airex DC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.

c. 10 JAN 02 – 1.0% solution

Mix 5 gallons of Airex DC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.

## 9. CONTACTS:

a. Quarters:

-- **MacDill Lodging:** DSN: 968-4259, FAX 2660 (Gp 968-2617/2594)

1 April 2002

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Parris Island  
MCRD SC for Control of Sandfly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft Available on 7 April through 12 April 2002

3. Concept of Operations:

a. 7 Apr 02 (Sunday):

1400 Take Off KYNG  
1600 Land KNBC  
1630 Safety Briefing

b. 8 Apr 02 (Monday):

1430 Load Chemical  
1630 Take Off KNBC  
1900 Land KNBC

c. 9 Apr 02 (Tuesday):

1400 Load Chemical  
1630 Take Off KNBC  
1900 Land KNBC

d. 10 Apr 02 (Wednesday):

1400 Load Chemical  
1700 Take Off KNBC  
1900 Land KNBC

e. 11 Apr 02 (Thursday):

1400 Load Chemical  
1700 Take Off KNBC  
1900 Land KNBC

- f. 12 Apr 02 (Friday):
  - 1200 Take Off KNBC
  - 1400 Land KYNG
- 4. Spray Parameters:
  - a. Acreage: 7,500 Acres (Only areas determined by PMP)
  - b. Altitude: 150 Ft AGL
  - c. Pesticide: Dibrom® Concentrate (naled)
  - d. Deploy: 1.6 Hrs
  - e. Re-Deploy: 1.6 Hrs
  - f. Spray Time: 16 Minutes per Sortie (or as called by PMP)
- 5. Aircraft Commander/Mission Commander: Major (b) (6)
- 6. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr (b) (6) DSN(b) (6) .
- 7. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

(b) (6) , Lt Col, USAFR  
Operations Officer, 757 AS

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 7-12 APR 2002

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### 1. 910 AW PARTICIPANTS:

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6) , MSG (b) (6) ,  
SSG(b) (6) , SSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , SSG(b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Pest Management Professionals/Entomologist: Capt (b) (6)

##### d. 910 MDS/SG Observer: Maj (b) (6)

#### 2. PLANNED SEQUENCE OF EVENTS: (All times local)

##### 07 APR (Sunday):

1400: Take off KYNG  
1600: Land KNBC  
1630: Safety Briefing

**PPR # 097-01**

##### 08 APR (Monday):

1400: Facility In-Brief  
1430: Load Chemical  
1630: Take off KNBC  
1900: Land KNBC  
1947: Sunset

HAN 10 Gallon boom flush.

##### 09 APR (Tuesday):

1400: Load Chemical  
1630: Take off KNBC  
1900: Land KNBC  
1947: Sunset

##### 10 APR (Wednesday):

1400: Load Chemical  
1630: Take off KNBC  
1900: Land KNBC  
1948: Sunset

##### 11 APR (Thursday):

1400: Load Chemical  
1630: Take off KNBC  
1900: Land KNBC  
1949: Sunset

##### 12 APR (Friday):

1200: Take off KNBC  
1400: Land KYNG

### 3. ITEMS TO TAKE:

a. **Entomologist/CPMP:**

- (1) Wind Gauge, Compass, and Signal Mirrors
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder, Calibration Tables, and Oil Sensitive Papers
- (4) DGPS Computers, Trackstar Equipment, and Maps

b. **Navigators:**

- (1) Maps
- (2) Templates
- (3) Laptop Computer

c. **Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

### 4. SPRAY CONFIGURATION: SP-2G

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- e. **Differential GPS:** Installed
- f. **Aircraft Tail #:** 09108
- f. **Mission Identifier:** QZNRKA

### 5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)

a. **Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: HAN

- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

### 6. AMOUNT OF SPRAY MATERIAL AVAILABLE: Load 60 gallons of Dibrom® Concentrate per sortie and 25 gallons of HAN in flush tank.

### 7. PPR REQUIREMENTS: Required: PPR # 097-01

### 8. PARKING PLAN: Beaufort MCAS Ramp

## 9. AIR TO GROUND RADIO FREQUENCIES:

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

10. **TRANSPORTATION:** Parris Island will provide two vans for transportation to/from quarters and dining. An additional vehicle will be available for the CPMP/Entomologists/Ground Support personnel.

11. **SPRAY MONITORING OR TESTING:** CPMP and Parris Island MCRD Project Coordinator.

## 12. CONTACTS:

a. **Parris Island MCRD SC:** (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 7-12 April 2002
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 8 April 2002  
Time/s of Application (Local): 1745-1942
- f. Acres Treated: 6,272
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 7 April 2002
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-briefing: (When/Where/Briefer/s): Assistant Chief of Staff, Installation and Logistics, Col Semmler (Office); (b) (6) Maj (b) (6) & Capt (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMP/s (Category 11): CPT (b) (6)
- c. Aircrew:
  - (1) Pilots: MAJ (b) (6) (A/C), CPT (b) (6)
  - (2) Navigator(s): LTC (b) (6)
  - (3) Flight Engineer(s): SMS (b) (6)
  - (5) Spray Operators: CMS (b) (6) MSG (b) (6), TSG (b) (6)
- d. Safety Briefer: CPT (b) (6)
- e. Spray Maintenance: SMS (b) (6), MSG (b) (6), MSG (b) (6),  
SSG (b) (6), SSG (b) (6)
- f. Spray Ground Monitors: CPT (b) (6)
- g. Crew Chiefs: MSG (b) (6), SSG (b) (6)
- h. Avionics: TSG (b) (6)
- i. 910 MDS/SG Observer: MAJ (b) (6)
- j. Flying Data:
  - (1) Spray Sorties/Hours: 2/3.7
  - (2) Ferry Sorties/Hours: 2/4.1

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60
- e. Gallons Pesticide Applied: 49
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 15 gallons Heavy Aromatic Naptha (HAN)
- h. Other Additives Used: None
- i. Application Rate: 1 Oz/Acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used:
- f. Pressure: 35 PSI
- g. Flow Rate: 3.6

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off Set: 3000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground (Knots): 6-8 knots @ 140-160
  - (2) Release Altitude: 10-12 knots @ 140-160
- b. Temperature (Degrees Fahrenheit): 68 °F
- c. Relative Humidity: 60 %
- d. Cloud Cover: Clear
- e. Source: Ground observations at the MCRD Marina.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1 meter dowels
  - (2) Results: Good coverage throughout spray area, as determined by OSC cards.
- b. Effectiveness:
  - (1) Technique/s Used: Insect trapping was carried out using carbon-dioxide baited traps
  - (2) Results: The number of biting midges collected in the traps were reduced following the spray.

**8. REMARKS:** The second spray sortie was weather cancelled after take-off when conditions were no longer conducive for insect control. The next mission to Parris Island MCRD is scheduled for 21-25 April 2002, with two spray sorties anticipated.

**(b) (6)**

**(b) (6)**, CAPT, USAFR

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

FROM: 757 AS/DOS (DSN 346-1111/1531; FAX 346-1616)

SUBJECT: Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT  
Annual Weed Control Spray Mission on the Utah Test and Training Range (UTTR)

1. **Capability:** One aircraft will be available 7-15 Sep 2003 for the requested spray mission. The support aircraft available 7-8 & 14-15 Sep 03 in support of the mission.

2. **Concept of Operations:**

a. **7 Sep (Sunday):**

0900 Show at KYNG  
0910 Pre-Mission Briefing  
0930 LM's released to assist in loading aircraft  
1100 Spray aircraft 99107 Take-Off KYNG  
1105 Support Aircraft 19143 Take-Off KYNG  
1430 Land HIF  
1445 Safety Brief

b. **8 Sep (Monday) – 14 Sep (Sunday):** Schedule of daily events will be determined by the Mission Commander as required.

**(Range times 0700-1400)**

0430 Ground Support Team departs for UTTR  
0515 FEs, Crew Chiefs, & Spray MX report and Mix/Load Chemical  
0700-1400 Target areas sprayed as designated by PMP

c. **13 Sep (Saturday):** Weather back-up.

d. **14 Sep (Sunday):** Flush and clean up day.  
Schedule of daily events will be determined by the Mission Commander as required.  
Support Aircraft returns to Hill AFB

f. **15 Sep (Monday):**

0800 Aircrew report for duty  
0830 All personnel report  
1000-1015 Spray Aircrafts & Support aircraft take-off  
1700-1800 Mission completed all personnel and aircraft arrive at KYNG

3. **Spray Parameters and Sequencing:** (See attached Operational Schedule)
4. **Mission Commander:** Lt Col (b) (6)
5. Support required at Hill AFB and the UTTR has been completed.

(b) (6), Lt Col, USAFR  
Aerial Spray Mission Commander  
757 AS/DOS

Attachment  
Spray Operations Schedule

5. 910 Com Flt Personnel: SMS (b) (6), MSG(b) (6), MSG (b) (6),  
TSG (b) (6), TSG (b) (6), SSG (b) (6)

**6. IN-BRIEFING: (UTTR Staff)**

- a. **When/Time:** 7 Sep 03, 1445
- b. **Where:** Air Freight Terminal
- c. **Who:** LtC (b) (6) , LtC (b) (6) SMS (b) (6)

**7. ITEMS TO TAKE:**

- a. **PMP:**
  - (1) Project Notebook with Recording Sheets and Maps
  - (2) LapTop Computer and Batteries
  - (3) 2 Compasses and Stop Watch
  - (4) 2 Signal Mirrors and 2 Spot Lights
  - (5) Measuring Wheels and Tape
  - (6) Entomologists' Tool Kit
  - (7) UHF/VHF Radios and VHF Radios
  - (8) Cellular Phone
- b. **Mission Commander:** Cellular Phone
- c. **Navigator:** Maps
- d. **Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Herbicide Safety Binder
  - (4) Safety Equipment
- e. **Maintenance:** Aircraft Engine Spares

**8. SPRAY CONFIGURATION:**

- a. One Aircraft, Systems 3 and 5
- b. MASS Modules 1, 2 and 3
- c. UHV Fuselage booms oriented straight back

**9. PPR REQUIREMENTS:**

**10. PARKING PLAN:** Air Freight Ramp – on West side of the airfield, Spots 11/12

**11. RADIO FREQUENCIES:**

- **Clover Control:** UHF 339.0, 275.9, 361.4
- **Eagle Tower:** UHF 351.0; **MAWK 6 & 12**
- **Spray Ground Freq:** VHF 134.1, 118.45; UHF 398.1 (Primary), 383.2 (Back-up)
- **Spray Ground to Spray Maintenance:** **G MNT 1NO (on UTTR Brick)**
- **Base OPS:** 139.3

**12. SPRAY PARAMETERS:**

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

**13. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

**b. When:** Start at 0515 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be Furnished by Installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**14. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**15. CONTACTS:** (Commercial prefix (801) 777-XXXX; DSN 777-xxxx)

**16. SEQUENCING:**

- a.** Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling. Target 21 is the priority and shall be completed before starting Target 24.
- b.** After completion of Target 21 if Sector E (North of Base Leg Knoll) is released for air operations on Eagle Range then spray ops aircraft shall remain South of the North edge of Target 21, and Eagle Range aircraft shall remain North of Base Leg Knoll.
- c.** When winds blow directly from one side of the target to the middle of the target, ground monitors will direct the “dress up” of the target edges.
- d. Spraying Priorities:**
- (1) Target 21
  - (2) Target 24
  - (3) NORDLZ

**f. Multiple-Target Alignments for Possible Future Operations.**

Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required). However, no simo air operations will be conducted with Eagle Range while working Target 21.

- (1) The west edge of Target 23 lines up 1/4 mile west of the west edge of Target 21.
- (2) The west edge of Target 24 lines up with the west edge of Target 21.
- (3) When treating Targets 21 and 23 together on the same pass, treat the western-most stake on Target 23 and stake 139 on Target 21. If treating the east edge of Target 23, start with stake 90 on Target 21. When treating Targets 23 and 21 on the same passes, use stakes 90-139 on Target 21. Be sure to save treatment of stakes 90-139 on Target 21 until treating Targets 21 and 23 together.

**(4) When treating Targets 21 and 24 together, treat the west edge of Target 24 while aligned with stake 89 on Target 21. Be sure to save stakes 45-89 on Target 21 to treat concurrently with Target 13.**

**(5) Target 13 should be treated concurrently with stake 45 on Target 21 and those stakes to the east of stake 45.**

**17. GENERAL TARGET INFORMATION:**

**a. Target 21:**

- (1) Dimensions: 4,980' X 7,770'
- (2) Acreage: 888
- (3) Acres Sprayed in 2002: 888
- (4) 2000 Aircraft Loads: 18,869 Gal
- (5) Sorties: 17
- (6) Passes (35' Swath): 157
- (7) Spray-On Time/Pass: 23 Seconds
- (8) Spray Heading: 00/180

**b. Target 24:**

- (1) Dimensions: 1,600' X 6,080'
- (2) Acreage: 223
- (3) Acres Sprayed in 2002: 223
- (4) 2000 Aircraft Loads: 5,263 Gal
- (5) Sorties: 7
- (6) Passes: 47
- (7) Spray-On Time/Pass: 18 Seconds
- (8) Spray Heading: 00/180

**18. PLANNED SEQUENCE OF EVENTS: Hill AFB Tower Control and Runway Hours 0620L**

**NOTE: Scheduling reflects no weather or maintenance delays.**

**ALL TIMES MAY BE ADJUSTED BY MISSION COMMANDER.  
DUTY DAY FOR CIVILIANS WILL BE STD DAY (8 HOURS).  
MILITARY STATUS PERSONNEL WILL WORK AS  
REQUIRED WITHIN CREW REST CONSTRAINTS.**

**Tower Control, Runway & Airfield hours start at 0700L**

**RANGE TIMES: 0700-1400 each day (8-14 SEP)  
END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE**

**MIX.**

**ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL  
AIRCRAFT IS PRE-FLIGHTED FOR THE NEXT DAY OR RELEASED  
BY THE AIRCRAFT COMMANDER.**

**7 Sep (Mon):**

Ground Support personnel depart for Wendover Stateline Inn

**8-14 Sep (Mon-Sun):** (First Spray Sortie, Range Times 0700-1400, 8-14 Sep)

0500L: Spray Maintenance starts on first full day of mission and adjust as directed

0616L: Sunrise (see attach Sunrise/Sunset Chart)

0700-1400L: Spray Targets as directed Using 8 Sep schedule spray

UTTR

Targets as directed by the Mission Commander or Ground Support

Director

**14 Sep (Sun):** Weather Back-up/Flush, Clean Up; Support Aircraft arrives at Hill

**15 Sep (Monday):** All personnel and aircraft return to YNG

0800L: All Aircrew report

0830L: All Personnel report

1000L: Spray Aircraft Takes Off Hill AFB

1015L: Support Aircraft Takes off Hill AFB

1700L: Spray Lands YNG

1715L: Support A/C Lands YNG

**19. CALCULATIONS:**

$1,750 \text{ GALLONS/LOAD} / 366.1 \text{ GAL/MIN} = 4.78 \text{ MIN/LOAD}$

OR 4 MIN 47 SEC/LOAD OR 287 SEC/LOAD

## UTTR GEOGRAPHIC LOCATION

### AND TARGET DIMENSIONS

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

**TARGET 13.** The target is located east of and between targets 23 and 24. Target 13 is three concentric circles. The spray area is 2000 feet in diameter and contains approximately 72 acres. Orientation is generally N-S, although exact spray lines will depend on marker set-up.

**TARGET 21.** The target is the most northerly of the southern group. Target is a large, rectangular area 5000' X 7800'. Orientation is NNE-SSW using right patterns of SSW-NNE using left patterns. Target and surrounding terrain are flat.

**TARGET 22.** Target is located approximately three N.M. N.E. of CBU Valley. Target is a rectangle 2400' X 3700'. To assist in identification, Target 1, a circular target, is located immediately SE of 22. Target orientation is SE to NW with left patterns.

**TARGET 23.** Target is located about three N.M. SSW of Target 21. Target 23 is a rectangle approximately 1850' X 4500'. Terrain is flat. Target orientation is NNE-SSW using right patterns or SSW-NNE using left patterns.

**TARGET 24.** Target is located about one N.M. SSW of Target 23. Target 24 is a 1500' X 6000' rectangle. Orientation is the same as Target 21. Terrain is flat.

**TARGET 26.** Personnel from MMETA, or 6501st RS will be aboard aircraft to assist in identification and orientation of target. Target is located west of Target 21. Target is rectangle 100' X 6000'. Terrain is flat and can be flown as desired.

**CBU VALLEY.** CBU Valley is located on the northeast corner of the range. Spray line is oriented northwest/southwest (320/140). Spray can be accomplished both directions with turn around over the lake bed northwest and at the head of the valley southeast. Alternatively, spray will be northwest using left patterns. The ground rises gradually to the southeast of the target requiring higher power going southeast, lower going northwest.

**EAGLE TARGET.** Eagle is located southwest of CBU Valley and approximately six NM northwest of Target 21. Targets are the run-in areas to the strafing targets and the bombing targets. Spray line from the northeast run-ins is 023, and spray line for the west run-ins is 293. The centerline is marked by a row of tires. Bombing run-ins are triangular 5200' X 600' at the wide end and 50' at the narrow end. Orientation is northeast to southwest on one and northwest to southeast to the other.

**BIG POPPA.** Big Poppa is a circle 3250' in diameter located N.E. of CBU Valley. Orientation of spray lines is SSW to NNE. The target is dished with higher terrain on the east side and northeast quadrant. Off the target, the terrain rises rapidly to the east. Leaving the northeast quadrant, there is a ridge line about 150' - 200' high to overfly. Patterns are left hand.

**WILDCAT MOUNTAIN.** Target is a simulated airfield located about 30 NM southwest of the northern end of Cedar Mountain. The spray area consists of a runway, parallel taxiway and parking ramp. The runway is 200' X 10,200' the Orientation is NE to SW with left patterns. Target area is flat but the terrain rises rapidly to the west.

## **SPRAY OPERATIONAL SCHEDULE**

### **UTAH TEST AND TRAINING RANGE MISSION**

### **17-24 SEPTEMBER 2004**

17 Sep Support A/C #xxx, Report Time: 0900 Take Off: 1100 Arrive: 1430L  
Spray #1 A/C #107, Report Time: 0905 Take Off: 1105 Arrive: 1435 L  
Spray #1 A/C #108, Report Time: 0910 Take Off: 1110 Arrive: 1440 L

**PURPOSE/BENEFIT/OBJECTIVE:** To control vegetation on selected targets at the Utah Test and Training Range (UTTR)

#### **1. AIRCREW:**

- a. **Pilots:** MAJ (b) (6) , MAJ (b) (6) , MAJ (b) (6) , CPT (b) (6)
- b. **Navigators:** LTC (b) (6) , MAJ (b) (6)
- c. **Flight Engineers:** MSG (b) (6) , MSG (b) (6)
- d. **Spray Operators:** MSG (b) (6) , MSG (b) (6)

#### **2. AIRCRAFT/MASS SUPPORT:**

- a. **Mission Commander:** MAJ (b) (6)
- b. **Spray Maintenance:** TSG (b) (6) , TSG (b) (6) ,  
TSG (b) (6) , SSG (b) (6)

#### **3. UTTR GROUND PARTY:**

- a. **Entomologist/Pest Management Professional(s):**  
LTC (b) (6) , MAJ (b) (6) , CPT (b) (6) , CPT (b) (6)

#### **4. MAINTENANCE:**

- a. **910 MA Supervisor:** SMS (b) (6)
- b. **Avionics:**
- c. **Engine/Propulsion:**
- d. **Crew Chief:**

- 5. **910 Com Flt Personnel:** SMS (b) (6) , MSG(b) (6) , MSG (b) (6) ,  
TSG (b) (b) (6) TSG (b) (6) , SSG (b) (6)

**6. IN-BRIEFING:** (UTTR Staff)

- a. **When/Time:** 17 Sep 04, 1530
- b. **Where:** Air Freight Terminal
- c. **Who:** Everyone
- d. **Briefing Plan**
  - a. Billeting
  - b. Vehicles
  - c. Schedule of events
  - d. Weather call
  - e. Cellular Phone numbers for all personal

**7. ITEMS TO TAKE:**

- a. **PMP:**
  - (1) Project Notebook with Recording Sheets and Maps
  - (2) Laptop Computer and Batteries
  - (3) 2 Compasses and Stop Watch
  - (4) 2 Signal Mirrors and 2 Spot Lights
  - (5) Measuring Wheels and Tape
  - (6) Entomologists' Tool Kit
  - (7) UHF/VHF Radios and VHF Radios
  - (8) Cellular Phone
- b. **Mission Commander:** Cellular Phone, Mission Info
- c. **Navigator:** Maps
- d. **Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Herbicide Safety Binder
  - (4) Safety Equipment
- e. **Maintenance:** Applicable Equipment

**8. SPRAY CONFIGURATION:**

- a. One Aircraft, Systems 3 and 5
- b. MASS Modules 1, 2 and 3
- c. UHV Fuselage booms oriented straight back

**9. PPR REQUIREMENTS:**

**10. PARKING PLAN:** Air Freight Ramp – on West side of the airfield, **Spots 11/12**

**11. RADIO FREQUENCIES:**

- **Clover Control:** UHF 285.65, 275.9, 361.4
- **Eagle Tower:** UHF 351.0; **MAWK 4 (b) (6)**
- **Spray Ground Freq:** UHF 398.1 (Primary), 383.2 (Back-up); VHF 134.1, 118.45
- **Spray Ground to Spray Maintenance:** Use Sat phones
- **Base OPS:** 139.3

**12. SPRAY PARAMETERS:**

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)

- e. Spray Altitude:** 100 Feet AGL
- f. Swath Width:** 35 Feet
- g. Flow Rate:** 366.1 Gallons/Minute

**13. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

**b. When:** Start at 0515 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be Furnished by Installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**14. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**16. SEQUENCING:**

- a.** Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling. Target 21 is the priority.
- b.** Spray ops aircraft must stay south of Base Leg Knoll during turns on north run on Target 21. Coordination with range control is essential to assure that this portion of the range is released for air operations.
- c.** When winds blow directly from one side of the target to the middle of the target or during early morning when wind speed is low, ground monitors will direct the "dress up" of the target edges.
- d. Spraying Priorities:**  
(1) Target 21  
(2) Target 24  
(3) NORDLZ
- e. Multiple-Target Alignments for Possible Future Operations.**  
Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required).  
(1) The west edges of Targets 21 & 24 are contiguous and can be treated on the same pass with a spray-off gap between targets.

**17. GENERAL TARGET INFORMATION:**

**a. Target 21:**

- (1) Dimensions: 4,980' X 7,770'
- (2) Acreage: 888
- (3) Acres Sprayed in 2002: 888
- (4) 2000 Aircraft Loads: 18,869 Gal
- (5) Sorties: 17
- (6) Passes (35' Swath): 157
- (7) Spray-On Time/Pass: 23 Seconds
- (8) Spray Heading: 00/180

**b. Target 24:**

- (1) Dimensions: 1,600' X 6,080'
- (2) Acreage: 223
- (3) Acres Sprayed in 2002: 223
- (4) 2000 Aircraft Loads: 5,263 Gal
- (5) Sorties: 7
- (6) Passes: 47
- (7) Spray-On Time/Pass: 18 Seconds
- (8) Spray Heading: 00/180

**18. PLANNED SEQUENCE OF EVENTS: Hill AFB Tower Control and Runway Hours 0700L**

Note to next year's planner: check runway hours. There was confusion in 2003 because base ops was conducting 24/7 ops but the tower was not! Check weekend versus weekday hours.

**NOTE: Scheduling reflects no weather or maintenance delays.**

**ALL TIMES MAY BE ADJUSTED BY MISSION COMMANDER.  
DUTY DAY FOR CIVILIANS WILL BE STD DAY (8 HOURS).  
MILITARY STATUS PERSONNEL WILL WORK AS  
REQUIRED WITHIN CREW REST CONSTRAINTS.**

**Tower Control, Runway & Airfield hours start at 0700L**

**RANGE TIMES: ????????**

**END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE MIX.  
ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS  
PRE-FLIGHTED FOR THE NEXT DAY OR RELEASED BY THE AIRCRAFT  
COMMANDER.**

**17 Sep (Fri):**

Ground Support personnel depart for Wendover Stateline Inn

**18-22 Sep (Sat-Wed):** (First Spray Sortie, **Range Times 0700-1400, 18-23 Sep**)

0500L: Spray Maintenance starts on first full day of mission and adjust as directed

0712L: Sunrise (see attach Sunrise/Sunset Chart)

0700-1400L: Spray Targets as directed Using 8 Sep schedule spray UTTR

Targets as directed by the Mission Commander or Ground Support Director

**23 Sep (Thur):** Weather Back-up/Flush, Clean Up; Support Aircraft arrives at Hill

**24 Sep (Fri):** All personnel and aircraft return to YNG

0800L: All Aircrew report

0830L: All Personnel report

## **UTTR GEOGRAPHIC LOCATION AND TARGET DIMENSIONS**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

**TARGET 21.** The target is the most northerly of the southern group. Target is a large, rectangular area 5000 X 7800 feet. Orientation is NNE-SSW using right patterns of SSW-NNE using left patterns. Target and surrounding terrain are flat.

**TARGET 24.** Target is located to the south of Target 21. Target 24 is a 1600' X 6000' rectangle. Orientation is the same as Target 21. Terrain is flat.

**NORD LZ.** Assault Strip located to the northeast of Target 21 and Base leg Knoll. The runway orientation is SE to NW (120/300) and is 150 X 5700 feet.

# 910 AW AERIAL SPRAY--PMP'S POST-MISSION REPORT

## UTAH TEST AND TRAINING RANGE

### 7-15 SEPTEMBER 2003

#### 1. MISSION BASICS:

- a. **Installation Sprayed:** Utah Test and Training Range, UT
- b. **Mission Duration:** 7-15 Sep 03
- c. **Purpose of Application:** Weed Control over designated UTTR targets/facilitate UXO recovery
- d. **Date/s and Time/s of Application (Local):** See Spray Operations Summary Chart
- e. **Acres Treated:** 1146 acres: See Spray Operations Summary Chart
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** (b) (6) , Aerial Spray Coordinator, Hill/UTTR AFB, DSN (b) (6)
- g. **Date Spray Map Last Approved:** 7 Sep 03
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 7 Sep/1600, Base OPS, LtC (b) (6) /LtC (b) (6)

#### 2. OPERATIONAL:

- a. **Mission Commander:** LtC (b) (6)
- b. **Certified PMP (Category 11):** LtC (b) (6) , Maj (b) (6) (b) (6) Capt (b) (6)
- c. **Aircrew:**
  - (1) Aircraft CMDR/Pilot: Maj (b) (6) , Maj (b) (6)
  - (2) Navigators: LtC (b) (6) , Maj (b) (6)
  - (3) Flight Engineer: MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) , MSG (b) (6)
- d. **Safety Briefer:** Maj (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** TSG (b) (6) , TSG (b) (6) , TSG (b) (6)  
(b) (6), SSG (b) (6)
- f. **Spray Ground Monitors:** LtC (b) (6) (Spray Director), Maj (b) (6) , Capt (b) (6)  
(b) (6) , (b) (6)
- g. **Crew Chief(s):** MSG (b) (6) , TSG (b) (6)
- h. **910 MA/LG Superv:** SMS (b) (6)
- i. **Avionics:** MSG (b) (6)
- j. **Engine/Propulsion:** TSG (b) (6)
- k. **Flying Data:** (See Spray Data Charts)
  - (1) Spray A/C 899105: Ferry: 2, Hours: 9.9; Spray Sorties: 15, Hours: 19.3
  - (2) Support A/C 919108, Ferry: 2, Hours: 9.9

#### 3. PESTICIDE:

- a. **Trade Name (% Active Ingredient):** Krovar I DF®
- b. **EPA Registration Number:** 352-505
- c. **Formulation Sprayed:** 10 pounds in 22.5 gallons of water per acre
- d. **Gallons Pesticide Loaded:** 1,900 per sortie
- e. **Gallons Pesticide Applied:** 25,805 gallons
- f. **Gallons and Name Diluent Used:** 25,805 gallons water
- g. **Other Additives Used:** 13 Gal Foam Fighter F®, 103 Gal StaPut®, 40 Gal Hi-Light® Dye
- h. **Application Rate:** 22.5 Gal per acre

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** C-130H (899105)
- b. **Spray System (Modules Used) and System ID #:** 3 and 5.
- c. **Spray System Configuration:** SP-3G
- d. **Nozzle Type/Size:** 3 inch herbicide nozzles.
- e. **Nozzle Orientation & Number Used:** 2, oriented straight back.
- f. **Pressure:** 40 psi
- g. **Flow Rate:** 366 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 35 feet.
- b. **Spray Off Set:** Variable, determined by spotters on the ground.
- c. **Spray Release Altitude:** 100 feet.
- d. **Ground Speed:** 200 knots.

**6. WEATHER OBSERVATIONS (Ground Wind Direction (degrees)/Speed (knots):**

- a. **8 Sep:** 360/4-15
- b. **9 Sep:** 340-030/3-7
- c. **11 Sep:** 140-200/0-4
- d. **12 Sep:** 200-090/1-5
- e. **13 Sep:** 280-030/2-9

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Monitoring:**
  - (1) Technique/s Used: Ground/Aircraft direct observation of dye markings
  - (2) Results: Spray off-set determined via direct observation of application coverage
- b. **Effectiveness:**
  - (1) Technique/s Used: Visual field observations of coverage and amount of spring vegetation germination.
  - (2) Results: (See Remarks)

- 8. REMARKS:** Ground coverage was complete with no skips in sprayed areas. While mission goals were met (Targets 21 & 24 treated), 10+ hours crew days were required to meet the requirements. Two airframes are critical to this mission. UTTR staff and Hill AFB provided excellent support as did the Aerial Spray Maintenance personnel who worked uncommonly long shifts. The 910<sup>th</sup> Communications Flight deployed on this spray mission and enhanced the operation through their equipment and knowledge. Stakes on targets 21 & 24 should be replaced and synchronized using the western target edges as the starting point. Diddle Knoll was found to serve as an excellent target Command and Control Site, since targets 21 & 24 can be monitored simultaneously; there are also excellent telephone and radio communications available. It does not replace the need for monitors on target, however.

**FROM:** 757AS/DOS  
3976 King Graves Rd  
Vienna Ohio 44473-0910

**SUBJECT:** Capability and Concept of Operations for NAS Jacksonville, FL Static Display

1. One Aerial Spray equipped C-130 will be available 8-9 Feb 2010 to provide a static display for the attendees of the Tri-Services pest Management Convention. The personnel attending are DoD members serving the Air Force, Army and Navy installations. The 757AS was invited to provide this static display and give presentations regarding the Aerial Spray Mission.

2. Concept of Operations:

- a. 8 Feb (Monday)  
1500 Show KYNG  
1700 Depart KYNG  
2000 Land KNIP
- b. 9 Feb (Tuesday)  
1330-1700 Static Display KNIP  
1900 Depart KNIP  
2130 Land KYNG

3. Aircraft will be SP2G configured with ULV booms.

5. Maj (b) (6) will act as Aircraft Commander.

6. Support required at Jacksonville NAS, FL has been completed.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Langley AFB, VA.

1. Objective/Purpose/Benefits of the Spray Mission: Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes around LFI and the surrounding communities.

2. Capability: Aerial Spray C-130 Aircraft available 8-13 AUG 08

3. Concept of Operations:

**08 AUG (Friday): Deploy to LFI**

1000: Show time  
1200: Takeoff YNG  
1330: Land LFI w/safety briefing immediately following  
1430: Installation briefing

**09 AUG (Saturday): Spray LFI**

1600: Show time  
1630: WX decision, load Dibrom  
1800: Takeoff LFI  
2004: Sunset

**10 AUG (Sunday): Spray LFI**

1600: Show time  
1630: WX decision, load Dibrom  
1800: Takeoff LFI  
2002: Sunset

**11 AUG (Monday): Spray LFI**

1600: Show time  
1630: WX decision, load Dibrom  
1800: Takeoff LFI  
2001: Sunset

**12 AUG (Tuesday): System clean up/WX backup**

1600: Show time  
1630: WX decision, load Dibrom  
1800: Takeoff LFI  
2000: Sunset

**13 AUG (Wednesday): Redeploy to YNG**

1000: Show Time  
1200: Takeoff LFI  
1400: Land KYNG

4. Spray Parameters:

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Approximately 125,000 acres on the peninsula
- g. **Swath Width:** 2000 foot

5. Aircraft Commander: Capt (b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 8-13 AUG 08

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes at LFI and the surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: Capt (b) (6), Capt (b) (6)
- (3) Navigator: Maj (b) (6)
- (4) Flight Engineers: MSgt (b) (6), SSgt (b) (6)
- (5) Spray Operators: MSgt (b) (6) MSgt (b) (6) MSgt (b) (6)

##### b. Maintenance:

- 1. Spray Maintenance: TSgt (b) (6) MSgt (b) (6) MSgt (b) (6) TSgt (b) (6)
- 2. Crew Chiefs: TSgt (b) (6) AIC (b) (6)
- 3. Avionics: TSgt (b) (6)

##### c. Entomologists: Maj (b) (6)

##### d. Vehicles:

- Vehicle Dispatch: Will supply us with 2x9pax vans and 2 cars
- MC / Entomologist: One Car
- Ops: One van (9 pax), one car
- Mx: One Van (9 Pax)

##### e. Billeting Office: (757) 764-4667 DSN 574-4667, EXT 2528; FAX 574-3038 POC TSgt Cox

#### 2. PPR: 0827SF02

#### 3. SCHEDULE: (All times local)

##### 08 AUG (Friday): Deploy to LFI

- 1000: Show time
- 1200: Takeoff YNG
- 1330: Land LFI w/safety briefing immediately following
- 1430: Installation briefing

##### 09 AUG (Saturday): Spray LFI

- 1600: Show time
- 1630: WX decision, load Dibrom
- 1800: Takeoff LFI
- 2004: Sunset

##### 10 AUG (Sunday): Spray LFI

- 1600: Show time
- 1630: WX decision, load Dibrom
- 1800: Takeoff LFI
- 2002: Sunset

##### 11 AUG (Monday): Spray LFI

- 1600: Show time
- 1630: WX decision, load Dibrom
- 1800: Takeoff LFI
- 2001: Sunset

##### 12 AUG (Tuesday): System clean up/WX backup

- 1600: Show time
- 1630: WX decision, load Dibrom
- 1800: Takeoff LFI
- 2000: Sunset

##### 13 AUG (Wednesday): Redeploy to YNG

- 1000: Show Time

1200: Takeoff LFI

1400: Land KYNG

\*\*\*If mission is complete early, the mission will return early.

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
  - (1) Ops phone DSN878-3588
  - (2) Tower phone DSN 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7 or 257.9(Operating Hours 1000Z-0200Z)**
  - (1) Ground – 121.9 or 348.6 (phone 877-0221 ops)
  - (2) Tower – 118.7 (phone DSN 877-2862) voice mail 7-2962
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB: Tower DSN 574-7999**
  - (1) Tower - 125.0 or 253.5
  - (2) Ground - 121.7 or 275.8
  - (3) Clearance – 118.85 or 257.625
  - (4) Metro - 239.8
  - (5) ATIS – 270.1
- d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15, Tower Supervisor DSN 262-3443**
- e. **Norfolk Approach: 125.7 or 335.625**
- f. **Spray Ground: Primary 392.2; Secondary: 308.6**

**7. IN-BRIEFING:** 1430 hrs; CE Conference Room

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** 9 8005 nozzles -- straight down (4 left - 5 right)
- c. **Aircraft:** 90-9105
- d. **Mission Identifier:** QZNRKA810239

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
- g. **Swath Width:** 2000 foot

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 1530 hrs each day pending weather and heat index.\*\*Calibration performed unless otherwise directed by the Entomologist or Mission Commander

**d. Furnished by Installation:**

- (1) Pesticide
- (2) Loading Equipment/Crew

- (3) Hazardous Waste Disposal
- (4) Two B-5 or B-1 Stands

**11. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT-Langley AFB 27-31 AUG 2007

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB and Craney Island, VA
- b. Mission Duration: 27-31 AUG 2007
- c. Purpose of Application: Control of adult mosquitoes transmitting arboviruses
- d. Application Dates: 28-30 AUG 07
- e. Times of Application (Local): 1700-1930 (28 AUG); 1645-1939 (29 AUG)
- f. Acres Treated: 99874 total: 52,824 (28 AUG); 47,290 (29 AUG)
- g. Project Coordinator (Name, Phone #): (b) (6)
- h. Date Spray Map Last Approved: 27 AUG, 2007
- i. Date of Waste Generation Letter: 4 April 1996
- j. Installation In-Briefing: 1 CE Conference Room, Langley AFB; 27 AUG 07; MAJ (b) (6)  
LTCOL (b) (6)
- k. Mission identifier: QZNRKA810239

### 2. OPERATIONAL:

- a. Mission Commander: LTCOL (b) (6)
- b. Certified PMPs (Category 11): MAJ Don (b) (6) LTCOL Brian (b) (6)
- c. Aircrew:
  - (1) Pilots: CPT (b) (6) MAJ (b) (6)
  - (2) Navigator(s): MAJ (b) (6)
  - (3) Flight Engineer: MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) , MSG (b) (6) , MSG (b) (6)
- d. Safety Briefer: LTCOL (b) (6)
- e. Spray Maintenance: TSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- f. Crew Chiefs: SRA (b) (6) , TSG (b) (6)
- g. Avionics: (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 2/2.5 (28 AUG), 3.2 (29 AUG)
  - (2) Ferry Sorties/Hours: 2/1.6 (27 AUG), 1.6 (31 AUG)
  - (3) Training Sorties/Hours: 1/1.5 (27 AUG)

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 270 (28 AUG); 120 (29 AUG)
- e. Gallons Pesticide Applied: 208 (28 AUG); 191 (29 AUG)
- f. Gallons and Name Diluent Used: 10 gallons marvel oil
- g. Gallons and Name of Flush Used:
- h. Other Additives Used: n/a
- i. Application Rate: 0.5 oz/acre

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 90-9107
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV

- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles
- e. Nozzle Orientation & Number Used: 9 straight down; 4 left, 5 right
- f. Pressure (PSI): 46
- g. Flow Rate: 3.63 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): 70°/4 beginning dropping to 2 at 1900 on ground, 50° to 70°/7 at airplane (28 AUG); 70°/7 at airplane on Langley Peninsula, 110°/8 at Craney Island (29 AUG)
- b. Temperature (°F): 84° at 1735, dropping to 80° at 1900 (28 AUG)
- c. Cloud Cover: Clear (28 and 29 AUG)
- d.. Source: Ground observations/at altitude during spray

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: Community of Hampton reported an 87% reduction at 4 locations in mosquito counts following the application. Langley pest management and City of Portsmouth reported good control, with no significant numbers of daylight-flying species having been caught. Ft. Eustis reported excellent control. No report was available from York County. However, the pest management POC for that area was extremely pleased with the work done.

- 8. REMARKS:** Evidence of mosquito vectored viruses (namely Eastern Equine Encephalitis and West Nile Virus) has shown up in the tidewater area for the summer season 2007. This was the first spray of 2007, where in normal years the Langley peninsula receives 3-4 sprays per year. While popular local opinion related these depressed mosquito populations to the predaceous work of dragonflies, seen in abundance this year, it is more likely correlated with a much lower than average rainfall. Mosquito populations finally justified aerial application of pesticides following a significant rainfall event. Outstanding levels of mosquito control were achieved and the customers were pleased with the application. We received excellent support from Langley AFB, 1 CES to make this mission a success.

//Signed//

1700 Depart KLFI, Spray Areas Designated by PMP  
2030 Land KLFI

**f. 13 Sep (Friday):**

0900 Report  
1100: Depart KLFI  
1230: Land KYNG

**4. Spray Parameters:**

- a. Acreage: approximately 86,000 Acres
- b. Altitude: 150 Ft AGL
- c. Ground Speed: 200 Knots
- d. Pesticide: Dibrom® Concentrate
- e. Application Rate: 0.5 Ounce per Acre
- f. Flow Rate: 1.8 Gal per Minute at Craney Island; 3.6 Gallons per Minute for Langley AFB designated areas
- g. Swath Width: 1000' swaths at Craney Island; 2000' to 2500' swaths at Langley AFB
- h. System: SP2G – MASS ULV; Modules 1 and 2
- i. Nozzle Tips/Number/Orientation: 8008/8 oriented straight down for 2000' swaths; 8008/4 oriented straight down for 1000' swaths oriented straight down
- j. Aircraft Tail Number: 99105
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Aircraft/Mission Commander: Major(b) (6)**

**6. Support required at Langley AFB has been requested via FAX message.**

**7. If you have any questions concerning this mission please contact DSN (b) (6)**

(b) (6), Major, USAFR  
Chief, Aerial Spray  
757 AS/DOS (DSN 346-1531)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 8-13 SEPTEMBER 2002

**Purpose/Objectives/Benefits:** control nuisance and vector mosquitoes in order to improve working conditions and lower the incidence of arthropod borne illness for members operating at Langley AFB and surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Major (b) (6)
- (2) Pilots: Maj (b) (6), Maj (b) (6), Maj (b) (6)
- (3) Navigators: Maj (b) (6) (8-11 Sep), Maj (b) (6) (11-13 Sep)
- (4) Flight Engineers: SMS (b) (6)
- (5) Spray Operators: MSG (b) (6), TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6), TSG (b) (6), SSG (b) (6) (b) (6)
- (2) Crew Chiefs: MSG (b) (6) SMS (b) (6)
- (3) Avonics: TSG (b) (6)

##### c. Certified Pest Management Professionals: CPT (b) (6), LtC (b) (6)

**Gov Vehicles: 2 ea 9 pax van, 1 staff, 1 pick-up truck**

#### 2. SCHEDULE: (All time Local)

##### 8 SEP (Sunday):

**PPR # 0908EN01**

1200: Show at KYNG  
1400: Depart KYNG  
1530: Land KLF  
1545: Safety Briefing

##### 9 SEP (Monday):

0900: In-Briefing at CE Conference Room  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1922: Sunset

##### 10 SEP (Tuesday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1921: Sunset

##### 11 SEP (Wednesday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1919: Sunset

##### 12 SEP (Thursday):

1100: Daily meeting for PMP/MC in the hotel lobby

1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1918: Sunset

**13 SEP (Friday):**

0900: Report  
1100: Depart KLFI  
1230: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Cellular Phones, Kestrel Weather Monitor, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker and Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326/5327 Tower Manager
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops - 878-3588
  - (2) Tower - 878-3530
  - (3) Firing Range - 878-4412/5053 Range Tower
  - (4) Flight Service - 122.2
- b. **Newport News-Williamsburg Int:** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9 or 348.6** (phone 877-0221 ops)
  - (2) Tower – **124.9 or 280.1** (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - (4) CTAF – **118.7**
- c. **Langley AFB:** Tower OIC MSG (b) (6) Lt (b) (6) 1st OSS SQ
  - (1) Tower - **125.0 or 253.5** (phone 4-5326)
  - (2) Ground - **121.7 or 275.8**
  - (3) Clearance – **118.85 or 271.3**
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld):** Tower - **124.3, 126.375, 340.2, 318.7**
  - (1) Base Ops DSN 262-3419
  - (2) Tower DSN 262-3440
- e. **Spray Ground:** Primary **392.2 / 308.6** Secondary

**7. IN-BRIEFING:** Required; IAW the Schedule above.

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Modules 1 and 2
- b. **Nozzle Tips/Orientation:** 8 8008's for 2000' swathes and 4 8008's for 1000' swathes oriented straight down.
- c. **Aircraft:** 99106

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom<sup>®</sup> Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 1.8 Gallons/Minute at Craney Island; 3.6 Gallons/Minute at Langley areas
- f. **Acreage:** Approximately 86,000 Acres
- g. **Swath Width:** 1,000 Feet at Craney Island; 2,000 Feet at Langley areas.

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** 334 Gallons for 86,000 acres sprayed.
- b. **Where:** Aero Club Ramp
- c. **When:** 1430 hrs each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

**11. SPRAY MONITORING OR TESTING:**

The local mosquito control districts and Langley Pest Control will conduct mosquito surveillance using either trapping or biting count pre- and post-spray data to determine spray effectiveness. Oil sensitive cards will be used to confirm application within the spray blocks.

**12. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 8-13 SEP 09

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes at LFI and the surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander:
- (2) Pilots: Capt (b) (6), Capt (b) (6)
- (3) Navigator: LTC (b) (6)
- (4) Flight Engineers: SSgt (b) (6)
- (5) Spray Operators: TSgt (b) (6)

##### b. Maintenance:

1. Spray Maintenance: TSgt (b) (6) MSgt (b) (6) TSgt (b) (6) SRA (b) (6)
2. Crew Chiefs: TSgt (b) (6) AIC (b) (6)
3. Avionics: SSgt (b) (6)

##### c. Entomologists: Maj (b) (6)

##### d. Vehicles:

- **Vehicle Dispatch:** Will supply us with 2x9pax vans and 2 cars
- **MC / Entomologist:** One Car
- **Ops:** One van (9 pax), one car
- **Mx:** One Van (9 Pax)

##### e. Billeting Office: (757) 764-4667 DSN 574-4667, EXT 2528; FAX 574-3038 POC TSgt (b) (6)

#### 2. PPR: 0827SF02

#### 3. SCHEDULE: (All times local)

##### 8 SEP (Tuesday): Deploy to LFI

- 1500: Show time
- 1700: Takeoff YNG
- 1830: Land LFI w/safety briefing immediately following

##### 9 SEP (Wednesday): Spray LFI

- 1430: Installation briefing
- 1530: Show time
- 1600: WX decision, load Dibrom
- 1730: Takeoff LFI
- 1922: Sunset

##### 10 SEP (Thursday): Spray LFI

- 1530: Show time
- 1600: WX decision, load Dibrom
- 1730: Takeoff LFI
- 1920: Sunset

##### 11 SEP (Friday): Spray LFI

- 1530: Show time
- 1600: WX decision, load Dibrom
- 1730: Takeoff LFI
- 1919: Sunset

##### 12 SEP (Saturday): Spray LFI

- 1530: Show time
- 1600: WX decision, load Dibrom
- 1730: Takeoff LFI
- 1917: Sunset

##### 13 Sep (Sunday) Redeploy to YNG

- 1000: Show time
- 1200: Takeoff LFI
- 1400: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504
- c. **Camp Perry:** (757) 229-2121 ext 2263
- d. **Consideration calls:**
  - i. Newport News
  - ii. Ft Eustis/Felker AAF Tower
  - iii. Norfolk NS/Chambers Tower

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
  - (1) Ops phone DSN826-3588
  - (2) Tower phone DSN 826-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7 or 257.9 (Operating Hours 1000Z-0200Z)**
  - (1) Ground – **121.9** or 348.6 (phone 877-0221 ops)
  - (2) Tower – **118.7** (phone 877-2862) voice mail 7-2962
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB:** Tower DSN 574-7999
  - (1) Tower - **125.0** or 253.5
  - (2) Ground - **121.7** or 275.8
  - (3) Clearance – **118.85** or 257.625
  - (4) Metro - **239.8**
  - (5) ATIS – 270.1
- d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15**, Base Ops, DSN 262-3419, will transfer to TWR
- e. **Norfolk Approach: 125.7 or 335.625**
- f. **Spray Ground: Primary 392.2; Secondary: 308.6**

**7. IN-BRIEFING:** 1430 hrs; CE Conference Room

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** 9 8005 nozzles -- straight down (4 left - 5 right)
- c. **Aircraft:** 90-9107
- d. **Mission Identifier:** QZNRKA233246

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
- g. **Swath Width:** 2000 foot

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 1530 hrs each day pending weather and heat index. \*\*Calibration performed unless otherwise directed by the Entomologist or Mission Commander

**d. Furnished by Installation:**

- (1) Pesticide
- (2) Loading Equipment/Crew
- (3) Hazardous Waste Disposal
- (4) Two B-5 or B-1 Stands

# AERIAL SPRAY OPERATIONAL SCHEDULE

## VICTORIA, BC, CANADA

### 08 – 14 MAY 2000

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: \*LTC (b) (6) (7-12 May)
- (2) Pilots: \*\*LTC (b) (6), CPT (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: \*\*MSG (b) (6)
- (5) Spray Operators: MSG (b) (6), MSG (b) (6), TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance:
  - (a) 7-14 May 00: \*SMS (b) (6) ks
  - (b) 8-14 May 00: TSG (b) (6), TSG (b) (6) SSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Ground Support/Certified Pest Management Professionals: LTC (b) (6)

##### d. Security Police Support: \*TSG (b) (6), TSG (b) (6), AMN (b) (6)

\*Van \$238 per week; \*\*Full Size Car \$170.10 per week

#### 2. SCHEDULE: (All time Local)

##### 08 May (Monday):

##### PPR # NOT REQUIRED

0800: Show at KYNG  
1000: Depart KYNG  
1400: Land CYYJ  
1430: Safety Briefing

##### 09 May (Tuesday):

0930: 910 AW Participants Show Time/Weather Decision/Load Water  
1200: C-130 Departs CYYJ for training  
1400: C130 Lands CYYJ

##### 10 May (Wednesday):

0700: 910 AW Participants Show Time / Weather Decision/ Load Water  
0700-0730: Load Water & Vessels depart  
910 AW Aircrew final briefing at Victoria Airport 443 SQ facility  
0900-0930: Wildlife Working Group meets at IOS Pat Bay auditorium and  
departs to Boundary Pass via Hovercraft  
0930: 910 AW C130 Depart CYYJ  
1000-1200: Dispersant Exercise in the straits area/Wildlife Working Group  
will observe the mission from the CCG Hovercraft  
1200-1230: CCG Hovercraft returns to IOS, Working lunch for Operations staff  
1230: 910 AW C130 Land CYYJ  
1300: Wildlife Working Group meets at IOS Pat Bay auditorium  
1530: Location and Team Leader Debriefing TBD

##### 11 May (Thursday): (C130 Exercise Offshore (USAF only)

0830: 910 AW Show Time / Weather Decision/Load Water  
1100: 910 AW C130 Depart CYYJ  
1300: 910 AW C130 Land CYYJ

**12 May (Friday): (C130 Exercise Offshore (USAF only)**

0830: 910 AW Show Time / Weather Decision/Load Water

1100: 910 AW C130 Depart CYYJ

1300: 910 AW C130 Land CYYJ

**13 May (Saturday): C130 Aircraft Reconfigures Equipment at Comox**

A/R: Show Time / Clean the system

**14 May (Sunday): (Aircraft Departs for Home Station)**

0600: Show Time

0800: Depart CYYJ

1800: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Cellular Phones, Wind Gauge, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION. N/A**

**5. PARKING PLAN.** Determined at Victoria IAP BC

**6. RADIO FREQUENCIES.** Spray Ground: Primary / Secondary

**7. IN-BRIEFING/De-Briefing(s):** IAW the Schedule above.

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G System #4
- b. **Nozzle Tips/Orientation:** Rain drop nozzle tips oriented straight back
- c. **Aircraft:** 99108; Mission Identifier: QZNRKA826129

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 100' AGL
- b. **Ground Speed:** 200 KGS
- c. **Application Rate:** 5 to 9 gallons water per acre
- d. **Flow Rate:** Gallon/Minute
- e. **Swath Width:** 300'

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** 1000 gallons of water
- b. **Where:** Victoria Airport
- c. **When:** 8-14 May 00
- d. **Furnished by Installation:**
  - (1) Water
  - (2) Loading Equipment
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

**11. SPRAY MONITORING OR TESTING: To be determined**

**12. Quarters:**

- a. Best Western, Victoria BC, 1-250-656-4441
- b. Travel Lodge, Victoria BC, 1-250-656-1176

**13. Budget Car Rental, Sydney IAP BC, 1-250-953-5300/FAX 1-250-655-2606**  
3 Vans at \$238 per week; 2 full size cars at \$170.10 per week

**14. CONTACTS:**

**a. Canadian Customs:**

(1) Sydney IAP BC: 1-250-363-6644/44 (POC (b) (6) )

(2) Vancouver BC: 1-604-775-6753 (POC (b) (6) )

**b. Canadian Coast Guard Pacific/Yukon:** 1-250-757-2059 (POC (b) (6) )

**c. Canadian Coast Guard Vancouver BC:** 1-604-270-3273 (POC (b) (6) )  
1-604-209-6206 (POC (b) (6) )

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA 8-14 OCT 08 **Change 2**

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes at LFI and the surrounding communities.

### 1. 910 AW PARTICIPANTS:

#### a. Aircrew:

- (1) Mission Commander: (b) (6)
- (2) Pilots: LTC Elder (depart 11<sup>th</sup>), Maj (b) (6) **Capt (b) (6)** (arrive 11<sup>th</sup>)
- (3) Navigator: LTC (b) (6)
- (4) Flight Engineers: SMSgt (b) (6) **TSgt (b) (6)** (depart 10<sup>th</sup>)
- (5) Spray Operators: MSgt (b) (6) MSgt (b) (6) MSgt (b) (6) MSgt (b) (6)

#### b. Maintenance:

1. Spray Maintenance: TSgt (b) (6) MSgt (b) (6) TSgt (b) (6)
2. Crew Chiefs: MSgt (b) (6) SRA (b) (6)
3. Avionics: SSgt (b) (6)

#### c. Entomologists: Maj (b) (6) LTC (b) (6) (arrive 9th)

#### d. Vehicles: Vehicles will be at motor pool.

- MC / Entomologist: 1 quarter ton pickup
- Ops: 2 six pax pickups
- Mx: 1 van

#### e. Billeting Office: (757) 764-4667 DSN 574-4667, EXT 2528; FAX 574-3038 POC TSgt (b) (6) 18 reservations at the **Marriott**, 530 St Johns Rd, Newport News (757) 842-6212

### 2. PPR: 1008AW01

### 3. SCHEDULE: (All times local)

#### 08 OCT (Wednesday): Deploy to LFI

- 1500: Show time
- 1700: Takeoff YNG
- 1830: Land LFI w/safety briefing immediately following

#### 09 OCT (Thursday): Spray LFI

- 0930: Tour of aircraft of VA Dept. of Pesticide Services to 1045
- 1330: Installation briefing
- 1415: Show time
- 1445: WX decision, load Dibrom
- 1615: Takeoff LFI, spray no earlier than 1636
- 1836: Sunset

#### 10 OCT (Friday): Spray LFI

- 1415: Show time
- 1445: WX decision, load Dibrom
- 1615: Takeoff LFI, spray no earlier than 1635
- 1835: Sunset

#### 11 OCT (Saturday): Spray LFI

- 1415: Show time
- 1445: WX decision, load Dibrom
- 1615: Takeoff LFI, spray no earlier than 1634
- 1834: Sunset

#### 12 OCT (Sunday): WX Backup

- 1415: Show time
- 1445: WX decision, load Dibrom
- 1615: Takeoff LFI, spray no earlier than 1632
- 1832: Sunset

**13 OCT (Monday): WX Backup**

1415: Show time  
1445: WX decision, load Dibrom  
1615: Takeoff LFI, spray no earlier than 1631  
1831: Sunset

**14 OCT (Tuesday): Redeploy to YNG**

1000: Show time  
1200: Takeoff LFI  
1330: Land YNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, VHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504
- c. **Camp Perry:** (757) 229-2121 ext 2263
- d. **Consideration calls:**
  - i. Newport News
  - ii. Ft Eustis/Felker AAF Tower
  - iii. Norfolk NS/Chambers Tower

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
  - (1) Ops phone DSN826-3588
  - (2) Tower phone DSN 826-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7 or 257.9 (Operating Hours 1000Z-0200Z)**
  - (1) Ground – **121.9** or 348.6 (phone 877-0221 ops)
  - (2) Tower – **118.7** (phone 877-2862) voice mail 7-2962
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB:** Tower DSN 574-7999
  - (1) Tower - **125.0** or 253.5
  - (2) Ground - **121.7** or 275.8
  - (3) Clearance – **118.85** or 257.625
  - (4) Metro - **239.8**
  - (5) ATIS – 270.1
- d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15,** Base Ops, DSN 262-3419, will transfer to TWR
- e. **Norfolk Approach: 125.7 or 335.625**
- f. **Spray Ground: Primary 123.45**

**7. IN-BRIEFING:** 1300 hrs; CE Conference Room

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** 9 8005 nozzles -- straight down (4 left - 5 right)
- c. **Aircraft:** 90-9106
- d. **Mission Identifier:** QZNRKA110282

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.63 Gallons/Minute
- f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
- g. **Swath Width:** 2000 foot

10. **PESTICIDE LOADING:**
- a. **How Much Pesticide:** see entomologist
  - b. **Where:** Taxi Way F Aero Club Ramp
  - c. **When:** 1445 hrs each day pending weather and heat index.\*\*Calibration performed unless otherwise directed by the Entomologist or Mission Commander
  - d. **Furnished by Installation:**
    - (1) Pesticide
    - (2) Loading Equipment/Crew
    - (3) Hazardous Waste Disposal
    - (4) Two B-5 or B-1 Stands
11. **CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Langley AFB, VA.

1. Objective/Purpose/Benefits of the Spray Mission: Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes around LFI and the surrounding communities.

2. Capability: Aerial Spray C-130 Aircraft available 8-14 Oct 08

3. Concept of Operations:

**08 OCT (Wednesday): Deploy to LFI**

1500: Show time

1700: Takeoff YNG

1830: Land LFI w/safety briefing immediately following

**09 OCT (Thursday): Spray LFI**

1330: Installation briefing

1415: Show time

1445: WX decision, load Dibrom

1615: Takeoff LFI, spray no earlier than 1636

1836: Sunset

**10 OCT (Friday): Spray LFI**

1415: Show time

1445: WX decision, load Dibrom

1615: Takeoff LFI, spray no earlier than 1635

1835: Sunset

**11 OCT (Saturday): Spray LFI**

1415: Show time

1445: WX decision, load Dibrom

1615: Takeoff LFI, spray no earlier than 1634

1834: Sunset

**12 OCT (Sunday): WX Backup**

1415: Show time

1445: WX decision, load Dibrom

1615: Takeoff LFI, spray no earlier than 1632

1832: Sunset

**13 OCT (Monday): WX Backup**

1415: Show time

1445: WX decision, load Dibrom

1615: Takeoff LFI, spray no earlier than 1631

1831: Sunset

**14 OCT (Tuesday): Redeploy to YNG**

1000: Show time

1200: Takeoff LFI

1330: Land YNG

4. Spray Parameters:

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom<sup>®</sup> Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Approximately 125,000 acres on the peninsula
- g. **Swath Width:** 2000 foot

5. Aircraft Commander: LTC (b) (6)

757 Aerial Spray

, CAPT, USAFR

1 February 2002

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

FROM: 757 AS/DOS (346-1111; FAX 346-1616)

SUBJECT: Concept of Operations for Aerial Spray Training at Avon Park AFR/MacDill AFB FL

1. Purpose/Objectives/Benefits: To fulfill training requirements for squadron personnel and evaluate new drift control agent for enhanced application of aerially applied products.
2. Capability: Spray Aircraft Available 8-15 Feb 02.
3. Concept of Operations:
  - a. **8 Feb (Friday):**
    - 1100 Show at KYNG
    - 1300 Take-Off KYNG
    - 1600 Land KMCF
    - 1415 Safety Brief
  - b. **9 Feb (Saturday): 0800-1000 Range Times**
    - 0700 Show Time/Weather Decision/Load Water
    - 0715 Depart KMCF/Call Tower & Fire Department at AGR
    - 0800-1000 Spray water over designated area of the Avon Park Bombing Range
    - 1130 Land KMCF
  - c. **10 Feb (Sunday): 0800-1000 Range Times**
    - 0700 Show Time/Weather Decision/Load Water
    - 0715 Depart KMCF/Call Tower & Fire Department at AGR
    - 0800-1000 Spray water over designated area of the Avon Park Bombing Range
    - 1130 Land KMCF
  - d. **11 Feb (Monday): 0700-0930 Range Times**
    - 0630 Show Time/Load Water
    - 0645 Depart KMCF/Call Tower & Fire Department at AGR
    - 0700-0930 Spray water over designated area of the Avon Park Bombing Range
    - 1000 Land KMCF
  - e. **12 Feb (Tuesday): 0700-0930 Range Times**
    - 0630 Show Time/Load Water
    - 0645 Depart KMCF/Call Tower & Fire Department at AGR
    - 0700-0930 Spray water over designated area of the Avon Park Bombing Range
    - 1000 Land KMCF
  - f. **13 Feb (Wednesday): 0700-0930 Range Times**

0630 Show Time/Load Water  
0645 Depart KMCF/Call Tower & Fire Department at AGR  
0700-0930 Spray water over designated area of the Avon Park Bombing Range  
1000 Land KMCF

**g. 14 Feb (Thursday): 0700-0930 Range Times**

0630 Show Time/Load Water  
0645 Depart KMCF/Call Tower & Fire Department at AGR  
0700-0930 Spray water over designated area of the Avon Park Bombing Range  
1000 Land KMCF  
1001

**h. 15 Feb (Friday):**

0900 Show Time  
1200 Land KYNG

**4. Spray Parameters:**

- a. Acreage: N/A
- b. Altitude: 100 Ft AGL
- c. Ground Speed: 200 Knots
- d. Pesticide: N/A (Training with dyed water only)
- e. Application Rate: 500 Gallons of water
- i. Flow Rate: Approximately 200 Gallons per minute at psi 40
- j. System: SP2G – MASS ULV; Modules 1 and 2
- k. Nozzle Tips/Number/Orientation: 8070 Flat Fan oriented straight back 9-11 Feb and 45° 12-14 Feb
- l. Aircraft Tail Number: 99105
- m. Deploy/Re-Deploy Time: 3.5 hrs
- n. Spray Time: 2 hrs (or as called by Mission Commander)

**5. Mission Commander: Major (b) (6)**

**6. Support required at MacDill AFB and Avon Park Bombing Range AFB have been approved via telephone conversations with MacDill AFB Ops and the Range Manager at Avon Park AFRB.**

**7. If you have any questions concerning this mission please contact DSN (b) (6) .**

2 July 2002

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS (LtC Spears)

SUBJECT: Avon Park Drift Retardant Test Mission, 8-15 February 2002

1. Purpose. Compare different rates of AirexDC™ drift retardants, and different nozzle configurations.
2. Traveler(s). The participants are listed in Attachment 1, the Avon Park Operational Schedule for 8-15 February 2002.
3. Itinerary. The itinerary is listed in the Avon Park Operational Schedule (Attachment 1).
4. Aerial Spray Flight Data:

a. 8 Feb 02: Ferry Sortie	KYNG-KMCF 1800-2100Z	Flight Hours: 3.0
b. 9 Feb 02: Spray Sortie	KMCF-KMCF 1229-1502Z	Flight Hours: 2.6
c. 10 Feb 02: Spray Sortie	KMCF-KMCF 1228-1410Z	Flight Hours: 1.7
d. 11 Feb 02: Spray Sortie	KMCF-KMCF 1210-1431Z	Flight Hours: 2.4
e. 12 Feb 02: Spray Sortie	KMCF-KMCF 1220-1500Z	Flight Hours: 2.7
f. 13 Feb 02: Spray Sortie	KMCF-KMCF 1210-1450Z	Flight Hours: 2.7
g. 14 Feb 02: Spray Sortie	KMCF-KMCF 1220-1430Z	Flight Hours: 2.2
h. 15 Feb 02: Ferry Sortie	KMCF-KYNG 1510-1813Z	Flight Hours: 3.1

5. Discussion:

- a. Control® and AirexDC™ drift retardants were previously compared in December 2001 and January 2002 with AirexDC™ giving better results than Control®. AirexDC™ forms a protective coating around a spray droplet to prevent evaporation as opposed to the previous materials that mixed with and thickened the spray solution.
- b. AirexDC™ was tested at the rates of 0.25%, 0.50% and 0.75% with the nozzles oriented straight back (zero degrees) and at the rate of 0.50% with the nozzles at 45 degrees. The weather effects were similar for all of the trials so differences are likely due to the different rates and nozzle configurations and not influenced by weather.

## 6. Results:

- a. The recovery rate on the ground in ounces per acre was lowest for the 0.25% solution and highest for the 0.75% solution (Figure 1, Table 1). The recovery rates for the 0.50% solutions with nozzles oriented straight back and at 45 degrees were essentially the same, and between those for the 0.75% solution and the 0.25% solution. However, because of variability in the data, the only statistically significant difference was between the 0.75% solution and the 0.25 % solution. The differences are probably real, and would most likely show a statistically significant difference with more trials.
- b. The number of spray droplets per square centimeter (Figure 1, Table 1) was significantly higher for all of the solutions sprayed with the nozzles oriented straight back than for the 0.50% solution sprayed with the nozzles at 45 degrees. Observation of the water sensitive cards used to collect the spray droplets (Figure 2) indicates this is because fewer small droplets were collected with the nozzles at 45 degrees. There were no statistically significant differences between the number of droplets for the three solutions sprayed with the nozzles oriented straight back because of variability in the data although the 0.75% solution appeared to produce more droplets. Further testing may prove this as true. The droplet density for the 0.50% and 0.25% solutions with the nozzles at zero degrees was essentially equal.
- c. Volume median diameter (VMD) (Figure 1, Table 1) of the spray droplets was only statistically different between the 0.50% solution with the nozzles at 45 degrees and the 0.25% solution with the nozzles at zero degrees. The former had the largest VMD and the latter the smallest. Observation of the water sensitive cards (Figure 2) indicates that this is because fewer small droplets were produced with the nozzles at 45 degrees. The VMD for the 0.50% and 0.75% solutions with nozzles at zero degrees was about the same.
- d. There were no statistically significant differences in the effective swath for the four configurations (Figure 1, Table 1). However, the trend was for a narrower effective swath as the concentration of AirexDC™ in the solution was increased. Further testing may bear this out.

## 7. Conclusions and Recommendations:

- a. The 0.75% AirexDC™ with nozzles oriented at zero degrees gave the most recovery of the spray solution on the ground (Figure 2), but also appears to produce the narrowest effective swath. In dry climates, it would be best to use at least a 0.75% solution with the narrower swath. In wetter conditions, the 0.50% solution may be adequate and a wider swath width could then be used.

b. We need to conduct additional characterization trials with AirexDC™ comparing different concentrations and nozzle configurations. This will allow us to determine the best nozzle configuration for different applications.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MACDILL AFB / AVON PARK, FL

8-15 FEB 2002

**PURPOSE/OBJECTIVE/BENEFIT:** To fulfill training requirements for squadron personnel and evaluate new drift control agent for enhanced application of aerially applied products.

### 1. 910 AW PARTICIPANTS:

#### a. Aircrew:

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: Maj (b) (6) , Capt (b) (6)
- (3) Navigators: Maj (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6) TSG (b) (6)

#### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) , MSG (b) (6) , TSG (b) (6) ,  
SSG (b) (6) , SMS (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , SSG (b) (6)
- (3) Avionics: TSG (b) (6)

#### c. Certified Pest Management Professionals: Lt Col (b) (6)

#### d. Ground Support: TSG (b) (6) , TSG (b) (6)

### 2. SCHEDULE: (All time Local)

**08 FEB (Friday):** No range time.

**PPR # - 039AC01**

1100: Show at KYNG

1300: Depart KYNG

1600: Land KMCF

**09 FEB (Saturday):** Range Times 0800-1000, call AGR Tower & Fire Dept

0700: Show Time

0715: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

1130: Land KMCF

**10 FEB (Sunday):** Range Times 0800-1000, call AGR Tower & Fire Dept

0700: Show Time

0715: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

1130: Land KMCF

**11 FEB (Monday):** Range Times 0700-0930, call AGR Tower & Fire Dept

0630: Show Time

0645: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)

1000: Land KMCF

**12 FEB (Tuesday):** Range Times 0700-0930, call AGR Tower & Fire Dept  
0630: Show Time  
0645: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)  
1000: Land KMCF

**13 FEB (Wednesday):** Range Times 0700-0930, call AGR Tower & Fire Dept  
0630: Show Time  
0645: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)  
1000: Land KMCF

**14 FEB (Thursday):** Range Times 0700-0930, call AGR Tower & Fire Dept  
0630: Show Time  
0645: Depart KMCF Coordinated with CAPT (b) (6) / Sgt (b) (6)  
1000: Land KMCF

**15 Feb (Friday):**  
0900: Depart MCF  
1200: Land YNG

3. **PURPOSE OF THIS MISSION.** Compare drift retardant capabilities of Airex DC™ using different nozzle configurations.

4. **ITEMS TO TAKE:**

- a. **Navigator:** Maps with “No-Spray” Areas Marked and Laptop Computer
- b. **Certified Pest Management Professionals:**
  - (1) 18 Packs of Water-Sensitive Cards
  - (2) 2 Boxes of Plastic Card Holders
  - (3) 1 Signal Mirror
  - (4) 1 Spot Light
  - (5) 1 Engineer Wheel
  - (6) Swath Kit Weather Station and Image Analyzer
  - (7) UHF Radio with Antenna and VHF Radio
  - (8) Ground Maps
  - (9) Laptop Computer
  - (10) Digital Camera
  - (11) SATLOC Trackstar Equipment

5. **AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s)
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

6. **SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 108

c. Mission Identifier: QZNRKA

## **7. SPRAY PARAMETERS:**

- a. Booms -- Fuselage only.
- b. Nozzles -- 8070 Flat Fan oriented straight back 9-11 Feb and 45° 12-14 Feb.
- c. Number of Nozzles -- 30 Total; 15 on each fuselage boom.
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 100' above ground level.
- f. Spray -- Water with Airex DC™.
- g. Wind -- Headwind/tailwind.
- h. Flow Rate -- 200 Gallons per minute at 40 psi.

## **8. LOADING, MIXING AND APPLICATION:**

- a. 9 FEB 02 -- 0.75% solution  
Mix 3.75 gallons of AirexDC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.  
Nozzles straight back.
- b. 10 FEB 02 -- 0.50% solution  
Mix 2.5 gallons of Airex DC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.  
Nozzles straight back.
- c. 11 FEB 02 -- 0.25% solution  
Mix 1.25 gallons of AirexDC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.  
Nozzles straight back.
- d. 12 FEB 02 -- 0.75% solution  
Mix 3.75 gallons of AirexDC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.  
Nozzles 45°
- e. 13 FEB 02 -- 0.50% solution  
Mix 2.5 gallons of AirexDC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.  
Nozzles 45°
- f. 14 FEB 02 -- 0.25% solution  
Mix 1.25 gallons of AirexDC™ with 500 gallons of water.  
Fly 8, fifteen-second passes with a flow rate of 200 gallons per minute.  
Nozzles 45°

## **9. CONTACTS:**

**910 AW AERIAL SPRAY UNIT**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S POST-MISSION REPORT**  
**PARRIS ISLAND MCRD, SC 9-11 JULY 2007**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 9-11 JUL 2007
- c. Purpose of Application: To control pestiferous populations of the black salt marsh mosquito (*Aedes taeniorhynchus*) and other mosquito species
- d. Application Date: 10 July 2007
- e. Time/s of Application (Local): 1915-2025 hrs
- f. Acres Treated: 7,680
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) ,  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 10 July 2007
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 10 July; Assistant Chief of Staff,  
Installations and Logistics Conference Rm, Lt Col (b) (6) , Mr. (b) (6)  
briefed by Maj (b) (6)

**2. OPERATIONAL:**

- a. **Mission Commander:** LTC (b) (6)
- b. **Aircrew:**
  - (1) Pilots: Maj (b) (6) , Capt (b) (6)
  - (2) Navigator: LTC (b) (6)
  - (3) Flight Engineers: CMSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) , MSG (b) (6)
- c. **Maintenance:**
  - 1. Spray Maintenance: TSGT (b) (6) , MSG (b) (6) , TSGT (b) (6)
  - 2. Crew Chiefs: MSG (b) (6) , SSG (b) (6)
  - 3. Avionics: SSG (b) (6)
- d. **Entomologists:** MAJ (b) (6) (safety briefer)
- e. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.4
  - (2) Ferry Sorties/Hours: 2/5.5

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup>
- e. Gallons Pesticide Applied: 60 Gal Dibrom<sup>®</sup>
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 8 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 1.0 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 9 oriented straight down
- f. Pressure: 40 p.s.i.
- g. Flow Rate: 3.7 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 3000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 220°/3 knots
  - (2) Release Altitude: 230°/8 knots
- b. Temperature (Degrees Fahrenheit): 88°F dropping to 85°F
- c. Relative Humidity: 67%-74%
- d. Cloud Cover: Mostly cloudy
- e. Source: Ground observations at the MCRD water tower near the Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: GPS systems monitors aircraft flight pattern
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Collections of mosquitoes with traps in regions frequented by recruits involved in training before and after spray
  - (2) Results: 94% average reduction in mosquitoes (see attachment 2)

**8. REMARKS:** The typical target pest at Parris Island MCRD is the biting midge (sandflea). However, unusually high tides and rainfall in June resulted in a massive emergence of salt marsh mosquitoes. Thus, this spray was targeted specifically against mosquitoes. At this time of the year, the two breeding pairs of bald eagles migrate off the Depot, simplifying the flying logistics of this application (see attachment 1), since their nest sites did not have to be avoided. The weather conditions were near perfect for the application and trap results indicated a 94% average reduction in mosquito populations following the spray (attachment 2). An aircraft maintenance problem delayed the spray team's initial deployment from Youngstown ARS by 3 hours, but a quick decision by the mission commander and subsequent excellent support from both the deploying crew and base maintenance allowed for the mission to continue by switching the MASS to another aircraft; many thanks for their hard work. The next Parris Island mission is scheduled for 10 Sept 2007.

Site 3 Pre Spray	129	Post Spray 13

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **PARRIS ISLAND MCRD, SC**

### **9-12 JUL 2007**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance and disease carrying mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: Maj (b) (6) , Capt (b) (6)
- (3) Navigator: LTC (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: Msg (b) (6) , MSG (b) (6)

##### **b. Maintenance:**

1. Spray Maintenance: TSG (b) (6) , MSG (b) (6) , Tsgt (b) (6)
2. Crew Chiefs: Msg (b) (6) , SSG (b) (6)
3. Avionics: SSG (b) (6)

##### **c. Entomologists: MAJ (b) (6)**

#### **2. PPR REQUIREMENTS: 190-01**

**PPR BKT: TBD**

#### **3. PLANNED SEQUENCE OF EVENTS:** (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### **9 JUL (Monday):**

1300: Show Time  
1500 Take Off YNG  
1700 Land NBC w/ Safety Briefing immediately following  
1500: Installation Briefing

##### **10 JUL (Tuesday):**

0800: In-brief (Entomologist)  
1630 Show time  
1700 Wx/Decision, load Dibrom  
1845 Take off NBC  
2032 Sunset

##### **11 JUL (Wednesday):** (Wx Backup or Return to YNG)

1630 Show time  
1700 Wx/Decision, load Dibrom  
1845 Take off NBC  
2032 Sunset

##### **12 JUL (Thursday):**

1000: Show Time  
1200: Take off KNBC  
1300 Land BKT (Drop off Molino)  
1315 Depart BKT  
1530: Land KYNG

**Plan to drop off Molino at BKT on return to YNG either Wednesday or Thursday depending on return date.**

#### **4. ITEMS TO TAKE/NOTES:**

##### **a. Mission Commander:**

- (1) Mission Commander Cell Phone

- b. **Entomologist/CPMP:**
  - (1) Wind Gauge & Compass
  - (2) VHF Radios and Cellular Phone
  - (3) Pesticide Safety Binder
- c. **Navigators:**
  - (1) Maps
  - (2) Templates
- d. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 9 flat fan 8005 nozzles oriented straight down (or other configuration per entomologist)
- d. **Differential GPS:** Installed
- e. **Aircraft:** 90-9106
- f. **Mission Identifier:** QZNRKA548190

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 1.0 or 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.6 or 2.7 gallons/Minute (see entomologist)

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 118.975 TWR  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

**10. TRANSPORTATION:** Parris Island will provide 3 vans for transportation to and from quarters and for messing.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC:** (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Parris Island MCRD SC to control of Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Parris Island MCRD SC for control of nuisance mosquitoes with aerial spray application to reduce negative impact of insect bites on outdoor training at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft available on 9-12 JUL 07

3. Concept of Operations:

**9 JUL (Monday):**

1300: Show Time

1500 Take Off YNG

1700 Land KNBC w/ Safety Briefing immediately following

**10 JUL (Tuesday):**

1630 Show time

1700 Wx/Decision, load Dibrom

1845 Take off NBC

2032 Sunset

**11 Jul (Wednesday):**

1630 Show time

1700 Wx/Decision, load Dibrom

1845 Take off NBC

2032 Sunset

**12 JUL (Thursday):**

1100: Show Time

1300: Take off KNBC

1500: Land KYNG

4. Spray Parameters:

a. Acreage: 7,500 Acres (Only areas determined by PMP)

b. Altitude: 150 Ft AGL

c. Pesticide: Dibrom® Concentrate

d. Deploy: 2.0 Hrs

e. Re-Deploy: 2.0 Hrs

f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Maj (b) (6)

6. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) , DSN(b) (6) .

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray Training at Avon Park, FL

1. Purpose/Objectives/Benefits: Flight testing of a new Quantity Indicating System (QIS) for the Modular Aerial Spray System will be conducted testing the accuracy of the system and ensuring no EMI with aircraft instrumentation or other systems. Aircrew flight training in aerial spray operations to include initial copilot training will be conducted over Avon Park Bombing range and coastal waters. Other aircrew positions perform training for currency and proficiency.
2. Capability: Spray Aircraft Available, 9-13 FEB 2009.
3. **Concept of Operations**  
9 FEB (Monday)  
1400: Show Time KYNG  
1600: Depart KYNG

# AERIAL SPRAY OPERATIONAL SCHEDULE

## AVON PARK, FL

9-13 FEB 2009 Ch 1

**PURPOSE/OBJECTIVE/BENEFIT:** Flight testing of the Quantity Indicator System MASS upgrade. Aerial Spray flight training for aircrews over Avon Park Bombing range.

### 1. 910 AW PARTICIPANTS:

- a. **Aircrew:**
  - 1. Pilots: Capt (b) (6) , LTC (b) (6) , Maj (b) (6) , Maj (b) (6)
  - 2. Navigators: Maj (b) (6)
  - 3. Flight Engineers: Msgt (b) (6)
- b. Spray Operators: Sms (b) (6) , Msgt (b) (6) , Msgt (b) (6)
- c. **Maintenance:**
  - 1. Spray Maintenance: Smsgt (b) (6) , Msgt (b) (6) , Msgt (b) (6)
  - 2. Avionics: Ssgt (b) (6) , Ssgt (b) (6)
  - 3. Crew Chiefs: Tsg (b) (6) , SRA (b) (6)
  - 4. Engine Shop: Tsg (b) (6)
- d. **Entomologist/Ground Support: None**

### 2. SCHEDULE: (All time Local) All times and sequence of events are subject to change depending upon the needs of the training and range.

9 FEB (MON)

1400: Show Time KYNG  
1600: Depart KYNG  
1930 Land KMCF

10 FEB (TUE): Range scheduled: 1200-1500

Ground testing of QIS: Complete remaining ground testing items as required. Upon completion of ground items, flight testing of the EMI will be conducted at MCF. Upon completion of testing, the crew will depart out to KAGR

0800 or TBA Show Time  
1200 or TBA Take Off  
1500 Land Time

\*\*Schedule for remainder of week will be flexible depending upon the QIS testing.

11 FEB (WED): Range scheduled: 1200-1500

1000 Show at aircraft  
1200 T/O MCF

\*\* Training at Avon Park Range or overwater  
1500 Land MCF

12 FEB (THUR): Range Times 1200-1500

1000 Show at aircraft  
1200 T/O MCF  
1500 Land MCF

13 FEB (FRI)

0900: Show Time  
1100: Depart KMCF  
1430: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Navigator:** Maps with "No-Spray" Areas Marked

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 9-13 JUL 07 DRAFT

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes at LFI and the surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: Maj (b) (6), TBD
- (3) Navigator: LTC (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: Msg (b) (6), MSG (b) (6)

##### b. Maintenance:

1. Spray Maintenance: TSG (b) (6), MSG (b) (6), Tsgt (b) (6), SRA (b) (6)
2. Crew Chiefs: Msg (b) (6), SSG (b) (6)
3. Avionics: SSG (b) (6)

##### c. Entomologists: MAJ (b) (6)

##### d. Vehicles:

- Vehicle Dispatch: Will supply us with 2x9pax vans and 2 cars
- MC / Entomologist: One Car
- Ops: One van (9 pax), one car
- Mx: One Van (9 Pax)

##### e. Billeting Office: COM: (757) 764-4667 POC TSG (b) (6)

DSN 574-4667, EXT 2528; FAX 574-3038

Holiday Inn - 1815 W Mercury Blvd

- Non Available slips are in mission folder behind lodging info

#### 2. PPR: SPRAY01

#### 3. SCHEDULE: (All times local)

##### 9 JUL (Monday):

- 1000: Show Time
- 1200 Take Off YNG
- 1330 Land KLF w/ Safety Briefing immediately following
- 1430: Installation Briefing
- 1530 Calibrate system with Dibrom

##### 10 JUL (Tuesday):

- 1500 Show time
- 1530 Wx/Decision, load Dibrom
- 1800 Take off LFI
- 2027 Sunset

##### 11 Jul (Wednesday):

- 1500 Show time
- 1530 Wx/Decision, load Dibrom
- 1800 Take off LFI
- 2026 Sunset

##### 12 JUL (Thursday):

- 1500 Show time
- 1530 Wx/Decision, load Dibrom
- 1800 Take off LFI
- 2026 Sunset

**13 JUL (Friday) Deploy to YNG**

1000: Show Time

1200: Take off KNBC

1400: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
  - (1) Ops phone DSN878-3588
  - (2) Tower phone DSN 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7 (Operating Hours 1000Z-0200Z)**
  - (1) Ground – 121.9 or 348.6 (phone 877-0221 ops)
  - (2) Tower – 118.7 (phone DSN 877-2862) voice mail 7-2962
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB: Tower DSN 574-7999**
  - (1) Tower - 125.0 or 253.5
  - (2) Ground - 121.7 or 275.8
  - (3) Clearance – 118.85 or 271.3
  - (4) Metro - 239.8
- d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15, Tower Supervisor DSN 262-3443**
- e. **Norfolk Approach: 124.9**
- f. **Spray Ground: Primary 392.2; Secondary: 308.6**

**7. IN-BRIEFING:** 1430 hrs; CE Conference Room

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** ten 8005 nozzles -- straight down
- c. **Aircraft:** 89-9106
- d. **Mission Identifier:** QZNRKA548190

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
- g. **Swath Width:** 2000 foot

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 1600 hrs each day pending weather and heat index.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

**11. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

28 MAY 2008

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray San Diego Oil Spill Exercise

**1. Objective/Purpose/Benefit:** Joint Operational Exercise with the US Coast Guard simulating an oil spill clean up operation near the California coastline. Aerial application of simulated oil dispersant using water will be performed working with the US CG ships and aircraft. Exercise activities should result in further refinement of MOU's with US CG as well as enhance the working relationship between US CG and the USAFR in environmental/disaster relief operations.

**2. Capability:** Spray Aircraft available 9-13 JUN 2008

**3. Concept of Operations:**

**9 JUN (Monday)**

0800L: Show time  
1000L: Depart KYNG  
1330L: Land KNZY for Safety Briefing

**10 JUN (Tuesday):**

Briefings 0800-1600L: Dispersants, JRC Set up, ICS

**11 JUN (Wednesday):**

0830L: Show time  
0900L: Load water  
1000L: Take off KNZY  
1130L: Land KNZY, reload water  
1200L: Take off KNZY  
1330L: Land KNZY

**12 JUN (Thursday):**

0830L: Show time  
0900L: Load water  
1000L: Take off KNZY  
1200L: Land KNZY  
1300-1700L: Debrief with all exercise personnel

**13 JUN (Friday):**

0700L: Show  
0900L: Depart KNZY  
1830L: Land KYNG

**4. Spray Parameters:**

- a. Altitude:** 100' AGL
- b. Swath Width.** 100 feet for UHV or as determined by the CPMP
- c. Flow Rate.** 277 gallons/minute
- d. Application Rate.** 7/acre
- e. Ground Speed:** 200 Knots
- f. Proposed spray area:** Exercise area TBD by CG

**5. Mission Commander:** MAJ(b) (6)

6. Please contact me at DSN (b) (6) if you have any questions.

// Signed //

1830 Land KYNG

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cell Phone, Mission Folder

- b. Entomologist:** Cell Phone, 2 VHF Radio, Project Notebook, Entomologist's Tool Kit
- c. Navigator:** Maps/Map Bag, Validation Map
- d. Spray Operator:** Safety Gear, Calibration Tables
- e. Spray Maintenance:** Deployment Kit, Support Equipment

**4. PPR: 161-100**

**5. RADIO FREQUENCIES: Air To Ground/Air to Air TBD**

KNZY TWR 135.1V/336.4 U

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/ Fuselage Booms
- b. Nozzle Tips/Orientation:**  
Larvicide: Raindrop nozzles straight back
- c. Number:** *Larvicide: fuselage only, 16 total (8 each side) straight back*
- d. Booms:** Fuselage
- e. Aircraft:** 899108
- f. Mission Identifier:** QZNRKA537161

**7. SPRAY PARAMETERS:**

- a. **Nozzles – Raindrop nozzles oriented straight back.**
- b. **8 (16 total) on each fuselage boom; evenly spaced.**
- c. **Booms – fuselage only**
- d. **Airspeed – 200 knots ground speed.**
- e. **Altitude – 100 feet above water.**
- f. **Application Rate – 7 Gal/Acre**
- g. **Flow Rate – 277 Gal/Min**
- h. **Spray -- water only.**
- i. **Number of passes – 6 per sortie. Do not decrease flow rate in order to increase passes.**
- j. **Pressure – 40 psi**

**8. LOADING: Water from?**

- a. **900 gallons of water per sortie through the fire dept.**
- b. **Battalion Chief (b) (6) and (b) (6) are the POC's (b) (6)**

**9. TRANSPORTATION: 5 full size cars from Enterprise (619-522-6111) at a rate of \$47 + tax and fees. Pick them up at Base Ops.**

**17. GENERAL TARGET INFORMATION:**

**a. Target 21:**

- (1) Dimensions: 4,980' X 7,770'
- (2) Acreage: 888
- (3) Acres Sprayed in 2004: 888
- (4) Aircraft Loads: 18,869 Gal
- (5) Sorties: 17
- (6) Passes (35' Swath): 157
- (7) Spray-On Time/Pass: 23 Seconds
- (8) Spray Heading: 00/180

**b. Target 24:**

- (1) Dimensions: 1,600' X 6,080'
- (2) Acreage: 223
- (3) Acres Sprayed in 2004: 223
- (4) Aircraft Loads: 5,263 Gal
- (5) Sorties: 7
- (6) Passes (35' Swath): 47
- (7) Spray-On Time/Pass: 18 Seconds
- (8) Spray Heading: 00/180

**UTTR GEOGRAPHIC LOCATION**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

# **910 AW AERIAL SPRAY UNIT -- POST-MISSION REPORT**

## **LANGLEY AFB, VA ADULT MOSQUITO CONTROL 8-14 Oct 2008**

### **1. MISSION BASICS:**

- a. Installation Sprayed: Langley AFB, VA and surrounding communities.
- b. Mission Duration: 8-14 Oct 2008
- c. Purpose of Application: Adult mosquito control
- d. Application Dates: 9-13 Oct 08
- e. Times of Application (Local): 1635-1839 (9 Oct); 1635-1805 (10 Oct); 1635-1835 (11 Oct); 1640-1740 (12 Oct); 1630-1840 (13 Oct)
- f. Acres Treated: 135,186 total: 52,824 (9 Oct); 47,290 (10 Oct); 19,712 (11 Oct); 2,560 (12 Oct); 12,800 (11 Oct)
- g. Project Coordinator (Name, Phone #): (b) (6), (b) (6)
- h. Date Spray Map Last Approved: 16 June 2008
- i. Date of Waste Generation Letter: 4 April 1996
- j. Installation In-Briefing: 1 CE Conference Room, Langley AFB; 9 Oct 08; Lt Col (b) (6) Maj (b) (6) Maj (b) (6)
- k. Mission identifier: QZNRKA110282

### **2. OPERATIONAL:**

#### **910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: Lt Col (b) (6) (8-10 Oct), Maj (b) (6) Capt (b) (6) (10-14 Oct)
- (3) Navigator: Lt Col (b) (6)
- (4) Flight Engineers: SMSgt (b) (6) tSgt (b) (6) (8-10 Oct)
- (5) Spray Operators: MSgt (b) (6) MSgt (b) (6) MSgt (b) (6) MSgt (b) (6)

##### **b. Maintenance:**

- 1. Spray Maintenance: TSgt (b) (6) MSgt (b) (6) TSgt (b) (6)
- 2. Crew Chiefs: MSgt (b) (6) SRA (b) (6)
- 3. Avionics: SSgt (b) (6)

##### **c. Entomologists:** Maj (b) (6) Lt Col (b) (6) (In place 9 Oct)

##### **d. Flying Data:**

- (1) Spray Sorties/Hours: 5/8.1 [2.1 (9 Oct); 1.5 (10 Oct); 2.0 (11 Oct); 1.0 (12 Oct); 1.5 (13 Oct)]
- (2) Ferry Sorties/Hours: 2/3.2 [1.6 (8 Oct); 1.6 (14 Oct)]

### **3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 208 (9 Oct); 88 (10 Oct); 143 (11 Oct)
- e. Gallons Pesticide Applied: 163 (9 Oct); 125 (10 Oct); 77 (11 Oct); 10 (12 Oct); 50 (13 Oct)
- f. Gallons and Name Diluent Used: none
- g. Gallons and Name of Flush Used: 10 gallons marvel oil
- h. Other Additives Used: n/a
- i. Application Rate: 0.52 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 90-9107
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles
- e. Nozzle Orientation & Number Used: 9 straight down; 4 left, 5 right (9 Oct); 11 (10-13 Oct)
- f. Pressure (PSI): 70 psi (9 Oct); 50 psi (10-13 Oct)
- g. Flow Rate: 3.7 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): 063°/8 (9 Oct); 70°/11 (10 Oct) on Langley Peninsula, 070°/8 (11 Oct); 090°/9 Craney Island (12 Oct); 270-330°/5 Portsmouth (13 Oct)
- b. Temperature (°F): 78-74 (9 Oct) 73-69 (10 Oct); 70-67 (11 Oct); 71-63 (12 Oct); 75-73 (13 Oct)
- c. Cloud Cover: overcast (9-11 Oct); mostly sunny (12-13 Oct)
- d. Source: Ground observations/at altitude during spray

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

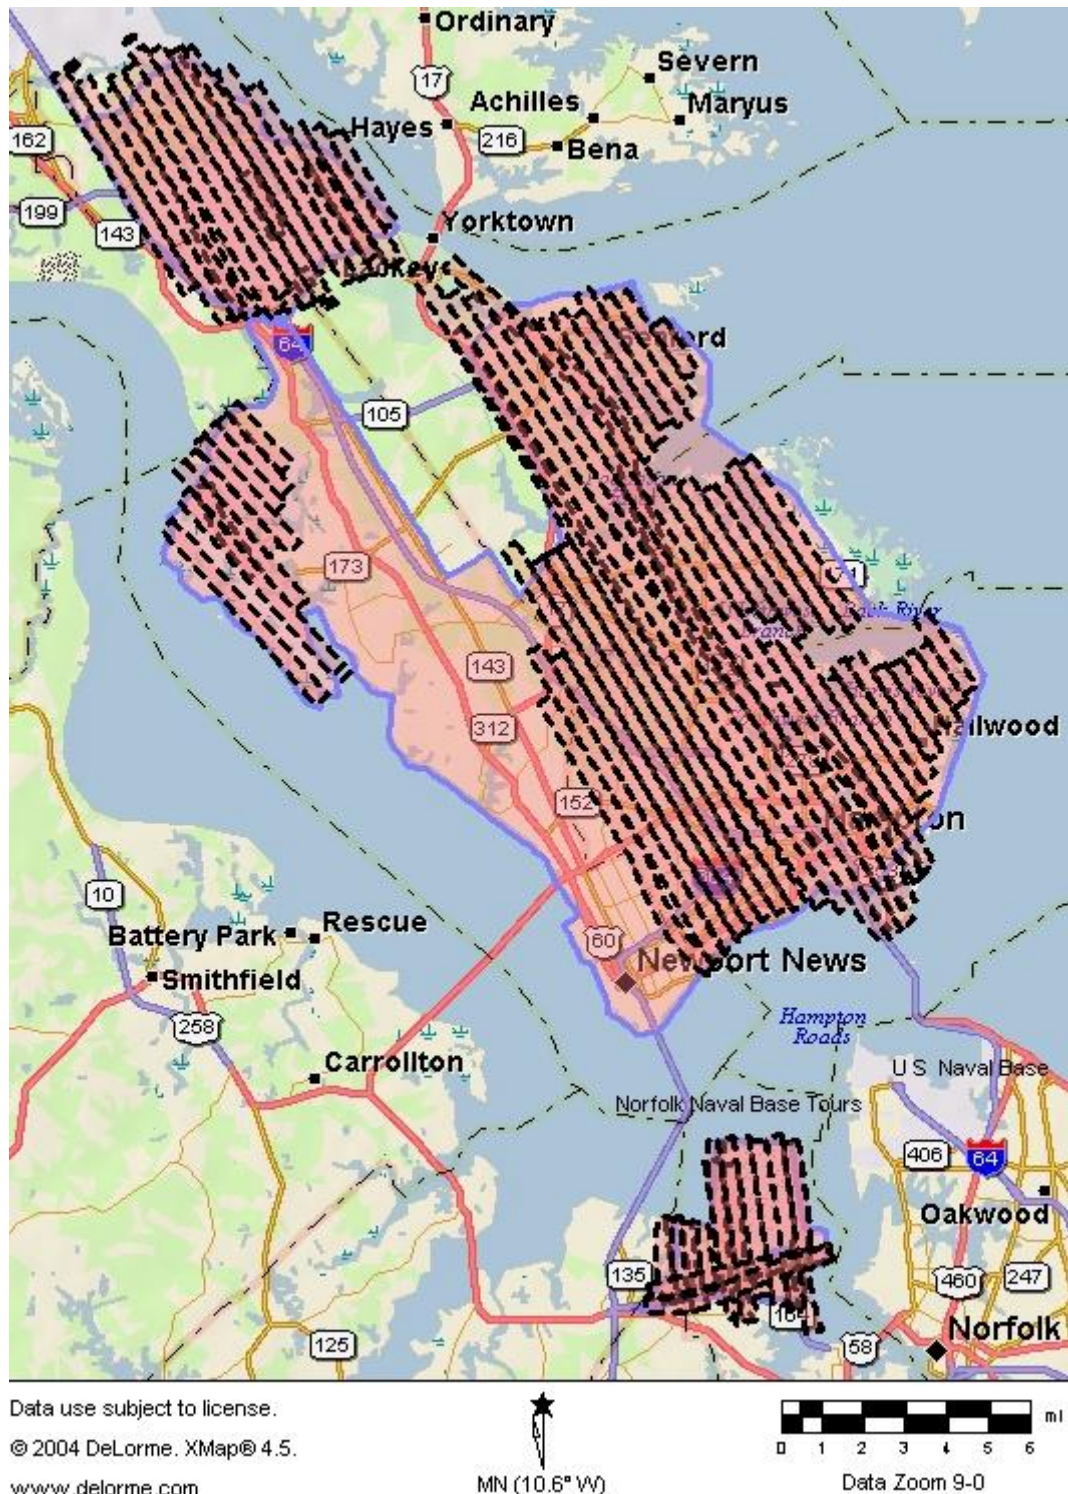

- a. Deposition Pattern:
  - (1) Technique/s Used: 2000 foot swath achieved easy with steady crosswind speeds greater than 5 knots.
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment by the various community and Base mosquito control professionals.
  - (2) Results: Langley pest management and City of Portsmouth reported good control, with no significant numbers of daylight-flying species present following applications; reduction was approximately 87%. York Co. residents were pleased with the results. Diurnal species were reduced 80% in Hampton, relative to pre-spray levels.

8. **REMARKS:** High tides and heavy rainfall produced by late season storms prompted fall season mosquito development, particularly from salt marsh mosquito species. Wind direction and restrictions on treatment times for some areas limited total acreage per sortie during this mission. Additionally, spray was suspended on 12 Oct because the MASS flow meter stopped working. In subsequent investigation, Spray Maintenance found a foreign object blocking the device. This is the second time Dibrom drums at Langley have been less than pure (see mission report June 2008). Apparently, stocks of defective drums have now been exhausted. Recommend straining pesticide during loading with 100 mesh screens if material is suspect. A total of 5 spray sorties were flown giving effective levels of mosquito control and achieving customer satisfaction. Attachment 1 shows the treatment areas for this mission. A flight engineer and spray operator finished their qualifications and a copilot received initial observation flights and completed some nonspray swaths during this mission. We received excellent support from Langley AFB, 1 CES to make this mission a success. Special thanks to Spray Maintenance for quickly resolving the MASS flow rate issues.

//Signed//

(b) (6) LtCol, USAFR  
(b) (6) , Maj, USAFR  
Certified Pest Management Professionals

**Attachment 1. Map depicting sprayed areas over Langley AFB and surrounding communities. 9-13 October 2008. Shaded portions show total potential area certified to receive sprays while dotted lines show the actual areas treated. Some communities opted not to receive sprays based on low mosquito presence for those regions.**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## CHARLESTON AFB / POINTSETT RANGE

### TRAINING AND TEST

#### 09 - 16 FEB 2001

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LtC (b) (6)
- (2) Pilots: Maj (b) (6) (9-16), Lt (b) (6) (9-11) Cpt (b) (6) (11-16)
- (3) Navigators: LtC (b) (6) (9-16), Maj (b) (6) (12-16)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: (9-16) MSG (b) (6), TSG (b) (6)  
(9-11) TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6), SSG (b) (6), TSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6), TSG (b) (6)
- (2) Avionics: MSG (b) (6)

##### c. Ground Support: TSG (b) (6)

##### d. Certified Pest Management Professionals: LTC (b) (6), Lt (b) (6)

#### 2. SCHEDULE: (All time Local)

##### 09 FEB (Friday):

1700: Depart YNG  
1900: Land CHS

##### PPR # - NONE REQUIRED

##### 10 FEB (Saturday) 0900-1200 Range Time

0900: Depart CHS  
1200: Land CHS

##### 11 FEB (Sunday):

0900: Depart CHS  
1100: Land YNG Swap-out  
1130: Depart YNG

##### 16 FEB (Friday):

0900: Depart CHS  
1100: Land YNG

### **3. ITEMS TO TAKE:**

- a. **Navigator:** Maps with “No-Spray” Areas Marked and Laptop Computer
- b. **Certified Pest Management Professionals:**
  - (1) 18 Packs of Water-Sensitive Cards
  - (2) 3 Boxes of Plastic Card Holders & Index Cards
  - (3) 2 Signal Mirrors
  - (4) 2 Spot Lights
  - (5) 1 Measuring Wheels
  - (6) Swath Kit Weather Station and Image Analyzer
  - (7) UHF Radio with Antenna and VHF Radio
  - (8) Ground Maps
  - (9) Laptop Computers
  - (10) Digital Camera
  - (11) SATLOC Trackstar Equipment

### **4. AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Charleston: TWR-; GND-; CMD POST-; PTD-

### **5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 0910?

### **6. SPRAY PARAMETERS: FEB 11 & 12**

- a. Nozzles – Raindrop oriented straight back.
- b. Number of Nozzles; 28; 7 on each wing boom and 7 on each fuselage boom; evenly spaced.
- c. Ball valve configuration to isolate booms; adapter for high volume spray.
- d. Airspeed – 200 knots ground speed.
- e. Altitude – 100 feet above ground level
- f. Spray -- water only.
- g. Number of passes – 6; pass 1 head wind with both wing booms; pass 2 tail wind with both wing booms; pass 3 head wind with fuselage booms; pass 4 tail wind with fuselage booms; pass 5 head wind with all booms; pass 6 tail wind with all booms.
- h. Pressure – 40 psi

### **7. SPRAY PARAMETERS: FEB 13 & 14**

- a. Nozzles – 8070 flat fan oriented straight back.
- b. Number of Nozzles; 80; 20 on each wing boom and 20 on each fuselage boom; evenly spaced.
- c. Ball valve configuration to isolate booms; adapter for high volume spray.
- d. Airspeed – 200 knots ground speed.
- e. Altitude – 100 feet above ground level
- f. Spray -- water only.
- g. Number of passes – 6; pass 1 head wind with both wing booms; pass 2 tail wind with both wing booms; pass 3 head wind with fuselage booms; pass 4 tail wind with fuselage booms; pass 5 head wind with all booms; pass 6 tail wind with all booms.
- h. Pressure – 40psi

### **8. SPRAY PARAMETERS: FEB 15**

- a. Nozzles – 8070 flat fan oriented straight back.
- b. Number of Nozzles; 80; 20 on each wing boom and 20 on each fuselage boom; evenly spaced.
- c. Ball valve configuration to isolate booms; adapter for high volume spray.

- d. Airspeed – 200 knots ground speed.
- e. Altitude – 100 feet above ground level
- f. Spray -- water only.
- g. Number of passes – 6; pass 1 upwind wing boom; pass 2 downwind wing boom; pass 3 upwind wing boom; pass 4 downwind wing boom; pass 5 fuselage booms; pass 6 fuselage booms.
- h. Pressure – 40psi

17 July 2000

**MEMORANDUM FOR 757 AS/DO**

**FROM: 757 AS/DOS**

**SUBJECT: Granular Dispersal Equipment for Mosquito Larviciding**

**1. PURPOSE.** The purpose of the trip to Portland Oregon was to examine the feasibility of equipping our C-130 aerial spray aircraft with granular dispersal equipment for mosquito larviciding. Habitat for mosquito larvae is often located under heavy forest canopies. Liquid larvicides are intercepted by foliage and do not reach the water bodies where mosquitoes breed. Granular larvicides penetrate the leaf canopy and are deposited in the mosquito habitat under the dense vegetation. The area occupied by mosquito larvae is much smaller than that occupied by adults, therefore less area needs to be treated. With the Differential Global Positioning systems now on our airplanes, we can efficiently treat for mosquitoes in these smaller areas.

**2. PARTICIPANTS.** Attachment 1 provides a list of the 910 AW personnel who participated in this mission. Two ferry sorties totaling 13.3 hours were flown.

**3. ITINERARY.** Personnel from the 757<sup>th</sup> Airlift Squadron traveled to Portland Oregon on 10 July 2000. LtC (b) (6) Maj (b) (6) , and SMS (b) (6) met with (b) (6) and (b) (6) from Simplex Inc on 11 July 2000. The itinerary is in attachment 2. The 910 AW personnel returned to Youngstown Air Reserve Station on 12 July 2000.

**4. DISCUSSION.** Mosquito eggs are present in soil on flood plains. The eggs hatch when flooded by events such as hurricane Floyd resulting in extreme increase of adult mosquito populations in ten days to two weeks. Large increases of adult mosquitoes can be prevented by application of larvicides to flood water so that adult mosquitoes don't rise to nuisance levels and the disease threat is eliminated. Granular formulations penetrate dense forest canopies better than liquid formulations and would provide better control in floodwater. A granular capability needs to be developed for our C130 aircraft so we can increase our mission effectiveness for controlling mosquito larvae under dense forest canopies. This is especially important since the only current DoD granular capability lies with the Army Pesticide Dispersal Unit. The Army no longer plans to field this unit, so the granular capability needs to be replaced using another platform.

**5. CONCLUSION/RECOMMENDATIONS.** The visit to Simplex in Portland, Oregon was a valuable fact finding mission. We were able to view granular application equipment used on other aircraft. From viewing this equipment it appears that an air driven system would work best for granular application with our aircraft. It is recommended that the 757<sup>th</sup> Airlift Squadron develop specifications for a granular applicator and submit them through contracting to begin the acquisition process. A single unit should be developed and tested before additional units are acquired.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 10-12 OCT 2006

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: MC- MAJ (b) (6) , LTC (b) (6) , Maj (b) (6)
- (2) Navigators: LTC (b) (6)
- (3) Flight Engineers: MSG (b) (6)
- (4) Spray Operators: Msgt (b) (6) , Msgt (b) (6) mmer, SRA (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) , TSG (b) (6) , Tsg (b) (6)
- (2) Crew Chiefs: Msg (b) (6) , TSG (b) (6)
- (3) Avionics: SSgt (b) (6)

##### c. Pest Management Professionals/Entomologist: Maj (b) (6)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car keys and vehicles at Base Ops.

#### 2. PPR REQUIREMENTS: 283-01

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

**10 OCT (Tuesday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

0900: Show Time  
1100: Take Off YNG  
1300: Land KNBC  
1300: Safety Briefing  
1430: Installation in-brief  
1530: Load chemical/Wx decision  
1745: Take off KNBC for spray sortie (begin spraying 1.25 hrs prior to sunset)  
1856: Sunset

**11 OCT (Wednesday):** wx backup or training

Check Rifle Range: None

1100: Installation Brief  
1430 Showtime  
1500: Load Chemical/Wx Decision  
1700: Take off KNBC  
1855: Sunset

**12 OCT (Thursday)** redeploy to YNG

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander Cell Phone

- b. **Entomologist/CPMP:**
  - (1) Wind Gauge & Compass
  - (2) UHF/VHF Radios and Cellular Phone
  - (3) Pesticide Safety Binder
- c. **Navigators:**
  - (1) Maps
  - (2) Templates
- d. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 11 open for 8005's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 90-9107
- f. **Mission Identifier:** QENRKA011283

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 2,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 8 Minutes
- h. **Flow Rate:** 5.4 gallons/Minute

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 118.975 Tower, 123.0 CTAF (tower open until 0100 hrs Z)  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 123.4 V**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC: (MCRD/MCAS Com: (843) 228-XXXX; Off Station Com: (843) 525-XXXX)**

**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S POST-MISSION REPORT**  
**PARRIS ISLAND MCRD, SC 10-12 OCT 2006**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 10-12 OCT 2006
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 10 Oct 2006
- e. Time/s of Application (Local): 1815-1920
- f. Acres Treated: 7,281
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) ,  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 2 Oct 2006
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 2 Oct; Assistant Chief of Staff,  
Installations and Logistics, COL Wingard; briefed by Maj Tancer/Maj Breidenbaugh

**2. OPERATIONAL:**

- a. **Mission Commander:** MAJ (b) (6)
- b. **Aircrew:**
  - (1) Pilots: LTC (b) (6) e, Maj (b) (6)
  - (2) Navigators: LTC (b) (6)
  - (3) Flight Engineers: MSG (b) (6)
  - (4) Spray Operators: Msgt (b) (6) , Msgt (b) (6) , SRA (b) (6)
- c. **Maintenance:**
  - (1) Spray Maintenance: MSG (b) (6) , TSG (b) (6) ,, Tsg (b) (6)
  - (2) Crew Chiefs: Msg (b) (6) , TSG (b) (6)
  - (3) Avionics: SSgt (b) (6)
- d. **Entomologist:** MAJ (b) (6)
- e. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.0
  - (2) Ferry Sorties/Hours: 2/4.1

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom® Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 45 Gal Dibrom® (10 Oct)
- e. Gallons Pesticide Applied: 44 Gal (10 Oct)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 8 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 0.77 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 12 oriented straight down
- f. Pressure: 55 p.s.i.
- g. Flow Rate: 5.4 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray Off-set: none
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS (20Oct):**

- a. Winds (Direction/Speed):
  - (1) Ground: 270°/1-2 Knots; variable
  - (2) Release Altitude: 260-290° /3-5 knots
- b. Temperature (Degrees Fahrenheit): 77° F
- c. Relative Humidity: 78%
- d. Cloud Cover: Partly Cloudy
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: visual observation of aircraft course (GPS)
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Weekly collections of gravid mosquitoes with attractant-baited traps and landing rates in regions frequented by recruits involved in training.
  - (2) Results: Excellent control was noted in all areas sampled.

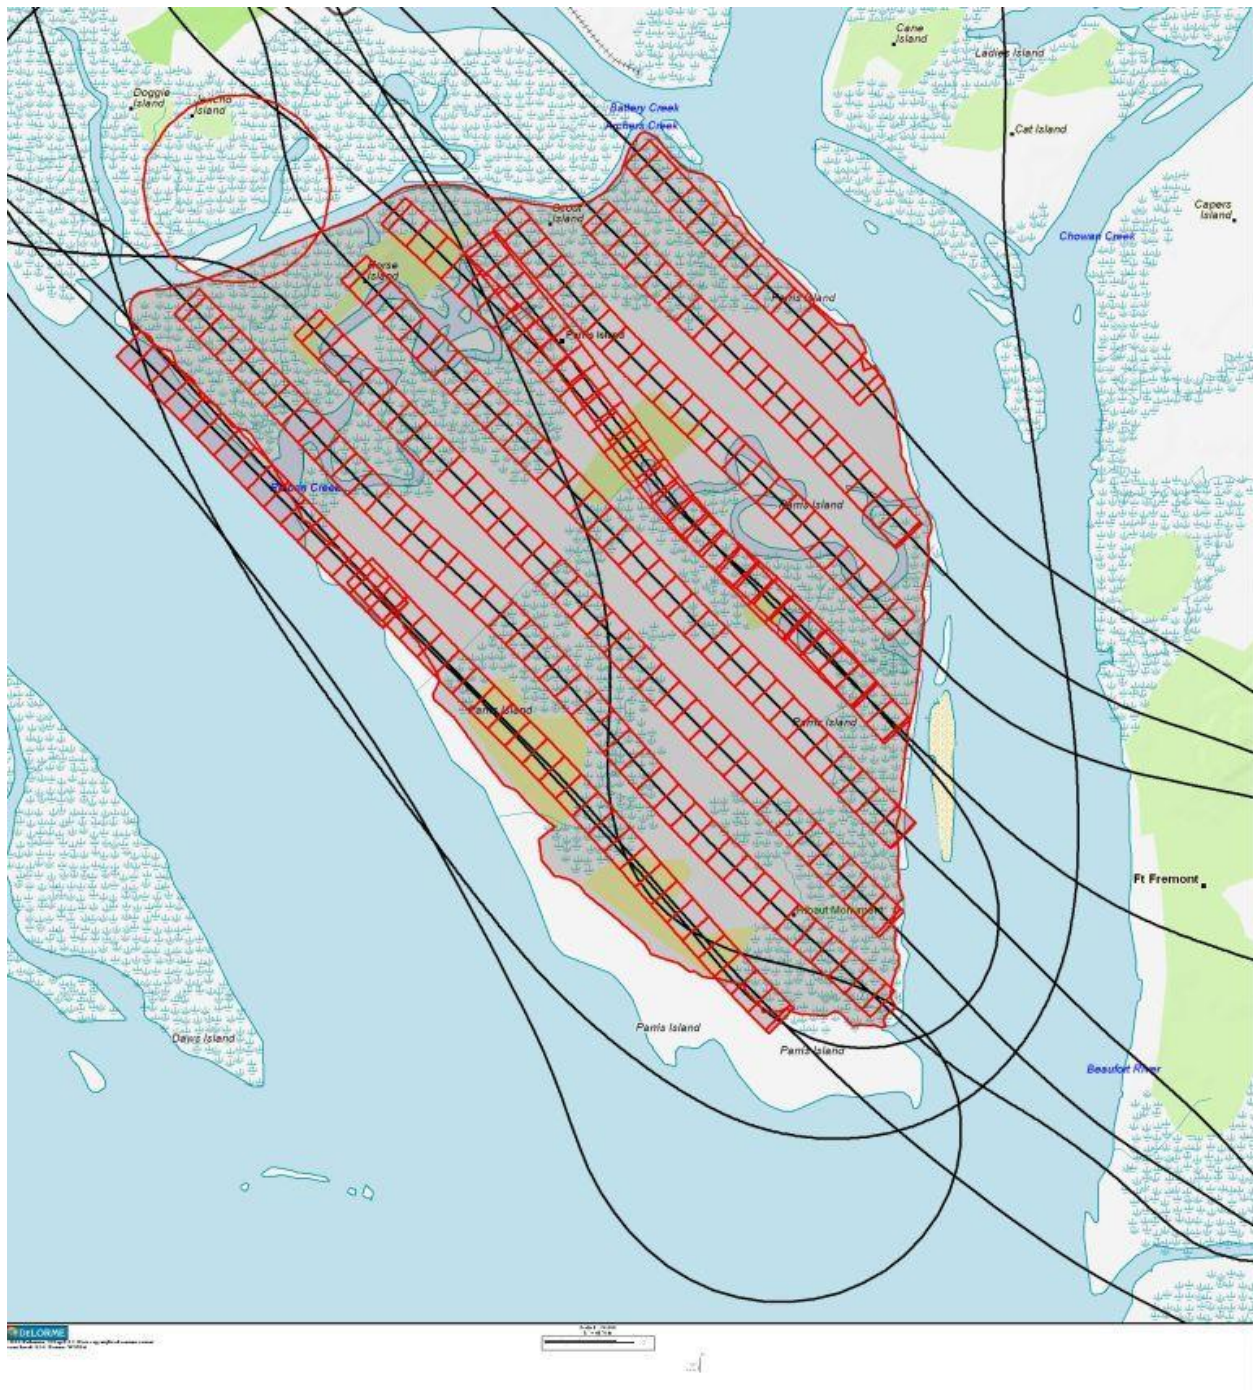

**8. REMARKS:** A single application was made over the Parris Island MCRD on 10 Oct 06 for control of biting midges (sandfleas) and mosquitoes. The application began approximately 1 hour prior to sunset to correspond with the peak activity period of the pest. The actual application required about 40 minutes. In order to save on costs we used a half drum and on full drum of pesticide resulting in 7,200 acres treated. This is slightly below the target of 7,400 acres on Parris Island but was justified by not opening a new pesticide drum at the end of the spray season. The path of the aircraft is shown in attachment 1. The relative efficacy will be determined by trap collections the following week. The next Parris Island mission is project to take place in late March early April in 2007. This was our final scheduled insecticide mission for the year.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Parris Island MCRD SC to control of Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Parris Island MCRD SC for control of nuisance mosquitoes with aerial spray application to reduce negative impact of insect bites on outdoor training at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft available on 10-12 SEP 07

3. Concept of Operations:

**10 SEP (Monday):**

0900: Show Time  
1100: Take Off YNG  
1300: Land KNBC  
1300: Safety Briefing  
1430: Installation in-brief  
1530: Load chemical/Wx decision  
1745: Take off KNBC for spray sortie (begin spraying 1.5 hrs prior to sunset)  
1937: Sunset

**11 SEP (Tuesday):** Wx back up, training, or redeploy to YNG

1500: Showtime  
1530: Load Chemical/Wx Decision  
1745: Take off KNBC  
1936: Sunset

**12 SEP (Wednesday):** Wx back up, training, or redeploy to YNG

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate
- d. Deploy: 2.0 Hrs
- e. Re-Deploy: 2.0 Hrs
- f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Maj (b) (6)

6. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) DSN (b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MOUNTAIN HOME AFB RANGE, ID

### 10 – 15 OCT 2000

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6)
- (2) Pilots: MAJ (b) (6) , CPT (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: CMS (b) (6)
- (5) Spray Operators: TSG (b) (6) , MSG (b) (6) , TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6) , SSG (b) (6) , SSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , TSG (b) (6)
- (3) Avionics: SSG (b) (6)

##### c. Ground Support/CPM Professionals: LTC (b) (6) , LTC (b) (6) , CPT (b) (6) , CPT (b) (6)

#### 2. SCHEDULE: (All Local) Times

##### 10 OCT (Tuesday)

1000: Show at KYNG

**PPR # - 284-1**

1200: Depart KYNG

1530: Land KMUO/Safety Briefing

A/R: Maintenance configures aircraft; Aircrew plan next day's mission

##### 11 OCT (Wednesday): Range Time 0800-1245

0630: Show time

0752: Sunrise

A/R: Take Off KMUO (As determined by Mission Cmdr)

1030: Land KMUO

##### 12 OCT (Thursday): Range Time 0800-1045

0630: Show time

0753: Sunrise

A/R: Take Off KMUO (As determined by Mission Cmdr)

1030: Land KMUO

##### 13 OCT (Friday): Range Time 0800-1015 and 1345-1900

0630: Show time

0755: Sunrise

A/R: Take Off KMUO (As determined by Mission Cmdr)

A/R: Land KMUO

##### 14 OCT (Saturday): Range Time 0800-0900 and 1500-1800

0600: Show time

0756: Sunrise

0800: Take Off KMUO

0900: Land KMUO (Or as required)

1230: Take Off KMUO

1330: Land KHIF

**PPR # - None Required at Hill AFB**

##### 15 OCT (Sunday)

0730: Show time

0900: Take Off KHIF

1600: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** Swath Kit, UHF Radio, Cardholders, Water Sensitive Cards, Tool Kit, VHF Radio, Cell Phone, Laptop Computers and accessories
- c. **Navigator:** Maps/Map Bag, Validation Map, Toshiba Computer
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Mobility Kit, MASS Spares, Spill Kit, Pesticide Safety Binder, Safety Equipment and Tool and other equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION:** None Required.

**5. PARKING PLAN:**

**6. RADIO FREQUENCIES:**

- a. **Air To Ground:** Entomologists: 292.2(range); Maintenance 384.7
- b. **Mt Home:** PTD: 372.2, ACC CP (Raymond 27): 381.3, ATIS: 273.5, TWR: 133.85 / 253.5, GND: 120.5 / 275.8, RAPCON: 259.1, Salt Lake Center: 387.15/363.0
- c. **Range:** Saylor Creek Range: 292.2 pri / 381.3 sec  
Sagebrush Control: 251.2, Paradise MOA: 272.7/236.05/225.55  
Owyhee MOA: 392.2/266.35, Bruneau/Sheep Creek MOA: 251.875

**7. IN-BRIEFING:** Upon Arrival.

**8. SPRAY CONFIGURATION FOR 11 OCT:**

- a. **System:** SP-2G
- b. **Nozzle Tips/Orientation:** Oil Spill Dispersant Nozzles/Straight Back
- c. **Number:** Fuselage 30 (15 each side)
- c. **Booms:** Fuselage Booms
- d. **Aircraft:** 99105 (0910? spare)
- e. **Profile:** Planned HV Profile

**9. SPRAY CONFIGURATION FOR 12 OCT:**

- a. **System:** SP-2G
- b. **Nozzle Tips/Orientation:** 8070 Flat Fan Wing; 8050 Flat Fan Fuselage/Straight Back
- c. **Number:** Upwind Wing Boom 46; Downwind Wing Boom 10 on most inboard sites; Fuselage 40 (20 each side)
- d. **Aircraft:** 99105 (Mission Identifier: QZNRKA010284)
- e. **Profile:** Planned HV Profile

**10. SPRAY CONFIGURATION FOR 13-14 OCT:** Will depend on results from previous days

**11. SPRAY PARAMETERS:**

- a. **Altitude:** 100' AGL
- b. **Swath Width.** 125 feet
- c. **Flow Rate.** 581 Gallons/Minute
- d. **Application Rate.** Simulate 10 Gal spray/Acre 11 OCT and 5 Gal spray/Acre 12 OCT
- e. **Ground Speed:** 200 Knots

**12. SPRAY MIXING AND LOADING:** One quart of Control per 475 gal water added to tanks.

**13. SPRAY MONITORING OR TESTING: Performed by the CPMPs**

**NOTES:** Will use water sensitive cards.

**14. CONTACTS:**

**a. Mountain Home AFB, ID:**

- (1) Base Ops: DSN: 728-2222; COMM: (208)-828-2222
- (2) Billeting: x6451 FAX: 4797
- (3) Transportation: x2215 FAX: 1619

3 October 2000

**MEMORANDUM FOR 910 OG/CC**

**FROM: 757 AS/DOS**

**SUBJECT: Saylor Creek Range, Idaho, High Volume Test Mission 10-15 Oct 00**

1. **Purpose:** The purpose of this mission was to characterize our aerial spray aircraft for a high volume herbicide mission at Saylor Creek Range, Idaho, that is proposed for November 2000.
2. **Participants:** The participants are listed in Attachment 1, the Mountain Home Operational Schedule for 10-15 October 2000.
3. **Itinerary:** The itinerary is listed in the Mountain Home Operational Schedule (Atch 1). Four ferry sorties were flown totaling 11.4 hours and three spray sorties were flown totaling 5.5 hours.
4. **Discussion:**
  - a. Two configurations with raindrop nozzles were tested. Spray deposition was collected on kromekote cards. The first configuration was raindrop nozzles on the fuselage booms only. The application rate desired was 10 gallons per acre on a 125' swath width. Winds were 7-9 mph at 160 degrees, the temperature was 41degrees F and the humidity was 71%. The aircraft was flying 180 – 360 degrees so there was a slight crosswind component from the east. Spray deposition was excellent, but effective swath width was 75 feet rather than the desired 125 feet.
  - b. The second configuration was raindrop nozzles on the upwind wing boom and fuselage booms. This configuration also yielded excellent spray deposition. The application rate desired was 5 gallons per acre on a 250' swath width. Winds were 5 mph at 218 degrees and the aircraft was flying 180 degrees so there was a crosswind component from the west. Temperature was 44 degrees F and humidity was 91%. Effective swath width proved to be 200 feet with this configuration. Visual observation of the spray test using only the upwind wing boom with fuselage booms showed that the spray from the fuselage booms dropped from the aircraft and was deposited upwind of spray from the upwind wing boom. Spray from the wing was lifted by wind vortices created by air moving over the wings. It drifted downwind over the top of that from the fuselage booms and was deposited downwind of spray from the fuselage booms (Figure 1). Deposition from fuselage booms was heavier than deposition from the wing boom, however, there were no gaps in spray coverage.
  - c. Testing with flat fan nozzles was planned, but not completed due to unfavorable weather, and because tests with the raindrop nozzles yielded excellent spray deposition patterns for the high volume mission.

## 5. Conclusions/Recommendations:

- a. Both configurations will work for the high volume herbicide application planned for Saylor Creek Range in November 2000. The combination upwind wing boom and fuselage booms is recommended because the wider swath width will require less application time than with fuselage booms only. Spray-on time for a 200' swath width would be 16 minutes as opposed to 42 minutes with a 75' swath width.
  - b. The disadvantage of the wider swath width is less spray mix is applied per acre. The wider swath width tested was at the low end of the recommended 5 to 15 gallons per acre. I recommend increasing the flow rate from 581 to 651 gallons per minute to give a higher application rate for the 200' swath width desired. The application rate would be 7 gallons per acre. The required number of sorties would be 6. The required number of sorties for a 10 gallon per acre application would be 8. Thirty-three nozzles would be required as opposed to 30 used during this test.
  - c. Because of heavier deposition from the fuselage, 4 nozzles should be used on each fuselage boom instead of the 5 used during this test, and 25 nozzles should be used on the upwind wing boom instead of the 20 used during this test.
6. The actual High Volume Herbicide Spray mission for Saylor Creek Range ID is scheduled 13-19 Nov 00. With the excellent test results completed during this mission we anticipate no problems during the actual spray mission scheduled in November.

(b) (6), PhD, Lt Col, AFRC  
Research Entomologist

- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s) Hrs 0700-2300 M-F, S-S per flying schedule  
DSN 968-7138
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

**5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 99106
- c. Mission Identifier: QZNRKA405010

**6. MISSION PROTOCOLS:**

Avon Park Spray Testing Itinerary  
10-16 Jan 05

- 1. Test 1: determination of effective swath width with fuselage ULV configuration @ **300’** AGL
  - a. Spray mineral oil from fuselage booms using 9 (4 left side: 5 right side) 8005 nozzles at, 200 knots
    - i. We are looking for a crosswind spray (see below)
    - ii. 2 or 3 replications depending on results
- 2. Test 2: determination of effective swath width with fuselage ULV configuration @ **500’** AGL
  - a. Same as test one except change altitude to **500’** AGL, 200 knots
    - i. Crosswind pattern
    - ii. 2 or 3 replications
- 3. Spray Parameters (use for all tests):
  - a. Booms -- Fuselage only.
  - b. Nozzles - 8005 TeeJet
  - c. Number of Nozzles – 9 nozzles 4 on left, 5 on right
  - d. Airspeed -- 200 knots ground speed.
  - e. Altitude -- 300’/500’ above ground level.
  - f. Wind – Crosswind component.

g. Flow Rate – 4.5 gallons/minute

4. Mission Protocols:

- a. Determination of effective swath width with fuselage ULV configuration. Glass slides will be used to collect and sample droplets. Ten sampling stations will be setup along either Smith Road (east/west road south of Bravo Range), Oliver Road (north/south road), or Frostproof Rd (NW/SE). This is a crosswind test, thus, we are looking for the wind direction to be within  $\pm 30^\circ$  of the direction of the road. Additionally, we need the average winds to be below 10 mph. Because wind will play an important part in these tests please be prepared to wait for appropriate winds during the entire range time. We are aiming for a transect length of 3 miles. Some of the locations will not support this distance but we will try to get close.
- b. The first test will be a 300' AGL. We need the system to have stabilized prior to reaching the sampling points. 15 seconds prior to the sampling point and 15 seconds after should be sufficient (30 seconds total) but this value could change as we increase the altitude. Spray Operators: Please record the spray-on time and pressure. Three passes over the target is all that is require for a given day's test.
- c. Microscope slides will be retrieved 25 minutes after the plane has passed. Number and size of the droplets will be determined.

  4. Mission Protocols:
    - a. Determination of effective swath width with fuselage ULV configuration. Glass slides will be used to collect and sample droplets. Ten sampling stations will be setup along either Smith Road (east/west road south of Bravo Range), Oliver Road (north/south road), or Frostproof Rd (NW/SE). This is a crosswind test, thus, we are looking for the wind direction to be within  $\pm 30^\circ$  of the direction of the road. Additionally, we need the average winds to be below 10 mph. Because wind will play an important part in these tests please be prepared to wait for appropriate winds during the entire range time.
    - b. The first test will be a 300' AGL. We need the system to have stabilized prior to reaching the sampling points. 15 seconds prior to the sampling point and 15 seconds after should be sufficient (30 seconds total) but this value could change as we increase the altitude. Spray Operators: Please record the spray-on time and

pressure. Three passes over the target is all that is require for a given day's test.

- c. Microscope slides will be retrieved 25 minutes after the plane has passed.  
Number and size of the droplets will be determined.
- 6. Aircraft Commander: Major (b) (6)
- 7. Support required at Avon Park Bombing Range is thru the Range Manager.
- 8. If you have any questions concerning this mission please contact DSN (b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## NSB, KINGS BAY, GA

### 11-13 April 2008 **Change 1**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at NSB, Kings Bay, GA.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: MC: Capt (b) (6) , Maj (b) (6) , Capt (b) (6)
- (2) Navigators: LTC (b) (6)
- (3) Flight Engineers: Msgt (b) (6) ,
- (4) Spray Operators: Smsgt (b) (6) , Msgt (b) (6) , Msgt (b) (6) , Msgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSgt (b) (6) , TSgt (b) (6) , MSgt (b) (6) , SRA (b) (6)
- (2) Crew Chiefs: Ssgt (b) (6) A1C (b) (6)
- (3) Avionics: Ssgt (b) (6)

##### c. Entomologist: Maj (b) (6)

#### 2. PPR REQUIREMENTS: 41102

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### 11 APR (Friday)

1600 Show  
1700 Depart YNG  
2000 Land KNIP  
2030 Safety Brief

**12 APR (Saturday) :** Aircraft will squawk 5107 prior to entering P-50. Ensure pilots are given this squawk from ATC!!  
Flight plan: KNIP – Kings Bay – KNIP at 3000' on IFR flight plan with delay at Kings Bay.

TBD Brief  
1500 Weather call/Crew show  
1530 Load Chemical  
1800 Depart KNIP  
Sunset: 1952

##### 13 APR (Sunday)

1000 Show time  
1200 Depart KNIP  
1500 Land YNG

**\*\*No weather back up day available based on Kings Bay scheduled events.**

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander Cell Phone

##### b. Entomologist:

- (1) Wind Gauge & Compass
- (2) VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

##### c. Navigators:

- (1) Maps
- (2) Templates

- d. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** size = 8005; 20 open for 7.4 flow rate; 15 open for 5.5); oriented straight down.
- d. **Differential GPS:** Wingman Installed
- e. **Aircraft:** 89-9105
- f. **Mission Identifier:** QZNRKA096102

**6. Adult mosquito control spray Parameters: (Kings Bay)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 1.0 oz/acre or 0.75 oz/acre see entomologist
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 2,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 15,000 Acres
- g. **Spray-On Time:** 32 Minutes
- h. **Flow Rate:** 7.4 gallons/minute or 5.55 gal/min see entomologist

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 3 or 4 drums of Dibrom for Kings Bay (see entomologist).

**8. PARKING PLAN NAS Jacksonville, FL**

**9. AIR TO GROUND RADIO FREQUENCIES:**

Navy Jax Ops-	310.2	Tower	120.0/340.2
Ground	128.6/336.4	<b>Spray Ground:</b>	<b>123.45 VHF</b>
ATIS	281.0		

**10. TRANSPORTATION:**

Enterprise Car Rental: 904-772-7007  
 3 FS Cars ( Townsend, Galati, Lott) \$40/day+5gov policy  
 2 Mini Vans (Darby, Hefner) \$75/day+5gov policy

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP and by NSB Kings Bay pest control.

**12.. Quarters:**

Hampton Inn Jacksonville-Orange Park (904)-777-5313 \$79/night  
 6135 Youngerman Circle, Jacksonville, FL 32244

**13. CONTACTS:**

- a. **Naval Submarine Base Kings Bay, GA (Com: (912) 573-xxxx; DSN 573-xxxx)**
  - (1) Spray Coordinator: (b) (6)

(2) Strategic Weapons Facility Atlantic (SWFLANT) x0551

**b. Naval Air Station Jacksonville, FL (NAS JAX)**

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at King's Bay NSB, GA

1. Objective/Purpose/Benefits of the Spray Mission. Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Kings Bay NSB, GA.

2. Capability: Spray Aircraft available on 11-13 APR 2008

3. Concept of Operations:

11 APR (Friday)

1600 Show

1700 Depart YNG

2000 Land KNIP

2030 Safety Brief

12 APR (Saturday) :

TBD In-Brief with NAS Personnel

1500 Weather call/Crew show

1530 Load Chemical

1800 Depart KNIP

Sunset: 1952

13 APR (Sunday)

1100 Show time

1200 Depart KNIP

1500 Land YNG

4. Spray Parameters:

a. Acreage: 15000 Acres (Only areas determined by PMP)

b. Altitude: 150 Ft AGL

c. Pesticide: Dibrom® Concentrate;

d. Deploy: 3.0 Hrs/ Redeploy: 3.0

f. Spray Time: 30 Minutes

5. Aircraft Commander Maj (b) (6)

6. Support required at Kings Bay NSB has been coordinated.

// SIGNED //

Assistant Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 11-14 August 2009

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks and Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) MC: LTC (b) (6)
- 2) Pilots: LTC (b) (6) , Capt (b) (6)
- 3) Navigators: LTC (b) (6)
- 4) Flight Engineers: MSgt (b) (6)
- 5) Spray Operators: MSgt (b) (6) , Msgt (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: TSgt (b) (6) , SSgt (b) (6) , TSgt (b) (6)
- 2) Crew Chief(s): TSgt (b) (6) , SRA (b) (6)
- 3) Avionics: TSgt (b) (6)

##### c. Entomologists/Ground Support: Maj (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 11 AUG (Tuesday):

1000: Showtime  
1200: Depart KYNG  
1430: Land KRDR/Safety Briefing  
1630: WX decision/Load chemical  
1830: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2048

##### 12 AUG (Wednesday):

1630: Showtime/WX decision/Load Chemical  
1830: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2046

##### 13 AUG (Thursday):

1630: Showtime/WX Decision/Load Chemical  
1830: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2044

##### 14 AUG (Thursday):

1130: Show time  
1330: Takeoff KRDR  
1730: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 VHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

#### 4. PPR: 81101KB

5. **RADIO FREQUENCIES:** Air To Ground Primary VHF 123.45 KRDR Tower 124.9 V; Grand Forks International 118.4 V

#### 6. CONFIGURATION: SP2G

- a. System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down
- c. Number:** ULV: 18 8005s total (9 each side)
- e. Aircraft:** 90-9108
- f. Mission Identifier:** QZNRKA687223

## 7. SPRAY PARAMETERS:

### a. Adulticide

- (1) **Area to be treated:** 11518 acres (Grand Forks AFB), 18346 (Grand Forks) and 877 (Grand Forks Intl)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION:** Transportation provided by base (DSN362-3976): One 15 pax van (OPS), three 6 pax trucks (MC, OPS, MX), one 1.5 ton truck (spray MX).

**10. LODGING:** Onbase, 18 rooms reserved. DSN 362-7200 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844

## 11. CONTACTS:

### a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205

- (1) **Base Operations:** Airfield Manager DSN 362-4409  
-- DSN 362-xxxx or (701) 747-xxxx20
- (2) **Pest Management:** TSgt (b) (6) or Ssgt (b) (6) DSN 362-4289, FAX 3432)
- (3) **Base Civil Engineer:** Lt Col (b) (6)
- (4) **Environmental Officer:** (b) (6), DSN (b) (6), FAX 6155
- (5) **Public Affairs:** DSN 362-5608/5023 (off duty CP ext 6711)
- (6) **Weather:** DSN 362-4396
- (6) **Billeting:** DSN 362-3070/6189/7200 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844

# 910 AW AERIAL SPRAY UNIT POST-MISSION REPORT

## GRAND FORKS AFB – ADULT MOSQUITO CONTROL 11-14 August, 2009

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 11-14 August 2009
- c. Purpose of Application: Control adult nuisance and vector mosquitoes
- d. Application Date: 12-13 August 2009
- e. Time/s of Application (Local): 1915-2055 (12 Aug); 1855-2105 (13 Aug)
- f. Acres Treated: 30138
- g. Project Coordinator/s (Name/Rank, Title, Phone #): TSG (b) (6) , NCOIC Pest Management Shop, DSN (b) (6)
- h. Date Spray Map Last Approved: 10 August 2009
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): Teleconference. 10 August 2009. MAJ (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11): MAJ (b) (6)
- c. Aircrew:
  - 1) Pilots: LTC (b) (6) , CAPT (b) (6)
  - 2) Navigators: LTC (b) (6)
  - 3) Flight Engineers: SMS (b) (6)
  - 4) Spray Operators: SMS (b) (6) , SMS (b) (6)
- d. Safety Briefer: MAJ (b) (6)
- e. Spray Maintenance: TSGT (b) (6) , TSGT (b) (6) , TSGT (b) (6)
- f. Spray Ground Monitors: LTC (b) (6)
- g. Crew Chief: TSGT (b) (6) , SRA (b) (6)
- h. Avionics: TSGT (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 2/4.0
  - (2) Ferry Sorties/Hours: 2/6.2

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-5481
- c. Gallons Pesticide Loaded: 100 gal Trumpet® (12 August)
- d. Gallons Pesticide Applied: 140 gal Trumpet® (13 August)
- e. Gallons and Name of Flush Used: 50 gal/water
- f. Other Additives Used: none
- g. Application Rate: 1.0 oz/acre Trumpet®

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 18 straight down
- f. Pressure (PSI): 38 PSI
- g. Flow Rate: 7.26 GPM

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray Off Set: 2000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 170° @ 7 knots (ground observation) (12 Aug); 190° @ 4 knots (13 Aug)
- b. Temperature (Degrees Fahrenheit): 85 °F (12 Aug); 81 °F (13 Aug)
- c. Relative Humidity: 55%
- d. Cloud Cover: Clear
- e. Source: Ground observations and National Weather Service

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. The 319 MDG/ADS conducts adult mosquito trapping to monitor mosquito densities on base. The City of Grand Forks also monitors mosquito populations with 11 traps distributed around the city.
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito traps
  - (2) Results: Trap data pending from 319 MDG/ADS. City of Grand Forks reported an 89 percent decrease in mosquito counts, with the most active trap collecting only 4 mosquitoes following the spray. Most traps had zero mosquitoes present.

**8. REMARKS:** Mosquito counts were relatively low prior to this spray. However, the threat of West Nile Virus prompted AF public health to make the decision to spray the base with Trumpet EC. The applications were made during the last 1.5 hrs of daylight to maximize the correlation between the spray period and mosquito activity. Meteorological conditions were good during the AFB and city application, with a moderate unidirectional wind assuring good coverage. Preliminary post-spray observations indicate excellent control of mosquitoes. Pending trap count data will undoubtedly confirm this. The City of Grand Forks opted to be a part of this spray mission. Post-spray trap counts from the city indicate a significant reduction in the mosquito populations, with post-spray trap counts declining approximately 89 percent from pre-spray trap counts. Many thanks to TSGT (b) (6) of the GFAFB pest control shop, and thanks also to (b) (6), of the Grand Forks public health department.

**Attachment 1. Image shows Grand Forks AFB, City of Grand Forks, and Grand Forks International Airport spray blocks (red) and pesticide application swaths (yellow) during application on 12 and 13 August 2009. A 2000' southerly offset was used to compensate for winds. Diagonal application of spray within the City of Grand Forks Spray Block indicates tank flush activities.**

**DEPARTMENT OF THE AIR FORCE**  
**AIR FORCE RESERVE COMMAND (AFRC)**

6 May 09

**MEMORANDUM FOR HQ AFRC/DOOM**

**FROM:** 757AS/DOS  
3976 King Graves Rd  
Vienna Ohio 44473-0910

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Grand Forks AFB, ND

1. One C-130 will be available 11-15 May 09 for the requested spray larvacide mission helping to control nuisance and vector species of mosquitoes reducing the negative impact these organisms generate on outdoor activities.

2. Concept of Operations:

- a. 11 May (Monday)  
0900 Show KYNG  
1100 Depart KYNG  
1300 Land KRDR
- b. 12-14 May (Tuesday-Thursday)  
0430 Show KRDR  
0600 Depart KRDR  
0900 Land KRDR
- c. 15 May (Friday)  
0700 Show KRDR  
0900 Depart KRDR  
1500 Land KYNG

3. Aerial Spray Training for pilots and maintenance support personnel will be accomplished. The following flight parameters will be utilized:

- a. Altitude – 100' AGL
- b. Swath width – 200'
- c. Flow rate – 186 gal/min for an application rate of 2.0 gal/acre
- d. Chemical – Altosid
- e. Approximate spray area – 1636 acres

4. Maj (b) (6) will act as Mission Commander.

5. Lt Col (b) (6) will act as Aircraft Commander

6. Support required at Grand Forks AFB, ND has been completed.

(b) (6), Major, USAFR  
Assistant Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 11-15 May 2009

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes and thereby improving working conditions and lower mosquito-borne illness for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: LTC (b) (6), Maj (b) (6), LTC (b) (6)
- 2) Navigators: LTC (b) (6)
- 3) Flight Engineers: MSGT (b) (6)
- 4) Spray Operators: MSGT (b) (6), Msgt (b) (6) ibson, Msgt (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: Tsgt (b) (6), Tsgt (b) (6), Tsgt (b) (6), A1C (b) (6)
- 2) Crew Chief(s): (b) (6)
- 3) Avionics: Msgt (b) (6)

##### c. Entomologist/Mission Commander: Maj (b) (6)

#### 2. SCHEDULE: (All Local Times) PPR: 051101JM

##### 11 May (Monday)

0800: Showtime  
1000: Depart KYNG  
1200: Land KRDR/Safety Briefing  
1430: Spray In Brief (CPMP, MC, AC).

##### 12 May (Tuesday):

0430: Show time  
0530 Load Chemical  
0600 Take off KGFK (Larvicide Spray Sortie)  
0900 Land KRDR  
0552: Sunrise

##### 13 May (Wednesday):

0430: Show time  
0530 Load Chemical  
0600: Take off KRDR (Larvicide Spray Sortie)  
0900: Land KRDR  
0550: Sunrise

##### 14 May (Thursday):

0430: Show time  
0530 Load Chemical  
0600: Take off KRDR (Larvicide Spray Sortie)  
0900: Land KRDR  
0549: Sunrise

##### 15 May (Friday):

0800: Show time  
1000: Take off KRDR  
1400: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cell Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 UHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit

c. **Navigator:** Maps/Map Bag, Validation Map

- d. Spray Operator:** Safety Gear, Calibration Tables
- e. Spray Maintenance:** Deployment Kit, Support Equipment

**4. PPR: 05-16-01/ES**

**5. RADIO FREQUENCIES: Air To Ground Primary** VHF 123.45; secondary UHF 392.2;  
KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/ Fuselage Booms
- b. Nozzle Tips/Orientation:**  
Larvicide: Raindrop nozzles straight back
- c. Number:**  
Larvicide: fuselage only, 12 total (6 each side) straight back
- d. Booms:** Fuselage
- e. Aircraft:** 899105
- f. Mission Identifier:** QZNRKA227131

**7. SPRAY PARAMETERS:**

- a. Larvicide**
  - (1) **Area to be treated:** approx. 1,636 acres
  - (2) **Altitude:** 100' for Larvicide application
  - (3) **Swath Width.** 200 feet
  - (4) **Flow Rate.** 186 gallons/minute
- b. Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)
- c. Ground Speed:** 200 Knots

**8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)**

- a. Composition of each Gallon:**
  - (1) 0.375 ounces of Altosid® 20
  - (2) 0.64 ounces of AirexDC™ drift retardant
  - (3) Water
- b. Typical load:** (2 tanks of 450 gallons each)
  - (1) Fill with 450 gallons of water/tank. Total water in tanks = 900 gal.
  - (2) Total water added = 900 gallons
  - (3) Add 1.33 (1 1/3) gallons of Altosid® per tank (2 2/3 gallons total).
  - (4) 2.5 gal AirexDC per tank (5 Gal total) while agitating approximately 15 min
  - (5) Total quantity mix. 908 gallons
- c. Final Load for complete flush**
  - (1) Fill tanks with the amount of water necessary for a proper system flush
- d. Mixing Instructions:**  
SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.  
PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

**9. TRANSPORTATION 2 cars and 2 vans provided by 319 CES, Transportation (bus) will be provided to the In-Brief , vehicles will be picked up there.**

**2-Aircrew**  
**1-Spray MX**  
**1-Crew Chiefs & Specialists**

**10. LODGING: On Base Billeting:** DSN 362-3070/6189 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844  
Rooms Reserved by the Pest Management at RDR

## 11. CONTACTS:

### a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205

**910 AW AERIAL SPRAY**  
**GRAND FORKS AFB, ND 11-15 May 2009**  
**PMP'S POST-MISSION REPORT**

**1. MISSION BASICS:**

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 11-15 May 2009
- c. Purpose of Application: Control nuisance and vector mosquitoes (larval stages)
- d. Application Date: 14 May, 2009
- e. Time of Application (Zulu): 1145-1252; 1330-1420; 1455-1625; 1640-1715 (flush)
- f. Acres Treated: 1,320
- g. Project Coordinator/s (Name/Rank, Title, Phone #): TSGT (b) (6) DSN (b) (6)
- h. Date Spray Map Last Approved: 11 May 2009
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 11 May, 2009; 319<sup>th</sup> CES Conference Room, TSGT (b) (6) , Lt Col (b) (6) , LTC (b) (6) , MAJ (b) (6)

**2. OPERATIONAL:**

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMP/Entomologist (Category 11): MAJ (b) (6) (safety briefer)
- c. Aircrew:
  - Pilots: LTC (b) (6) , Maj (b) (6) , MAJ (b) (6)
  - Navigators: LTC (b) (6)
  - Flight Engineers: Msg (b) (6)
  - Spray Operators: Msg (b) (6) , SMS (b) (6) , MSG (b) (6)
- d. Maintenance:
  - Spray Maintenance: Tsg (b) (6) , Tsg (b) (6) Tsg (b) (6) , A1C (b) (6)
  - Crew Chief(s): SrA (b) (6), SrA (b) (6)
  - Avionics: MSG (b) (6)
- e. Flying Data:
  - (1) Spray Sorties/Hours: 4/4.0
  - (2) Ferry Sorties/Hours: 2/6.0

**3. PESTICIDES:**

- a. Trade Name (% Active Ingredient): Altosid Liquid Larvicide Concentrate (20% methoprene)
- b. EPA Registration Number: Altosid Liquid Larvicide Concentrate 272446
- c. Gallons Pesticide Loaded: 8.0 Gal Altosid<sup>®</sup> (14 May)
- d. Pesticide Applied: 8.0 Gal Altosid<sup>®</sup> (14 May)
- e. Diluent: 2640 gallons water and 400 gallons of water rinse and flush
- f. Other Additives Used: AirexDC<sup>®</sup> drift reduction agent (1.28 oz/acre; 15 gal total)
- g. Application Rate: 0.75 oz/acre Altosid<sup>®</sup>

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 9106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: Raindrop nozzles
- e. Nozzle Orientation & Number Used: 12 straight back
- f. Pressure (PSI): 35-65
- g. Flow Rate: 187-189 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 200' LV
- b. Spray Off Set: none
- c. Spray Release Altitude: 100'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 340°/6 kts
- b. Temperature (Degrees Fahrenheit): 40-55°
- c. Relative Humidity: 88%
- d. Cloud Cover: 100%
- e. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Prior to the 14 May application, monitoring was conducted by Grand Forks AFB (GFAFB) Public Health personnel along the ditches to the west of the horse barns, and the ditches near the golf course and alert pad. Larval density averaged between 3-4 per dip depending on location, and all appeared to be 1<sup>st</sup> instar larvae. With expectation of much warmer and wetter weather in the future, this application was probably very timely.
- b. Effectiveness:
  - (1) Technique/s Used: Larval dip samples
  - (2) Results: Altosid is an insect growth regulator which acts by inducing morphological changes which interfere with normal development. These effects, not immediately apparent, result in the failure of adult mosquitoes to emerge from pupae. Thus, post application sampling is critical to determining efficacy. Grand Forks AFB Public Health and Pest Management personnel will continue to sample mosquito populations and report their findings.

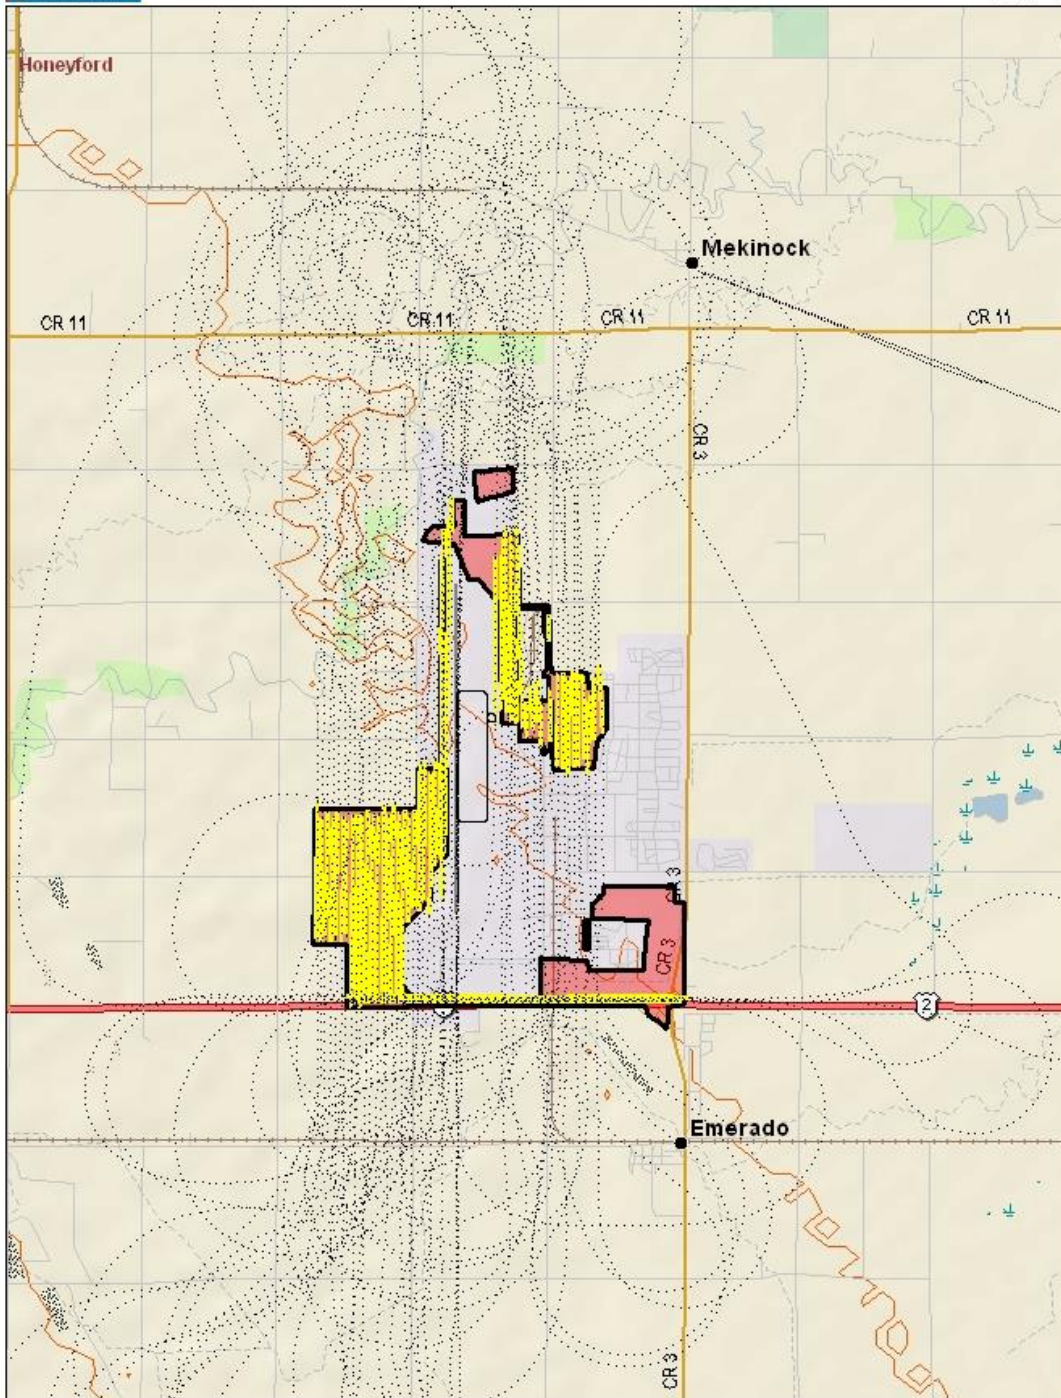

**8. REMARKS:** This is the seventh spray season at Grand Forks AFB. The spray block remains similar in size and shape to previous missions with the area west of the runway and ditches to the east and south of the runway as primary wet area. A propeller hydraulic leak cancelled operations on Tuesday (12 May), and high winds (30-45 kts) cancelled operations on Wednesday (13 May). Fortunately, excellent weather conditions prevailed on Thursday (14 May), and a majority of the prescribed area was sprayed in 3 lifts. We had excellent support from the GFAFB Fire Department, who delivered water upon request, and from TSGT (b) (6) of the Pest Management Shop. The next spray mission to Grand Forks AFB is scheduled for 29 June for adult mosquito control.

//Signed//

(b) (6), MAJ, USAFR  
Certified Pest Management Professional

3 October 2001

**MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497-0198)**

**FROM: 757 AS/DOS**

**SUBJECT: Capability and Concept of Operations for Aerial Spray of Weed  
Control at Mountain Home AFB, Saylor Creek Range ID (11-19 Oct 01)**

1. **Purpose of the Aerial Spray Mission:** This mission was requested and funded by 366 CES/CERF to perform an aerial spray application of Oust® at the Saylor Creek Range at Mountain Home AFB ID to inhibit annual re-growth of the undesirable cheatgrass, thus, allowing native vegetation to establish and be competitive to cheatgrass.
2. **Proposed Benefits of the Requested Mission:** To prevent fire hazards and to inhibit re-growth of the undesirable cheatgrass allowing native vegetation to establish and be competitive.
3. **Capability:** Spray Aircraft Tail Number 99108 Available 11-19 October 2001
4. **Concept of Operations: (All Times are Local Times)**  
**11 OCT (Thursday):**  
0900: Show at KYNG **PPR # 284-1**  
1100: Depart KYNG  
1500: Land KMUO/Safety Briefing, MX configures aircraft; plan next day's mission  
1600: In-briefing  
  
**12 OCT (Friday): Range Time 0800-1000, 1300-1700 (3 sorties if possible)**

Owyhee MOA: 392.2/266.35, Bruneau/Sheep Creek MOA: 251.875

**7. IN-BRIEFING:** Upon Arrival.

**8. SPRAY CONFIGURATION:**

- a. **System:** SP-3G
- b. **Nozzle Tips/Orientation:** Raindrop/Straight Back
- c. **Number:** Fuselage – 8 (4 each side)
- d. **Booms:** Fuselage
- e. **Aircraft:** 99108 **Mission Identifier:** QZNRKA062284
- f. **Profile:** Planned HV Profile

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 100' AGL
- b. **Swath Width.** 68 feet
- c. **Flow Rate.** 158 gal/min
- d. **Application Rate.** 5 gal/acre approximately 4,000 acres to be treated for cheatgrass
- e. **Ground Speed:** 200 Knots

**10. SPRAY MIXING AND LOADING:** On Bomb Loading Area

**11. SPRAY MONITORING OR TESTING:** Performed by the CPMPs

**NOTES:** Will use water sensitive cards.

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. Installation Sprayed: Mountain Home AFB, Saylor Creek Range, ID.
- b. Mission Duration: 11-19 OCT 01.
- c. Purpose of Application: Cheatgrass (Figure 1) control.
- d. Application Date(s) and time(s) (Local):
  - (1) 12 OCT: 0835-1010, 1245-1431, 1500-1627.
  - (2) 13 OCT: 0740-0914, 1110-1256.
  - (3) 14 OCT: 0740-0920, 1120-1227.
  - (4) 15 OCT: 0750-0905, 0950-1105.
  - (5) 16 OCT: 0800-0921.
  - (6) 18 OCT: 0805-0921, 1050-1148 (flush).
- e. Acres Treated: 3800
- f. Project Coordinator (Name/Rank/Title/Phone #): (b) (6) (b) (6) Natural Resource Manager (b) (6)
- g. Date Spray Map Last Approved: 11 OCT 01
- h. Installation In-Briefing: (When/Where/Briefer/s): 11 OCT 01, 1600, Mountain Home AFB, LtC (b) (6)

## 2. OPERATIONAL:

- a. Mission Commander: Maj (b) (6)
- b. Certified PMP/s (Category 11): LtC (b) (6) and (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: Maj (b) (6)
  - (2) Pilot(s): Maj (b) (6) and Maj (b) (6)
  - (3) Navigator: LtC (b) (6) LtC (b) (6) (11-13 OCT)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6) & MSG (b) (6)
- d. Spray Maintenance/Pesticide Loaders: SMS (b) (6), TSG (b) (6), SSG (b) (6), and SSG (b) (6)
- e. Crew Chief(s): MSG (b) (6) and TSG (b) (6)
- f. Avionics: TSG (b) (6)
- g. Flying Data:
  - (1) Spray Sorties/Hours: 12 sorties; 17.8 hours
  - (2) Ferry Sorties/Hours:
    - (a) Spray A/C 99108: 2 Ferries; 11.2 Hours
    - (b) Support A/C 99101: 2 Ferries; 11.2 Hours

## 3. PESTICIDE:

- a. Trade Name: Oust<sup>®</sup>
- b. EPA Registration Number: 352-401; EPA SLN #ID-000019
- c. Formulation Sprayed: Water dispersible granule
- d. Pounds Pesticide Loaded: 204
- e. Pounds Pesticide Applied: 204
- f. Gallons and Name Diluent Used: 22,975 gallons water
- g. Gallons and Name of Flush Used: 600 Gal of water & 2 Gal Remove<sup>®</sup>
- h. Other Additives Used: 5.5 Gal Control<sup>®</sup> and 2.75 Gal Prevent<sup>®</sup>.
- i. Application Rate: 5 Gal/Acre (0.75 Oz Oust<sup>®</sup>).

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99108)
- b. Spray System (Modules Used) and System ID #: SP-3G
- c. Spray System Configuration: Fuselage booms
- d. Nozzle Type: Raindrop nozzles with flow rate of 20 gallons per minute at 40 psi.
- e. Nozzle Orientation and Number Used: 10 (5 each side).
- f. Pressure: 40 psi.
- g. Flow Rate: 158 gallons per minute.

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 68 Ft
- b. Spray Offset: 136 Ft
- c. Spray Release Altitude: 100 Ft AGL
- d. Ground Speed: 200 knots

**6. WEATHER OBSERVATIONS:**

- a. Wind Direction:
  - (1) 218° on 12 OCT, switching to 270° for second and third sorties.
  - (2) 270° on 13 OCT.
  - (3) 225° on 14 OCT
  - (4) 118° on 15 OCT with unexpected wind shift to 60° at beginning of second sortie.
  - (5) 88° on 16 OCT.
  - (6) 240° on 18 OCT.
- b. Wind Speed (mph)
  - (1) 10 on 12 OCT decreasing to 5-7 by the end of the third sortie.
  - (2) 6-10 on 13 OCT.
  - (3) 5-8 on 14 OCT.
  - (4) 8-10 on 15 OCT with gusts up to 12 by the end of the second sortie.
  - (5) 8-10 on 16 OCT early in the morning, but up to 14 on the west side of the block when the sortie was flown.
  - (6) 6-10 on 18 OCT
- c. Temperature (F°): 34-45 (12 OCT); 41-56 (13 OCT); 48-70 (14 OCT); 46-58 (15 OCT); 38 (16 OCT); 31.5 (18 OCT)
- d. Relative Humidity (%): 41 (12 OCT); 34 (13 OCT); 25 (14 OCT) 17 (15 OCT) 56 (16 OCT) 44 (18 OCT)
- e. Cloud Cover(%): 90 (12 OCT); 75 (13 OCT); 25 (14 OCT); 10 (15 OCT); 60 (16 OCT); 10 (18 OCT)
- f. Source: Ground observation

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Visual observation.
  - (2) Results: See remarks
- b. Effectiveness:
  - (1) Technique/s Used: Vegetation measurements
  - (2) Results: Will be determined in the spring of 2002

**8. REMARKS:** Conditions for aerial spray were best during early morning hours (Figure 2). Only fuselage booms were used this year in order to eliminate small spray droplets from wing booms caught in wing-tip vortices that are more prone to wind drift. This resulted in a narrower effective swath and consequently, a lower flow rate. The application rate of Oust<sup>®</sup> was reduced this year from 1 ounce to 0.75 ounces per acre to reduce impact on Sandberg's bluegrass. An unexpected shift in wind direction while spraying on 14 October caused an overlap of spray coverage of approximately two swaths or 136 feet. The effect of wind on spray deposition on 16 October was compensated for by shutting off the spray a little earlier on the west end of the swath. Ground observations at the location indicated that the spray was depositing well. Very few if any gaps in coverage are anticipated.

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497-0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray of Musk Thistle Weed at Smoky Hill Air National Guard Range, Salina KS.

1. Purpose/Objective/Benefit: To control musk thistle weed at the Smoky Hill ANGR KS, to improve grazing areas, to eliminate the Range as a source of infestation to neighboring farms from wind-blown musk thistle seeds and to support state and local noxious weed control efforts.
2. Capability. Spray Aircraft Tail Number 99106 Available 12-16 November 2002
3. Concept of Operations:
  - a. 12 Nov 02 (Tuesday):
    - 1000 Show at KYNG
    - 1200 Take Off YARS
    - 1445 Land Salina Airport KS
  - b. 13 Nov 02 (Wednesday): Two spray sorties
    - 0700 Take-Off
    - 0703-1100 Range Time (CSAR Exercise 1100-1500)
  - c. 14 Nov 02 (Thursday): Two spray sorties
    - 0700 Take Off
    - 0704-1100 Range Time (CSAR Exercise 1100-1500)
  - d. 15 Nov 02 (Friday): One or two spray sorties
    - 0700 Take-Off
    - 0705-1100 Range Time (CSAR Exercise 1100-1500)
  - e. 16 Nov 02 (Saturday):
    - 0730 Show Time
    - 0900 Take-Off
    - 1345 Land KYNG
4. Spray Parameters:

- a. Acreage: 4,608 Acres (approximately) (Only areas determined by PMP)
  - b. Altitude: 100' AGL
  - c. Ground Speed: 200 Knots
  - d. Swath Width: 330 Feet
  - e. Pesticide: Tordon® 22K
  - f. Flow Rate: 307 Gallon/Minute
  - g. Application Rate: 2 Gal spray/Acre (water with 1 Oz Control® & 10 Oz Tordon® 22K)
  - h. Deploy: 3.4 Hrs
  - i. Re-Deploy: 2.8 Hrs
  - j. Spray Time: 10 Hrs (or as called by PMP)
5. Mission Commander: Lt (b) (6)
6. Certified Pest Management Professional(s): LtC (b) (6) and LtC (b) (6)
7. Support required at Smoky Hill ANGR KS has been coordinated with MSG (b) (6),  
Smoky Hill ANGR Spray Coordinator, DSN (b) (6) and Lt Col (b) (6), Range  
Commander, DSN (b) (6).
8. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616 or DSN 346-1161,  
ATTN: 757 AS/DOS.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Avon Park, FL

1. Purpose/Objectives/Benefits: Perform proficiency and continuation training for aerial spray aircrew and ground crew. Concurrently, a flight will proceed to Jacksonville NAS to attend part of the DOD Tri-services Pest Management Board annual meeting where a 757 AS entomologists will lecture about the Air Force spray mission. The crew may open the aircraft and allow the other DOD members of the class to view our system.
2. Capability: Spray Aircraft Available, 12-16 February 2007
3. Concept of Operations:
  - 12 FEB (Monday): PPR # - Not Req
    - 0900: Show Time KYNG
    - 1100: Depart KYNG
    - 1400: Land KAGR
  - 13 (Tuesday): Range Times 0900-1200, call AGR Tower & Fire Dept
    - 0830: Show Time
    - 1000: Depart AGR for training and fly to Jacksonville NAS
    - 1200: Arrive KNIP
    - 1600 Depart KNIP
    - 1645 Arrive KAGR
  - 14-15 Feb
    - 0800: Show Time
    - 0900: Depart
    - 1200: Land
  - 16 FEB (Friday)
    - 0800 Show time
    - 1000 Depart KAGR
    - 1300 Arrive KYNG
4. Spray Configuration:
  - a. MASS – SP2G
  - a. Aircraft Number: 90-9107
  - b. Mission Identifier: QZNRKA462043
5. Support required at Avon Park Bombing Range is thru the Range Manager.
6. If you have any questions concerning this mission please contact Maj (b) (6) at DSN (b) (6)  
(b) (6) I will be TDY from 7 Jan until 3 Mar.

## **AVON PARK, FL**

### **12-16 FEB 2007**

**PURPOSE/OBJECTIVE/BENEFIT:** Static display for DOD Tri-services Pest Management Board at Jacksonville NAS on 13 Feb 07. Aircrew and Spray Maintenance will be conducting flight and ground training. Mission commander/AC will determine the priority and plan of training.

#### **1. 910 AW PARTICIPANTS:**

- a. **Aircrew:**
  - 1. Pilots: M/C-LTC (b) (6) , Capt(b) (6)
  - 2. Navigators: LTC (b) (6) , Maj (b) (6) ,
  - 3. Flight Engineers: MSgt (b) (6)
  - 4. Spray Operators: MSgt (b) (6) MSgt (b) (6)(b) (6) , SSgt (b) (6)
- b. **Maintenance:**
  - 1. Spray Maintenance: MSgt (b) (6) , TSgt (b) (6) TSgt(b) (6)
  - 2. Avionics: None
  - 3. Crew Chiefs: TSgt (b) (6) TSgt (b) (6)
- c. **Entomologists:** None
- d. **Admin Support:** None

#### **2. SCHEDULE: (All time Local) All times and sequence of events are subject to change depending upon the needs of the testing and training.**

12 Feb (Monday):

0900: Show Time KYNG  
1100: Depart KYNG  
1400: Land KAGR

13 Feb (Tuesday): Range Times 0900-1200, call AGR Tower & Fire Dept

0830: Show Time  
1000: Depart AGR for training and fly to Jacksonville NAS to attend DOD Tri  
Services Pest Management Meeting and open aircraft for viewing of the system  
1200: Arrive KNIP **PPR # - 21301**  
1600: Depart KNIP  
1645: Arrive KAGR

14-15 Feb (Wednesday-Thursday) Range Times 0900-1200

0730: Show Time  
0900: Depart KAGR  
1200: Land KAGR

16 Feb (Friday) Range Times 0900-1200

0830: Show time  
1000: Depart KAGR  
1300: Arrive KYNG

#### **3. ITEMS TO TAKE:**

- a. **Navigator:** Avon Park Range Maps

**4. AIR TO GROUND FREQUENCIES:**

- a. **Spray: Primary 392.2;** Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s) Hrs 0700-2300 M-F, S-S per flying schedule **DSN 968-7138**
- e. MacDill: TWR-123.7; GND-118.575; ATIS-133.825; CMD POST-311.0; PTD-372.2

**5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 99106
- c. Mission Identifier: QZNRKA462043

**6. MISSION PROTOCOLS:**

- a. Training Requirements: Loadmaster ULV water spray training, pilot proficiency and navigator initial training

**7. CONTACTS:**

- a. Quarters: (JTR Lodging/\$92)
  - **Quality Inn (863) 385-4500 (\$71 w/Tax Exempt Form) FAX (863) 382-4793**

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Minot AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Minot AFB ND and the city of Minot and surrounding areas. Operations will consist of Adulticide applications.

**2. Capability:** Spray Aircraft 89-9105 available 12-16 JUN 06

**3. Concept of Operations:**

**12 Jun (Monday)**

1100: Show at KYNG  
1300: Depart KYNG  
1500: Land KMIB/Safety Briefing  
1600: Spray In Brief (CPMP, MC, AC)

**13 Jun(Tuesday):**

1730: Show time  
1800 Load Chemical  
1930: Take off KMIB (Spray Sortie)  
2146: Sunset

**14 Jun (Wednesday):**

1730: Show time  
1800 Load Chemical  
1930: Take off KMIB (Spray Sortie)  
2147: Sunset

**15 Jun (Thursday):**

1730: Show time  
1800 Load Chemical  
1930: Take off KMIB (Spray Sortie)  
2147: Sunset

**16 Jun (Friday):**

1130: Show time  
1330: Take off KMIB  
1730: Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 150' AGL for Adulticide swaths
- b. **Swath Width.** 1000 feet for ULV or as determined by the CPMP
- c. **Flow Rate.** 4.36 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 20,000 acres

**5. Mission Commander:** Maj (b) (6)

// Signed //

(b) (6), Maj, USAFR  
AERIAL SPRAY CHIEF

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MINOT AFB, ND

### 12-16 June 2006

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Minot AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: CPT (b) (6) (b) (6) CPT (b) (6) (b) (6) COL (b) (6)
- (3) Navigators: LTC (b) (6) (b) (6) LTC (b) (6) (b) (6)
- (3) Flight Engineers: MSG (b) (6) (b) (6)
- (4) Spray Operators: MSG (b) (6) (b) (6) MSG (b) (6) (b) (6) SRA (b) (6) (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) (b) (6) TSG (b) (6) (b) (6) TSG (b) (6) (b) (6)
- (2) Crew Chief(s): MSG (b) (6) (b) (6) SRA (b) (6) (b) (6)
- (3) Avionics: TSG (b) (6) (b) (6)

##### c. Entomologist: Maj (b) (6) (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 12 Jun (Monday)

PPR: OM163001

- 1100: Show at KYNG
- 1300: Depart KYNG
- 1500: Land KMIB/Safety Briefing
- 1600: Spray In Brief (CPMP, MC, AC)

##### 13 Jun (Tuesday):

- 1730: Show time
- 1800 Load Chemical
- 1930: Take off KMIB for area review (Adulticide Spray Sortie will begin @ 2000 hrs)
- 2141: Sunset

**NOTE: We will determine on Monday evening if we will be making a larvicide application on Tues. morning. See MC and CPMP for info.**

##### 14 Jun (Wednesday):

- 1730: Show time
- 1800 Load Chemical
- 2000: Take off KMIB (Adulticide Spray Sortie)
- 2142: Sunset

##### 15 Jun (Thursday):

- 1730: Show time
- 1800 Load Chemical
- 2000: Take off KMIB (Adulticide Spray Sortie)
- 2143: Sunset

##### 16 Jun (Friday):

- 1130: Show time
- 1330 Depart KMIB
- 1800 Land YNG

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, Compass, Pest Safety Binder, 1 UHF Radio, 1 VHF radio Project Notebook
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

#### 4. PPR: OM163001

#### 5. RADIO FREQUENCIES: Air To Ground Primary UHF 392.2; VHF 123.45

Minot AFB Tower 120.65 V, 236.6, 253.5; Minot International 118.2 V or Unicom 122.95

## 6. CONFIGURATION: SP2G

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down
- c. **Number:** ULV: 8 8005s total (4 each side) for 1000' swaths and 16 8005's (8 each side) for 2000' swaths
- e. **Aircraft:** 89-9105
- f. **Mission Identifier:** QZNRKA569163

## 7. SPRAY PARAMETERS:

### a. Adulticide

- (1) **Area to be treated:** 14,000 acres
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 1000 feet for AFB; 2000' City of Minot or as determined by the PMP
- (4) **Flow Rate.** 3.27 gallons/minute for 1000' swaths; 6.5 gal/min for 2000' swaths
- (5) **Application Rate.** 0.90 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots (338 Feet/Second)
- (7) **Flush:** With water, triple rinse, then air purge

### b. Larvicide

- (1) **Area to be treated:** approx. 300
- (2) **Altitude:** 100' for Larvicide application
- (3) **Swath Width.** 200 feet
- (4) **Flow Rate.** 186 gallons/minute
- (5) **Application Rate.** 2 gallons/acre (water with 4 oz of Vectobac)
- (6) **Nozzles:** Raindrop nozzles straight back; fuselage only, 14 total (7 each side)

8. **SPRAY MIXING AND LOADING:** Amount of Trumpet will be determined on site but at least 90 gallons will be loaded. When working with Vectobac be sure to continue to re-circulate whenever possible once the active ingredient has been added.

9. **TRANSPORTATION:** 4 six packs, 2 Ops, 2 Mx

10. **LODGING:** International Inn Hotel, Com 701-852-3161, MC will pick up non A slips at the hotel, billeting is faxing them. Go South on Hwy 83 from the base. It will be on the right hand side about a ¼ mile south of the airport.

## 11. CONTACTS:

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft available 12-16 May 2008

**3. Concept of Operations:**

**12 May (Monday)**

0900: Showtime  
1100: Depart KYNG  
1300: Land KGFK/Safety Briefing  
1430: Spray In Brief (CPMP, MC, AC).

**13 May (Tuesday):**

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0552: Sunrise

**14 May (Wednesday):**

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0550: Sunrise

**15 May (Thursday):**

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0549: Sunrise

**16 May (Friday):**

0800: Show time  
1000: Take off KGFK  
1400: Land KYNG

**4. Spray Parameters:**

- a. Altitude:** 100' AGL for Larvicide swath when no trees are present.
- b. Swath Width.** 200 feet for LV or as determined by the CPMP
- c. Flow Rate.** 1.86 gallons/minute LV
- d. Application Rate.** 0.75 oz/acre Altosid<sup>®</sup>)
- e. Ground Speed:** 200 Knots
- f. Proposed spray area:** Approximately 1,800 acres

**5. Aircraft Commander:** CAPT (b) (6)

6. Support at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator.

7. HQ AFRC/DOOM approval via email.

**910 AW AERIAL SPRAY**  
**GRAND FORKS AFB, ND 14-18 May 2007**  
**PMP'S POST-MISSION REPORT**

**1. MISSION BASICS:**

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 14-18 May 2007
- c. Purpose of Application: Control nuisance and vector mosquitoes (larval stages)
- d. Application Date/s: 15, 16, and 17 May, 2006
- e. Time/s of Application (Local): 0755-0825; 1000-1045 (15 May); 0550-0640; 1500-1615 (16 May); 0550-0700; 0810-0920; 0950-1020 (flush) (17 May)
- f. Acres Treated: 1,800
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) , Environmental Officer, DSN<sup>(b)</sup> (b) (6) SSGT (b) (6) , (b) (6)
- h. Date Spray Map Last Approved: 14 May 2007
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 14 May, 2006; 319<sup>th</sup> CES Conference Room; Lt (b) (6) , Ms. (b) (6) , Lt Col (b) (6) , Maj (b) (6)

**2. OPERATIONAL:**

- a. Mission Commander: Lt Col (b) (6)
- b. Certified PMP/Entomologist (Category 11): Maj (b) (6) (safety briefer)
- c. Aircrew:
  - Pilots: Maj (b) (6) , Maj (b) (6)
  - Navigators: Maj (b) (6)
  - Flight Engineers: Msg (b) (6) , TSgt (b) (6)
  - Spray Operators: Msg (b) (6) , Msg (b) (6)
- d. Maintenance:
  - Spray Maintenance: Tsg (b) (6) , Tsg (b) (6) , Tsg (b) (6)
  - Crew Chief(s): Msg (b) (6) , SrA (b) (6)
  - Avionics: (b) (6)
- e. Flying Data:
  - (1) Spray Sorties/Hours: 6/6.1
  - (2) Ferry Sorties/Hours: 2/6.3

**3. PESTICIDES:**

- a. Trade Name (% Active Ingredient): Altosid Liquid Larvicide Concentrate (20% methoprene)
- b. EPA Registration Number: Altosid Liquid Larvicide Concentrate 272446
- c. Gallons Pesticide Loaded: 2.6 Gal Altosid<sup>®</sup> (15 May); 2.6 Gal Altosid<sup>®</sup> (16 May); 5.2 Gal Altosid<sup>®</sup> (17 May)
- d. Pesticide Applied: 2.6 Gal Altosid<sup>®</sup> (15 May); 2.6 Gal Altosid<sup>®</sup> (16 May); 5.2 Gal Altosid<sup>®</sup> (17 May); total of 10.5 gallons Altosid<sup>®</sup>
- e. Diluent: 3,600 gallons water and 600 gallons of water flush
- f. Other Additives Used: AirexDC<sup>®</sup> drift reduction agent (1.28 oz/acre; 20 gal total)
- g. Application Rate: 0.75 oz/acre Altosid<sup>®</sup>

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 9107 (14-16 May); 9105 (16-18 May)
- b. Spray System (Modules Used) and System ID #: 2 (15 May); 6 (16-17 May)
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: Raindrop nozzles
- e. Nozzle Orientation & Number Used: 12 straight back
- f. Pressure (PSI): 35-65 (15 May); 35-65 (16 May) & 41-65 (17 May)
- g. Flow Rate: 187-189 gpm (15-17 May)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 200' LV
- b. Spray Off Set: 200' (15 May); none (16-17 May)
- c. Spray Release Altitude: 100'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 330°/20kts (15 May); 330° (16 May); 190°/15kts (17 May)  
(1) Ground: 4 knots (15 May); 10 knots (16 May); 12 knots (17 May)
- b. Temperature (Degrees Fahrenheit): 40-59° (15-17 May)
- c. Relative Humidity: 94-37% (15-17 May) during applications
- d. Cloud Cover: Partly Cloudy (15 May); clear (16-17 May)
- e. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Prior to the 15-17 May application, monitoring was conducted by Grand Forks AFB (GFAFB) Public Health personnel along the ditches to the west of the horse barns, the ditches to the north of the smokehouse, and the area west of the alert pad by the perimeter road. Larval density averaged between 6-35 larvae per dip depending on location. It appeared that some pupation had already occurred prior to the larvicide application and, subsequently, the base will likely be experiencing significant adult mosquito activity soon, as the insecticide is not effective against pupae.
- b. Effectiveness:
  - (1) Technique/s Used: Larval dip samples
  - (2) Results: Altosid is an insect growth regulator which acts by inducing morphological changes which interfere with normal development. These effects, not immediately apparent, result in the failure of adult mosquitoes to emerge from pupae. Thus, post application sampling is critical to determining efficacy. Grand Forks AFB Public Health personnel will continue to sample mosquito populations and report their findings.

**8. REMARKS:** This is the sixth spray season at Grand Forks AFB. The spray block remains similar in size and shape to previous missions with the area west of the runway and ditches to the east and south of the runway as primary wet area. A computer failure on the MASS #2 occurred during the application on 15 May which made it impossible to determine the flow rate and spray had to be stopped. The 910th was able to replace the #2 MASS with #6 by swapping out with an aircraft from Youngstown on the morning of 16 May. Excellent weather conditions then allowed for quick coverage over the remaining spray block. We had excellent support from the GFAFB Fire Department who delivered water upon request. The next spray mission to Grand Forks AFB is scheduled for 25-29 June for adult mosquito or larval control.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 12-16 May 2008

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes and thereby improving working conditions and lower mosquito-borne illness for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: LTC (b) (6), LTC (b) (6), LTC (b) (6),
- 2) Navigators: LTC (b) (6), Capt (b) (6)
- 3) Flight Engineers: MSGT (b) (6), TSGT (b) (6), Msgt (b) (6)
- 4) Spray Operators: MSGT (b) (6), MSGT (b) (6), Tsgt (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: Tsgt (b) (6), TSG (b) (6), Ssgt (b) (6), Tsgt (b) (6)
- 2) Crew Chief(s): Msg (b) (6), A1C (b) (6)
- 3) Avionics: Msgt (b) (6)

##### c. Entomologist: LTC (b) (6)

#### 2. SCHEDULE: (All Local Times) PPR: 05-16-01/ES

##### 12 May (Monday)

0900: Showtime  
1100: Depart KYNG  
1300: Land KGFK/Safety Briefing  
1430: Spray In Brief (CPMP, MC, AC).

##### 13 May (Tuesday):

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0552: Sunrise

##### 14 May (Wednesday):

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0550: Sunrise

##### 15 May (Thursday):

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0549: Sunrise

##### 16 May (Friday):

0800: Show time  
1000: Take off KGFK  
1400: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cell Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 UHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment

**4. PPR: 05-16-01/ES**

**5. RADIO FREQUENCIES: Air To Ground Primary** VHF 123.45; secondary UHF 392.2;  
KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

**a. System:** 2-Module System/ Fuselage Booms

**b. Nozzle Tips/Orientation:**

Larvicide: Raindrop nozzles straight back

**c. Number:**

Larvicide: fuselage only, 12 total (6 each side) straight back

**d. Booms:** Fuselage

**e. Aircraft:** 899107

**f. Mission Identifier:** QZNRKA454133

**7. SPRAY PARAMETERS:**

**a. Larvicide**

(1) **Area to be treated:** approx. 1,608 acres

(2) **Altitude:** 100' for Larvicide application

(3) **Swath Width.** 200 feet

(4) **Flow Rate.** 186 gallons/minute

**b. Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)

**c. Ground Speed:** 200 Knots

**8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)**

**a. Composition of each Gallon:**

(1) 0.375 ounces of Altosid® 20

(2) 0.64 ounces of AirexDC™ drift retardant

(3) Water

**b. Typical load:** (2 tanks of 450 gallons each)

(1) Fill with 450 gallons of water/tank. Total water in tanks = 900 gal.

(2) Total water added = 900 gallons

(3) Add 1.33 (1 1/3) gallons of Altosid® per tank (2 2/3 gallons total).

(4) 2.5 gal AirexDC per tank (5 Gal total) while agitating approximately 15 min

(5) Total quantity mix. 908 gallons

**c. Final Load for complete flush**

(1) Fill tanks with the amount of water necessary for a proper system flush

**d. Mixing Instructions:**

SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

**9. TRANSPORTATION 2 cars and 2 vans provided by 319 CES, Transportation (bus) will be provided to the In-Brief , vehicles will be picked up there.**

**2-Aircrew**

**1-Spray MX**

**1-Crew Chiefs & Specialists**

**10. LODGING: On Base Billeting:** DSN 362-3070/6189 or (701) 594-8431, FAX 362-3069

-- Prime Knight DSN 362-3844 or (701) 747-3844

Rooms Reserved by the Pest Management at RDR

## 11. CONTACTS:

### a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205

- (1) **Base Operations:** Airfield Manager DSN 362-4409  
-- DSN 362-xxxx or (701) 747-xxxx
- (2) **Environmental Officer:** (b) (6), DSN (b) (6), FAX 6155
- (3) **Base Civil Engineer:** Lt (b) (6)
- (4) **Pest Management:** (b) (6) or (b) (6), DSN (b) (6), FAX 3432
- (5) **Public Affairs:** DSN 362-5608/5023 (off duty CP ext 6711)
- (6) **Weather:** DSN 362-4396
- (6) **Billeting:** DSN 362-3070/6189/7200 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844
- (7) **Transportation:** DSN 362-3976

# AERIAL SPRAY OPERATIONAL SCHEDULE

## SMOKY HILL ANG RANGE, KS

### 12-16 NOV 2002

**PURPOSE/OBJECTIVE/BENEFIT:** to control musk thistle at the Smoky Hill ANGR, to improve grazing areas, to eliminate the Range as a source of infestation to neighboring farms from wind-blown musk thistle seeds and to support state and local noxious weed control efforts.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: \*\*Lt Col (b) (6)
- (2) Pilots: Lt Col (b) (6)      Maj (b) (6)      Lt (b) (6)
- (3) Navigators: Maj (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: \*\*MSG(b) (6)      , TSG (b) (6)

##### b. Maintenance:

- (1) Spray MX: \*TSG (b) (6)      , TSG (b) (6)      , TSG (b) (6)      , SSG (b) (6)
- (2) Crew Chiefs: \*\*TSG (b) (6)      lor, TSG (b) (6)
- (3) Avionics: \*\*MSG (b) (6)
- (4) AGE: TSG (b) (6)

##### c. Ground Support/CPM Professionals: (11-16 Nov) LTC (b) (6)      , LTC (b) (6)

##### d. Security Police: \*\*MSG (b) (6)      , \*\*TSG (b) (6)      , TSG (b) (6)      , SSG (b) (6)

\* = 1 Van/\$79 day: TSG (b) (6)      1 Van 12-13 Nov/Maj (b) (6)      ;      1 Van 15-16 Nov/Unk

\*\* = 7 Full Size/\$49 day :,

Mid-Size/\$47 day

#### 2. SCHEDULE: (All Local) Times

##### 12 NOV (Tuesday)

1000: Show at KYNG

1200: Depart KYNG

1445: Land KSLN/Safety Briefing

A/R: Maintenance configures aircraft; Aircrew plan next day's mission

##### 13 NOV (Wednesday): 2 Spray Sorties

0530: Show time

0711: Sunrise

0700: Take Off KSLN

0703-1100: Range time (Coordinate MARSA as needed after 1100)

0900: Land KSLN

##### 14 NOV (Thursday): 2 Spray Sorties

0530: Show time

0712: Sunrise

0700: Take Off KSLN

0704-1100: Range time (Coordinate MARSA as needed after 1100)

0900: Land KSLN

##### 15 NOV (Friday): 1 or 2 Spray Sorties

0530: Show time

0713: Sunrise

0700: Take Off KSLN

0705-1100: Range time (Coordinate MARSA as needed after 1100)

0900: Land KSLN

##### 16 NOV (Saturday):

0708: Sunrise

0730: Show time  
0900: Take Off KSLN  
1345: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phone, Wind Gauge, 2 Compasses, 1 UHF Radio, Kodak Camera, Pest Safety Binder, 2 Signal Mirrors, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries
- c. **Navigator:** Maps/Map Bag, Validation Map, 1 Panasonic Computer
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Stake Bed Truck, Support Equipment, Control®

### 4. NOTIFICATION NECESSARY FOR THIS MISSION: None Required.

### 5. PARKING PLAN: Highway Patrol Ramp (by the Civil Air Patrol Hangar).

### 6. RADIO FREQUENCIES:

- a. **Air To Ground:** Primary 392.2
- b. **Salina:** CTAF: 119.3, UNICOM: 122.95, ATIS: 120.15, TWR: 119.3 / 257.7, GND: 121.9 / 397.9, NG OPS: 49.95 / 304.6
- c. **Smoky Hill:** Primary 316.9, Secondary 304.9; Victor Freq: 139.7

### 7. IN-BRIEFING: Upon Arrival.

### 8. SPRAY CONFIGURATION:

- a. **System:** SP-3G
- b. **Nozzle Tips/Orientation:** 8070 Flat Fan TeeJet/90° straight back
- c. **Number:** Wing. 68 Total (34 each side)/Fuselage. 16 Total (8 each side) with 3" restrictor
- d. **Booms:** Full Wing and Fuselage Booms
- e. **Aircraft:** 106 **Mission Identifier:** QZNRKA115316
- f. **Profile:** Planned LV Profile

### 9. SPRAY PARAMETERS:

- a. **Altitude:** 100' AGL
- b. **Swath Width.** 330 feet.
- c. **Flow Rate.** 307 Gallons/Minute (approximately 4,608 acres to be sprayed)
- d. **Application Rate.** 2 Gal spray/Acre (water with 1 Oz of Control® & 10 Oz of Tordon®)
- e. **Ground Speed:** 200 Knots

### 10. SPRAY MIXING AND LOADING:

- a. **Composition of Each Gallon:**
  - (1) 5 Ounces of Tordon® 22K
  - (2) 0.08 Ounces of Control® Drift Retardant
  - (3) Water
- b. **First Load (4 Tanks of 443.3 Gallons Each + Sump of 70 Gallons)**
  - (1) Fill to 425.05 Gal/ Water/Tank using the pump on the water tanker truck.  
This is done by putting the filler hose into the rear tank with all tanks open to the common sump.  
Total water in tanks = 1700.2 Gal.
  - (2) 70 Gal/Water in Sump

- (3) Total Water Added = 1,770.2 Gallons
- (4) Upload 18 Gal/Tordon® 22K/Tank (72 Gallons Total for 4 Tanks) with the ULV uploading system.
- (5) Add 1 Qt/ Control®/Tank while agitating approximately 15 min  
(1 Gallon total for four tanks)
- (6) Total Quantity Mix. 1843.2 Gallons
- c. Subsequent Loads (4)
  - (1) Fill to 442.55 Gal/Water/Tank. Total Water = 1770.2 Gal
  - (2) Add 18 Gal/Tordon 22K/Tank. Total Tordon 22K = 72 Gal
  - (3) Add 1 Qt/ Control/Tank. Total Control = 1 Gal
  - (4) Total quantity Mix. 1,843.2 Gallons (does not include 70 Gal already mixed in Sump)
- d. Mixing Time/Load. Agitate by recirculating each mix for approximately 15 minutes.

## 11. SPRAY MONITORING OR TESTING: Performed by the CPMPs

### NOTES:

Ideal to have westerly wind to spray west boundary.

Ideal to have easterly wind to spray east boundary.

(November winds expected to be predominately from the north)

## 12. CONTACTS:

- a. **Quarters:** JTR Rate Lodging/\$55 Meals/\$28

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. **Installation Sprayed:** Smoky Hill ANGR, Salina KS
- b. **Mission Duration:** 12-16 Nov 02
- c. **Purpose of Application:** Management of Musk Thistle on ANGR.
- d. **Application Date/s:** 13, 14, 15 Nov 02  
**Time/s of Application (Zulu):** 1314-1500 (13 Nov); 1307-1430, 1635-1650 (14 Nov); 1500-1810, 1930-2140 (15 Nov)
- e. **Acres Treated:** 2300
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** MSG (b) (6), Aerial Spray Coordinator, Smoky Hill ANGR, DSN (b) (6) (b) (6) LTC (b) (6), LTC (b) (6)
- g. **Date Spray Map Last Approved:** 12 Nov 02
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 0830, 12 Nov 02; Smoky Hill ANGR; LTC (b) (6) (b) (6)

## 2. OPERATIONAL:

- a. **Mission Commander:** LTC (b) (6)
- b. **Certified PMP (Category 11):** LTC (b) (6), LTC (b) (6)
- c. **Aircrew:**
  - (1) Aircraft Commander: Pilot: LTC (b) (6)
  - (2) Co-Pilot: MAJ (b) (6)
  - (3) Navigator: MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6) TSG (b) (6)
- d. **Safety Briefer:** LTC (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** TSG (b) (6), TSG (b) (6), TSG (b) (6), SSG (b) (6)
- f. **Spray Ground Monitors:** LTC (b) (6), LTC (b) (6)
- g. **Crew Chief(s):** TSG (b) (6), TSG (b) (6)
- h. **Avionics:** TSG (b) (6)
- i. **AGE:** TSG (b) (6)
- j. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.8 13 NOV; 2/1.6 14 Nov; 2/5.3 15 Nov.
  - (2) Ferry Sorties/Hours:
    - (a) Spray A/C 99105 Ferry Sorties/Hours: 2/6.1
    - (b) Support A/C 99106 Ferry Sorties/Hours: 4/6.3 (12-13 Nov & 15-16 Nov)

## 3. PESTICIDE:

- a. **Trade Name (% Active Ingredient):** Tordon® 22K
- b. **EPA Registration Number:** 62719-6
- c. **Formulation Sprayed:** Tordon® 22K mixed with water and AirexDC®
- d. **Gallons Pesticide Loaded:** 4600 gal of Tordon® 22K/AirexDC®/water loaded (179 gal Tordon® 22K; 35 gal AirexDC®)
- e. **Gallons Pesticide Applied:** 179 gallons
- f. **Gallons and Name Diluent Used:** 4,386 gallons of water
- g. **Gallons and Name of Flush Used:** 198 gallons of water & 2 gallons Remove®
- h. **Other Additives Used:** None
- i. **Application Rate:** 2 gallons spray/acre (water with 2 oz. AirexDC® & 10 oz. of Tordon®)

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** 909105
- b. **Spray System (Modules Used) and System ID #:** 3-Module system
- c. **Spray System Configuration:** Full Wing and Fuselage Booms
- d. **Nozzle Type/Size:** 8070 Flat Fan TeeJet®
- e. **Nozzle Orientation & Number Used:** 68; Wing: 34 each side;  
Fuselage: 16 (8 each side) with 3" Restrictor
- f. **Pressure:** 40 PSI
- g. **Flow Rate:** 280 GPM

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 300'
- b. **Spray Off Set:** 990' 13 Nov, 660' 14 Nov; 660, 15 Nov
- c. **Spray Release Altitude:** 100' 13 Nov; 150' dropping to 100' on 14 Nov as wind speed picked up;  
150' first sortie dropping to 100' for second sortie with higher wind speed 15 Nov.
- d. **Ground Speed:** 200 Knots

**6. WEATHER OBSERVATIONS:**

- a. **Winds (Direction/Speed):**  
Ground: 230/4-16 mph 13 Nov; 330 switching to 10/6-10 mph 14 Nov; 20/5-10 mph 15 Nov.
- b. **Temperature Range During Application (°F):** 40-55 13 Nov; 48 14 Nov; 35-47 15 Nov
- c. **Cloud Cover:** 0% 13 Nov, 100% 14 Nov; 50% 15 Nov
- d. **Humidity:** 53% 13 Nov, 98% 14 Nov; 68%-55% 15 Nov
- e. **Source:** Ground observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Pattern:**
  - (1) Technique/s Used: Ground Observation
  - (2) Results: Spray off-set determined each day
- b. **Effectiveness:**
  - (1) Technique/s Used: Visual field observations
  - (2) Results: (See Remarks)

- 8. REMARKS:** Results will be determined during the next growing season in the Spring of 2003 for musk thistle.

  - (3) Avionics: SSGT (b) (6) SSGT (b) (6)
  - (4) Engine/Propulsion: TSgt (b) (6)
  - (5) Hydraulics/Electrician: MSgt (b) (6) TSgt (b) (6)
  - (6) ARMS: SRA (b) (6)
- c. **Entomologists:** LTC (b) (6) application supervision, Cat 11 (UTTR), MAJ Mark Breidenbaugh, pesticide mixing and loading Cat 11, safety briefer (Hill AFB)
- d. **Ground Support:** SMSgt (b) (6) (UTTR), TSgt (b) (6) (Hill AFB).
- e. **Flying Data:**
  - (1) 4 Spray Sorties on 14 MAR – 2 105; 2 106.
  - (2) 4 Spray Sorties on 16 MAR – 2 105; 2 106.
  - (3) 4 Spray Sorties on 17 MAR – 2 105; 2 106.
  - (4) 2 Spray Sorties on 18 MAR – 1 105; 1 106.
  - (5) 1 Training Sortie on 19 MAR – 106.
  - (6) Ferry Sorties/Hours: 4/20.1
  - (7) Spray sorties/hours: 17/27.6

**3. PESTICIDE:**

- a. Trade Name: Krovar<sup>®</sup> IDF
- b. EPA Registration Number: 352-505
- c. Formulation Sprayed: 10 lbs Krovar<sup>®</sup> per 22.5 gallons formulation.
- d. Gallons Pesticide Mix Loaded: 24,640
- e. Gallons Pesticide Mix Applied: 24,640
- f. Formulation Used: 450 lbs Krovar<sup>®</sup>, 4.0 gal StaPut<sup>®</sup>, ½ gal Foam Fighter<sup>®</sup>, 200 ounces Hi-Light<sup>®</sup> Dye, remainder water per 1000 gal of spray mix.
- g. Gallons and Name of Flush Used: 900 gal water
- h. Other Additives Used: 102 gal StaPut<sup>®</sup>; 40.6 gal Hi-Light<sup>®</sup> dye; 12.7 gal No-foam
- i. Application Rate: 22.5 gal/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99105, 99106
- b. Spray System (Modules Used) and System ID #: 3 and 5.
- c. Spray System Configuration: 3-Module System/ UHV Fuselage Booms
- d. Nozzle Type/Size: UHV Fuselage
- e. Nozzle Orientation & Number Used: 2 oriented straight back.
- f. Pressure: 40 p.s.i.
- g. Flow Rate: 22.5 gallons per minute.

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 35'
- b. Spray Off-set: None
- c. Spray Release Altitude: 100' AGL
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) 14 MAR – beginning 300° at 9 knots; ending 290° at 8 knots
  - (2) 16 MAR – beginning calm; ending 20° at 11 knots with gusts to 16 knots.
  - (3) 17 MAR – beginning light & variable; ending 310° at 6 knots.
  - (4) 18 MAR – beginning 170° at 7 knots; ending 160° at 9 knots.
- b. Temperature (Degrees Fahrenheit):
  - (1) 14 MAR – 40° F - 46° F.
  - (2) 16 MAR – 27° F - 37° F.
  - (3) 17 MAR – 38° F.
  - (4) 18 MAR – 41° F
- c. Relative Humidity:
  - (1) 14 MAR – 42 % - 37 %.
  - (2) 16 MAR – 52 % - 43 %.
  - (3) 17 MAR – 42 %.
  - (4) 18 MAR – 36 %.
- d. Cloud Cover: Variable from 0 % to 100 % over the duration of the project; but mostly low cloud cover while spraying.
- e. Source: Ground observations at UTTR Target 21.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:

- (1) Technique Used: blue dye pattern on targets and observations from ground markers.
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Techniques Used: monitoring of weed emergence in spring.
  - (2) Results: will be determined this spring by range personnel.

8. **REMARKS:** No spraying was conducted on March 13 or March 15 due to poor weather. The spray for Target 24 was completed on March 16, 2008 and the spray for Target 21 was completed on March 18, 2008. The Aerial Spray Squadron used 24,640 gallons of pesticide mix for the spray (11,450 pounds of Krovar; active ingredients: 4,580 Bromacil and 4,580 lbs Diuron). Specific data is shown in Attachment 1. In October 2007, members from 75 CES and 757AS made herbicide applications on test plots located on the NORD LZ with unique herbicide formulations from different vendors. Results from these applications will be evaluated this spring and summer. Formulations that perform at equal or greater than Krovar will be considered for use during future missions depending on product cost and application schedule. Timing of applications will also be evaluated; specifically we will determine whether the spring or fall timeframe is more appropriate. Thus, the FY09 application may occur either in March or September based on these findings.

**Vienna OH 44473-5926**

**MEMORANDUM FOR HQ AFRC/DOOM**

15 FEB 08

**FROM:** 757 AS/DOS

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT  
Annual Weed Control Spray Mission on the Utah Test and Training Range (UTTR)

1. **Capability:** Two aircraft will be available 12-21 Mar 08 for the requested spray mission. The 910AW will provide mission support 12-13 & 20-21 Mar 08.

2. **Concept of Operations:**

**12 Mar (Wednesday)**

0800 Show at KYNG  
0815 Mission Brief  
1000 Spray01 Take off (Crew Per the flying schedule, not spray plan)  
1005 Spray02 Take off (Crew Per the flying schedule, not spray plan)  
1010 Support aircraft Take off  
1330, 1335, 1340 Arrive Hill AFB  
1400 Mission Commander/Safety/Flight operations/ and In-processing Briefings

**13-14 Mar (First Spray Sortie, Range Times (1500Z-2000Z))**

0600: Show time, aircrew 1 (Crew according to spray plan)  
0630: Show time, aircrew 2 (Crew according to spray plan)  
0743: Sunrise  
0800: Spray 01 Take off  
0830: Spray 02 Take off  
0800-1700: Spray 01 & 02 spray UTTR Targets as directed by the MC

**15-16 Mar- Weather back up only; Hill range closed unless needed due to delays**

**17-19 Mar (First Spray Sortie, Range Times (1500Z-2000Z))**

0600: Show time, aircrew 1 (Crew according to spray plan)  
0630: Show time, aircrew 2 (Crew according to spray plan)  
0735: Sunrise  
0800: Spray 01 Take off  
0830: Spray 02 Take off  
0800-1700: Spray 01 & 02 spray UTTR Targets as directed by the MC

**20 Mar : Finish spray areas/Weather Back-up/Flush, Clean Up;**

0600: Show time, aircrew Spray 1  
0630: Show time, aircrew Spray 2  
0732: Sunrise (see attach Sunrise/Sunset Chart in mission folders)  
0800: Spray 01 Take off  
0830: Spray 02 Take off

**\*\*Flush sorties, plan 2 sorties each pending spray mx approval on clean tanks**

**21 Mar (Thur) All aircrew and aircraft return to YNG**

0700: All Aircrew report  
0730: All Personnel report  
0900: Spray01 Takes off  
0905: Spray02 Takes off  
0910: Support airplane Takes off  
1600: Lands YNG

3. **Spray Parameters and Sequencing:**

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24 and Nord LZ)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

4. **Mission Commander:** Lt Col (b) (6)

5. **Aircraft Commanders:** Maj's (b) (6), Capt (b) (6)

6. **Support required at Hill AFB and the UTTR has been completed.**

(b) (6), Capt, USAFR  
Assistant Chief of Aerial Spray

# SPRAY OPERATIONAL SCHEDULE

## UTAH TEST AND TRAINING RANGE MISSION

### 12-21 MARCH 2008 CH3

12 Mar A/C #105, MI: QZNRKA753072 Report Time: 0800 Take Off: 1000 Arrive: 1330L

12 Mar A/C #106, MI: QZNRKA754072 Report Time: 0805 Take Off: 1005 Arrive: 1335L

12 Mar Supt A/C #103 QDNRKA755072 Report Time: 0810 Take Off: 1010 Arrive: 1340L

20 Mar Supt AC #??? QDNRKA756080 Report Time 0800 Take Off 1000 Arrive 1330

**PURPOSE/BENEFIT/OBJECTIVE:** Aerial spray herbicide mission controlling Halogeton on Targets 21, 24 at the Utah Test and Training Range(UTTR)aiding vegetation control for bombing mission test evaluations and unexploded ordinance recovery.

#### 1. AIRCREW 1: AC 106-In place CALL SIGN: SPRAY 06

a. **Pilots:** MAJ (b) (6) , Capt (b) (6) , Maj (b) (6)

b. **Navigators:** Maj (b) (6) , LTC (b) (6)

c. **Flight Engineers:** MSgt (b) (6)

d. **Spray Operators:** MSgt (b) (6) , Msgt(b) (6)

e. **Crew Chiefs:** Msgt (b) (6)

#### AIRCREW 2: AC 105-In place CALL SIGN: SPRAY 05

a. **Pilots:** Capt (b) (6) , 1Lt (b) (6) , Capt (b) (6) ,

b. **Navigator:** Maj (b) (6) ,

c. **Flight Engineer:** MSgt (b) (6)

d. **Spray Operators:** MSgt(b) (6) , Msgt (b) (6)

e. **Crew Chief:** Tsgt(b) (6)

Aircrew/Personnel to take Support aircraft: Msgt (b) (6) , Msgt (b) (6) Msgt (b) (6) , Msgt (b) (6) , Sra (b) (6) , Sra (b) (6)

Separate Arrival: LTC (b) (6) (Wed – Sat)

#### 2. MISSION SUPPORT:

a. **Mission Commander:** LTC (b) (6)

1. Makes final decision on all changes to the schedule

2. Confirm all hotel information is correct upon check in

3. Report flight data to AFRC daily (See contact info on reporting sheet)

b. **Entomologists:** Maj (b) (6) (In Place)

c. **ARMS:** SRA (b) (6)

#### 3. UTTR GROUND PARTY:

a. **Entomologist/Pest Management Professional(s):** \*LTC (b) (6) (Commercial air out)  
 , Smsgt Susan Kintz

#### 4. MAINTENANCE:

a. **910 MX Supervisor:** \*SMSgt(b) (6) - (In place 5 Mar 08); Msgt (b) (6)

b. **910 Spray MX:** \* TSgt (b) (6) - (In place 6 Mar 08), Tsgt (b) (6) , Tsgt (b) (6) ,  
(b) (6) , (b) (6) , (b) (6)

c. **Instruments/Avionics:** Ssgt Andrew Ford (in place 6 Mar 08), Ssgt (b) (6)

d. **Hydraulics/Electrician:** Msgt (b) (6) , Tsgt (b) (6)

e. **Engine/Propulsion:** Tsgt (b) (6)

5. **COMM:** MSgt (b) (6) , MSgt (b) (6) , Msgt (b) (6) , Tsgt (b) (6) , A1C (b) (6)

#### 6. IN-BRIEFING: (UTTR Staff)

a. **When/Time:** 12 Mar 2008 , 1400-1430

b. **Where:** Building 777

c. **Who:** EVERYONE!! Do Not leave Forestry area until cleared out by the MC.

**d. Briefing Plan**

- a. Billeting- See item **16.g** below
- b. Vehicles- See item **16.h** below
- c. Schedule of events
- d. Weather call
- e. Cellular Phone numbers for all personnel

**7. PLANNED SEQUENCE OF EVENTS:** Hill AFB Tower Control and Runway Hours 24/7

**NOTES:**

- 1. Scheduling reflects no weather or maintenance delays. In the event of weather or maintenance delays, the missions will be adjusted as required. **ALL TIMES SUBJECT TO ADJUSTMENT BY MISSION COMMANDER**
- 2. **DUTY DAY FOR CIVILIANS WILL BE AS REQUIRED WITHIN CREW REST CONSTRAINTS.**
- 3. Tower Control, Runway & Airfield hours 24/7
- 4. **UTTR RANGE TIMES: 1500-2000Z**
- 5. **ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS PRE-FLIGHT COMPLETE AND RELEASED BY THE MISSION COMMANDER.**

**12 Mar (Wednesday)**

0800 Show at KYNG  
0815 Mission Brief  
1000 Spray01 Take off (Crew Per the flying schedule, not spray plan)  
1005 Spray02 Take off (Crew Per the flying schedule, not spray plan)  
1010 Support aircraft Take off  
1330, 1335, 1340 Arrive Hill AFB  
1400 Mission Commander/Safety/Flight operations/ and In-processing Briefings

**13-14 Mar (First Spray Sortie, Range Times (1500Z-2000Z))**

0545: Show time, aircrew 1 (Crew according to spray plan)  
0630: Show time, aircrew 2 (Crew according to spray plan)  
0743: Sunrise  
0800: Spray 01 Take off  
0830: Spray 02 Take off  
0800-1700: Spray 01 & 02 spray UTTR Targets as directed by the MC

**15-16 Mar- Weather back up only; Hill range closed unless needed due to delays**

**\*\*Possible Wingman Training Flight on Sat morning**

**17-19 Mar (First Spray Sortie, Range Times (1500Z-2000Z))**

0545: Show time, aircrew 1 (Crew according to spray plan)  
0630: Show time, aircrew 2 (Crew according to spray plan)  
0735: Sunrise  
0800: Spray 01 Take off  
0830: Spray 02 Take off  
0800-1700: Spray 01 & 02 spray UTTR Targets as directed by the MC

**20 Mar : Finish spray areas/Weather Back-up/Flush, Clean Up;**

0600: Show time, aircrew Spray 1  
0630: Show time, aircrew Spray 2  
0732: Sunrise (see attach Sunrise/Sunset Chart in mission folders)  
0800: Spray 01 Take off  
0830: Spray 02 Take off  
**\*\*Flush sorties, plan 2 sorties each pending spray mx approval on clean tanks**

**21 Mar (Thur) All aircrew and aircraft return to YNG**

0700: All Aircrew report  
0730: All Personnel report  
0900: Spray01 Takes off  
0905: Spray02 Takes off  
0910: Support airplane Takes off  
1600: Lands YNG

\*\*If completed early, the aircrews and airframes may return early. Support personnel will be dependent upon the arrival of the support aircraft. TBD by the mission commander.

## 8. ITEMS TO TAKE:

- a. **PMP:**
  - (1) Project Notebook with Recording Sheets and Maps
  - (2) Laptop Computer and Batteries
  - (3) 2 Compasses and Stop Watch
  - (4) 2 Signal Mirrors and 2 Spot Lights
  - (5) Measuring Wheels and Tape
  - (6) Entomologists' Tool Kit
  - (7) UHF/VHF Radios and VHF Radios
  - (8) Cellular Phone
- b. **Mission Commander:** Mission Folder, Cellular Phone
- c. **Navigator:** Maps
- d. **Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Herbicide Safety Binder
  - (4) Safety Equipment
- e. **Maintenance:** Applicable Equipment

## 9. SPRAY CONFIGURATION: SP3G

- a. Two Aircraft, Systems 3 and 5
- b. MASS Modules 1, 2 and 3
- c. UHV Fuselage booms oriented straight back

## 10. PPR REQUIREMENTS: All required, see Form 33 setup sheets for aircraft

- 106- LD1202
- 105- LD1201
- 023- LD1203 (Departure)
- 023- LD2004 (Return)

## 11. PARKING PLAN: Forestry (Alert) Ramp – on East side of the airfield.

## 12. RADIO FREQUENCIES:

- **Clover Range Control:** UHF 285.65, 275.9, 361.4 (p)
- **Eagle Tower:** UHF 351.0; Mawk 4 ((b) (6) )
- **Diddle Knoll & Spray Ops Freq:** UHF 398.1 (Primary), 383.2 (Back-up); VHF 134.1, 118.45
- **Spray Inter plane:** UHF 237.05 / VHF 138.375
- **Spray Ground to Spray Maintenance:** See Iridium Phones
- **Base OPS:** 139.3
- **HF Operations:** Designated by Comm. See attached list.
- **Communications Ground Freq:** LMR nets are trunked at Hill.

### - IRIDIUM PHONES

- Mission Commander (808) 434-8586
- Maintenance Supervisor (808) 434-9585
- Entomologist/Pest Management (808) 434-1477 and (808) 659-3224

## 13. SPRAY PARAMETERS:

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24 and a couple passes on Nord LZ)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

**14. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

**b. When:** Start at 0530 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be furnished by installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**15. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**16. CONTACTS:** Commercial prefix (801) 777-XXXX; DSN 777-xxxx

**a. 388<sup>th</sup> RANS/RSO, Range Control Officer/Installation Spray Coordinator:**

**17. SEQUENCING:**

- a. Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling.
- b. Spray ops aircraft must stay south of Base Leg Knoll during turns on north run on Target 21. Coordination with range control is essential to assure that this portion of the range is released for air operations.
- c. When winds blow directly from one side of the target to the middle of the target or during early morning when wind speed is low, ground monitors will direct the “dress up” of the target edges.
- d. **Spraying Priorities:**
  - (1) Target 21
  - (2) Target 24
- f. **Multiple-Target Alignments for Possible Future Operations.**  
Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required).
  - (1) The west edges of Targets 21 & 24 are contiguous and can be treated on the same pass with a spray-off gap between targets.

**18. GENERAL TARGET INFORMATION:**

- a. **Target 21:**
  - (1) Dimensions: 4,980' X 7,770'
  - (2) Acreage: 888
  - (3) Acres Sprayed in 2004: 888
  - (4) Aircraft Loads: 18,869 Gal
  - (5) Sorties: 17
  - (6) Passes (35' Swath): 157
  - (7) Spray-On Time/Pass: 23 Seconds
  - (8) Spray Heading: 00/180
- b. **Target 24:**
  - (1) Dimensions: 1,600' X 6,080'
  - (2) Acreage: 223
  - (3) Acres Sprayed in 2004: 223
  - (4) Aircraft Loads: 5,263 Gal
  - (5) Sorties: 7
  - (6) Passes (35' Swath): 47
  - (7) Spray-On Time/Pass: 18 Seconds
  - (8) Spray Heading: 00/180

**UTTR GEOGRAPHIC LOCATION**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MOUNTAIN HOME AFB RANGE, ID

### 12-28 SEPTEMBER 2008

**PURPOSE/BENEFITS/OBJECTIVES.** To prevent fire hazards, inhibit annual re-growth of cheatgrass on Saylor Creek Range and allow native vegetation to establish and be competitive.

#### 1. 910 AW PARTICIPANTS:

##### 2. 12 SEP 08

###### a. Aircrew:

- 1) Mission Commander: Maj (b) (6) 12-20 Sep
- 2) Pilots: Capt (b) (6) -28 Sep, Capt (b) (6) 12-20 Sep
- 3) Navigator: Maj (b) (6) 12-20 Sep
- 4) Flight Engineer: SSgt (b) (6) 12-16 Sep
- 5) Spray Operators: MSgt (b) (6) 12-28 Sep, MSgt (b) (6) 12-20 Sep

###### b. Maintenance:

- 1) Spray MX: TSgt (b) (6) 12-28 Sep
- 2) Crew Chiefs: TSgt (b) (6) 12-28 Sep, SRA (b) (6) 15-28 Sep

##### 15 SEP 08

###### a. Aircrew:

Pilot: Capt (b) (6) 15-20 Sep, Maj (b) (6) 15-16 Sep, Maj (b) (6) 15-16 Sep  
Nav: 1Lt (b) (6) 15-16 Sep  
Engineer: SMS (b) (6) (b) (6) 15-20 Sep\*  
Load Masters: MSgt (b) (6) 15-16 Sep

###### b. Maintenance:

Spray Mx: MSgt (b) (6) 15-28 Sep, TSgt (b) (6) 15-28, SRA (b) (6) 15-28  
Avionics: TSgt (b) (6) (b) (6) 15-28 Sep  
Crew Chief: MSgt (b) (6) 15-16 Sep  
Prop: MSgt (b) (6) 15-28 Sep  
Electric: TSgt (b) (6) 15-28 Sep  
Hyd: MSgt (b) (6) 15-28 Sep

###### c. Entomologists: LTC (b) (6) (b) (6) 15-28 Sep

##### 19 SEP 08

###### a. Aircrew:

- 1) Mission Commander: LTC (b) (6) 19-28 Sep
- 2) Pilots: Maj (b) (6) 19-28 Sep
- 3) Navigator: LTC (b) (6) 19-28 Sep
- 4) Flight Engineer: MSgt (b) (6) 19-28 Sep

- 6) Load Master MSgt (b) (6) 19-20 Sep

###### b. Maintenance:

TBD

#### 2. SCHEDULE: (Local times; total of 13 lifts required, 1-3 lifts per day)

##### 12 SEP (Friday):

0600: Show at KYNG

PPR #AMS003

0800: Depart KYNG

1130: Land KMUO (Local)

1230: Safety Briefing, MX configures aircraft; plan next day's mission

\*\* ASAP After landing

**15 SEP (Monday)**

**Support Aircraft**

**PPR#2461514**

0800 Crew show  
1000 Depart YNG  
1335 Land MUO

\*Spray Crew members: SMS (b) (6)

\*Spray Mx/Mx: Msgt (b) (6) Tsgt (b) (6) Sra (b) (6) Ssgt (b) (6) Sra (b) (6)

**16 SEP (Tuesday): Range Time 0630-1100, (1-3 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0724: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**17 SEP (Wednesday): Range Time: 0630-1100, (1-3 sorties if possible)**

0730: Show time/Load water and Chemical  
**0700:** Take Off KMUO  
0725: Sunrise  
Multiple lifts TBD – Wx permitting 2-3 sorties

**18 SEP (Thursday): Range Time: 0630-1100 (1-3 sorties if possible)**

0800: Show time  
**0700:** Take Off KMUO  
0726: Sunrise  
Multiple lifts TBD – Wx permitting 2-3 sorties

**19 SEP (Friday): Range Time 0700-1000, (1 sorties )**

0730: Crew Show time/Load water and chemical (FOD WALK @MUO)  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0727: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**\*\*SWAPOUT AIRCRAFT YNG PPR#2461516**

0800: Show at YNG  
1000: Depart YNG  
1330: Land MUO

**20 SEP (Saturday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0728: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**21 SEP (Sunday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0730: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**22 SEP (Monday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0730: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**23 SEP (Tuesday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0730: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**24 SEP (Wednesday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0730: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**25 SEP (Thursday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0730: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**26 SEP (Friday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
0730: Sunrise  
0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**\*\*Spray Support Aircraft: PPR#:2461521**

0800 Show YNG  
1000 Depart YNG  
1330 Land MUO

**27 SEP (Saturday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)

0830 Reload Chemical and depart ASAP if second lift  
1000: Land KMUO

**28 SEP (Sunday)**

0700 Show  
0900 Depart MUO  
1630 Land YNG

**\*\* If no delays are encountered, the mission will return to YNG after completion of last flush sortie and cleaning of system.**

**3. ITEMS TO TAKE:**

- a. Mission Commander:** 1 Cellular Phone
- b. Entomologist:** UHF Radio, Cardholders, Water Sensitive Cards, Tool Kit, VHF Radio, Cell Phone, Laptop Computer
- c. Navigator:** Maps/Map Bag, Validation Map,
- d. Spray Operator:** Safety Gear, computer
- e. Spray Maintenance:** Mobility Kit, MASS Spares, Spill Kit, Pesticide Safety Binder, Safety Equipment and Tool and other equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION: N/A**

**5. PARKING PLAN:** Transient Ramp in front of Base Operations

## 6. RADIO FREQUENCIES:

- a. **Air To Ground:** Entomologists: 123.45 VHF; 292.2 (range); Maintenance 384.7
- b. **Mt Home:** PTD: 372.2/138.9, ACC CP (Raymond 27): 381.3, ATIS: 273.5, TWR: 133.85 / 253.5, GND: 120.5 / 275.8, RAPCON: 259.1, Salt Lake Center: 387.15/363.0
- c. **Range:** Saylor Creek Range: 134.1 / 292.2 pri / 381.3 sec  
Sagebrush Control: 251.2, Paradise MOA: 272.7/236.05/225.55  
Owyhee MOA: 392.2/266.35, Bruneau/Sheep Creek MOA: 251.875

## 7. IN-BRIEFING: 1530 Airfield Management Office

## 8. Billeting:

### Sleep Inn Foot Hills

1180 US 20 Mountain Home, ID

208-587-9743

Fax: 208-587-7382

## 9 Vehicles: Mountain Home will provide vehicles.

- 2 Minivans (1 Ops; 1 MX)
- 1 12Pax Van (Ops/Support crew)
- 1 ½ Ton Pick Up (OPS)
- 6 Pax 16-28 SEP (MX)
- 6 Pax 17-28 SEP (MX)

## 8. SPRAY CONFIGURATION:

- a. **System:** SP-3G
- b. **Nozzle Tips/Orientation:** Raindrop/Straight Back
- c. **Number:** Fuselage – 17 nozzles (8 left side: 9 right side)
- d. **Booms:** Fuselage
- e. **Aircraft:** 99105 **Mission Identifier:** QZNRKA287256
- f. **Profile:** Planned HV Profile

## 9. SPRAY PARAMETERS:

- a. **Altitude:** 100' AGL (we are treating at 46.5 acres/minute)
- b. **Swath Width.** 100 feet
- c. **Flow Rate.** 326 gal/min
- d. **Application Rate.** 7 gal/acre; approximately 3,200 acres to be treated for cheatgrass
- e. **Ground Speed:** 200 Knots

## 10. SPRAY MIXING AND LOADING:

### a. Composition of Each Gallon:

- (1) 0.57 ounces of Plateau® (we want 4oz in 7 gallons per acre)
- (2) 1 ounce of Sta-put® Drift Retardant
- (3) 126.4 ounces of water

### b. First Load (4 Tanks of 450 gallons each + sump of 75 gallons)

- (1) Fill to 450 gal water/tank using the pump on the water tanker truck. This is done by putting the filler hose into the rear tank with all tanks open to the common sump. Total water in tanks = 1,800 gal.
- (2) 75 gal/water in sump
- (3) Total water added = 1,800 gallons
- (4) Upload 8.03 gal (30.4L)/Plateau; add 14 gal Sta-put while agitating approximately 5-7 min  
Total quantity mix 1822 gallons

## 11. **SPRAY MONITORING OR TESTING: Performed by the CPMPs**

**NOTES:** Will use water sensitive cards.

7 August 2001

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB  
ND Control of Mosquitoes

1. **Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.
2. **Capability:** Spray Aircraft Available 13-16 Aug 2001
3. **Concept of Operations:**
  - 13 August (Monday):
    - 1000: Show time
    - 1300: Depart KYNG
    - 1530: Land KRDR/Safety Briefing
  - 14 August (Tuesday): Targeted pests are active during evening hours
    - 1700: Show time
    - 1900: Take Off KRDR
    - 2045: Land KRDR
  - 15 August (Wednesday): Targeted pests are active during evening hours
    - 1700: Show time
    - 1900: Take Off KRDR
    - 2045: Land KRDR
  - 16 August (Thursday):
    - 0800: Show Time
    - 1100: Take Off KRDR
    - 1500: Land KYNG
4. **Spray Parameters:**
  - a. **Acreage:** 20,000 Acres with Adulticide (Only areas determined by PMP)
  - b. **Altitude:** 150 Ft ULV
  - c. **Pesticide:** Trumpet (Adulticide)
  - d. **Deploy:** 3.3 Hrs
  - e. **Re-Deploy:** 3.0 Hrs
  - f. **Spray Time:** Will be determined by PMP
5. **Mission Commander:** Major (b) (6)

6. **Aircraft Commander:** Major (b) (6)
7. Support required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6), DSN (b) (6).
8. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

(b) (6), Major, USAFR  
Aerial Spray Operations Coordinator

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **GRAND FORKS AFB, ND**

### **13-16 AUGUST 2001**

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: MAJ (b) (6) , LTC (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , CMS (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: TSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chief(s): SSG (b) (6) , SRA (b) (6)
- (3) Avionics: SSG (b) (6)

##### **c. Entomologists/Ground Support: MAJ (b) (6) & 1LT (b) (6)**

#### **2. SCHEDULE: (All Local Times)**

##### **13 AUGUST (Monday)**

1000: Show at KYNG  
1300: Depart KYNG  
1530: Land KRDR/Safety Briefing

##### **14 AUGUST (Tuesday): (Target Pest are active during evening hours)**

1530: In-brief  
1700: Show time  
1900: Take Off KRDR  
2043: Sunset/Land KRDR

##### **15 AUGUST (Wednesday): (Target Pest are active during evening hours)**

1700: Show time  
1900: Take Off KRDR  
2041: Sunset/Land KRDR

##### **16 AUGUST (Thursday)**

0800: Show time  
1100: Take Off KRDR  
1500: Land KYNG

#### **3. ITEMS TO TAKE:**

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder, 2 Signal Mirrors, 1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries, Kodak Camera
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

4. **PPR:** Not required weekdays

5. **RADIO FREQUENCIES:** Air To Ground Primary 392.2; VHF 123.45

#### 6. **SPRAY CONFIGURATION:**

- a. **System:** 2-Module System/Stainless Steel ULV Wing Booms and Fuselage Booms
- b. **Nozzle Tips/Orientation:**  
ULV: 8008 TeeJet oriented straight down
- c. **Number:**  
ULV: wing only, 6 8008s total (3 each side)
- d. **Booms:** Full Wing
- e. **Aircraft: ; Mission Identifier:**

#### 7. **SPRAY PARAMETERS:**

- a. **Altitude:** 150' for ULV application
- b. **Swath Width.** 1500 feet for ULV or as determined by the PMP
- c. **Flow Rate.** 3.3 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet, ULV
- e. **Ground Speed:** 200 Knots

#### 8. **SPRAY MIXING AND LOADING:**

The amount of Trumpet to load will be determined on site

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 13-16 AUG 2007

**Purpose/Objectives and Proposed Benefits:** To control vector mosquitoes of West Nile virus in order to protect the health and improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: Maj (b) (6), Capt (b) (6), Capt (b) (6)
- 2) Navigators: LTC (b) (6)
- 3) Flight Engineers: SMS (b) (6)
- 4) Spray Operators: MSG (b) (6), MSG (b) (6) olino

##### b. Maintenance:

- 1) Spray Maintenance: SMS (b) (6), Tsgt (b) (6), Tsgt (b) (6)
- 2) Crew Chief(s): SSG (b) (6), SSG (b) (6)
- 3) Avionics: TSgt (b) (6)

##### c. Entomologist: Maj (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 13 AUG (Monday)

1000: Showtime  
1200: Depart KYNG  
1400: Land KGFK/Safety Briefing  
1530: Spray In Brief (CPMP, MC, AC)  
1730: Wx decision/load chemical  
1915: Take off KRDR (Adulticide Spray Sortie)  
2045: Sunset

##### 14 AUG (Tuesday):

1700: Show time  
1730 Wx decision/load chemical  
1915: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2043

##### 15 AUG (Wednesday):

1700: Show time  
1730 Wx decision/load chemical  
1915: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2042

##### 16 AUG (Thursday):

1130: Show time  
1330: Take off KGFK  
1730: Land KYNG

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, Compass, Pest Safety Binder, 1 VHF Radio
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

#### 4. PPR: 08-13-01-HL

#### 5. RADIO FREQUENCIES: Air To Ground Primary UHF 392.2; VHF 123.45 KRDR Tower 124.9 V; Grand Forks International 118.4 V

#### 6. CONFIGURATION: SP2G

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms

- b. Nozzle Tips/Orientation:** ULV (adulthoodicide): 8005 Tee Jet oriented straight down  
**c. Number:** ULV: 14 8005s total (7 each side)

**e. Aircraft:** 89-9105

**f. Mission Identifier:** QZNRKA741225

**7. SPRAY PARAMETERS:**

**a. Adulthoodicide**

- (1) **Area to be treated:** 11488 acres (Grand Forks AFB) and city of Grand Forks (18,300 acres)
- (2) **Altitude:** 150' for Adulthoodicide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site on a daily basis with about 232 gallons required (8 drums) to treat entire area

**9. TRANSPORTATION: TBD**

**10. LODGING: ON BASE**

**Billeting :** DSN 362-7200 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844  
14 Rooms Reserved

**11. CONTACTS:**

**a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

- (1) **Base Operations:** Airfield Manager DSN 362-4409  
-- DSN 362-xxxx or (701) 747-xxxx20
- (2) **Pest Management:** TSgt (b) (6) or Ssgt (b) (6) DSN (b) (6) , FAX 3432)
- (3) **Base Civil Engineer:** Lt Col (b) (6)
- (4) **Environmental Officer:** (b) (6) , DSN (b) (6) 5, FAX 6155
- (5) **Public Affairs:** DSN 362-5608/5023 (off duty CP ext 6711)
- (6) **Weather:** DSN 362-4396
- (6) **Billeting:** DSN 362-3070/6189/7200 or (701) 594-8431, FAX 362-3069

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and WNV vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft available 13-16 AUG 2007

**3. Concept of Operations:**

**13 AUG (Monday)**

1100: Showtime

1300: Depart KYNG

1500: Land KGFK/Safety Briefing

1600: Spray In Brief (CPMP, MC, AC).

**14 AUG (Tuesday):**

1700: Show time

1730 Load Chemical

1930: Take off KRDR (Adulticide Spray Sortie)

Sunset: 2131

**15 AUG (Wednesday):**

1700: Show time

1730 Load Chemical

1930: Take off KRDR (Adulticide Spray Sortie)

Sunset: 2131

**16 AUG (Thursday):**

1130: Show time

1330: Take off KGFK

1730: Land KYNG

**4. Spray Parameters:**

**a. Adulticide**

- (1) **Area to be treated:** 11488 acres (Grand Forks AFB)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

5. **Aircraft Commander:** Capt (b) (6)

6. **Mission Commander:** Maj (b) (6) (b) (6)

6. Support at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator.

7. HQ AFRC/DOOM approval via email.

Assistant Chief Aerial Spray

20 August 2001

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

SUBJECT: Grand Forks AFB ND Aerial Spray Mission After Action Report

**1. PURPOSE:** The purpose of this mission was to spray the designated areas of Grand Forks AFB ND for mosquito control (13-17 Aug 01). The designated areas to be sprayed were determined by the Grand Forks AFB Environmental Officer and the Civil Engineer Pest Management Office in coordination with the 910 AW Entomologists/Pest Management Professionals.

**2. SPRAY EVENTS:**

- a. 13 Aug 01 (Mon):** The C-130 departed KYNG 1655 and landed at KRDR 2010. Aircraft Serial #899106, Mission ID: QZNRKA962225. A total of 3.3 hrs of Flight Time was logged.
- b. 14 Aug 01 (Tues):** The scheduled spray mission was aborted due to bad weather.
- c. 15 Aug 01 (Wed):** The scheduled spray mission was aborted due to bad weather.
- d. 16 Aug 01 (Thur):** One Spray sortie was conducted 1150-1455Z. 25 swath passes were flown over 25,600 acres, 120 gallons of Trumpet EC applied (0.6 Ounce Ground Coverage Per Acre). A total of 3.1 hours were logged during this spray sortie.
- e. 17 Aug 01 (Fri):** The C-130 departed KRDR 1410, arriving at KYNG 1709. A total of 3.0 hrs Flight Time was logged.
- f.** This mission completed the spray season at Grand Folks AFB.

**3. TRAINING.**

- a.** CMS (b) (6) received Spray Operator's/Loadmaster recurrency training.
- b.** The reserve entomologist, Major (b) (6), received excellent training. He was required to go through the mission "step by step", directing spray swath passes, and conducting pre- and post-briefings. Maj (b) (6) also received excellent on-the-job-training on the DGPS system. Marking the spray boundaries and inputting them to SATLOC greatly enhanced the efficiency of mission.
- c.** Spray Maintenance personnel wore their PPE during this mission with no problems and received continuous spray maintenance qualification training.

**4. QUARTERS/TRANSPORTATION:** The contract quarters were fine. Transportation was well coordinated.

(b) (6), Lt Col, USAFR  
Aerial Spray Mission Commander

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 13-17 August 2001
- c. Purpose of Application: Control nuisance and vector mosquitoes
- d. Application Date/s: 16 August 2001
- e. Time/s of Application (Local): 0650-0950 (16 Aug)
- f. Acres Treated: 25,600 (16 Aug)
- g. Project Coordinators (Name/Rank, Title, Phone #): (b) (6) , DSN (b) (6) ; SSG (b) (6) , NCOIC Pest Management Shop, DSN (b) (6)
- h. Date Spray Map Last Approved: 14 Aug 2001
- i. Installation In-Briefing: (When/Where/Briefer/s): 14 Aug 2001; CE Conference Room, LTC (b) (6) & MAJ (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11): MAJ (b) (6) & 1LT (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: MAJ (b) (6)
  - (2) CoPilot: LTC (b) (6)
  - (3) Navigator(s): MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: CMSG (b) (6) , MSG (b) (6)
- d. Safety Briefer: 1LT (b) (6)
- e. Spray Maintenance: TSG (b) (6) , TSG (b) (6) TSG (b) (6)
- f. Spray Ground Monitors: MAJ (b) (6) & 1LT (b) (6)
- g. Crew Chiefs: SSG (b) (6) & SRA (b) (6)
- h. Avionics: SSG (b) (6)

### 3. FLYING DATA:

- (1) Spray Sorties/Hours: 1/3.1
- (2) Ferry Sorties/Hours: 2/6.3

### 4. PESTICIDES:

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-5481
- c. Gallons Pesticide Loaded: 120
- d. Gallons Pesticide Applied: 120
- e. Gallons and Name of Flush Used: Water
- f. Application Rate: .60 oz/acre

**5. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 8008 6 straight down
- f. Pressure (PSI): 40-60
- g. Flow Rate: 3.3 GPM

**6. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1500' ULV
- b. Spray Off Set: 3000'
- c. Spray Release Altitude: 150' ULV
- d. Ground Speed: 200 Knots (338 Feet/Second)

**7. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - 1) Ground: 4-6 knots @ 270-300°
  - 2) Release Altitude: 6-12 knots @ 280-330°
- b. Temperature (Degrees Fahrenheit): 61-65°
- c. Cloud Cover: Clear
- d. Source: Direct observation

**8. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. The Grand Forks AFB Public Health Unit and Pest Management conduct adult mosquito trapping to monitor mosquito densities on base.
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito traps
  - (2) Results: Significant decrease in mosquito activity following application

- 9. REMARKS:** After two evening sorties were cancelled due to adverse weather conditions, a morning application was made based on the confirmed presence of the target pest during morning hours (0600-1000 hrs) and advantageous environmental parameters (wind speed and temperature). Morning applications, with ground equipment, have been carried out regularly with excellent results at Minot AFB for similar reasons. Mosquito trap counts dropped significantly following the spray. However, Pest Management noted that mosquito activity had returned to area within a few days. This was the final mission this year for the Grand Forks Aerial Mosquito Control Program, which is only one aspect of the overall Integrated Pest Management Plan (IPMP) for mosquito control at Grand Forks. Three adulticide applications and one larvicide spray were made this year. During this period, surveillance trapping of mosquitoes was not always reported in a timely and consistent manner. While we are sensitive to manpower problems, background pest surveillance is the cornerstone of any IPMP and necessary for efficacy monitoring of spray applications. Our best mosquito control option continues to be larviciding. These materials are environmentally friendly and prevent immature mosquitoes from reaching the pestiferous flying blood-feeding adult stage. The current plan for CY2002 includes two larvicide applications early in the season and up to three adulticide treatments; the larger the spray area around the base, the longer period of relief from mosquito attack will be realized.

0730: Show Time

0730: Fuel

0900: Depart

1300: Land

1400 Fuel

1500 Depart for YNG

1800 Land YNG

4. Spray Configuration:
  - a. MASS – SP2G
  - b. Aircraft Number: 90-9105
  - c. Mission Identifier: QZNRKA665044

5. Mission Protocols:

A. Avon Park Spray Testing Itinerary 13-17 FEBB 06

1. Test Determine the effective swath width with a fuselage ULV configuration released at 500 feet AGL with 8008/8005 Nozzles.

- a. Spray mineral oil from fuselage at 200 knots
  - i. We are looking for a crosswind spray (see below)
  - ii. 2 or 3 replications depending on results

2. Spray Parameters (use for all tests):

- a. Booms -- Fuselage only.
- b. Nozzles – 8008/8005 TeeJet
- c. Airspeed -- 200 knots ground speed.
- d. Altitude -- 500' above ground level.
- e. Wind – Crosswind component.
- f. Flow Rate – 4.5 gallons/minute

3. Testing Protocols:

Determination of effective swath width at 500 feet release altitude with fuselage ULV configuration. Glass slides will be used to collect and sample droplets at 10 sampling stations along approximately 5 miles of projected spray path. Desired wind is at least +/- 30 degrees of collection station alignment and less than 10 MPH.

BVA oil will be mixed with 0.25% (volume/volume) ratio Fluorescent dye. Dye distinguishes our droplets from contaminate droplets when viewed under florescent microscope.

- a. The test will be a 500' AGL. System will be stabilized prior to reaching the sampling points. 15 seconds prior to the sampling point and 15 seconds after should be sufficient (30 seconds total). Three passes over the target is planned for each day's test.
- b. Microscope slides will be retrieved 1 hour after the plane has passed. Number and size of the droplets will be determined.

6. Mission Commander: MAJ (b) (6)

7. Support required at Avon Park Bombing Range is thru the Range Manager.
8. If you have any questions concerning this mission please contact me at DSN (b) (6)

29 November 2023

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

SUBJECT: 500 Foot Release Height Swath Characterization Test and Training Mission  
Avon Park AF Range, Florida 13-17 FEB 06

**1. Purpose:** Determine swath characteristics (i.e. droplet drift, swath offsets, average droplet size at various distances downwind) of a mimic insecticide (BVA oil) dispersed at altitudes of 500' AGL by the C-130 aerial spray platform. In these tests, a fluorescent dye was added to distinguish material sprayed from the aircraft with microscopic drops occurring in the environment. Additionally, initial spray training for navigator aircrew members was planned.

**2. Participants:**

a. **Aircrew:**

1. Mission Commander: Maj (b) (6)
2. Pilots: Maj (b) (6) Maj (b) (6)
3. Navigators: Maj (b) (6) , Lt Col (b) (6) Maj (b) (6)
4. Flight Engineers: MSgt (b) (6)
5. Spray Operators: SMSgt (b) (6) MSgt (b) (6)

b. **Maintenance:**

1. Spray Maintenance: TSgt (b) (6) TSgt (b) (6) TSgt (b) (6)  
(b) (6)
2. Avionics: TSgt (b) (6)
3. Crew Chiefs: TSgt (b) (6) TSgt (b) (6)

c. **Entomologists:** Maj (b) (6) Capt (b) (6) SMSgt  
(b) (6) (entomology technical support)

**3. Spray Configuration:**

Mass-SP2G  
Aircraft Number: 99105  
Mission Identifier: QZNRKA665044

**4. Spray Parameters:**

Booms—Fuselage only.  
Nozzles—8008 TeeJet.  
Number of Nozzles— 3 per side (8008)  
Airspeed—200 knots ground speed.  
Altitude—500' AGL.  
Wind—90 degree crosswind component.

## 5. Aerial Spray Flight Data:

a. 13 Feb 06: Ferry	KYNG-KYNG 1600-1715Z	Flight Hours: 1.3
b. 13 Feb 06: Ferry	KYNG-KAGR 1950-2248Z	Flight Hours: 3.0
c. 14 Feb 06: Spray Sortie	KAGR-KAGR1400-1615Z	Flight Hours: 2.3
d. 15 Feb 06: Spray Sortie	KAGR-KAGR1350-1553Z	Flight Hours: 2.1
e. 16 Feb 06: Spray Sortie	KAGR-KAGR1350-1542Z	Flight Hours: 1.9
f. 17 Feb 06: Ferry	KAGR-KYNG1400-1728Z	Flight Hours: 3.5

## 6. Methods:

Ten droplet collection stations were outfitted with spinning impingers (glass microscope slides) and placed along available sections of road inside the Avon Park Range (see figure 1). Six 8008 flat fan nozzles (3 per side) on fuselage booms were used along with a flow rate of approximately 4.5 gpm at 50 psi of BVA oil (equivalent to 0.62 oz/acre). Four aircraft passes were made on a course perpendicular to the collection stations, with each pass totaling 30 seconds of spray-on time. After the last pass was completed, and giving time for the spray cloud to settle, the spinning slides were collected and viewed under a fluorescent compound microscope. Fifty drops (if available) were counted for each sampling station. Drops were measured for volume mean diameter (VMD) and drop density (number of drops per cm<sup>2</sup>) for each station. Training was accomplished on all spray flights with navigator spray upgrades receiving priority.

14 February: A test was conducted with stations set up along a NW-SE orientation along Frostproof road (Figure 1.) Light and variable winds yielded poor results for this test. Ground wind speed was below 2 knots and wind direction shifted 180° more than once during the test. Such parameters cannot be counted as a replication of high altitude spray test and serve as an example of the need for a minimum wind speed and consistent wind direction for aerial spray applications.

15 February: A test was conducted along an east-west orientation on Kissimmee Road (Figure 1). Spinner stations were separated by 2,500 feet. Ground wind conditions maintained 1.5 – 3.0 knots at approximately 070° during the test. Test conditions were acceptable and drops were recovered on all slides (except for directly under the aircraft release point). Volume median diameter and drop density are shown in Figure 2 for all stations. The highest droplet densities (10-14 drops per cm<sup>2</sup>) were seen at stations 3 & 4. At other stations, droplet densities were less than 5 drops per cm<sup>2</sup>. Because higher concentrations of drops are correlated with greater insect mortality, stations 3 & 4 represent that portion of the swath with the greatest potential for effective mosquito control as well as the effective swath width of the application (approximately 2,000 feet). This data suggests the use of a 2,000 foot swath width along with a swath offset of 4,000 feet (Figure 2).

16 February: Wind conditions allowed for the use of a north-south orientation along Van Eegan road (Figure 1). Spinner stations were positioned 1,742 feet apart, with the 1<sup>st</sup> spinner station located at the junction of Kissimmee and Van Eegan. Four West-East passes were made flying along Kissimmee with each pass commencing and ending spray on or off 40 seconds prior to intersection with the road, respectively. Ground wind conditions averaged 1.5 – 4.5 knots at 360 - 030° and 11 knots at 060° at altitude during the test. Parameters

appeared to be excellent for this test. However, it now seems that the crosswind component at altitude was substantial enough that the spray cloud did not intersect with every sampling station. Figure 3 shows that droplets were only recovered downwind as far as station 6. Droplet densities were low throughout (less than 8 drops per cm<sup>2</sup>).

**7. Conclusions:** The test completed on 15 February can be considered a replication of previous high altitude spray results (see previous reports on 500 foot release heights). These data indicate a 2,000 foot effective swath and an offset of 4,000 feet (figure 2). Tests carried out on 14 & 16 February were less conclusive. On 14 February, meteorological conditions were unfavorable and, consequently, negative results were expected. However, conditions appeared to be near perfect on the ground and acceptable at altitude during the 16 February test but the results were not as expected. It is well accepted that it is more difficult to control drift from material released at a higher altitude and these results probably reflect that fact. These results may indicate a narrow tolerance for cross-wind components when spraying at 500 feet above ground level. Nonetheless, the 15 February test suggests that effective mosquito sprays can be accomplished using the C-130 and the modular aerial spray system. The obvious next step is to perform further replications with the addition of active ingredient and insect bioassays.

**8. Recommendations:** Conduct a series of mosquito bioassays spraying active ingredient (most likely our primary mosquito insecticide -- Dibrom) over a long distance sampling line (3 + miles) and simultaneously conduct swath characterizations to attempt to correlate insect mortality with droplet size and density. This can be accomplished during regularly scheduled spray missions at such locations as Langley or Grand Forks Air Force Bases.

**5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 909108
- c. Mission Identifier: QZNRKA665044

**6. MISSION PROTOCOLS:**

**Avon Park Spray Testing 13-17 Feb 06**

Purpose: Determining the effective swath width with a fuselage ULV configuration released at 500 feet AGL with 8008 Nozzles.

**Spray Parameters**

Spray: BVA oil

Booms -- Fuselage only

Number and type of nozzles – 8008; 6 Nozzles total = (3 left, 3 right) Airspeed -- 200 knots ground speed

Altitude -- 500' above ground level

Wind – crosswind test

Flow Rate – 4.5 gallons/minute

Fig. 1. Diagram of crosswind test. First sampling location will be on the Upwind aspect. Aircraft will pass directly over 1<sup>st</sup> sampling site (no offset).

#### Mission Protocols:

Determination of effective swath width at 500 feet release altitude with fuselage ULV configuration. Glass slides will be used to collect and sample droplets. Ten sampling stations will be setup along either Van Eeghan (north/south), Frostproof (north-west/southeast) or Kissimmee Rd (east/west). This is a crosswind test, thus, we are looking for the wind direction to be within  $\pm 30^\circ$  of the direction of the road. Additionally, we need the average winds to be below 10 mph. Because wind will play an important part in these tests please be prepared to wait for appropriate winds during the entire range time. We are aiming for a transect length of approximately 5 miles if possible. Some of the locations will not support this distance but we will try to get close.

BVA oil will be mixed with a 0.25% (volume/volume) ratio Fluorescent dye. This dye allows us (when viewed with a fluorescent microscope) to distinguish between drops sprayed by determine exactly drops that are coming out of the spray system as opposed to drops resulting from environmental contaminants. The dye will be dissolved in HAN and mixed with the BVA oil prior to the 1<sup>st</sup> day of testing.

We need the system to have stabilized prior to reaching the sampling points. 20 seconds prior to the sampling point and 20 seconds after should be sufficient (40 seconds total). Please note that this could change depending on wind direction and speed. The aircraft will dispense spray directly over the upwind end of the sampling line, hopefully marked with a vehicle. There will be no offset.

**Navigator:** please record wind speed and direction at time of test. **Spray Operators:** Please record the spray-on time and pressure. Three passes over the target is all that is required for a given day's test. Ground personnel for the test will position themselves at the 1<sup>st</sup> sampling location and provide visual cues or mirror flashes as appropriate.

Microscope slides will be retrieved up to an hour after the plane has passed. Please do not fly through the test area during this time-frame.

Testing will be repeated on subsequent days until a sufficient number of replications have been completed.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 13-17 October 09

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes at LFI and the surrounding communities.

1. **910 AW PARTICIPANTS:**
  - a. **Aircrew:**
    - (1) Pilots: LTC (b) (6) , LTC (b) (6)
    - (2) Navigator: LTC (b) (6)
    - (3) Flight Engineers: SMSgt (b) (6)
    - (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6)
  - b. **Maintenance:**
    1. Spray Maintenance: TSgt (b) (6) , TSgt (b) (6) , MSgt (b) (6)
    2. Crew Chiefs: MSgt (b) (6) , Amn (b) (6)
    3. Avionics: TSgt (b) (6)
  - c. **Entomologist:** Maj (b) (6) (MC), LTC(b) (6)
2. **Vehicles:** Langley will supply us with 2x9pax vans and 2 cars
  - **MC / Entomologist:** One Car
  - **Ops:** One van (9 pax), One car
  - **Mx:** One Van (9 pax)
3. **Billeting:** 14 rooms on base DSN 574-4667 or Comm (757) 764-4667 FAX DSN 574-3038
4. **PPR:** 1013AS01
5. **SCHEDULE: (All times local) THIS MISSION WILL RETURN EARLY IF ABLE**

**13 Oct (Tuesday): Deploy to LFI**

1500: Show time  
1700: Takeoff YNG  
1830: Land LFI w/safety briefing immediately following

**14-16 Oct (Wednesday-Friday): Spray LFI**

1200: Station In-brief (Tuesday only)  
1415: Show time  
1430: WX decision, load Dibrom  
1615: Takeoff LFI  
1830: Sunset  
1845: Land LFI

**17 Oct (Saturday): Redeploy to YNG**

0800: Show time  
1000: Takeoff LFI  
1130: Land KYNG
6. **ITEMS TO TAKE:**
  - a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, VHF Radios, Laptop Computer
  - b. **Navigator:** Maps/Map Bag, Validation Map
  - c. **Spray Operator:** Safety Gear, Calibration Tables
  - d. **Spray Maintenance:** Deployment Kit/Supply Kit
7. **NOTIFICATION NECESSARY FOR THIS MISSION:**
  - a. **Langley Tower:** DSN 574-5326
  - b. **Langley Base Ops:** DSN 574-2504
  - c. **Camp Perry:** (757) 229-2121 ext 2263
  - d. **Consideration calls:**
    - i. Newport News
    - ii. Ft Eustis/Felker AAF Tower
    - iii. Norfolk NS/Chambers Tower

8. **PARKING PLAN:** Taxiway Foxtrot with the North Ramp as an alternate
9. **RADIO FREQUENCIES:**

    - (1) Tower - 125.0 or 253.5
    - (2) Ground - 121.7 or 275.8
    - (3) Clearance – 118.85 or 257.625
    - (4) Metro - 239.8
    - (5) ATIS – 270.1
  - d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15, Base Ops, DSN 262-3419, will transfer to TWR**
  - e. **Norfolk Approach: 118.9 or 353.7**
  - f. **Spray Ground: 123.4**
10. **IN-BRIEFING:** 1200 hrs on Tuesday in the CE Conference Room
11. **SPRAY CONFIGURATION:**
- a. **System:** SP2G - MASS ULV; Fuselage booms
  - b. **Nozzle Tips/Orientation:** 9 8005 nozzles -- straight down (4 left - 5 right)
  - c. **Aircraft:** 90-9107
  - d. **Mission Identifier:** QZNRKA097286
12. **SPRAY PARAMETERS:**
- a. **Altitude:** 150' AGL
  - b. **Ground Speed:** 200 KNOTS
  - c. **Pesticide:** Dibrom® Concentrate
  - d. **Application Rate:** 0.5 oz/acre
  - e. **Flow Rate:** 3.6 Gallons/Minute
  - f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
  - g. **Swath Width:** 2000 foot
13. **PESTICIDE LOADING:**
- a. **How Much Pesticide:** see entomologist
  - b. **Where:** Taxi Way F Aero Club Ramp or North Ramp if constructions isn't complete
  - c. **When:** 1430 hrs each day pending weather and heat index.\*\*Calibration performed unless otherwise directed by the Entomologist or Mission Commander
  - d. **Furnished by Installation:**
    - (1) Pesticide
    - (2) Loading Equipment/Crew
    - (3) Hazardous Waste Disposal
    - (4) Two B-5 or B-1 Stands

**5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 99106
- c. Mission Identifier: QZNRKA643044

**6. MISSION PROTOCOLS:**

**Avon Park Spray Testing Itinerary  
13-18 Feb 05**

Test 1. Characterization of droplet spectrum produced using fuselage ULV configuration with 8001 nozzles.

**Spray Parameters**

Booms -- Fuselage only  
Number and type of nozzles – 8001 = 42 nozzles/21 per side  
Airspeed -- 200 knots ground speed  
Altitude -- 150' above ground level  
Wind – Into the wind test  
Flow Rate – 4.5 gallons/minute

Figure 1. Into the Wind test.

Test 2: determination of effective swath width with fuselage ULV configuration @ **300'** AGL  
 Spray BVA oil from fuselage booms using 9 (4 left side: 5 right side) 8005 nozzles at, 200 knots  
 We are looking for a crosswind spray (see below)  
 Single test depending on results

Test 3: determination of effective swath width with fuselage ULV configuration @ **500'** AGL  
 Same as test one except change altitude to **500'** AGL, 200 knots  
 Crosswind pattern  
 2 or 3 replications

#### Spray Parameters for crosswind tests:

Booms -- Fuselage only.

Nozzles - 8005 TeeJet

Number of Nozzles – 9 nozzles 4 on left, 5 on right

Airspeed -- 200 knots ground speed.

Altitude -- 300'/500' above ground level.

Wind – Crosswind component.

Flow Rate – 4.5 gallons/minute

## Mission Protocols:

Determination of effective swath width at 300/500 feet release altitude with fuselage ULV configuration. Glass slides will be used to collect and sample droplets. Ten sampling stations will be setup along either Smith Road (east/west road south of Bravo Range), Oliver Road (north/south road), or Frostproof Rd (NW/SE), or Kissimmee Rd (east/west). This is a crosswind test, thus, we are looking for the wind direction to be within  $\pm 30^\circ$  of the direction of the road. Additionally, we need the average winds to be below 10 mph. Because wind will play an important part in these tests please be prepared to wait for appropriate winds during the entire range time. We are aiming for a transect length of 3 miles (5 miles if we can use Kissimmee. Some of the locations will not support this distance but we will try to get close.

The first altitude test will be at 300' AGL. We need the system to have stabilized prior to reaching the sampling points. 15 seconds prior to the sampling point and 15 seconds after should be sufficient (30 seconds total) but this value could change as we increase the altitude. **Navigators:** please record wind speed and direction at time of test. **Spray Operators:** Please record the spray-on time and pressure. Three passes over the target is all that is required for a given day's test. After the 300' test we will proceed the following test day to a 500' AGL test.

Microscope slides will be retrieved an hour after the plane has passed. Please do not fly through the test area during this time-frame.

## 7. CONTACTS:

1 March 2005

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

**SUBJECT:** Swath Characterization Test and Training Mission

**1. Purpose:** The purpose of the following series of tests was to determine swath characteristics (i.e. Average diameter of dispensed droplets and drift distance) of a mimic insecticide (BVA oil) dispersed at altitudes of 300' and 500' AGL by the C-130 aerial spray platform. This test consisted of swath characterization at various altitudes using a C-130 equipped with a Modular Aerial Spray System (MASS) with fuselage booms equipped with 8005 TeeJet nozzles. We also completed an additional replication of an "into the wind" test with 8001 nozzles (Please see Aerial Spray Report/Memorandum dated 14 December 2004 for more background information).

**2. Participants:** A list of test participants is included in attachment I.

**3. Spray Configuration:**

Mass-SP2G

Aircraft Number: 99106

Mission Identifier: QZNRKA405010

**4. Spray Parameters:**

Booms—Fuselage only.

Nozzles—8005, 8001 TeeJet.

Number of Nozzles— 4 per side (8005); 20 per side (8001), oriented down

Airspeed—200 knots ground speed.

Altitude—150', 300' and 500' AGL.

Wind—90 degree crosswind component or directly into the wind.

**5. Itinerary:**

13-14 February: Personnel Arrive at Avon Park (14 Feb) after diverting to Patrick AFB to inspect landing gear. Total ferry time was 4.8 hours (KYNG-KCOF-KAGR).

15 February: One testing sortie was flown for a total flight time of 2.0 hours. Nine spinning impingers ("spinners") were placed in an east-west orientation on Smith Road which is south of Bravo Range (Figure 1). Spinner stations were positioned in an array with each station separated 200 feet apart and spanning 800 feet left of the center station and 800 feet right of the center spinner station (This follows methods detailed in Aerial Spray report 10 December 2004). Twenty 8001 flat fan nozzles were used per side with fuselage booms along with a flow rate of 4.5 gmp target flow rate. Three passes were made to increase the number of

drops collected (Figure 2) and aircraft path was at 180°. Spray-on time for each pass was 40 seconds; spraying began 20 seconds prior to the aircrafts' point of intersection with Smith Road. Ground wind conditions averaged 1.0 knot at 206° during the test, while winds were recorded at altitude as 4 knots at 190°. Flow rate was 4.0 gpm and 71 psi. Drops were counted and measured under compound microscopes. A target of 100 drops per slide or 200 drops per station were measured. Volume median diameter (VMD) was calculated using the method described by Yeomans (1949), and droplet density was determined by dividing the number of drops counted by the number of microscope fields viewed times the area of each field (=drops per centimeter squared), and finally divided by the number of spray passes. An initial sortie of 1.0 hours was logged without getting the test completed because there was a problem with flow through the nozzles. The problem was remedied by Spray Maintenance and a second successful sortie of 1.3 hours was flown. Total flight time was 3.3 hours.

16 February: No sorties flown. Aircraft maintenance.

17 February: One testing sortie was flown with 2 individual testing passes completed. Ten spinning impingers ("spinners") were placed in an east-west orientation on Kissimmee Road, north of OQ range (Figure 1). Spinners were located approximately 1500' apart and were equipped with Teflon-coated microscope slides to document droplet size and drift distance from point of release. The aircraft flew north-south spray passes near the west end of Kissimmee Road, perpendicular to the line of spinners. Three 40 second passes were made; spraying began 20 seconds prior to the aircrafts' point of intersection with Kissimmee Rd. The aircraft flew directly over the 1<sup>st</sup> spinner location. Aircraft altitude was 300' AGL. Thirty minutes following the first test, the microscope slides were collected to be counted later and were replaced with fresh slides. A second test was accomplished at 500' AGL release altitude, while all other parameters remained the same. Ground wind conditions were 2.9 knots at 257 to 270 degrees. Flow rate for the 300 ft test averaged 5.0 gpm and 4.3 gpm during the 500 ft test. Boom pressure was reported between 42-74 psi over both tests. Total flight time was 1.9 hours.

18 February: Mission complete. Personnel return to Youngstown ARS. Total ferry time 3.6 hours.

**6. Results:** Over 5,800 drops were measured during the mission. Volume Mean Diameter (VMD) of the collected spray droplets from the 8001 "into the wind test" was 14 micrometers (range 2.4 – 37.8  $\mu\text{m}$ ) (Figure 2). This is in agreement with the previous test with 8001 nozzles which had an overall VMD of 18.4  $\mu\text{m}$ . The 300 ft altitude test detected drops at every station and results are graphically represented in Figure 3. The largest size drops were collected at station 2 ( $\approx$  1,600 ft downwind) and the most dense collection of drops occurred at station 3 ( $\approx$  3,200 ft downwind). Results from the 500 ft altitude spray test were less easy to interpret. Droplets were again seen on the first station slides (these slides were directly under the spray plane) and the density of these drops was unusually high (149 drop per  $\text{cm}^2$ ). Drop densities and average drop size remained relatively the same over the 2.7 mile sampling line (Figure 4).

**7. Conclusions:** Results of the "into the wind" test analyzing the 8001 sized nozzles were similar to previous tests and can be considered a valid replication indicative of the droplet spectrum produced by the fuselage booms under operational parameters (Aerial Spray report 10 December 2004).

Downwind altitude testing using fuselage booms and flat fan nozzles with BVA oil and Dibrom from 150' AGL has been shown to be an effective configuration for adult mosquito control. Our tests here releasing BVA oil at 300 ft indicate that an offset greater than 1,600 ft will be needed for mosquito control because the greatest concentration of drops were recovered 3,168 feet downwind. Droplet sizes and concentrations throughout the sampling transect are predicted to be effective at mosquito control if the material contained an active ingredient. These data agree with a previous 300 ft altitude test carried out in January 2004 which showed that the majority of large drops had fallen out of the spray cloud by the 3,000 ft mark. Unfortunately, the 500 ft altitude test reported here is more difficult to interpret. It is unclear why droplets were recovered directly under the plane in the 300ft or particularly at 500ft (drops were recovered at station one in both tests). The possibility exists that slides can be contaminated from a source other than the BVA released from the plane. Small droplets, such as the ones worked with here, are difficult to distinguish as to their original source.

**8. Recommendations:** Repeat 300' and 500' AGL releases with the addition of a fluorescent dye to distinguish between droplets and answer the question of contamination. Use active pesticide and caged mosquitoes as bioassays to determine efficacy of high altitude spray releases. Use minimum of 2 mile transect for such studies. Our next scheduled test of the fuselage configuration is 14-19 March 2005 at Craney Island, VA (Army Corps of Engineers) to complete characterization studies with Dibrom.

**9. Acknowledgements:** Excellent work by both the Aircrew and Spray Maintenance helped assure a successful test. Ground operations and data acquisition was enhanced by the helpful presence of MAJ (b) (6), CAPT (b) (6) and SMS (b) (6) Mr. (b) (6) (b) (6) Director of Manatee County Mosquito Control District, observed and offered his knowledge and technical support to the test.

1600: Depart Avon Park

4. Spray Configuration:

- a. MASS – SP2G
- a. Aircraft Number: 90-9105
- b. Mission Identifier: QZNRKA567013

5. Mission Protocols:

A. Avon Park Spray Testing Itinerary 13-18 Jan 05

1. Test 1. Determine the effective swath width with a fuselage ULV configuration released at 500 feet AGL with 8008 Nozzles.

- a. Spray mineral oil from fuselage booms using 5 (2 left side: 3 right side) nozzles at, 200 knots
  - i. We are looking for a crosswind spray (see below)
  - ii. 2 or 3 replications depending on results

2. Spray Parameters (use for all tests):

- a. Booms -- Fuselage only.
- b. Nozzles - 8008 TeeJet
- c. Number of Nozzles – 5 nozzles 2 on left, 3 on right
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 500' above ground level.
- f. Wind – Crosswind component.
- g. Flow Rate – 4.5 gallons/minute

3. Testing Protocols:

Determination of effective swath width at 500 feet release altitude with fuselage ULV configuration. Glass slides will be used to collect and sample droplets at 10 sampling stations along approximately 5 miles of projected spray path. Desired wind is at least +/- 30 degrees of collection station alignment and less than 10 MPH.

BVA oil will be mixed with 0.25% (volume/volume) ratio Fluorescent dye. Dye distinguishes our droplets from contaminate droplets when viewed under florescent microscope.

- a. The test will be a 500' AGL. System will be stabilized prior to reaching the sampling points. 15 seconds prior to the sampling point and 15 seconds after should be sufficient (30 seconds total. Three passes over the target is planned for each day's test.
- b. Microscope slides will be retrieved 1 hour after the plane has passed. Number and size of the droplets will be determined.

B. Flight exercise with Florida Mosquito Control Association:

Spray aircraft will participate in an exercise with the Florida Mosquito Control Association during their short course on aerial spray. Entomologists from the 757 AS will be on the ground working with the spray course personnel during the exercise. The exercise will simulate the application of mosquito larvicide down a runway at Buckingham Army airfield using water. Water sensitive cards will be used in collection and analysis of spray.

6. Aircraft Commander: Major (b) (6)
7. Support required at Avon Park Bombing Range is thru the Range Manager.
8. If you have any questions concerning this mission please contact DSN (b) (6) .

**3. Spray Configuration:**

Mass-SP2G  
Aircraft Number: 99105  
Mission Identifier: QZNRKA567013

**4. Spray Parameters:**

Booms—Fuselage only.  
Nozzles—8008 TeeJet.  
Number of Nozzles— 3 per side (8008)  
Airspeed—200 knots ground speed.  
Altitude—500' AGL.  
Wind—90 degree crosswind component.

**5. Itinerary:**

13 January: Personnel Arrive at Avon Park from YARS. Total ferry time was 3.5 hours (KYNG-KAGR).

14 January: One testing and training sortie was flown for a total flight time of 2.5 hours. Ten spinning impingers (“spinners”) were placed in an east-west orientation on Kissimmee Road (Figure 1). Spinner stations were positioned in an array with each station separated by 2500 feet. Five 8008 flat fan nozzles were used per side with fuselage booms along with a flow rate of 4.7 gmp target flow rate. Three North-South (crosswind) passes were made to increase the number of drops collected. Spray-on time for each pass was 40 seconds; spraying began 30 seconds prior to the aircrafts’ point of intersection with Kissimmee. Ground wind conditions maintained 9-15 knots at approximately 290° during the test. Flow rate was 4.5 gpm and 83 psi. Attempts were made to count and measure droplets under a compound fluorescent microscope. However, observation revealed no droplets collected on the slides, obviously a factor of the relatively high release heights compounded by the stiff wind. A determination was made to conduct further tests with lesser wind speeds.

15 January: One testing and training sortie was flown for a total flight time of 2.0 hours. Ten spinning impingers were placed in a NW-SE orientation along Frostproof road (Figure 1.) Spinner stations were positioned 1700 feet apart, with the 1<sup>st</sup> spinner station located in the most northwest point of the road. Six 8008 flat fan nozzles were used per side with fuselage booms with a flow rate of approximately 4.75 gpm at 56 psi. Three Southwest-Northeast passes were made, with each pass commencing and ending spray on or off 30 seconds prior to intersection with the road, respectively. Ground wind conditions averaged 2-4 knots at 310° during the test. 45 minutes after the last pass was completed, the spinning slides were collected and viewed under a fluorescent compound microscope. 50 droplets (if available) were counted for a slide located at each one of the sampling stations. Drops were measured for volume mean diameter, calculated using the method described by Yeomans (1949).

16 February: One testing and training sortie was flown for a total flight time of 2.0 hours. Spinning impingers were placed in a North-South orientation along Van Egan road (Figure 1.) Spinner stations were positioned 2500 feet apart, with the 1<sup>st</sup> spinner station located in a southern point of the road. Six 8008 flat fan nozzles were used per side with fuselage booms with a flow rate of approximately 4.7 gpm at 60 psi. Four West-East passes were made, with each pass commencing and ending spray on or off 40 seconds prior to intersection with the road, respectively. Ground wind conditions averaged 6-7 knots at 188° during the test. 45 minutes after the last pass was completed, the spinning slides were collected and viewed under a fluorescent compound microscope. Slide data was calculated as above.

17 January: No training missions were conducted. Entomologists redeployed to Fort Myer to coordinate an aerial spray demonstration and to give a presentation at the Lee County Aerial Spray Fly-in.

18 January: Mission complete. Personnel return to Youngstown ARS. Total ferry time 3.5 hours.

**6. Results:** Volume Mean Diameter (VMD) of the collected spray droplets from the 8008 crosswind test on Frostproof Road are depicted in figure 2. VMD’s ranged from approximately 32 microns 1700 feet from the aircraft release point, increasing to approximately 50 microns at 3400, and 5100 feet respectively, followed by a roughly

linear decrease in VMD at 13,600 from the aircraft release point. Drops were not located at stations greater than this distance, or at the sampling station directly beneath the aircraft flight path. VMD of drops collected from the Crosswind test on Van Eegan road are shown in Figure 3, along with droplet density corrected for a 4 pass scenario. VMD was approximately 68 microns for droplets collected at the sampler located 2500 feet from the aircraft release point. VMD's for the rest of the sampling locations varied from roughly 30 microns to over 50 microns all the way out to 22500 feet from the release point. Droplet density increased from approximately 0.75 drops/mm<sup>2</sup> at the 2500 foot sampling location, increasing to over 2.25 drops/mm<sup>2</sup> at 10000 feet, and then decreased to between 0.5 and 1.0 drops/mm<sup>2</sup>.

**7. Conclusions:** As expected, no drops were located directly beneath the material release point, in accordance with the dogma that drops are carried to be deposited downwind. Also, as evidenced by figure 2, a lighter wind condition may have resulted in a tighter and more “normal” distribution of droplet sizes. Indeed, no drops were collected at all at the limits of the test. This is in contrast to the test with increased windspeed (Figure 3), where large drops are collected generally close to the release point (2500'), and the rest of the drops are distributed fairly evenly over the entire sampling line, out to 22,500 feet from the release point. In this scenario it is entirely possible that the even smaller drops were not collected at all, as the smaller drops would have a tendency to deposit more slowly, and thus, be generally collected for downwind of the release point. In effect, we may have missed the end of the aerosol cloud.

Comparing this data to previous, it becomes obvious that our previous testing (droplet sizing and density counts may have been significantly biased by slide contamination. This has been suggested by (b) (6), (pers. Communication) and several others doing similar pesticide cloud characterization work. Looking at some of the data from the 2004 testing season (Figure 4), in which a test was conducted in almost identical (with respect to windspeed) conditions as the test recently conducted on Van Eegan (figure 3) we find that despite a 4 knot crosswind we find that “drops” are very small and have been collected directly below the material release point. These drops, however, did not have the benefit of being unambiguously “marked” with a fluorescent dye, and we consider the previous data suspect at best.

In light wind conditions it appears that the material drift can be defined quite well. Further, although there is not suitable replication at this point, windspeed increases appear to create a major shift in material cloud distribution (deposition), to the point where at the “higher winds” of, for example, greater than 10-12 knots may make the material cloud “uncontrollable” from a targeted application perspective.

The relationship between VMD and drop density in the Van Eegan test appears to be quite typical, and the peak density may suggest where the limits or middline of effective swath occurs.

Using 8008 flat fan nozzles we feel maximized the chances for successful material recovery on the spinners by increasing the size of the droplets coming out of the aircraft. Interestingly, the VMD's of droplets recovered are not that far out of the range of what has been traditionally thought of as “optimal” size for mosquito control, and in fact might prove to be quite effective for vector control. However, the general industry thinking is that “smaller is better” might also suggest that smaller nozzles are necessary for more complete atomization of the spray material. It is quite likely the properties of the spray clouds described in these test would be altered substantially and that the smaller drops produced would drift farther than witnessed in this series of tests.

Effective control will be dependent on functionally characterizing the effective width of a swath. To adequately do this, bioassays using live mosquitos AND the

characterization techniques described here will necessary. At 500', the key variable will undoubtedly be the single-pass rates that are applied (as well as the nozzle) selection. We may well see a scenario where multiple swaths might need to be flown to achieve a rate necessary to control vectors over the distance that the cloud travels. In short, very wide swaths, very high flow rates for each swath.

We considered this series of tests to be a success in that we effectively captured spray deposition from 500' AGL application and demonstrated that the spray material will deposit within a reasonable distance given relatively low-wind conditions.

**8. Recommendations:** Conduct testing in relatively mild conditions (less than 6 knots). Repeat this series of tests using 8005 flat fans for comparison. Conduct a series of mosquito bioassays spray active ingredient (Dibrom) over a long distance sampling line (5 plus miles) and simultaneously conduct swath characterizations to attempt to correlate insect mortality with drops size and drop density. Conduct bioassays with different flow rates using a single pass application. Initial applications should be relatively low (standard 2000', 0.5 oz/acre Dibrom parameters, 3.6 gpm), and significantly higher (5x or 10x rates). If a single pass application rate will not support this, conduct multiple passes.

**9. Acknowledgements:** Excellent work by both the Aircrew and Spray Maintenance helped assure a successful test. Ground operations and data acquisition was enhanced by the helpful presence of MAJ (b) (6) and SMS (b) (6) Dr. (b) (6), associate professor, Florida A&M, offered her knowledge and technical support to the test.

- b. Aircraft Number: 99105
- c. Mission Identifier: QZNRKA567013

**6. MISSION PROTOCOLS:**

**Avon Park Spray Testing 13-18 Jan 06**

Test 1. Determining the effective swath width with a fuselage ULV configuration released at 500 feet AGL with 8008 Nozzles.

**Spray Parameters**

Spray: BVA oil  
Booms -- Fuselage only  
Number and type of nozzles – 8008; 5 Nozzles total = (2 left, 3 right) Airspeed -- 200 knots ground speed  
Altitude -- 500' above ground level  
Wind – crosswind test  
Flow Rate – 4.5 gallons/minute

Fig. 1. Diagram of crosswind test. First sampling location will be on the Upwind aspect. Aircraft will pass directly over 1<sup>st</sup> sampling site (no offset).

#### Mission Protocols:

Determination of effective swath width at 500 feet release altitude with fuselage ULV configuration. Glass slides will be used to collect and sample droplets. Ten sampling stations will be setup along either Van Eeghan (north/south), Frostproof (north-west/southeast) or Kissimmee Rd (east/west). This is a crosswind test, thus, we are looking for the wind direction to be within  $\pm 30^\circ$  of the direction of the road. Additionally, we need the average winds to be below 10 mph. Because wind will play an important part in these tests please be prepared to wait for appropriate winds during the entire range time. We are aiming for a transect length of approximately 5 miles if possible. Some of the locations will not support this distance but we will try to get close.

In the BVA oil will be mixed 0.25% (volume/volume) ratio Fluorescent dye. This dye will allow us (when viewed with a fluorescent microscope) to determine exactly the drops that are coming out of the spray system as opposed to drops resulting from environmental contaminants. The dye will be dissolved in HAN and mixed with the BVA oil prior to the 1<sup>st</sup> days testing.

We need the system to have stabilized prior to reaching the sampling points. 15 seconds prior to the sampling point and 15 seconds after should be sufficient (30 seconds total) but this value could change as we increase the altitude. The aircraft will dispense spray directly over the 1<sup>st</sup> sampling location. There will be no offset. **Navigator:** please record wind speed and direction at time of test. **Spray Operators:** Please record the spray-on time and pressure. Three passes over the target is all that is required for a given day's test. Ground personnel for the test will position themselves at the 1<sup>st</sup> sampling location and provide visual cues or mirror flashes as appropriate.

Microscope slides will be retrieved an hour after the plane has passed. Please do not fly through the test area during this time-frame.

Test one will be repeated on subsequent days until a sufficient number of replications have been completed.

20 January 2004

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

SUBJECT: Swath Characterization Test and Training Mission

**1. Purpose:** The purpose of this series of tests was to determine swath characteristics (i.e. Volume Mean Diameter of dispensed droplets and drift distance) of a mimic insecticide (soybean oil) dispersed at altitudes of 150' and 500' AGL by the C-130 aerial spray platform. This test consisted of swath characterization at various altitudes using a C-130 equipped with a Modular Aerial Spray System (MASS) with fuselage booms equipped with 8005 TeeJet nozzles.

**2. Participants:** A list of test participants are included in attachment I.

**3. Spray Configuration:**

Mass-SP2G

Aircraft Number: 99106

Mission Identifier: QZNRKA999347

**4. Spray Parameters:**

Booms—Fuselage only.

Nozzles—8005 TeeJet.

Number of Nozzles—3 and 4 per side respectively, oriented straight down.

Airspeed—200 knots ground speed.

Altitude—150' and 500' AGL.

Wind—90 degree crosswind component.

**5. Itinerary:**

13 December: Personnel Arrive at Avon Park. Total ferry time was 3.6 hours.

14 December: No sorties were flown due to inclement weather.

15 December: One testing sortie was flown with 2 individual testing passes completed. Ten spinning impingers ("spinners") were placed in north-south orientation on Oliver Road between Alpha and Foxtrot ranges (see appendix 2). Spinners were located approximately 500' apart and were equipped with Teflon-coated microscope slides to document droplet size and drift distance from point of release. Spinners were also equipped with oil-sensitive cards located on the spinner mounting poles. The aircraft flew a spray pass to the north end of Oliver Road, perpendicular to the line of spinners. Spray-on time for the oil was 40 seconds, half of which was dispensed prior to the aircrafts' point of intersection with Oliver

Road. Aircraft offset was 500' North of the 1<sup>st</sup> spinner location. Aircraft altitude was 150' AGL. Following the 1<sup>st</sup> pass, the microscope slides were collected to be counted later and were replaced with fresh slides. The test was repeated with the same parameters. Ground wind conditions were light and variable from 270 to 90 degrees at 4 MPH. Flow rates for both passes ranged from 4.6 to 5.3 gph at 26 to 28 psi. Total flight time was 2.0 hours.

16 December: One testing sortie was flown with 2 passes completed for 1 test. Spinners with microscope slides were placed in an east-west orientation on Smith road with spinners located 1500' apart. Material was dispensed 1500' upwind of the first droplet collector (Smith and Old Bravo roads). Aircraft trajectory during Spray-on was directly over Old Bravo road flying North to South. The aircraft made 2 spray-on passes of 40 seconds apiece as described previously. Aircraft altitude was 500' AGL for each pass. Thirty minutes following the final pass, an attempt was made to retrieve the microscope slides from the spinners. However, it commenced to rain at that time, rendering any results from the test invalid. Total flight time was 0.7 hours.

17 December: No sorties were flown due to inclement weather.

18 December: One testing sortie was flown with 2 passes completed for 1 test. Test parameters and set-up were identical to that on 16 December except that the spinners were oriented north-south on Oliver road. Flight trajectory was from west to east, intercepting the north end of Oliver road. Microscope slides were collected 30 minutes after conclusion of the 2<sup>nd</sup> spray pass. Winds at altitude were approximately 12 knots at 340 degrees. System flow rates for both passes ranged from 4.0 to 4.7 gpm at 10 to 17 psi. Total flight time was 1.0 hours.

19 December: Mission complete. Personnel return to Youngstown ARS. Total ferry time 3.4 hours.

**6. Results:** Volume Mean Diameter (VMD) of the collected spray droplets from the 150' spray altitude ranged from 31.25 to 5.0 microns after a spread factor had been calculated with the raw data. VMD was quite large at the first 2 sampling stations (500 and 1000 feet from flight path), with values of 31.25 and 21.88 microns, respectively. At 1500' VMD decreased to 7.5 microns, followed by an additional decrease to 6.25 microns from 2000 to 3500 feet from the flight path, and a further decrease to 5 microns from 4000 to 5000 feet from the flight path. The range of the droplet sizes collected was greatest near the flight path of the aircraft, and dropped substantially as downwind distance from the flight path increased. Droplet size distributions were noticeably skewed (positively) from 1500 to 3000 feet, suggesting the collection of a few very large droplets and many smaller droplets of various sizes. Droplet size distribution approached normality from 3500 to 5000 feet. VMD of the collected spray droplets from the 500' spray altitude ranging from 47.5 to 18.75 microns in diameter. No droplets were collected at the 1000' offset from the spray path. Maximum VMD of droplets was at 3500' from the spray path, in general decreasing to 18.75 at 14,000'. Distribution of droplets at each sampling location were approximately normal. The number of drops available to count on the microscope slides ranged from 11 to 77. The target number for each location was 100.

**7. Conclusions:** Swath characteristics generated from the 150' spray pass appear to be quite typical of many published characterizations including our own C-130 ULV wing-boom configuration, with the majority of large droplets collected from spinners nearest the flight path. VMD of droplets at 1500' and beyond indicate a droplet size suitable for effective control of biting flies when conducting space sprays, however, it should be noted that VMD is a descriptive statistic that which only indicates the median droplet diameter, and does not describe the distribution of droplet sizes at a particular collection point. In order to elucidate the effective swath width, in future tests using fuselage spray booms, insect bioassays at each collection point will also be necessary, using material with an active ingredient. Despite this current limitation, this 150' test seems to indicate that using fuselage booms to apply active ingredient in a space spray from a C-130 may be effective. Results from the 500' test were more ambiguous. VMD of droplets collected were quite large in comparison with the 150' test at all collection points. Further, relatively few drops were collected as seen by the absence of available data. Despite the extensive sampling distance involved, it may be that some of the smaller droplets drifted even further downwind, in which case future tests would necessitate using even greater sampling distances. An alternate theory to explain the data may be that at the higher altitude, the individual droplets had more opportunity to coalesce. This theory remains improvable at this time as our sampling line was limited to approximately 3 miles. In future tests we intend to increment spray altitudes less dramatically (i.e. 100' increments) and extend our sampling lines in order to attempt to explain our current data set. Our next scheduled test of the fuselage configuration is 24-29 January 2004 at Avon Park Air Force Bombing Range.

8 November 2000

**MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497-0198)**

**FROM: 757 AS/DOS**

**SUBJECT: Capability and Concept of Operations for Aerial Spray of Weed  
Control at Mountain Home AFB, Saylor Creek Range ID (13-19 Nov 00)**

1. **Purpose of the Aerial Spray Mission:** This mission was requested and funded by 366 CES/CERF to perform an aerial spray application of Oust® at the Saylor Creek Range at Mountain Home AFB ID to inhibit annual re-growth of the undesirable cheatgrass, thus, allowing native vegetation to establish and be competitive to cheatgrass.
2. **Proposed Benefits of the Requested Mission:** To prevent fire hazards and to inhibit re-growth of the undesirable cheatgrass allowing native vegetation to establish and be competitive.
3. **Capability:** Spray Aircraft Tail Number 99107 Available 13-19 November 2000
4. **Concept of Operations:**
  - a. **13 Nov 00 (Monday):**
    - 1100 Take Off KYNG
    - 1450 Land KMUO; Safety Briefing, Configure A/C, Aircrew Mission planning meeting
  - b. **14 Nov 00 (Tuesday): Range time 0700-1030/1300-1415 (additional times available on case-by-case basis)**
    - 0600 Show Time
    - 0730 Take-Off KMUO
    - 0745-1030 Range available for Spray mission
    - 1045 Land KMUO
    - 1245 Take-Off KMUO
    - 1430 Land KMUO
  - c. **15 Nov 00 (Wednesday): Range Time 0700-0945/1245-1400**
    - 0600 Show Time
    - 0730 Take Off KMUO
    - 0705-0945 Range available for Spray mission
    - 1000 Land KMUO
    - 1230 Take-Off KMUO
    - 1415 Land KMUO
  - d. **16 Nov 00 (Thursday): Range Time 0700-0945/1245-1400**
    - 0630 Show Time
    - 0800 Take-Off KMUO
    - 0700-0945 Range available for Spray mission
    - 1000 Land KMUO
    - 1230 Take-Off KMUO

- 1415 Land KMUO
- e. **17 Nov 00 (Friday): Range Times 0700-1015/1500-1830 (Flush Day)**  
0630 Show Time  
0800 Take-Off KMUO  
0700-1015 & 1530-1830 Spray Mission as Determined by Mission Commander
- f. **18 Nov 00 (Saturday): Range Time 0945-1800 if needed**  
0800 Show Time  
0930 Take Off KMUO  
1130 Land KMUO  
1500 Take Off KMUO  
1600 Land KHIF
- g. **19 Nov 00 (Sunday):**  
0730 Show Time  
0900 Take-Off KHIF  
1400 Land KYNG
5. **Spray Parameters:**
- a. **Acreage:** 1,460 Acres (areas determined by PMP to spray for cheatgrass)
  - b. **Altitude:** 100' AGL
  - c. **Ground Speed:** 200 Knots
  - d. **Swath Width:** 200 Feet
  - e. **Pesticide:** Oust<sup>®</sup>
  - f. **Flow Rate:** 651 Gallon/Minute
  - g. **Application Rate:** 7 Gal/Acre
  - h. **Deploy:** 3.4 Hrs
  - i. **Re-Deploy:** 2.8 Hrs
  - j. **Spray Time:** 10 Hrs (or as called by PMP)
6. **Primary Key Personnel:**
- a. **Mission Commander:** Lt Col (b) (6)
  - b. **Aircraft Commander:** Capt (b) (6)
  - c. **Certified Pest Management Professional(s):** LtC (b) (6) and Maj (b) (6)
  - d. **Toxicologist:** Capt (b) (6)
7. Support required at Mountain Home AFB has been coordinated with 366 CES/CERF, Ms (b) (6), Spray Coordinator, DSN (b) (6).
8. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616 or DSN 346-1161, ATTN: 757 AS/DOS.

Chief, Aerial Spray (757 AS/DOS)  
DSN (b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MOUNTAIN HOME AFB RANGE, ID

### 13 – 19 NOV 2000

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: MAJ (b) (6) , CPT (b) (6) , CPT (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) MSG (b) (6) , MSG (b) (6)

##### b. Maintenance:

- (1) Spray MX: SMS (b) (6) , SSG (b) (6) , SSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , TSG (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Ground Support/CPM Professionals: LTC (b) (6) , MAJ (b) (6) , CPT (b) (6)

#### 2. SCHEDULE: (Local Times; Total of 6 Lifts required, 2 Lifts per day WX depending)

##### 13 NOV (Monday):

0900: Show at KYNG

PPR # - 318-1

1100: Depart KYNG

1450: Land KMUO/Safety Briefing, MX configures aircraft; Aircrew plan next day's mission

##### 14 NOV (Tuesday): Range Time 0700-1030/1300-1415

0600: Show time

0730: Take Off KMUO (As determined by Mission Cmdr)

0735: Sunrise

1045: Land KMUO

1245: Take Off KMUO

1430: Land KMUO

##### 15 NOV (Wednesday): Range Time 0700-0945/1245-1400

0600: Show time

0730: Take Off KMUO (As determined by Mission Cmdr)

0736: Sunrise

1000: Land KMUO

1230: Take Off KMUO

1415: Land KMUO

##### 16 NOV (Thursday): Range Time 0700-0945/1245-1400

0600: Show time

0730: Take Off KMUO (As determined by Mission Cmdr)

0737: Sunrise

1000: Land KMUO

1230: Take Off KMUO

1415: Land KMUO

##### 17 NOV (Friday): Range Time 0700-1015/1530-1830 (FLUSH DAY)

0600: Show time

0730: Take Off KMUO (As determined by Mission Cmdr)

0739: Sunrise

1030: Land KMUO

**18 NOV (Saturday): Range Time 0945-1800 (If Needed)**

0740: Sunrise; Show Time 0800

0930: Take Off KMUO

1130: Land KMUO (Or as required)

1500: Take Off KMUO

1600: Land KHIF

**PPR # - None Required at Hill AFB**

**19 NOV (Sunday)**

0830: Show time

1000: Take Off KHIF

1700: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** UHF Radio, Cardholders, Kromekote Cards, Tool Kit, VHF Radio, Cell Phone, Laptop Computers and accessories, spinners and Teflon coated slides; microscope
- c. **Navigator:** Maps/Map Bag, Validation Map, Toshiba Computer
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Mobility Kit, MASS Spares, Spill Kit, Pesticide Safety Binder, Safety Equipment and Tool and other equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION: N/A**

**5. PARKING PLAN: Bomb Loading Area**

**6. RADIO FREQUENCIES:**

- a. **Air To Ground:** Entomologists: 292.2(range); Maintenance 384.7
- b. **Mt Home:** PTD: 372.2, ACC CP (Raymond 27): 381.3, ATIS: 273.5, TWR: 133.85 / 253.5, GND: 120.5 / 275.8, RAPCON: 259.1, Salt Lake Center: 387.15/363.0
- c. **Range:** Saylor Creek Range: 292.2 pri / 381.3 sec  
Sagebrush Control: 251.2, Paradise MOA: 272.7/236.05/225.55  
Owyhee MOA: 392.2/266.35, Bruneau/Sheep Creek MOA: 251.875

**7. IN-BRIEFING: Upon Arrival.**

**8. SPRAY CONFIGURATION:**

- a. **System:** SP-3G
- b. **Nozzle Tips/Orientation:** Oil Spill Dispersant Nozzles/Straight Back
- c. **Number:** Fuselage – 8 (4 each side); Wing 50 (25 each side) with ball shut-off valves
- d. **Booms:** Fuselage and Wing Booms (only fuselage and upwind wing booms will be used)
- e. **Aircraft:** 99105 (99106 spare) **Mission Identifier:** QZNRKA225318
- f. **Profile:** Planned HV Profile

**10. SPRAY PARAMETERS:**

- a. **Altitude:** 100' AGL
- b. **Swath Width.** 200 feet
- c. **Flow Rate.** 651 Gallons/Minute
- d. **Application Rate.** 7 gal/acre (Approximately 1460 acres to be treated for cheatgrass)
- e. **Ground Speed:** 200 Knots

**11. SPRAY MIXING AND LOADING: On Bomb Loading Area**

## 12. SPRAY MONITORING OR TESTING: Performed by the CPMPs

NOTES: Will use water sensitive cards.

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. Installation Sprayed: Mountain Home AFB, Saylor Creek Range, ID (Figure 1)
- b. Mission Duration: 13-19 Nov 00
- c. Purpose of Application: Cheatgrass
- d. Application Date(s) and time(s) (Local):
  - (1) 15 Nov: 1245-1345, 1535-1700
  - (2) 16 Nov: 1245-1340, 1530-1625
  - (3) 17 Nov: 1520-1605
- e. Acres Treated: 1,443
- f. Project Coordinator (Name/Rank/Title/Phone #): (b) (6), Natural Resource Manager, (b) (6)
- g. Date Spray Map Last Approved: 13 Nov 00
- h. Installation In-Briefing: (When/Where/Briefer/s): 13 Nov 00, 1530, Mountain Home AFB, Maj (b) (6)

## 2. OPERATIONAL:

- a. Mission Commander: LtC (b) (6)
- b. Certified PMP/s (Category 11): LtC (b) (6) & Maj (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: Capt (b) (6)
  - (2) Pilot(s): Maj (b) (6) & Capt (b) (6)
  - (3) Navigator: Maj (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6), MSG (b) (6) & MSG (b) (6)
- d. Spray Maintenance/Pesticide Loaders: SMS (b) (6), SSG (b) (6) & SSG (b) (6)
- e. Crew Chief(s): MSG (b) (6) & TSG (b) (6)
- f. Avionics: TSG (b) (6)
- g. Flying Data:
  - (1) Spray Sorties/Hours: 7 Sorties; 8.0 Hours
  - (2) Ferry Sorties/Hours:
    - (a) Spray A/C 99105: 3 Ferries; 10.8 Hours
    - (b) Support A/C 923023 (13-14 Nov): 2 Ferries; 10.5 Hours
    - (c) Support A/C 919144 (17-19 Nov): 3 Ferries; 11.8 Hours

## 3. PESTICIDE:

- a. Trade Name: Oust<sup>®</sup>
- b. EPA Registration Number: 352-401; EPA SLN #ID-000019
- c. Formulation Sprayed: Water dispersible granule
- d. Pounds Pesticide Loaded: 82
- e. Pounds Pesticide Applied: 82
- f. Gallons and Name Diluent Used: 7,166 gallons water
- g. Gallons and Name of Flush Used: 600 Gal of water & 2 Gal Remove<sup>®</sup>
- h. Other Additives Used: 4 Gal Control<sup>®</sup>; 30 Gal Blaze-on<sup>®</sup> dye
- i. Application Rate: 7 Gal/Acre 15 Nov 00 (1 Oz Oust<sup>®</sup>); 5 Gal/Acre 16-17 Nov 00 (1 Oz Oust<sup>®</sup>)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99105)
- b. Spray System (Modules Used) and System ID #: SP-3G
- c. Spray System Configuration: Wing and fuselage booms
- d. Nozzle Type/Size: Raindrop nozzles
- e. Nozzle Orientation & Number Used: Straight Back\Wing 50 (25 each side); Fuselage 12 (6 each side)
- f. Pressure: 40 psi
- g. Flow Rate: 325 gpm 15 Nov (two passes flown over each swath); 465 gpm 16-17 Nov (1 pass per swath)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 200 Ft
- b. Spray Offset: 600 Ft
- c. Spray Release Altitude: 100 Ft AGL; Second sortie on 16 Nov flown at 150 Ft because of low wind
- d. Ground Speed: 200 knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 270/5-10 mph (15 Nov); 30/3mph (16 Nov); 270/5mph (17 Nov)
  - (2) Release Altitude:
- b. Temperature (Degrees Fahrenheit): 34° (15 Nov); 37° (16 Nov); 27° (17 Nov)
- c. Relative Humidity: 85% (15 Nov); 60% (16 Nov); 80% (17 Nov)
- d. Cloud Cover: 100% (15 Nov); 0% (16 Nov); 100% (17 Nov)
- e. Source: Ground observation

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Visual observation of blue dye on snow (Figure 2)
  - (2) Results: See remarks
- b. Effectiveness:
  - (1) Technique/s Used: Vegetation measurements
  - (2) Results: Will be determined in the spring of 2001

**8. REMARKS:** The coverage of the spray block was excellent except for the first sortie on 16 Nov 00 which had 32 oz per 1000 gallons of the drift retardant Control® in the mix in an attempt to reduce drift from wingtip vortices. Downwind drift of the smallest droplets was up to 0.6 mile with 16 oz of Control® per 1000 gallons when winds were 8 to 10 mph. No gaps in coverage were observed with the 32 oz rate and wind speeds from 8 to 10 mph. The 32 oz rate proved to be too much for the wind speed of 3 mph on 16 Nov 00 and caused gaps in the spray pattern between the fuselage boom and wing booms. In the second sortie, 16 oz of Control® per 1000 gallons was used and the altitude was increase to 150 feet. This eliminated spray gaps for the 3 mph wind speed. In situations where less drift is required, it is recommended that only the fuselage booms be used, and the swath be narrowed. This will eliminate drops being spread further downwind in the wingtip vortices.

**CERTIFIED PEST MANAGEMENT PROFESSIONAL**

(b) (6) , PhD, LtC, USAFR

Aerial spray of cheatgrass with a C-130 at Saylor Creek Range Idaho.

Droplet distribution of aerial spray at Saylor Creek Range Idaho.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MOUNTAIN HOME AFB RANGE, ID

### 13-28 SEPTEMBER 2007 CH2

**PURPOSE/BENEFITS/OBJECTIVES.** To prevent fire hazards, inhibit annual re-growth of cheatgrass on Saylor Creek Range and allow native vegetation to establish and be competitive.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

##### 13-21 SEP 07 CREW

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: Capt (b) (6), Capt (b) (6), Capt (b) (6)
- (3) Navigator: LtC (b) (6)
- (4) Flight Engineer: Msgt (b) (6)
- (5) Spray Operators: Msgt (b) (6), Msgt (b) (6)

##### b. Maintenance:

- (1) Spray MX: Tsgt (b) (6), Tsgt (b) (6), Tsgt (b) (6), Tsgt (b) (6)
- (2) Crew Chiefs: Tsgt (b) (6), AIC (b) (6)
- (3) Avionics: (b) (6)
- (4) Engine Shop: Msgt (b) (6)

##### c. Entomologists: LTC (b) (6), Maj (b) (6)

##### 20-28 SEP CREW

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: MAJ (b) (6)
- (3) Flight Engineer: Msgt (b) (6) (17 Sep – 28 Sep)
- (5) Spray Operators: TBD

##### b. Maintenance:

- (1) Avionics: Smsgt (b) (6)

##### d. Entomologists: Maj (b) (6),

#### 2. SCHEDULE: (Local times; total of 13 lifts required, 1-2 lifts per day)

##### 13 SEP (Thursday):

0800: Show at KYNG PPR # 259321  
1000: Depart KYNG  
1400: Land KMUO (Local)  
1430 Safety Briefing, MX configures aircraft; plan next day's mission  
1530 Spray Mission In-brief for at Base Operations Bldg 262

##### \*\* ASAP After landing

\* Crew members, Crew chiefs will be on Spray Aircraft

##### Support Aircraft PPR#253921

0800 Crew show  
1005 Depart YNG  
1435 Land MUO

##### 14 SEP Support Aircraft

0830 Crew Show  
1030 Depart MUO  
1700 Arrive YNG

Spray Maintenance additional personnel will ride on support aircraft.

##### 14 SEP (Friday): Range Time 0700-1000, (1-2 sorties if possible)

0530: Crew Show time/Load water and chemical

**0700:** Take Off KMUO (As determined by Mission Cmdr)  
 0721: Sunrise  
 0830 Reload Chemical and depart ASAP if second lift  
 1000: Land KMUO  
**15 SEP (Saturday): Range Time Free All Day, (2-3 sorties if possible)**  
 0730: Show time/Load water and Chemical  
**0900:** Take Off KMUO  
 0722: Sunrise  
 Multiple lifts TBD – Wx permitting 2-3 sorties  
**16 SEP (Sunday): Range Time Free all day (2-3 sorties if possible)**  
 0800: Show time  
**0900:** Take Off KMUO  
 0723: Sunrise  
 Multiple lifts TBD – Wx permitting 2-3 sorties  
**17 SEP (Monday): Range Time 0700-1000, (1 sorties )**  
 0730: Crew Show time/Load water and chemical (FOD WALK @MUO)  
**0900:** Take Off KMUO (As determined by Mission Cmdr)  
 0724: Sunrise  
 0830 Reload Chemical and depart ASAP if second lift  
 1000: Land KMUO  
**18 SEP (Tuesday): Range Time 0700-1000, (1-2 sorties if possible)**  
 0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
 0725: Sunrise  
 0830 Reload Chemical and depart ASAP if second lift  
 1000: Land KMUO  
**19 SEP (Wednesday): Range Time 0700-1000, (1-2 sorties if possible)**  
 0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
 0726: Sunrise  
 0830 Reload Chemical and depart ASAP if second lift  
 1000: Land KMUO  
**20 SEP (Thursday): Range Time 0700-1000, (1-2 sorties if possible)**  
  
**20 SEP            Swap out Aircraft                    PPR# 253924**  
                  1000   Depart YNG  
                  1430   Arrive MOU  
                  \*\*Spray crew members in crew rest for 0530 show  
**21 SEP            Swap out Aircraft**  
                  0830   Crew Show  
                  1030   Depart MUO  
                  1700   Arrive YNG  
  
**21 SEP (Friday): Range Time 0700-1000, (1-2 sorties if possible)**  
 0530: Crew Show time/Load water and chemical  
**0700:** Take Off KMUO (As determined by Mission Cmdr)  
 0729: Sunrise  
 0830 Reload Chemical and depart ASAP if second lift  
 1000: Land KMUO  
  
**22 SEP (Saturday): Range Time 0700-1000, (1-2 sorties if possible)**  
 0800: Crew Show time/Load water and chemical  
**0900:** Take Off KMUO (As determined by Mission Cmdr)  
 0730: Sunrise

0830 Reload Chemical and depart ASAP if second lift

1000: Land KMUO

**23 SEP (Sunday): Range Time 0700-1000, (1-2 sorties if possible)**

0800: Crew Show time/Load water and chemical

**0900:** Take Off KMUO (As determined by Mission Cmdr)

0731: Sunrise

0830 Reload Chemical and depart ASAP if second lift

1000: Land KMUO

**24 SEP (Monday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical

**0700:** Take Off KMUO (As determined by Mission Cmdr)

0732: Sunrise

0830 Reload Chemical and depart ASAP if second lift

1000: Land KMUO

**25 SEP (Tuesday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical

**0700:** Take Off KMUO (As determined by Mission Cmdr)

0733: Sunrise

0830 Reload Chemical and depart ASAP if second lift

1000: Land KMUO

**26 SEP (Wednesday): Range Time 0700-1000, (1-2 sorties if possible)**

0530: Crew Show time/Load water and chemical

**0700:** Take Off KMUO (As determined by Mission Cmdr)

0734: Sunrise

0830 Reload Chemical and depart ASAP if second lift

1000: Land KMUO

**27 SEP (Thursday)**

Maintenance system clean up

**Support Aircraft Arrival:** [PPR#253925](#)

1000 Depart YNG

1430 Arrive MUO

**28 SEP (Friday) Both Aircraft**

0830: Show time

1000: Take Off KMUO

1730: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Mission Commander:** 1 Cellular Phone
- b. **Entomologist:** UHF Radio, Cardholders, Water Sensitive Cards, Tool Kit, VHF Radio, Cell Phone, Laptop Computer
- c. **Navigator:** Maps/Map Bag, Validation Map,
- d. **Spray Operator:** Safety Gear, computer
- e. **Spray Maintenance:** Mobility Kit, MASS Spares, Spill Kit, Pesticide Safety Binder, Safety Equipment and Tool and other equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION: N/A**

**5. PARKING PLAN:** Transient Ramp in front of Base Operations

**6. RADIO FREQUENCIES:**

- a. **Air To Ground:** Entomologists: 123.45 VHF; 292.2 (range); Maintenance 384.7
- b. **Mt Home:** PTD: 372.2/138.9, ACC CP (Raymond 27): 381.3, ATIS: 273.5, TWR: 133.85 / 253.5, GND: 120.5 / 275.8, RAPCON: 259.1, Salt Lake Center: 387.15/363.0
- c. **Range:** Saylor Creek Range: 134.1 / 292.2 pri / 381.3 sec  
Sagebrush Control: 251.2, Paradise MOA: 272.7/236.05/225.55  
Owyhee MOA: 392.2/266.35, Bruneau/Sheep Creek MOA: 251.875

**7. IN-BRIEFING:** Upon Arrival. At 1530 Airfield Management Office

8. Billeting:

**Sleep Inn Foot Hills \$60 or \$65/night depending on the room you get**

1180 US 20 Mountain Home, ID

208-587-9743

Fax: 208-587-7382

9 Vehicles: Mountain Home CE will provide vehicles.

2- 6 Pax (OPS)

1 Mini-van & 1 6 Pax (Maint)

**8. SPRAY CONFIGURATION:**

- a. **System:** SP-3G
- b. **Nozzle Tips/Orientation:** Raindrop/Straight Back
- c. **Number:** Fuselage – 17 nozzles (8 left side: 9 right side)
- d. **Booms:** Fuselage
- e. **Aircraft:** 99105 **Mission Identifier:** QZNRKA757256
- f. **Profile:** Planned HV Profile

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 100' AGL (we are treating at 46.5 acres/minute)
- b. **Swath Width.** 100 feet
- c. **Flow Rate.** 326 gal/min
- d. **Application Rate.** 7 gal/acre; approximately 3,200 acres to be treated for cheatgrass
- e. **Ground Speed:** 200 Knots

**10. SPRAY MIXING AND LOADING:**

**a. Composition of Each Gallon:**

(1) 0.57 ounces of Plateau® (we want 4oz in 7 gallons per acre)

(2) 1 ounce of Sta-put® Drift Retardant

(3) 126.4 ounces of water

**b. First Load (4 Tanks of 450 gallons each + sump of 75 gallons)**

(1) Fill to 450 gal water/tank using the pump on the water tanker truck. This is done by putting the filler hose into the rear tank with all tanks open to the common sump. Total water in tanks = 1,800 gal.

(2) 75 gal/water in sump

(3) Total water added = 1,800 gallons

(4) Upload 8.03 gal (30.4L)/Plateau; add 14 gal Sta-put while agitating approximately 5-7 min

Total quantity mix 1822 gallons

**11. SPRAY MONITORING OR TESTING: Performed by the CPMPs**

**NOTES:** Will use water sensitive cards.

**12. CONTACTS:**

**MEMORANDUM FOR HQ AFRC/DOOM**

**FROM:** 757AS/DOS  
3976 King Graves Rd  
Vienna Ohio 44473-0910

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Parris Island MCRD, SC

1. Aerial spray mission controlling biting midges and mosquitoes with insecticide to reduce the negative impact on outdoor training at Parris Island MCRD, SC.

2. Concept of Operations:

- a. 14 April (Tuesday)  
1100 Depart KYNG  
1300 Land KNBC  
1830 Depart KNBC  
2000 Land KNBC
- b. 15 April (Wednesday)  
1830 Depart KNBC  
2000 Land KNBC
- c. 16 April (Thursday)  
1200 Depart KNBC  
1400 Land KYNG

3. Maj (b) (6) will act as Mission Commander.

4. Maj (b) (6) will act as Aircraft Commander

5. Support required at Parris Island has been completed.

(b) (6), Maj, USAFR  
Assistant Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 14-16 APR 2009

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: Maj (b) (6) , Maj (b) (6)
- (2) Navigator: LTC (b) (6)
- (3) Flight Engineer: TSG (b) (6)
- (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSgt (b) (6) , SSgt (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , MSG (b) (6)
- (3) Avionics: MSG (b) (6)

##### c. Entomologist: Maj (b) (6) -MC

#### 2. PPR REQUIREMENTS: 104-01 (PFC Bullock)

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

**14 APR (Tuesday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

0900: Show Time/Load system  
1100: Take Off KYNG  
1300: Land KNBC  
1300: Safety Briefing  
1430 Installation Brief  
1700: Wx Decision and Load Chemical  
Take off TBD (approx.1850) or mission (Start Spray 1.0 hrs prior to Sunset)  
1950: Sunset

**15 APR (Wednesday):** Adulticide sortie at Parris Island Wx/backup

1500: Showtime  
1700: Wx Decision and Load Chemical  
Take off TBD (approx.1850) or mission (Start Spray 1.0 hrs prior to Sunset)  
1951: Sunset

**16 APR (Thurs) Redeploy to YNG; this will occur on Wed following successful spray on Tues.**

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander Cell Phone

##### b. Entomologist/CPMP:

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

##### c. Navigators:

- (1) Maps
- (2) Templates

##### d. Spray Maintenance:

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 7 open for 8005's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 90-9106
- f. **Mission Identifier:** QZNRKA053104

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 8 Minutes
- h. **Flow Rate:** 2.7 gallons/Minute

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Beaufort Tower: 119.05 MCAS TWR  
Beaufort Approach 123.7  
Hilton Head Arpt: 118.975 Tower, 123.0 CTAF (tower open until 0100 hrs Z)  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 123.4 V**

**10. TRANSPORTATION:** Parris Island will provide vehicles for transportation to and from quarters and for messing. Vehicles will be at Base Operations.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP &Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC: (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX)**

**910 AW AERIAL SPRAY UNIT**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S**  
**POST-MISSION REPORT (replaces AFRC Form 55)**  
**PARRIS ISLAND MCRD, SC 14-16 APR 2009**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 14-16 APR 2009
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 14,15 Apr 2009
- e. Time/s of Application (Local): 1845-1920 (14 Apr); 1825-1945 (15 Apr)
- f. Acres Treated: 6,827
- g. Project Coordinator (Name/Rank, Title, Phone #):(b) (6) ,  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 14 Apr 2009
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 14 Apr; Assistant Chief of Staff,  
Installations and Logistics, COL (b) (6) briefed by Maj (b) (6) /Maj (b) (6)
- k. Mission Identifier: QZNRKA053104

**2. OPERATIONAL:**

- a. **Mission Commander:** Maj(b) (6)
- b. **Aircrew:**
  - (1) Pilots: Maj (b) (6) Maj (b) (6)
  - (2) Navigator: LTC (b) (6)
  - (3) Flight Engineer: TSG (b) (6)
  - (4) Spray Operators: MSgt (b) (6) MSgt (b) (6)
- c. **Maintenance:**
  - (1) Spray Maintenance: TSgt (b) (6) , SSgt (b) (6) , TSG (b) (6)
  - (2) Crew Chiefs: MSG (b) (6) , MSG (b) (6)
  - (3) Avionics: MSG (b) (6)
- d. **Entomologist:** Maj (b) (6)
- e. **Flying Data:**
  - (1) Spray Sorties/Hours: 2/1.9
  - (2) Ferry Sorties/Hours: 2/4.6

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom® Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 40 Gal Dibrom® (14 Apr)
- e. Gallons Pesticide Applied: 3 gal (14 Apr); 37 gal (15 Apr)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 10 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 7 oriented straight down
- f. Pressure: 55 p.s.i.
- g. Flow Rate: 2.7 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 1000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS (19 Apr):**

- a. Winds (Direction/Speed):
  - (1) Ground: 160-200°/3-5 Knots
  - (2) Release Altitude: 230° /5-7 Knots
- b. Temperature (Degrees Fahrenheit): 74° F
- c. Relative Humidity: 43%
- d. Cloud Cover: Partly Cloudy
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

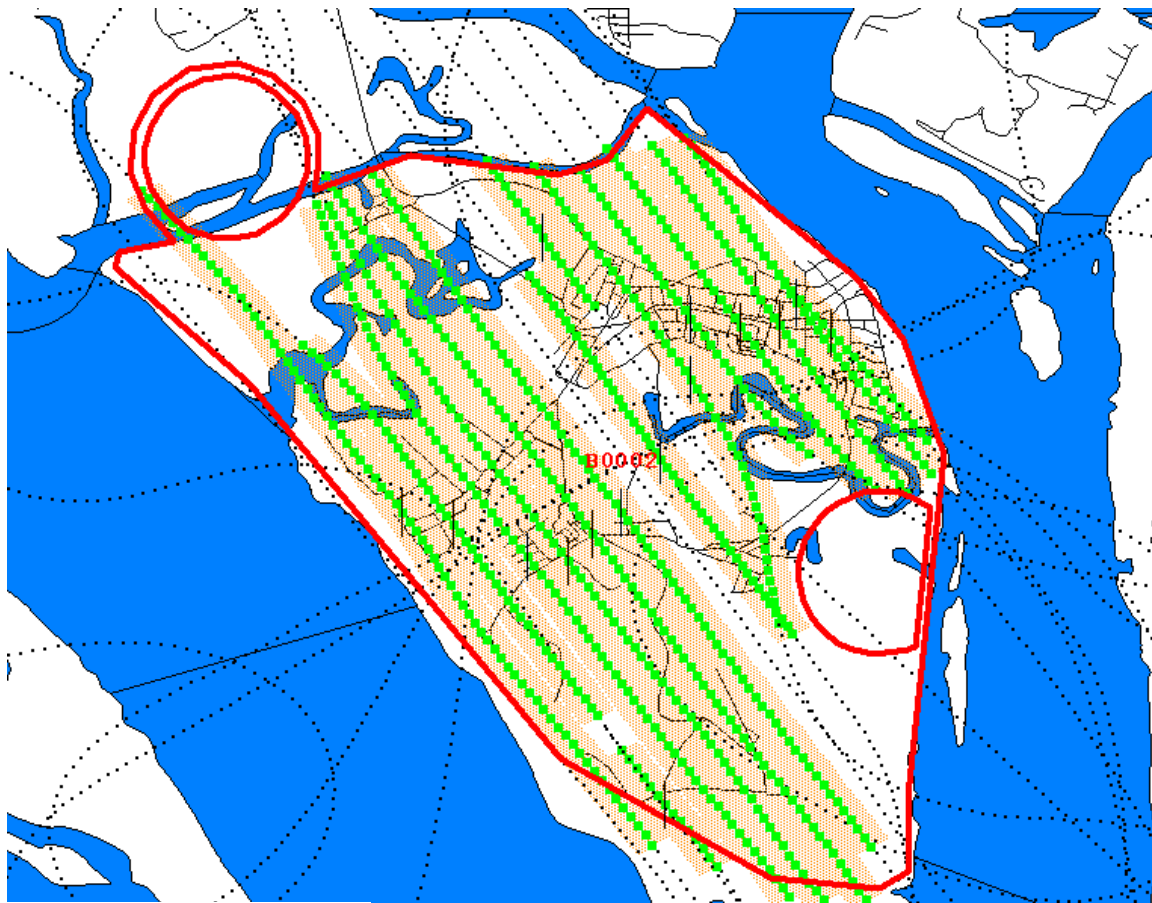

- a. Deposition Pattern:
  - (1) Technique/s Used: visual observation of aircraft course (GPS)
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito and midge numbers were determined prior to spraying using CO<sub>2</sub>-baited traps. Post-spray monitoring was carried out by Natural Resources personnel.
  - (2) Results: Good results were reported.

**8. REMARKS:** This was the first application of CY2009 at Parris Island and mosquito and midges were present in moderate numbers. On 14 April our application was cut short by approaching thunderstorms. The following night conditions were acceptable for aerial spray operations (Attachment 1) and the rest of the installation was treated. The mission was carried out without incident and the Parris Island Environmental staff reported good control. The next application is projected for 27-30 April and, judging from the amount of recent rainfall, will likely be an important spray for Parris Island.

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 120 Gal Dibrom<sup>®</sup>
- e. Gallons Pesticide Applied: 120 Gal Dibrom<sup>®</sup>
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 8 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 1.0 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 20 oriented straight down
- f. Pressure: 100 p.s.i.
- g. Flow Rate: 7.3 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray Off-set: 2000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 220°/3 knots
  - (2) Release Altitude: 270°/8 knots
- b. Temperature (Degrees Fahrenheit): 90°F dropping to 82°F
- c. Relative Humidity: 46%-74%
- d. Cloud Cover: Mostly cloudy
- e. Source: Ground observations and aircraft SCNs

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: GPS system monitoring aircraft flight pattern. Direct field observations (Mr. (b) (6) LT (b) (6) Maj (b) (6) )
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: New Jersey Light Trap collections before and after sprays
  - (2) Results: 83% reduction in mosquitoes

**8. REMARKS:** This mission was the second conducted at the request of NSB Kings Bay for emergency mosquito control. The installation is in the process of completing required documentation to become established as a pre-approved routine mission. Kings Bay had been experiencing moderate mosquito levels until the day before the application when numbers of mosquitoes increased significantly. Consequently, we were requested to treat at the higher label rate as we do on other installations when large numbers are present. Observations on the ground 1 hr after the application revealed a significant reduction in mosquito activity. Mosquito trapping over the next 3 days yielded an average of 25 mosquitoes per trap night. This represents an 83% reduction relative to pre-spray levels. To improve the efficacy of these sprays and lengthen the period of biting relief felt by the base population, increasing the spray area to include a buffer-zone beyond the installation boundaries should be considered. The next scheduled spray mission for Kings Bay will be 2-5 Oct 08. Kings Bay is planning on purchasing and using the naled formulation Trumpet for the next mission. This material is less expensive, can be flushed with water, is compatible with liquid larvicides use, and is just as effective. This was Mr. (b) (6) last mission as the project coordinator at Kings Bay, we thank him for his excellent support and wish him well.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Parris Island MCRD

1. Objective/Purpose/Benefits of the Spray Mission. Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training Parris Island MCRD SC.

2. Capability: Spray Aircraft available on 14-17 APR 08

3. Concept of Operations:

**14 APR (Monday):**

0900 Show Time  
1200: Take Off KYNG  
1400: Land KNBC  
1430: Safety Briefing  
1500 Installation Brief

**15 APR (Tuesday):** Adulticide at Parris Island

1500: Showtime  
1530: Load Chemical/Wx Decision  
1800: Take off KNBC (Start Spray 1.5 hrs prior to Sunset)  
1951: Sunset

**16 APR (Wednesday)** Wx Backup/System Clean up. If wx backup, see above note for Tuesday.

1500 Showtime  
1530: Load Chemical/Wx Decision  
1800: Take off KNBC  
1951: Sunset

**17 APR (Thursday) Redeploy to YNG**

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate;
- d. Deploy: 2.0 Hrs
- e. Re-Deploy: 2.0 Hrs
- f. Spray Time: 32 Minutes

5. Aircraft Commander Maj (b) (6)

6. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) , DSN (b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 14-16 APR 2008

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: MC-LTC (b) (6) , Maj (b) (6) , Capt (b) (6) , LTC (b) (6)
- (2) Navigator: Maj (b) (6)
- (3) Flight Engineer: MSG (b) (6)
- (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6) , MSgt (b) (6) (b) (6) MSgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSgt (b) (6) , SSgt (b) (6) , SrA (b) (6) , MSgt (b) (6)
- (2) Crew Chiefs: TSgt (b) (6) , Amn (b) (6)
- (3) Avionics: Ssgt (b) (6)

##### c. Entomologist: Maj (b) (6)

#### 2. PPR REQUIREMENTS: 015-01

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

**14 APR (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

0900: Show Time/Load system

1200: Take Off KYNG

1400: Land KNBC

1430: Safety Briefing

1500 Installation Brief

1530: Load Chemical/Wx Decision Training mission/Adulticide if weather dictates

Take off TBD for mission (Start Spray 1.5 hrs prior to Sunset)

1950: Sunset

**15 APR (Tuesday):** Adulticide/training sortie at Parris Island Wx/backup

1500: Showtime

1530: Load Chemical/Wx Decision

1800: Take off KNBC (Start Spray 1.5 hrs prior to Sunset)

1951: Sunset

**16 APR (Wednesday) Redeploy to YNG**

1000: Show Time

1200: Take off KNBC

1400: Land KYNG

**\*\*Due to ORI debrief on Thursday 17 Apr, the mission will return on 16 APR.**

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander Cell Phone

##### b. Entomologist/CPMP:

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

##### c. Navigators:

- (1) Maps
- (2) Templates

- d. **Spray Maintenance:**  
(1) Spill Kit  
(2) Safety Equipment  
(3) Loading and Clean-up Equipment and Supplies

5. **SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)  
b. **Booms:** Stainless Steel ULV Fuselage Booms  
c. **Nozzles:** 11 open for 8005's oriented straight down  
d. **Differential GPS:** Installed  
e. **Aircraft:** 90-9105  
f. **Mission Identifier:** QZNRKA192105

6. **SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**  
Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: Marvel Mystery Oil  
b. **Application:** 0.75 oz/acre  
c. **Spray Altitude:** 150 Feet  
d. **Swath Width:** 1,000 Feet  
e. **Ground Speed:** 200 Knots (338 Feet/Second)  
f. **Acreage:** 7,500 Acres  
g. **Spray-On Time:** 8 Minutes  
h. **Flow Rate:** 2.7 gallons/Minute

7. **AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

8. **PARKING PLAN:** Beaufort MCAS Ramp

9. **AIR TO GROUND RADIO FREQUENCIES:**

Beaufort Tower: 119.05 MCAS TWR  
Beaufort Approach 123.7  
Hilton Head Arpt: 118.975 Tower, 123.0 CTAF (tower open until 0100 hrs Z)  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 123.4 V**

10. **TRANSPORTATION:** Parris Island will provide vehicles for transportation to and from quarters and for messing. Vehicles will be at Base Operations.

11. **SPRAY MONITORING/TESTING:** Ground monitoring by CPMP &Parris Island MCRD Project Coordinator.

12. **CONTACTS:**

- d. **Differential GPS:** Wingman Installed
- e. **Aircraft:** 89-9105
- f. **Mission Identifier:** QZNRKA151227

**6. Adult mosquito control spray Parameters: (Kings Bay)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 1.0 oz/acre or 0.75 oz/acre see entomologist
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 2,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 15,000 Acres
- g. **Spray-On Time:** 32 Minutes
- h. **Flow Rate:** 7.4 gallons/minute or 5.55 gal/min see entomologist

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 3 or 4 drums of Dibrom for Kings Bay (see entomologist).

**8. PARKING PLAN:** Parking will be on the T-33 Line at NAS Jacksonville, FL.

**9. AIR TO GROUND RADIO FREQUENCIES:**

Navy Jax Ops-	310.2/134.775	Tower	120.0/340.2
Ground	128.6/336.4	Spray Ground:	123.45 VHF
ATIS	281.0	St Marys:	122.8 VHF

**10. TRANSPORTATION:** Enterprise Car Rental: 904-772-7007 \$40/day+5gov policy  
5 Full Size Cars (b) (6) ) Keys will be at base ops.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP and by NSB Kings Bay pest control.

**12. BILLETING:** Hampton Inn Jacksonville-Orange Park, 6135 Youngerman Circle, 904-777-5313  
16 rooms blocked confirmation # 85742030 \$79/night

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at King's Bay NSB, GA

1. Objective/Purpose/Benefits of the Spray Mission. Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Kings Bay NSB, GA.

2. Capability: Spray Aircraft available on 14-17 August 2008

3. Concept of Operations:

14 AUG (Thursday)

1600: Show

1800: Depart KYNG

2030: Land KNIP/Safety brief

15 AUG (Friday)

TBD: In-Brief with Kings Bay Personnel

1500: Weather call/Crew show

1530: Load Chemical

1800: Depart KNIP

Sunset: 2008

16 AUG (Saturday) WX Backup

1500: Weather call/Crew show

1530: Load Chemical

1800: Depart KNIP

Sunset: 2007

17 AUG (Sunday)

1000: Show time

1200: Depart KNIP

1430: Land KYNG

4. Spray Parameters:

a. Acreage: 15000 Acres (Only areas determined by PMP)

b. Altitude: 150 Ft AGL

c. Pesticide: Dibrom® Concentrate;

d. Deploy: 3.0 Hrs/ Redeploy: 3.0

f. Spray Time: 30 Minutes

5. Aircraft Commander: Maj (b) (6)

6. Support required at Kings Bay NSB has been coordinated.

// SIGNED //

1730 Show time/WX Decision  
1800 Load Chemical  
1945 Takeoff KMIB (Adulticide Spray Sortie)  
2141 Sunset

##### 16 JUL (Wednesday):

1730 Show time/WX Decision  
1800 Load Chemical  
1945 Takeoff KMIB (Adulticide Spray Sortie)  
2140 Sunset

##### 17 JUL (Thursday): Weather back up

1730 Show time/WX Decision  
1800 Load Chemical  
1945 Takeoff KMIB (Adulticide Spray Sortie)  
2139 Sunset

##### 18 JUL (Friday)

1100 Show time  
1300 Depart KMIB  
1735 Land KYNG

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, Compass, Pest Safety Binder,  
1 VHF radio Project Notebook
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

#### 4. KMIB PPR: 1401RM

#### 5. RADIO FREQUENCIES: Air To Ground Primary UHF 392.2; VHF 123.45

Minot AFB Tower 120.65 V, 236.6, 253.5; Minot International 118.2 V, 393.1 or Unicom 122.95

#### 6. CONFIGURATION: SP2G

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down

c. **Number:** 13 for 5.45GPM or 18 for 7.27  
e. **Aircraft:** 89-9105  
f. **Mission Identifier:** QZNRKA775196

**7. SPRAY PARAMETERS:**

**a. Adulticide**

- (1) **Area to be treated:** 5,158 (AFB) & 9,011 (Magic City)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000
- (4) **Flow Rate.** 5.45 or 7.27 (see entomologist)
- (5) **Application Rate.** 0.75 oz/acre or 1.0 oz/acre
- (6) **Ground Speed:** 200 Knots (338 Feet/Second)
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** Amount of Trumpet will be determined on site.

**9. TRANSPORTATION:** Provided by Minot, POC is Sgt (b) (6) (pest management): 2 mini-vans, 2 six pax

**10. LODGING:** Grand International Inn, 701-852-3161, 1500 N Broadway, Minot. Directions and non-avails are in mission folder.

**11. CONTACTS:**

**a. Minot AFB ND: DSN prefix: 453- Commercial area code and prefix (701) 723 -**

1. **Base Operations:** x2347, Airfield Manager: TSgt (b) (6) /TSgt (b) (6) FAX: 3637
2. **Environmental Officer:** (b) (6)
3. **Base Civil Engineer:** Lt Col (b) (6)

# 910 AW AERIAL SPRAY UNIT -- POST-MISSION REPORT

## MINOT AFB ADULT MOSQUITO CONTROL 14-18 JULY 2008

### 1. MISSION BASICS:

- a. Installation Sprayed: Minot AFB, North Dakota
- b. Mission Duration: 14-18 July 2008
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date/s: 16 & 17 July 2008
- e. Time/s of Application (Local): 2025-2141 (16 Jul) & 2025-2138 (17 Jul)
- f. Acres Treated: 9,045 (16 Jul) & 5,461 (18 Jul) = 14,506 acres
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Pest control supervisor/spray coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 14 July 2008
- i. Date of Waste Generation Letter: 17 July 2006
- j. Installation In-Briefing: (When/Where/Briefer/s): 14 Jul; 5CES Conference Room; Maj (b) (6), Maj (b) (6)

### 2. OPERATIONAL:

- a. **Aircrew:**
  - (1) Pilots: Maj (b) (6) (A/C), Maj (b) (6) Capt (b) (6)
  - (2) Navigators: Maj (b) (6)
  - (3) Flight Engineers: MSgt (b) (6)
  - (4) Spray Operators: MSgt (b) (6) MSgt (b) (6) MSgt (b) (6)
- b. **Maintenance:**
  - (1) Spray Maintenance: TSgt (b) (6) TSgt (b) (6) TSgt (b) (6) SRA (b) (6)
  - (2) Crew Chief(s): TSgt (b) (6) Amn (b) (6)
  - (3) Avionics: TSgt (b) (6)
- c. **Entomologist:** Maj (b) (6) (MC) & LtCol (b) (6)
- d. **Safety Briefer:** Maj (b) (6)
- e. **Flying Data:**
  - (1) Spray Sorties/Hours: 2 sorties (2.4+1.3) = 3.7
  - (2) Ferry Sorties/Hours: 4.0+3.3 = 7.3

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Trumpet<sup>®</sup> EC Concentrate
- b. EPA Registration Number: 59639-90-5481
- c. Formulation Sprayed: Emulsified Concentrate
- d. Gallons Pesticide Loaded: 60 gal (15 Jul); 30 gal (17 Jul); 90 gallons total
- e. Gallons Pesticide Applied: 53 gal (16 Jul) & 32 gal (17 Jul)
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 45 gallons; water
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 13 oriented straight down
- f. Pressure: 45-60 psi
- g. Flow Rate: 5.5 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray offset: 2000' (17 Jul); 2000' (18 Jul)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 7-8 knots @ 330° (16 Jul) & light and variable <3 knots @ 330° (17 Jul)
  - (2) Release Altitude: 7-13 knots @ 330° (16 Jul) & 3-5 knots @ 330° (17 Jul)
- b. Temperature (Degrees Fahrenheit): 79°(16 Jul) & 74° (17 Jul)
- c. Relative humidity: 52-74% (16 Jul) & 57-68% (17 Jul)
- d. Cloud Cover: Overcast (16 Jul) & mostly clear (17 Jul)
- e. Source: Ground observations and aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Minot AFB Pest Control Shop (5 CES/CEOUE) collected 300 mosquitoes/trap night and 10 mosquitoes/trap night the night following the application (97% reduction).
- b. No data was reported from the city of Minot, but judging the excellent environmental conditions and results at the AFB, we expect significant reduction in mosquito activity.

**8. REMARKS:** This was the 4<sup>th</sup> year of spray operations conducted at Minot AFB and the city of Minot to control mosquitoes. Areas treated are shown in Attachment 1. Moderate levels of mosquito abundance were reduced by this application to very low and we consider these results to be excellent. The scheduled application on 15 July was cancelled because an ignition control relay failed. The part was located at the 934<sup>th</sup> AW & 910<sup>th</sup> AW staff responded with each group driving half-way to deliver the part. Quick action and a long work day by 910 AW/MXS enabled the mission to continue as scheduled on 16 July. Because of the cancelled sortie, there was some confusion with local media as to which spray area was to be sprayed on a given date. Because the mosquito species *Aedes vexans* has a peak flight period close to sunset, it is this timeframe which is particularly important to utilize for optimal control. Thus, when the spray crew finished spraying the AFB property on 16 July with additional daylight to spare, we also treated the northern portion of the City of Minot. It is important to take advantage of favorable environmental conditions because they may not be present on subsequent dates. In the future it is advised that both the City and the AFB be prepared for spray operations the final 2 hours of daylight each evening as conditions may be varied throughout the spray area and flexibility is required to maximize mosquito control.

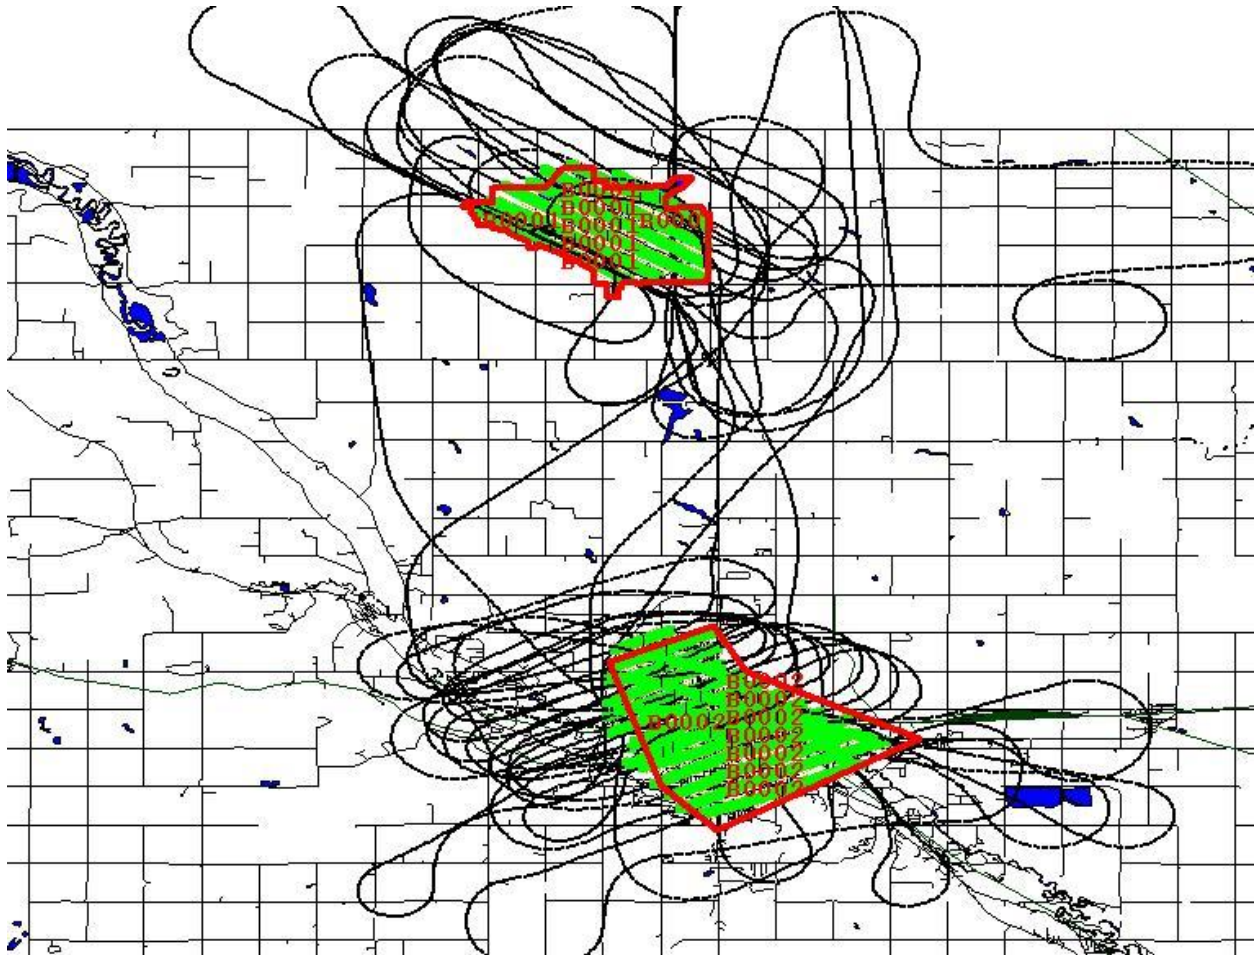

As encountered in previous years, the 5<sup>th</sup> CES and others at Minot provided outstanding support for our operation; the people at Minot AFB are great to work with. Special thanks go out to MSgt (b) (6) and SSgt (b) (6) for making this mission a success through their conscientious and diligent work.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Minot AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Minot AFB ND and the city of Minot and surrounding areas. Operations will consist of Adulticide applications.

**2. Capability:** Spray Aircraft available 14-18 JULY 2008

**3. Concept of Operations:**

**14 JUL (Monday):**

0900 Show time  
1100 Depart KYNG  
1345 Land KMIB  
1500 Installation Brief

**15 JUL (Tuesday):**

1500 Calibration System  
1730 Show time/WX Decision  
1800 Load Chemical  
1945 Takeoff KMIB (Adulticide Spray Sortie)  
2141 Sunset

**16 JUL (Wednesday):**

1730 Show time/WX Decision  
1800 Load Chemical  
1945 Takeoff KMIB (Adulticide Spray Sortie)  
2140 Sunset

**17 JUL (Thursday): Training/Weather back up**

1730 Show time/WX Decision  
1800 Load Chemical  
1945 Takeoff KMIB (Adulticide Spray Sortie)  
2139 Sunset

**18 JUL (Friday):**

1000 Show time  
1200 Depart KMIB  
1630 Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 150' AGL
- b. **Swath Width.** as determined by the CPMP
- c. **Flow Rate.** 4.36 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre
- e. **Chemical:** Trumpett
- f. **Ground Speed:** 200 Knots
- g. **Proposed spray area:** Approximately 20,000 acres

**3. PESTICIDES:**

- a. Trade Name (% Active Ingredient): Altosid Liquid Larvicide Concentrate (20% methoprene)
- b. EPA Registration Number: Altosid Liquid Larvicide Concentrate 272446
- c. Gallons Pesticide Loaded: 2.6 Gal Altosid<sup>®</sup> (15 May); 2.6 Gal Altosid<sup>®</sup> (16 May); 5.2 Gal Altosid<sup>®</sup> (17 May)
- d. Pesticide Applied: 2.6 Gal Altosid<sup>®</sup> (15 May); 2.6 Gal Altosid<sup>®</sup> (16 May); 5.2 Gal Altosid<sup>®</sup> (17 May); total of 10.5 gallons Altosid<sup>®</sup>
- e. Diluent: 3,600 gallons water and 600 gallons of water flush
- f. Other Additives Used: AirexDC<sup>®</sup> drift reduction agent (1.28 oz/acre; 20 gal total)
- g. Application Rate: 0.75 oz/acre Altosid<sup>®</sup>

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 9107 (14-16 May); 9105 (16-18 May)
- b. Spray System (Modules Used) and System ID #: 2 (15 May); 6 (16-17 May)
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: Raindrop nozzles
- e. Nozzle Orientation & Number Used: 12 straight back
- f. Pressure (PSI): 35-65 (15 May); 35-65 (16 May) & 41-65 (17 May)
- g. Flow Rate: 187-189 gpm (15-17 May)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 200' LV
- b. Spray Off Set: 200' (15 May); none (16-17 May)
- c. Spray Release Altitude: 100'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 330°/20kts (15 May); 330° (16 May); 190°/15kts (17 May)  
(1) Ground: 4 knots (15 May); 10 knots (16 May); 12 knots (17 May)
- b. Temperature (Degrees Fahrenheit): 40-59° (15-17 May)
- c. Relative Humidity: 94-37% (15-17 May) during applications
- d. Cloud Cover: Partly Cloudy (15 May); clear (16-17 May)
- e. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Prior to the 15-17 May application, monitoring was conducted by Grand Forks AFB (GFAFB) Public Health personnel along the ditches to the west of the horse barns, the ditches to the north of the smokehouse, and the area west of the alert pad by the perimeter road. Larval density averaged between 6-35 larvae per dip depending on location. It appeared that some pupation had already occurred prior to the larvicide application and, subsequently, the base will likely be experiencing significant adult mosquito activity soon, as the insecticide is not effective against pupae.
- b. Effectiveness:
  - (1) Technique/s Used: Larval dip samples
  - (2) Results: Altosid is an insect growth regulator which acts by inducing morphological changes which interfere with normal development. These effects, not immediately apparent, result in the failure of adult mosquitoes to emerge from pupae. Thus, post application sampling is critical to determining efficacy. Grand Forks AFB Public Health personnel will continue to sample mosquito populations and report their findings.

**8. REMARKS:** This is the sixth spray season at Grand Forks AFB. The spray block remains similar in size and shape to previous missions with the area west of the runway and ditches to the east and south of the runway as primary wet area. A computer failure on the MASS #2 occurred during the application on 15 May which made it impossible to determine the flow rate and spray had to be stopped. The 910th was able to replace the #2 MASS with #6 by swapping out with an aircraft from Youngstown on the morning of 16 May. Excellent weather conditions then allowed for quick coverage over the remaining spray block. We had excellent support from the GFAFB Fire Department who delivered water upon request. The next spray mission to Grand Forks AFB is scheduled for 25-29 June for adult mosquito or larval control.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 14-18 May 2007

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes and thereby improving working conditions and lower mosquito-borne illness for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: MAJ (b) (6), LTC (b) (6), Maj (b) (6)
- 2) Navigators: MAJ (b) (6)
- 3) Flight Engineers: MSG (b) (6), TSgt (b) (6)
- 4) Spray Operators: Msg (b) (6), MSG (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: TSG (b) (6), TSG (b) (6), TSG (b) (6)
- 2) Crew Chief(s): TSG (b) (6), SRA (b) (6)
- 3) Avionics: (b) (6)

##### c. Entomologist: Maj (b) (6)

#### 2. SCHEDULE: (All Local Times) PPR: 05-14-01MS

##### 14 May (Monday)

0900: Showtime  
1100: Depart KYNG  
1300: Land KGFK/Safety Briefing  
1400: Spray In Brief (CPMP, MC, AC).

##### 15 May (Tuesday):

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0550: Sunrise

##### 16 May (Wednesday):

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0549: Sunrise

##### 17 May (Thursday):

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0548: Sunrise

##### 18 May (Friday):

0800: Show time  
1000: Take off KGFK  
1400: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 UHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment

**4. PPR: 05-14-01MS**

**5. RADIO FREQUENCIES: Air To Ground Primary** VHF 123.45; secondary UHF 392.2;  
KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

**a. System:** 2-Module System/ Fuselage Booms

**b. Nozzle Tips/Orientation:**

Larvicide: Raindrop nozzles straight back

**c. Number:**

Larvicide: fuselage only, 12 total (6 each side) straight back

**d. Booms:** Fuselage

**e. Aircraft:** 899108

**f. Mission Identifier:** QZNRKA196134

**7. SPRAY PARAMETERS:**

**a. Larvicide**

(1) **Area to be treated:** approx. 1,608 acres

(2) **Altitude:** 100' for Larvicide application

(3) **Swath Width.** 200 feet

(4) **Flow Rate.** 186 gallons/minute

**b. Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)

**c. Ground Speed:** 200 Knots

**8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)**

**a. Composition of each Gallon:**

(1) 0.375 ounces of Altosid® 20

(2) 0.64 ounces of AirexDC™ drift retardant

(3) Water

**b. Typical load:** (2 tanks of 450 gallons each)

(1) Fill with 450 gallons of water/tank. Total water in tanks = 900 gal.

(2) Total water added = 900 gallons

(3) Add 1.33 (1 1/3) gallons of Altosid® per tank (2 2/3 gallons total).

(4) 2.5 gal AirexDC per tank (5 Gal total) while agitating approximately 15 min

(5) Total quantity mix. 908 gallons

**c. Final Load for complete flush**

(1) Fill tanks with the amount of water necessary for a proper system flush

**d. Mixing Instructions:**

SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

**9. TRANSPORTATION** 2 cars and 2 vans provided by 319 CES, Transportation (bus) will be provided to the In-Brief , vehicles will be picked up there.

**2-Aircrew**

**1-Spray MX**

**1-Crew Chiefs & Specialists**

**10. LODGING: On Base Billeting:** DSN 362-3070/6189 or (701) 594-8431, FAX 362-3069

-- Prime Knight DSN 362-3844 or (701) 747-3844

Rooms Reserved by the Pest Management at RDR

## 11. CONTACTS:

DEPARTMENT OF THE AIR FORCE  
HEADQUARTERS 910<sup>TH</sup> AIRLIFT WING

7 Mar 2005

**MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)**

**FROM:** 757 AS/DOS (346-1652/1965; FAX 346-1616)

**SUBJECT:** Capability and Concept of Operations for Aerial Spray Characterization Testing at Langley AFB

1. **Purpose/Objectives/Benefits:** Characterize the droplet spectrum for two TeeJet flat fan nozzles using the Characterize Ultra Low Volume (ULV) fuselage configuration and Dibrom insecticide.
2. **Capability:** Spray Aircraft 89-9106 Available 14-19 Mar 05.

3. **Concept of Operations:**

**14 Mar (Monday):**

**PPR: 314BB01**

0900: Show at KYNG  
1100: Depart KYNG  
1215: Land KLF1  
1230: Mission Safety Briefing

**15 Mar (Tuesday):**

0800: Show time Hotel Lobby  
0900: Load Dibrom / Weather Decision  
1000: Take off, testing at Craney Island  
1130: Land

**16 Mar (Wednesday):**

0800: Show time Hotel Lobby  
0900: Load Dibrom / Weather Decision  
1000: Take off, testing at Craney Island  
1130: Land

**17 Mar (Thursday):**

0800: Show time Hotel Lobby  
0900: Load Dibrom / Weather Decision  
1000: Take off, testing at Craney Island  
1130: Land

**18 Mar (Friday):**

0800: Show time Hotel Lobby  
0900: Load Dibrom / Weather Decision  
1000: Take off, testing at Craney Island  
1130: Land

**19 Mar (Saturday)**

0800: Show time Hotel Lobby

1000: Take off for KYNG  
1115: Land KYNG

**4. Spray Parameters:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Aircraft:** 89-9106
- c. **Mission Identifier:** QZNRKA773073

**5. Testing Protocols:** Craney Island (Langley AFB) Testing Itinerary

- a. Purpose: Characterization of droplet spectrum produced using the fuselage ULV configuration with two nozzle types and Dibrom (concentrate). We propose to characterize the following TeeJet flat fan nozzles: 8008 and 8003.
- b. Spray Parameters (Please note that only the number and type of nozzle will change during this mission):
  - 1. Booms -- Fuselage only
  - 2. Nozzles -- 8008 = 7 nozzles/4 left side; 3 right side; 8003 = 17 nozzles/9 left side & 8 right side. Projected schedule will be alternating from 8008 to 8005 nozzles.
  - 3. Airspeed -- 200 knots ground speed
  - 4. Altitude -- 150' above ground level
  - 5. Wind -- Into the wind test
  - 6. Flow Rate -- 3.6 gallons/minute
- c. Mission Protocols:
  - 1. Purpose: Determine droplet spectrum as delivered for a simulated mosquito adulticide spray using the fuselage ULV configuration. Teflon-coated microscope slides will be used to collect droplets. Eleven sampling stations will be setup along one of the west/north/east perimeter roads on Craney Island. The final setup will be determined by the prevailing wind direction. This is an “into the wind. We need the average winds to be below 10 mph.
  - 2. Aircrew: We need the system to have stabilized prior to reaching the sampling points. This is an into the wind test (see figure 1 below). Please turn the spray system on 20 seconds prior to the sampling point and until 10 seconds after.  
**Spray Operators:** Please record the spray-on time and pressure at 5 second intervals. **Navigator:** Please record winds at altitude every ten seconds. If conditions are stable (little variation in wind direction and speed) two spray-on passes will be used for each test (e.g. that is two passes per nozzle configuration).
  - 3. Microscope slides will be retrieved 20 minutes after the plane has passed. Number and size of the droplets will be determined. Please depart the area so as to avoid contamination of the slides.

Figure 1. Into the Wind test.

6. Aircraft/Mission Commander: Maj (b) (6)
7. If you have any questions concerning this mission please contact the Aerial Spray Office,  
DSN (b) (6) .

1115: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass,  
Pest Safety Binder, UHF Radio,  
Satloc Ground Tracker and Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops phone 878-3588
  - (2) Tower phone 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9** or 348.6 (phone 877-0221 ops)
  - (2) Tower – **124.9** or 280.1 (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB: Tower 4-2591**
  - (1) Tower - **125.0** or 253.5 (phone 4-5326)
  - (2) Ground - **121.7** or 275.8
  - (3) Clearance – **118.85** or 271.3
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld): Tower – 125.7 or 124.3**

e. **Spray Ground: Primary 392.2; Secondary: 308.6**

7. **IN-BRIEFING:** No official in-brief. We will brief the fire department directly.

8. **SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** see protocols
- c. **Aircraft:** 89-9106
- d. **Mission Identifier:** QZNRKA773073

9. **SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom<sup>®</sup> Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** n/a; Dibrom<sup>®</sup> Test at Craney Island
- g. **Swath Width:** 2000 foot

10. **PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 0830 hrs each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

11. **SPRAY TEST PROTOCOLS**

Craney Island (Langley AFB) Testing Itinerary  
15-18 March 05

- a. Purpose: Characterization of droplet spectrum produced using the fuselage ULV configuration with two nozzle types and Dibrom (concentrate). We propose to characterize the following TeeJet flat fan nozzles: 8008 and 8003.
- b. Spray Parameters (Please note that only the number and type of nozzle will change during this mission):
  - 1. Booms -- Fuselage only
  - 2. Nozzles -- 8008 = 7 nozzles/4 left side; 3 right side; 8003 = 17 nozzles/9 left side & 8 right side. Projected schedule will be alternating from 8008 to 8003 nozzles.
  - 3. Airspeed -- 200 knots ground speed
  - 4. Altitude -- 150' above ground level
  - 5. Wind -- Into the wind test
  - 6. Flow Rate -- 3.6 gallons/minute
- c. Mission Protocols:
  - 1. Purpose: Determine droplet spectrum as delivered for a simulated mosquito adulticide spray using the fuselage ULV configuration. Teflon-coated microscope slides will be

used to collect droplets. Eleven sampling stations will be setup along one of the west/north/east perimeter roads on Craney Island. The final setup will be determined by the prevailing wind direction. This is an “into the wind. We need the average winds to be below 10 mph.

2. **Aircrew:** We need the system to have stabilized prior to reaching the sampling points. This is an into the wind test (see figure 1 below). Please turn the spray system on 20 seconds prior to the sampling point and until 10 seconds after. **Spray Operators:** Please record the spray-on time and pressure at 5 second intervals. **Navigator:** Please record winds at altitude every ten seconds. If conditions are stable (little variation in wind direction and speed) two spray-on passes will be used for each test (e.g. that is two passes per nozzle configuration).

3. Microscope slides will be retrieved 20 minutes after the plane has passed. Number and size of the droplets will be determined. Please depart the area so as to avoid contamination of the slides.

3976 King Graves Rd Unit 26  
Vienna OH 44473-5926

24 March 2005

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

SUBJECT: Fuselage Characterization Test with Dibrom and Training Mission Langley AFB, VA

**1. Purpose:** The purpose of this mission was to determine the droplet spectrum produced by the relatively new ULV fuselage configuration using 8008 and 8003 size flatfan nozzles. This information allows us to confirm that we are applying product, in this case the organophosphate Dibrom, in accordance with the pesticide label.

**2. Participants:** A list of test participants is included in attachment I.

**3. Spray Configuration:**

Mass-SP2G

Aircraft Number: 99106

Mission Identifier: QZNRKA773073

**4. Spray Parameters:**

Booms—Fuselage only.

Nozzles—8008, 8003 TeeJet.

Number of Nozzles— 7 (8008); 17 (8003), oriented down   Airspeed—200 knots ground speed.

Altitude—150' AGL.

Wind— Directly into the wind.

**5. Itinerary:**

14 March: Personnel Arrive at Langley AFB. Total ferry time was 1.4 hours. Safety brief given to mission participants and Fire Department on hazards associated with Dibrom.

15 February: Test cancelled. Wind speeds above acceptable levels. Briefed Lt Col (b) (6) (b) (6) from AF/REOR on the 910<sup>th</sup> AW capability in regard to aerial spray. Lt Col (b) (6) asked us to continue to work on a comprehensive brief and be prepared to visit the Pentagon, AFRC HQ, and Unified Commands to explain our capability.

16-17 March: No sorties flown. Snow and wind prevented test.

18 March: One testing sortie was flown with 2 individual testing passes completed. Ten spinning impingers (“spinners”) were placed in a 150/330 degrees orientation on the northern

end of the Craney Island Project, Army Corps of Engineers. Spinners were located approximately 200' apart and were equipped with Teflon-coated microscope slides to document droplet size. The aircraft flew 060 degree heading over the center station to confirm location and then made two "wet" passes over the center station. The aircraft departed the test area to conduct training and the spinners were allowed to run for 15 minutes and then microscope slides were collected. The test was then repeated. Ground wind conditions were 4.6 knots at 060 degrees, temperature was 55 °F. Flow rate for the test averaged 3.6 gpm. Boom pressure was reported between 16-23 psi. Total flight time was 1.7 hours.

19 March: Mission complete. Personnel return to Youngstown ARS. Total ferry time 1.4 hours.

**6. Results:** Droplets were not recovered in appreciable numbers on the right side of the sampling transect from either test. Relatively large drops were recovered at the center station (i.e., >40 microns) and subsequent slides to the left of the aircrafts path. Furthermore, the droplet size recovered at the left end of the transect (i.e., 800 feet left of center line) were not of the size expected (not less than <15 microns).

**7. Conclusions:** It is apparent that too much of a crosswind was present to consider our results from the 18<sup>th</sup> of March to be a true "into the wind" test. The droplets collected at the center station will be used as a replication during future studies. Training was accomplished for all crew positions. Squadron entomologists received training and practice setting up and measuring droplet characterization tests. Aerial Spray maintenance trained 1 new member on uploading and downloading of Dibrom, one of most difficult compounds to work with, mostly because of extensive personal protective equipment which must be worn.

**8. Recommendations:** Repeat test at future time to coincide with scheduled mosquito control applications on the Langley Peninsula. Refine aerial spray mission briefs to show our applicability to current and projected military operations. The next scheduled spray mission will be an actual application at the Parris Island MCRD, SC.

**9. Acknowledgements:** Langley AFB supported the mission with vehicles and ramp space/equipment. Setup for the experiment on Craney Island was supported by Portsmouth Mosquito Control biologists. The MASS worked flawlessly thanks to impeccable performances by the spray operators and spray maintenance.

1. List of Participants

Attachment 1.

**1. 910 AW PARTICIPANTS:**

**a. Aircrew:**

(1) Pilots: MAJ (b) (6), MAJ (b) (6) MAJ(b) (6)

(2) Navigator: MAJ(b) (6)

(3) Flight Engineers: MSG (b) (6)

(4) Spray Operators: MSG (b) (6), TSG(b) (6)

**b. Maintenance:**

(1) Spray Maintenance: SMS (b) (6)(b) (6), TSG (b) (6), TSG (b) (6)  
, TSG (b) (6)

(2) Crew Chiefs: MSG (b) (6), TSG (b) (6),

(3) Avionics: TSG (b) (6)

**c. Certified Pest Management Professionals:** LTC (b) (6), CPT (b) (6)  
LTC (b) (6) (15-16 Mar), MAJ (b) (6) (16,17 Mar)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 14-20 JUNE 2002

**Purpose/Objectives/Benefits:** control nuisance and vector mosquitoes in order to improve working conditions and lower the incidence of arthropod borne illness for members operating at Langley AFB and surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6)
- (2) Pilots: MAJ (b) (6), MAJ (b) (6)
- (3) Navigators: LTC (b) (6) avis
- (4) Flight Engineers: MSG (b) (6), TSG (b) (6)
- (5) Spray Operators: MSG (b) (6) (14-20), TSG (b) (6)
- (6) Spray Maintenance: MSG (b) (6), TSG (b) (6), SSG (b) (6)
- (7) Crew Chiefs: SSG (b) (6) SSG (b) (6)
- (8) Avonics: TSG (b) (6), SRA (b) (6)

##### c. Certified Pest Management Professionals: LTC (b) (6), Maj (b) (6), LTC (b) (6) Capt (b) (6) (b) (6)

#### 2. SCHEDULE: (All time Local)

##### 14 JUN (Friday):

##### PPR #

0800: Show at KYNG  
1100: Depart KYNG  
1230: Land KLF  
1230: Safety Briefing  
1300: Installation in-brief at CE Conference room

##### 15 JUN (Saturday):

1100: Daily meeting for PMP/MC in hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2027: Sunset

##### 16 JUN (Sunday):

1100: Daily meeting for PMP/MC in hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2027: Sunset

##### 17 JUN (Monday):

1100: Daily meeting for PMP/MC in hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2027: Sunset

**18 JUN (Tuesday):**

1100: Daily meeting for PMP/MC in hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2028: Sunset

**19JUN (Wednesday):**

1100: Daily meeting for PMP/MC in hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2028: Sunset

**20 JUN (Thursday):**

0900: Report  
1100: Depart KLFI  
1230: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Cellular Phones, Wind Gauge, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326 (Contacted 18 May 99, 0700L, DSN 574-2508)
- b. **Langley Base Ops:** DSN 574-2504 (Contacted 10 May 99, 1000L)

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops phone 878-3588
  - (2) Tower phone 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: (Operating Hours 1000Z-0200Z)**
  - (1) Ground - **121.9 or 348.6** (phone 877-0221 ops)
  - (2) Tower – **124.9 or 280.1** (phone 877-2962)
  - (1) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - (2) CTAF – **118.7**
- c. **Langley AFB: Tower OIC MSG (b) (6) Lt (b) (6) 1st OSS SQ (23665)**
  - (1) Tower - **125.0 or 253.5** (phone 4-5326)
  - (2) Ground - **121.7 or 275.8**
  - (3) Clearance – **118.85 or 271.3**
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld): Tower - 124.3, 126.375, 340.2, 318.7**
- e. **Spray Ground: Primary 392.2 / 308.6 Secondary**

7. **IN-BRIEFING:** Required; IAW the Schedule above.

8. **SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Modules 1 and 2
- b. **Nozzle Tips/Orientation:** 7 8008's for 2500' swathes and 5 8008's for 1000' swathes (unless temperatures are above 85 degrees then use 8010's – 6 for 2500' swathes and 2 or 3 for 1000' swathes), Oriented down.
- c. **Aircraft:** 99106

9. **SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL depending upon weather conditions
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom<sup>®</sup> Concentrate
- d. **Application Rate:** 0.5 Ounce/Acre
- e. **Flow Rate:** 1.8 Gallons/Minute at Craney Island; 4.5 Gallons/Minute at Langley areas
- f. **Acreage:** Approximately 82,000 Acres
- g. **Swath Width:** 1,000 Feet at Craney Island; 2,500 Feet at Langley areas.

10. **PESTICIDE LOADING:**

- a. **How Much Pesticide:** 320 Gallons for 82,000 acres sprayed.
- b. **Where:** Aero Club Ramp
- c. **When:** 1430 Hours each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

11. **SPRAY MONITORING OR TESTING:**

The local mosquito control districts will put out cages of live mosquitoes and oil-sensitive cards to monitor the control. Also, light trap data and biting count data will be collected pre- and post-spray by the base and the mosquito control districts to determine spray effectiveness.

12. **CONTACTS:** LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MOUNTAIN HOME AFB RANGE, ID

### 14-22 SEPTEMBER 2006 CH 2

**PURPOSE/BENEFITS/OBJECTIVES.** To prevent fire hazards, inhibit annual re-growth of cheatgrass on Saylor Creek Range and allow native vegetation to establish and be competitive.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: CPT (b) (6), CPT (b) (6)
- (3) Navigator: LtC (b) (6), LTC (b) (6)

\*\*MAJ John Kochansky arrive 19 SEP

LTC Dave Wiles Depart 20 SEP

- (4) Flight Engineer: MSG (b) (6)

- (5) Spray Operators: MSG (b) (6), MSG (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray MX: MSGT (b) (6), TSG (b) (6), TSG (b) (6), TSGT (b) (6)

- (2) Crew Chiefs: TSGT (b) (6), TSGT (b) (6)

- (3) Avionics: TSG (b) (6)

##### c. Entomologists: Maj (b) (6), Capt (b) (6), Maj (b) (6)

#### 2. SCHEDULE: (Local times; total of 9 lifts required, 1-2 lifts per day)

##### 14 SEP (Thursday):

0800: Show at KYNG

PPR # 241-1112

1000: Depart KYNG

1400: Land KMUO (Local)

1430 Safety Briefing, MX configures aircraft; plan next day's mission

**\*\* ASAP After landing In-briefing** All personnel who plan to drive need the Flt Line driving brief just prior to the installation brief at 1530. Spray Mission Inbrief for 1600 in the CE Conference Room, Bldg 1300, 14 Sep 2006.

\* Crew members, Crew chiefs will be on Spray Aircraft

##### RAS Spray Support plane:

- 1. Departure time as close to primary spray AC as possible.
- 2. Crew will make own billeting, transportation arrangements and PPR
- 3. spray personnel and maintenance will ride as PAX on the Support aircraft.

##### 15 SEP (Friday): Range Time 0730-0930, (1-2 sorties if possible)

0545: Show time

0722: Sunrise

0710: Take Off KMUO (As determined by Mission Cmdr)

1000: Land KMUO

##### 16 SEP (Saturday): Range Time Free All Day, (3-4 sorties if possible)

0545: Show time

**0710:** Take Off KMUO

0723: Sunrise

TBD – Wx permitting 3-4 sorties

**17 SEP (Sunday): Range Time Free all day (3-4 sorties if possible)**

0545: Show time

**0710:** Take Off KMUO

0725: Sunrise TBD – Wx permitting 3-4 sorties

**18 SEP (Monday): Range Time 0730-0930, (1-2 sorties if possible)**

0545: Show Time

0726: Sunrise

**0710:** Take Off KMUO

1000: Land KMUO (Or as required)

**19 SEP (Tuesday): Range Time 0730-0930, (1-2 sorties if possible)**

0545: Show Time

0727: Sunrise

**0710:** Take Off KMUO

1000: Land KMUO (Or as required)

**20 SEP (Wednesday): Range Time 0730-0930, (1-2 sorties if possible)**

0545: Show Time

0728: Sunrise

**0710:** Take Off KMUO

1000: Land KMUO (Or as required)

**21 SEP (Thursday): Range Time 0730-0930, (1-2 sorties if possible)**

0545: Show Time

0729: Sunrise

**0710:** Take Off KMUO

1000: Land KMUO (Or as required)

**Support Aircraft:**

1. Depart YNG for MUO

2. Make own billeting, transportation arrangements and set up PPR

**22 SEP (Friday) Both Aircraft**

0830: Show time

1000: Take Off KMUO

1730: Land KYNG

**3. ITEMS TO TAKE:**

- a. Mission Commander:** 1 Cellular Phone
- b. Entomologist:** UHF Radio, Cardholders, Water Sensitive Cards, Tool Kit, VHF Radio, Cell Phone, Laptop Computer
- c. Navigator:** Maps/Map Bag, Validation Map,
- d. Spray Operator:** Safety Gear, computer
- e. Spray Maintenance:** Mobility Kit, MASS Spares, Spill Kit, Pesticide Safety Binder, Safety Equipment and Tool and other equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION: N/A**

**5. PARKING PLAN: Bomb Loading Area**

## 6. RADIO FREQUENCIES:

- a. **Air To Ground:** Entomologists: 123.45 VHF; 292.2 (range); Maintenance 384.7
- b. **Mt Home:** PTD: 372.2/138.9, ACC CP (Raymond 27): 381.3, ATIS: 273.5, TWR: 133.85 / 253.5, GND: 120.5 / 275.8, RAPCON: 259.1, Salt Lake Center: 387.15/363.0
- c. **Range:** Saylor Creek Range: 134.1 / 292.2 pri / 381.3 sec  
Sagebrush Control: 251.2, Paradise MOA: 272.7/236.05/225.55  
Owyhee MOA: 392.2/266.35, Bruneau/Sheep Creek MOA: 251.875

## 7. IN-BRIEFING: Upon Arrival.

### 8. Billeting:

#### **Sleep Inn Foot Hills \$60/night**

1180 US 20 Mountain Home, ID

208-587-9743

Fax: 208-587-7382

### 9 Vehicles: Mountain Home CE will provide vehicles.

2- 6 Pax (OPS)

1 Mini-van & 1 6 Pax (Maint)

1 Rental- (Don Teig will keep from Airport) (Entomologists)

## 8. SPRAY CONFIGURATION:

- a. **System:** SP-3G
- b. **Nozzle Tips/Orientation:** Raindrop/Straight Back
- c. **Number:** Fuselage – 17 nozzles (8 left side: 9 right side)
- d. **Booms:** Fuselage
- e. **Aircraft:** 99107 **Mission Identifier:** QZNRKA120257
- f. **Profile:** Planned HV Profile

## 9. SPRAY PARAMETERS:

- a. **Altitude:** 100' AGL (we are treating at 46.5 acres/minute)
- b. **Swath Width.** 100 feet
- c. **Flow Rate.** 326 gal/min
- d. **Application Rate.** 7 gal/acre; approximately 2,000 acres to be treated for cheatgrass
- e. **Ground Speed:** 200 Knots

## 10. SPRAY MIXING AND LOADING:

### a. Composition of Each Gallon:

- (1) 0.57 ounces of Plateau® (we want 4oz in 7 gallons per acre)
- (2) 1 ounce of Sta-put® Drift Retardant
- (3) 126.4 ounces of water

### b. First Load (4 Tanks of 450 gallons each + sump of 75 gallons)

- (1) Fill to 450 gal water/tank using the pump on the water tanker truck. This is done by putting the filler hose into the rear tank with all tanks open to the common sump. Total water in tanks = 1,800 gal.
- (2) 75 gal/water in sump
- (3) Total water added = 1,800 gallons
- (4) Upload 8.03 gal (30.4L)/Plateau; add 14 gal Sta-put while agitating approximately 5-7 min  
Total quantity mix 1822 gallons

### c. Additional test loads:

++A single lift is planned at a 6oz per acre Plateau in 7 gal/acre:

An additional 4.01 gallons of Plateau will be need in the above tank mix

++A single lift is planned at a 6oz per acre Plateau in 10 gal/acre  
An additional 4.01 gallons (15.1L) of Plateau will be needed  
Flow rate: 465 gallons/minute with 12 nozzles open per side

## 11. SPRAY MONITORING OR TESTING: Performed by the CPMPs

NOTES: Will use water sensitive cards.

## 12. CONTACTS:

**757<sup>th</sup> AERIAL SPRAY SQUADRON**  
**PMP'S POST-MISSION REPORT**  
**Mountain Home AFB, ID Saylor Creek Range 14-22 Sept 2006**

**1. MISSION BASICS:**

- a. Installation Sprayed: Mountain Home AFB, Saylor Creek Range, ID (attachment 1)
- b. Mission Duration: 14-22 September 2006
- c. Purpose of Application: Herbicide application to control cheatgrass to suppress range fires
- d. Application Date(s) and time(s) (Local):
  - (1) 15 Sept: 0725-0902 (1.6 hrs)
  - (2) 16 Sept: 0755-0919 (1.3); 1005-1115 (1.2)
  - (3) 17 Sept: 0714-0842 (1.5); 0955-1058 (1.1); 1155-1305 (1.2)
  - (4) 18 Sept: 0710-0837 (1.5)
  - (5) 19 Sept: 0720-0845 (1.3)
  - (6) 20 Sept: 0710-0825 (1.3)
  - (7) 21 Sept: 0710-0819 (1.2); 0825-0905 (0.7) (flush sortie)
- e. Acres Treated: 2,560 acres: 256 (15 Sept); 512 (16 Sept); 768 (17 Sept); 256 (18 Sept); 256 (19 Sept); 256 (20 Sept); 256 (21 Sept)
- f. Project Coordinator (Name/Rank/Title/Phone #): (b) (6), Natural Resource Manager, (b) (6)
- g. Date Spray Map Last Approved: 14 September 2006
- h. Installation In-Briefing: (When/Where/Briefer/s): 14 Sept 06, Mountain Home AFB, Maj (b) (6), LTC (b) (6)

**2. OPERATIONAL:**

- a. **Aircrew:**
  - (1) Mission Commander: LTC (b) (6)
  - (2) Pilots: CPT (b) (6), CPT (b) (6)
  - (3) Navigator: LTC (b) (6), LTC (b) (6)
  - \*\*MAJ (b) (6) arrive 19 SEPT
  - LTC Dave Wiles Depart 20 SEPT

  - (5) Spray Operators: MSG (b) (6), MSG (b) (6), MSG (b) (6)
- b. Maintenance:
  - (1) Spray MX: MSGT (b) (6), TSG (b) (6), TSG (b) (6), TSGT (b) (6)
  - (2) Crew Chiefs: TSGT (b) (6), TSGT (b) (6)
  - (3) Avionics: TSG (b) (6)
- c. Entomologists: Maj (b) (6), Capt (b) (6), Maj (b) (6)
- d. Flying Data:
  - (1) Spray Sorties/Hours: 10 Sorties + 1 flush sortie; 13.9 hours
  - (2) Ferry Sorties/Hours:
    - (a) Spray A/C 99105: 2 Ferries; 11.5 Hours
    - (b) Support A/C 022 (14 Sept): 1 Ferries; 6 Hours
    - (c) Support A/C 102 (22 Sept): 2 Ferries; 11.4 Hours

**3. PESTICIDE:**

- a. Trade Name: Plateau<sup>®</sup>
- b. EPA Registration Number: 241-365
- c. Formulation Sprayed: Liquid herbicide (23.6% active ingredient)
- d. Gallons Pesticide Loaded: 8 (15 Sept); 16 (16 Sept); 24 (17 Sept); 8 (18 Sept); 8 (19 Sept); 8 (20 Sept); 12 (21 Sept)

- e. Gallons Pesticide Applied: 8 (15 Sept); 16 (16 Sept); 24 (17 Sept); 8 (18 Sept); 8 (19 Sept); 8 (20 Sept); 12 (21 Sept)
- f. Gallons and Name Diluent Used: 1,800 gallons water per lift
- g. Gallons and Name of Flush Used: 200 per lift; 600 Gal of water final flush
- h. Other Additives Used: gallons of Sta-Put®; 14 (15 Sept); 28 (16 Sept); 42 (17 Sept); 10 (18 Sept); 10 (19 Sept); 0 (20 Sept); 7.5 (21 Sept)
- i. Application Rate: 7 Gal/Acre 15-20 Sept 06 (4 oz/acre Plateau®); 21 Sept 06 (6.0 oz/acre Plateau®)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99105)
- b. Spray System (Modules Used) and System ID #: SP-3G
- c. Spray System Configuration: Wing and fuselage booms
- d. Nozzle Type/Size: Raindrop nozzles
- e. Nozzle Orientation & Number Used: Fuselage; Straight Back; 38 (19 each side)
- f. Pressure: 40 psi
- g. Flow Rate: 325 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 100 Ft
- b. Spray Offset: weather dependant. No offset when flown into the wind.
- c. Spray Release Altitude: 100 Ft AGL
- d. Ground Speed: 200 knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):  
Ground: 140/3-5 mph (15 Sept); 240-280/8-11mph (16 Sept); 240-260 3 mph (17 Sept); SE @ 5.3 mph (18 Sept); 100/5 mph (19 Sept); 290 – 6mph (20 Sept); 260-300 (21 Sept)
- b. Temperature (Degrees Fahrenheit): 58° (15 Sept); 48-51° (16 Sept); 35-68° (17 Sept); 45° (18 Sept); 50° (19 Sept); 46° (20 Sept); 50° (21 Sept)
- c. Relative Humidity: 60% (15 Sept); 60%-36% (16 Sept); 40-20% (17 Sept); 37% (18 Sept); 50% (19 Sept); 46-50% (20 Sept); 50 (21 Sept)
- d. Cloud Cover: 100% (15 Sept); 80% (16 Sept); 0% (17 Sept); 0% (18 Sept); (19 Sept); light rain (20 Sept); 80% (21 Sept)
- e. Source: Ground observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:  
(1) Technique/s Used: Visual observation from PMP on range  
(2) Results: See remarks
- b. Effectiveness:  
(1) Technique/s Used: Vegetation measurements  
(2) Results: Will be determined in the spring of 2007

**8. REMARKS:** This mission was the first use of the herbicide Plateau by the 910<sup>th</sup>. An excellent material to work with, it is biologically active at low concentration levels (e.g., 4oz/acre). The target pest plant (weed) was cheatgrass, an invasive species which dries out in the late season and is extremely flammable. The integrated pest management approach is to prevent germination of cheatgrass seeds the following year while allowing native grasses (less prone to burn) to become established. The fuselage boom configuration and resulting 100 foot swath width was tested and confirmed at home station & Youngstown ARS) prior to departure. On the Saylor Creek range the same swath width was confirmed visually by ground support. Coverage of the spray block was excellent, see map in attachment 1. The

map shows red for the majority of the spray passes (indicating spray-on) but the inhibit switch was in the wrong position on the northeast side of the spray block which only recorded the path of the aircraft and not the spray-on condition even though excellent coverage was achieved in this section as well. The majority of the sorties were flown with a headwind with less than a 30% crosswind component. On 16 September, two sorties were flown in a crosswind and ground support confirmed the appropriate offset to assure an even application and control drift. Efficacy will be determined by Mountain Home AFB Office of Natural Resources during the spring season 2007. If successful and additional money is available, an application on another section of the range will likely be planned for 2007. We would like to thank the folks at Mountain Home AFB for the excellent support we received. In particular, we appreciate the vehicle support and the Fire Department who filled us up with water just before dawn daily and played along with a quick turn on our final flush sortie.

//signed//

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Mountain Home AFB, ID

1. Aerial Spray flight proficiency training at Saylor Creek Bombing Range near Mountain Home AFB, ID aiding their fire prevention program. Cheat grass, an invasive grass species which creates a fire hazard, has overtaken many of the areas on the bombing range. Aerial spray operation applies a herbicide targeting Cheat grass, but allowing native fire resistant vegetation (sagebrush) to re-establish and become competitive.

2. Concept of Operations:

- a. 14 September (Monday)
  - 0900 Show KYNG
  - 1100 Spray aircraft depart KYNG
  - 1105 Support aircraft depart KYNG
  - 1430 Spray aircraft land KMUO
  - 1435 Support aircraft land KMUO
  - 1600 Installation briefing
- b. 15-18 September (Tuesday-Friday)
  - Spray aircraft:
    - 0500 Show KMUO
    - 0700 Depart MUO
    - 0815 Land MUO
    - 0900 Depart KMUO
    - 1015 Land KMUO
- c. Saturday and Sunday airfield closed

- d. 21-22 September (Monday-Tuesday)
  - 0500 Show KMUO
  - 0700 Depart MUO
  - 0815 Land MUO
  - 0900 Depart KMUO
  - 1015 Land KMUO
- e. 22 September (Tuesday) Support aircraft
  - 0900 Show KYNG
  - 1100 Depart KYNG
  - 1430 Land KMUO
- f. 23 September (Wednesday)
  - 0700 Show KMUO
  - 0900 Spray aircraft depart KMUO
  - 0905 Support aircraft depart KMUO
  - 1630 Spray aircraft land KYNG
  - 1635 Support aircraft land KYNG

- 3. Maj (b) (6) will act as Mission Commander.
- 4. Maj (b) (6) will act as Aircraft Commander
- 5. Support required at Mountain Home AFB and Saylor Creek has been completed.

(b) (6), Maj, USAFR  
Assistant Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MOUNTAIN HOME AFB RANGE, ID

### 14-23 SEPTEMBER 2009

**PURPOSE/BENEFITS/OBJECTIVES.** To prevent fire hazards, inhibit annual re-growth of cheatgrass on Saylor Creek Range and allow native vegetation to establish and be competitive.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Mission Commander: Maj (b) (6) 14-18 Sep; Maj (b) (6) 18-23 Sep
- 2) Pilots: Maj (b) (6) 14-18 Sep, Capt (b) (6) 14-18 Sep; Lt Col (b) (6) 14-23 Sep, Lt Col (b) (6) 18-23 Sep
- 3) Navigator: Lt Col (b) (6) 14-18 Sep; Lt Col (b) (6) 18-23 Sep
- 4) Flight Engineer: SSgt (b) (6) 14-18 Sep; MSgt (b) (6) 18-23 Sep
- 5) Spray Operators: MSgt (b) (6) SSgt (b) (6) 14-18 Sep; TSgt (b) (6) 18-23 Sep

##### b. Maintenance:

- 1) Spray MX: TSgt (b) (6) TSgt (b) (6) SSgt (b) (6) TSgt (b) (6)
- 2) Crew Chiefs: Tsg (b) (6) , Amn (b) (6)
- 3) Hyd/Prop/EE/Avi/Com- MSgt (b) (6) TSgt (b) (6) TSgt (b) (6) SSgt (b) (6) TSgt (b) (6)

#### 2. SCHEDULE: (Local times; total of 13 lifts required, 1-3 lifts per day)

##### 14 SEP (Monday):

0900: Show at KYNG QENRKA728257 PPR #2311247

1100: Depart KYNG

1430: Land KMUO (Local)

\*\* ASAP After landing Safety Briefing, MX configures aircraft; plan next day's mission

1630: Installation Briefing

##### Support Aircraft

QDNRKA786257

PPR#2311254

0900 Crew show

1105 Depart YNG

1435 Land MUO

\*All extra crew and maintenance ride on support aircraft

##### 15 SEP (Tuesday): Range Time 0700-1000, (1-3 sorties if possible)

0530: Crew Show time/Load water and chemical

0700: Take Off KMUO (As determined by Mission Cmdr)

0723: Sunrise

##### 16 SEP (Wednesday): Range Time: 0700-1000, (1-3 sorties if possible)

0530: Show time/Load water and Chemical

0700: Take Off KMUO

0724: Sunrise

##### 17 SEP (Thursday): Range Time: 0700-1000 (1-3 sorties if possible)

0530: Show time

0700: Take Off KMUO

0725: Sunrise

##### 18 SEP (Friday): Range Time 0700-1000, (1-3 sorties )

0530: Crew Show time/Load water and chemical (FOD WALK @MUO)

0700: Take Off KMUO (As determined by Mission Cmdr)

0726: Sunrise

Multiple lifts TBD – Wx permitting

**\*\*SWAPOUT AIRCRAFT YNG QDNRKA788261 PPR#2311252**

0600: Show at YNG

0800: Depart YNG

1130: Land MOU

1230: Depart KMUO

2000: Land KYNG

**21 SEP (Monday): Range Time 0700-1000, (1-3 sorties if possible)**

0530: Crew Show time/Load water and chemical

**0700:** Take Off KMUO (As determined by Mission Cmdr)

0730: Sunrise

**22 SEP (Tuesday): Range Time 0700-1000, (1-3 sorties if possible)**

0530: Crew Show time/Load water and chemical

**0700:** Take Off KMUO (As determined by Mission Cmdr)

0730: Sunrise

**Support Aircraft QDNRKA787265 PPR# 2311301**

0900 Show YNG

1100 Depart YNG

1430 Arrive KMUO

**23 SEP (Wednesday):**

0700: Crew Show time/Load water and chemical

**0900:** Take Off KMUO (As determined by Mission Cmdr)

1630: Land KYNG

**\*\* If no delays are encountered, the mission will return to YNG after completion of last flush sortie and cleaning of system.**

**3. ITEMS TO TAKE:**

- a. **Mission Commander:** 1 Cellular Phone
- b. **Entomologist:** UHF Radio, Cardholders, Water Sensitive Cards, Tool Kit, VHF Radio, Cell Phone, Laptop Computer
- c. **Navigator:** Maps/Map Bag, Validation Map,
- d. **Spray Operator:** Safety Gear, computer
- e. **Spray Maintenance:** Mobility Kit, MASS Spares, Spill Kit, Pesticide Safety Binder, Safety Equipment and Tool and other equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION: N/A**

**5. PARKING PLAN:** Transient Ramp in front of Base Operations

**6. RADIO FREQUENCIES:**

- a. **Air To Ground:** Entomologists: 123.45 VHF; 292.2 (range); Maintenance 384.7
- b. **Mt Home:** PTD: 372.2/138.9, ACC CP (Raymond 27): 381.3, ATIS: 273.5, TWR: 133.85 / 253.5, GND: 120.5 / 275.8, RAPCON: 259.1, Salt Lake Center: 387.15/363.0
- c. **Range:** Saylor Creek Range (Cowboy Control): 236.05pri/381.3sec/134.1tertiary  
If Cowboy Control isn't up, contact MUO APP on 371.2  
Sagebrush Control: 251.2, Paradise MOA: 272.7/236.05/225.55  
Owyhee MOA: 392.2/266.35, Bruneau/Sheep Creek MOA: 251.875

**7. IN-BRIEFING:** 1630 Airfield Management Office

**8. Billeting:**

**Sleep Inn Foot Hills \$70/night**  
1180 US 20 Mountain Home, ID  
208-587-9743  
Fax: 208-587-7382

**9. Vehicles:** Mountain Home is providing vehicles.

2 - 6 PAX trucks (1 Ops O's; 1 Spray MX)  
1 - 15 Pax Van (MX)  
1 - Pick-up (MC/Ento)  
1 - Staff Car (Ops E's)

**10. SPRAY CONFIGURATION:**

- a. **System:** SP-3G
- b. **Nozzle Tips/Orientation:** Raindrop/Straight Back
- c. **Number:** Fuselage – 17 nozzles (8 left side: 9 right side)
- d. **Booms:** Fuselage
- e. **Aircraft:** 90-9107 **Mission Identifier:** QZNRKA728257
- f. **Profile:** Planned HV Profile

**11. SPRAY PARAMETERS:**

- a. **Altitude:** 100' AGL (we are treating at 46.5 acres/minute)
- b. **Swath Width.** 100 feet
- c. **Flow Rate.** 326 gal/min
- d. **Application Rate.** 7 gal/acre; approximately 3,200 acres to be treated for cheatgrass
- e. **Ground Speed:** 200 Knots

**12. SPRAY MIXING AND LOADING:**

**a. Composition of Each Gallon:**

- (1) 0.57 ounces of Plateau® (we want 4oz in 7 gallons per acre)
- (2) 1 ounce of Sta-put® Drift Retardant
- (3) 126.4 ounces of water

**b. First Load (4 Tanks of 450 gallons each + sump of 75 gallons)**

- (1) Fill to 450 gal water/tank using the pump on the water tanker truck. This is done by putting the filler hose into the rear tank with all tanks open to the common sump. Total water in tanks = 1,800 gal.
- (2) 75 gal/water in sump
- (3) Total water added = 1,800 gallons
- (4) Upload 8.03 gal (30.4L)/Plateau; add 14 gal Sta-put while agitating approximately 5-7 min  
Total quantity mix 1822 gallons

**13. SPRAY MONITORING OR TESTING:** Performed by the CPMPs

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 15-18 May 2006
- c. Purpose of Application: Control nuisance and vector mosquitoes (larval stages)
- d. Application Date/s: 16 and 18 May, 2006
- e. Time/s of Application (Local): 0615-1555 (16 May); 0555-0825 (18 May)
- f. Acres Treated: 1701 Acres
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Environmental Officer, DSN (b) (6)
- h. Date Spray Map Last Approved: 15 May 2006
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 15 May, 2006 CAPT (b) (6) COL (b) (6); LTC (b) (6); MAJ (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMP/s (Category 11): CAPT (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: MAJ (b) (6)
  - (2) CoPilot: COL (b) (6)
  - (3) Navigator(s): LTC (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - Spray Operators: MSG (b) (6), MSG (b) (6)
- d. Safety Briefer: CAPT (b) (6)
- e. Spray Maintenance: TSG (b) (6), TSG (b) (6), TSG (b) (6)
- f. Spray Ground Monitors: CAPT (b) (6)
- g. Crew Chiefs: MSG (b) (6), TSGT (b) (6)
- h. Avionics: TSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 7/6.1
  - (2) Ferry Sorties/Hours: 2/5.7

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Altosid Liquid Larvicide Concentrate (20% methoprene)
- b. EPA Registration Number: Altosid Liquid Larvicide Concentrate 272446
- c. Gallons Pesticide Loaded: 7.97 Gal Altosid® (16 May); 1.61 Gal Altosid® (18 May) Gallons Pesticide Applied: 7.97 Gal Altosid® (16 May); 1.61 Gal Altosid® (18 May); Gallons and Name of Flush Used: Water (900 Gallons).
- d. Other Additives Used: AirexDC® drift reduction agent
- e. Application Rate: 0.75 Oz/acre Altosid®

#### **4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 9108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: Raindrop nozzles
- e. Nozzle Orientation & Number Used: 14 straight back
- f. Pressure (PSI): 36-42 (16 May); 35-46 (18 May)
- g. Flow Rate: 2.95-3.04 gpm (16 May); 2.76 gpm (18 May)

#### **5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 200' LV (16 and 18 May)
- b. Spray Off Set: None
- c. Spray Release Altitude: 100'
- d. Ground Speed: 200 Knots (338 Feet/Second)

#### **6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 350° @ 5 Knots (16 May); Light and variable (18 May)
- b. Temperature (Degrees Fahrenheit): 45-78° (16, 18 May)
- c. Cloud Cover: Mostly Clear (16 May); Mostly Cloudy/ showers (18 May)
- d. Source: Ground observations

#### **7. SPRAY ACTIVITIES:**

16 and 18 May: 5 Sorties Flown. The first sortie was terminated prematurely due to a non-functional totalizer (i.e. cumulative pesticide volume counter). Three wet passes were completed. In short, the instantaneous flow rate was known, but not the total volume of pesticide applied per unit time. Since weather conditions were ideal for application, and the forecast for the remainder of the week appeared marginal for aerial spray activities, a decision was made by the mission commander under the advisement of the CPMP to continue the mission and adjust for flow rates between sorties using pump pressure changes and/or nozzle addition or removal. Justification for this deviation from standard procedure was based on several factors:

1. Weather is rarely optimal for aerial spray activities in North Dakota. In this instance, wind direction and speed were ideal for an application of larvicide. Winds were from the N-NW with a maximum speed of 7 knots and an average speed of 4.5 knots. Furthermore, upon consultation with the customer (Grand Forks AFB CE) concerning the problems involved, the customer exhibited strong support for the continuation of spray activities, as they are acutely aware of the time sensitivity (with respect to effective mosquito control) of this application.
2. The application area in question was relatively small (1608 acres). Therefore, with a high volume application with 3.5 sorties involved and the use of 3200 plus gallons of finish spray, the flow rates of the applied pesticide could be modified between sorties to produce the desired application rates. Furthermore, with this scenario of treating the application block as a whole, there was no possibility of over treating, as the limiting factor was the amount of pesticide available. Since treatment was conducted at the lower label (legal) rates, there was an approximately 30% over application factor included, which in using the system as configured would have been impossible to achieve. If this material was required to be applied neat (i.e. concentrated) this application would never have been attempted, because in that case precise volume control is required. However, since this was a dilute application, the margin of legal safety was large enough for the mission to continue. In this case, the spray-on times for the acreages involved and the volume of pesticide applied per unit time were well within the calculated legal factors, and were in fact within 5% of the planned application rates.
3. The pesticide applied (Altosid) is relatively benign from a toxicological standpoint. Altosid is an insect growth regulator, and even in its concentrated state has little or no effect on non-target organisms. Concentrated Altosid, although relatively non-toxic, can be an eye irritant. However, in its diluted state, (as sprayed from the aircraft - 0.75 oz in 2 gallons water) it poses no human or animal toxicologically adverse effects. Since there was no possibility of overtreatment (as stated previously), the risk factors were negligible. To re-emphasize, treatment without a flow totalizer

using a more toxic material would be unacceptable. However, with the chemical involved and the dilution factors and weather variables, non-treatment was not an acceptable option.

Sortie 1 and 2: 300 seconds spray on time. 465 Acres covered with an application rate of 3.02 gallons finish spray per second. Total spray applied: 907 gallons. Winds: Ave 6@ 360.

Sortie 3: 298 seconds spray on time. 461.9 Acres covered with an application rate of 3.04 gallons finish spray per second. Total spray applied: 907 gallons. Winds: Ave 5.6@ 330.

Sortie 4: 312 seconds spray on time. 483.6 Acres covered with an application rate of 2.76 gallons finish spray per second. Total spray applied: 850 gallons. Winds: Ave 6.5 @ 360.

Sortie 5: 211 seconds spray on time. 290.5 Acres covered with and application rate of 2.76 gallons finish spray per second. Total spray applied: 581 gallons. Winds: Light and variable.

## **8. MONITORING (Pre- and Post-Treatment):**

- a. The Grand Forks AFB Environmental officer conducts adult mosquito trapping and larval sampling to determine mosquito densities on base. Prior to the 16-18 May application, no systematized monitoring was conducted, however, increased larval densities within spray blocks was observed by the environmental officer. In addition, larval dip sampling was conducted at 4 locations on the base by the 757th entomologist.
- b. Effectiveness:
  - (1) Technique/s Used: Larval dip samples
  - (2) Results: Pre-application averages at the 4 locations ranged from 4 larvae/dip to 20 larvae/dip. The greatest numbers were collected in the swales adjacent to the golf course. Other sampling locations included the ditches to the west of the horse barns, the ditches to the north of the smokehouse, and the area west of the alert pad by the perimeter road. The Grand Forks AFB Environmental section will conduct larval counts in spray blocks that were treated with Altosid® larvicide to determine the insecticide's efficacy.

**8. REMARKS:** This is the fifth spray season at Grand Forks AFB. The use of Low Volume sprays in order to treat mosquito larvae has been accomplished by the 910 AW/757 AS before. Recommend that Grand Forks AFB consider using a *Bacillus thuringiensis* larvicide (VectoBac) in the future to better assess larval mortality after the spray. Despite the fact that several operational difficulties were encountered, this mission was completed to the satisfaction of the customer. One of the principle difficulties encountered was with the MASS system and a defective totalizer. The aerial spray maintenance and avionics components to the success of this mission were critical. Special mention must be made for TSgt (b) (6) of Avionics and TSgt's (b) (6) (b) (6) and (b) (6) of spray maintenance for their efforts in troubleshooting the electrical misgivings of the MASS spray system in a timely fashion in order for the mission to continue on 16 May. In an adverse environment they managed to "jump-start" the system so the mission could advance.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Parris Island MCRD

1. Objective/Purpose/Benefits of the Spray Mission. Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training Parris Island MCRD SC.

2. Capability: Spray Aircraft available on 15-18 OCT 07

3. Concept of Operations:

**15 OCT (Monday):**

1300: Show Time  
1500: Take Off KYNG  
1700: Land KNBC  
1730: Safety Briefing

**16 OCT (Tuesday):** Adulticide at Parris Island

TBD Installation Brief  
1430: Showtime  
1500: Load Chemical/Wx Decision  
1645: Take off KNBC (Start Spray 1.5 hrs prior to Sunset)  
1850: Sunset

**17 OCT (Wednesday)** Wx Backup/ System Clean up.

1430 Showtime  
1500: Load Chemical/Wx Decision  
1645: Take off KNBC  
1849: Sunset

**18 OCT (Thursday)** Redeploy to YNG

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate;
- d. Deploy: 2.0 Hrs
- e. Re-Deploy: 2.0 Hrs
- f. Spray Time: 16 Minutes

5. Aircraft Commander Capt (b) (6)

6. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) DSN (b) (6)

// SIGNED //

(b) (6), CAPT, USAFR  
Assistant Chief of Aerial Spray

**910 AW AERIAL SPRAY  
PMP'S POST-MISSION REPORT-PARRIS ISLAND MCRD  
15-18 OCT 2007**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island MCRD, South Carolina
- b. Mission Duration: 15-18 OCT 2007
- c. Purpose of Application: Control of biting midges and adult mosquitoes
- d. Application Dates: 16 OCT 07
- e. Times of Application (Local): 1720-1800
- f. Acres Treated: 7,500
- g. Project Coordinator (Name, Phone #): (b) (6) , (b) (6)
- h. Date Spray Map Last Approved: 16 OCT 2007
- i. Date of Waste Generation Letter: 10 April 2000.
- j. Installation In-Briefing: 16 OCT 07; LTCOL (b) (6)
- k. Mission identifier: QZNRKA057288

**2. OPERATIONAL:**

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMPs (Category 11): LTCOL (b) (6)
- c. Aircrew:
  - (1) Pilots: CPT (b) (6) , CPT (b) (6) , COL (b) (6)
  - (2) Navigator(s): LTCOL (b) (6)
  - (3) Flight Engineer: MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) , SGT (b) (6)
- d. Safety Briefer: LTCOL (b) (6)
- e. Spray Maintenance: TSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- f. Crew Chiefs: TSG (b) (6) , TSG (b) (6)
- g. Avionics: TSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 1/1.4 (16 OCT)
  - (2) Ferry Sorties/Hours: 2/2.1 (15 OCT), 2.0 (18 OCT)
  - (3) Training Sorties/Hours: 1/0.8 (17 OCT)

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 44
- e. Gallons Pesticide Applied: 44
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 12 Gallons Marvel Oil
- h. Other Additives Used: n/a
- i. Application Rate: 0.75 oz/acre

#### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 90-9107
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles
- e. Nozzle Orientation & Number Used: 11 straight down; 5 left, 6 right
- f. Pressure (PSI): 45
- g. Flow Rate: 5.4 gpm

#### 5. APPLICATION PARAMETERS:

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

#### 6. WEATHER OBSERVATIONS:

- a. Winds (Direction/Speed in knots): Ground; 1640 – 4.5 knots average at 175°-200°; 1750 – 3.5 knots average at 180°; airplane 8-10 knots at 180°
- b. Temperature (°F): Ground; 80° at 1640, dropping to 78° at 1750
- c. Humidity: Ground; 55% at 1640, increasing to 65% at 1750
- d. Cloud Cover: Clear 50% to 90%
- e. Source: Ground observations/at altitude during spray

#### 7. SPRAY MONITORING (Pre- and Post-Treatment):

- a. Deposition Pattern:
  - (1) Technique Used: Normal projected off-sets based on MASS system characterization.
- b. Effectiveness:
  - (1) Technique Used: light traps were used to monitor biting midge and mosquito densities pre- and post-treatment.
  - (2) Results: Will be determined from light trap counts.

- 8. REMARKS:** Biting midges and mosquitoes were present and active during the time of spray. Landing counts on 17 OCT were taken. No mosquitoes were present; the counts for biting midges are in the table below:

Location	Time	Wind Speed Knots	Wind Direction	Temperature	Humidity	Number per minute
Rifle Range	1700	3	100	81	65	0
Elliott's Beach	1711	2	60	82	65	1
Golf Course	1720	3	100	82	61	0
Page Field	1726	2	95	80	63	0
Marina	1732	6	115	80	64	0

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **PARRIS ISLAND MCRD, SC**

### **15-18 OCT 2007**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Pilots: MC-MAJ (b) (6) , Capt (b) (6) , COL (b) (6) , Capt (b) (6)
- (2) Navigators: LTC (b) (6)
- (3) Flight Engineers: MSG (b) (6)
- (4) Spray Operators: Msgt (b) (6) , Ssgt (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: Tsgt (b) (6) , Tsgt (b) (6) , Tsgt (b) (6)
- (2) Crew Chiefs: Tsgt (b) (6) , Tsgt (b) (6)
- (3) Avionics: Tsgt (b) (6)

##### **c. Pest Management Professionals/Entomologist: LTC (b) (6)**

#### **2. PPR REQUIREMENTS: 288-02**

#### **3. PLANNED SEQUENCE OF EVENTS:** (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

**15 OCT (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

- 1300: Show Time
- 1500: Take Off KYNG
- 1700: Land KNBC
- 1730: Safety Briefing

**16 OCT (Tuesday):** Adulticide at Parris Island

- TBD Installation Brief
- 1430: Showtime
- 1500: Load Chemical/Wx Decision
- 1645: Take off KNBC (Start Spray 1.5 hrs prior to Sunset)
- 1850: Sunset

**17 OCT (Wednesday)** Wx Backup or System Clean up. If wx backup, see above note for Tuesday.

- 1430 Showtime
- 1500: Load Chemical/Wx Decision
- 1645: Take off KNBC
- 1849: Sunset

**18 OCT (Thursday) Redeploy to YNG**

- 1000: Show Time
- 1200: Take off KNBC
- 1400: Land KYNG

#### **4. ITEMS TO TAKE/NOTES:**

##### **a. Mission Commander:**

- (1) Mission Commander Cell Phone

##### **b. Entomologist/CPMP:**

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

##### **c. Navigators:**

- (1) Maps
- (2) Templates

**d. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 11 open for 8005's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 90-9107
- f. **Mission Identifier:** QENRKA057288

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 2,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 8 Minutes
- h. **Flow Rate:** 5.4 gallons/Minute

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 118.975 Tower, 123.0 CTAF (tower open until 0100 hrs Z)  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 123.4 V**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing. Vehicles will be at Base Operations.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP &Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC:** (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Langley AFB, Hampton, Ft Eustis, VA

1. **Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites and mosquito borne diseases.
2. **Capability:** Spray Aircraft 89-9107 Available 15-19 Aug 05.
3. **Concept of Operations:**
  - 15 Aug (Monday):
    - 0900: Show at KYNG
    - 1100: Depart KYNG
    - 1215: Land KLF1
    - 1230: Mission Safety Briefing
    - 1530: Spray In-Briefing
    - 1600: Showtime, Weather Decision, Load Dibrom
    - 1730: Take off KLF1 (Adulticide Spray Sortie)
    - 1957: Sunset
  - 16 Aug (Tuesday):
    - 1530: Showtime, Weather Decision, Load Dibrom
    - 1730: Take off KLF1 (Adulticide Spray Sortie)
    - 1830: Quiet hours begin
    - 2000: Quiet hours end
    - 1956: Sunset
  - 17 Aug (Wednesday):
    - 1530: Showtime, Weather Decision, Load Dibrom
    - 1730: Take off KLF1 (Adulticide or Spray Training Sortie)
    - 1954: Sunset
  - 18 Aug (Thursday):
    - 1530: Showtime, Weather Decision, Load Dibrom
    - 1730: Take off KLF1 (Adulticide or Spray Training Sortie)
    - 1953: Sunset
  - 19 Aug (Friday):
    - 0800: Show time Hotel Lobby
    - 1000: Take off for KYNG
    - 1115: Land KYNG
4. **Spray Parameters:**
  - a. **Altitude:** 150' AGL for Adulticide swaths when no trees are present.
  - b. **Swath Width:** 2000 feet for ULV or as determined by the CPMP
  - c. **Flow Rate:** 3.6 gallons/minute ULV
  - d. **Application Rate:** 0.50 oz/acre Dibrom® Concentrate
  - e. **Ground Speed:** 200 Knots
  - f. **Proposed spray area:** Approximately 125,000 acres
5. **Mission Commander:** Maj (b) (6)
6. **Aircraft Commander:** Ma (b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 15-19 Aug 2005

**Purpose/Objectives/Benefits:** Characterize the droplet spectrum for two TeeJet flat fan nozzles using the Characterize Ultra Low Volume (ULV) fuselage configuration and Dibrom insecticide.

**1. 910 AW PARTICIPANTS:**

**a. Aircrew:**

- (1) Mission Commander: MAJ (b) (6)
- (2) Pilots: MAJ (b) (6) , LTC (b) (6) , MAJ (b) (6) , CPT (b) (6)
- (3) Navigator: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6) , SSG (b) (6)

**b. Maintenance:**

- (1) Spray Maintenance: SMS (b) (6) , MSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , SSG (b) (6)
- (3) Avionics: TSG (b) (6)

**c. Certified Pest Management Professionals:** CPT (b) (6) , MAJ (b) (6) (In Place)

**d. Observer:** Col (b) (6) , 910LG/CC

**e. Vehicles: Rentals will be at base ops. Enterprise (757) 865-7201**

- **Vehicle Dispatch:** will provide 3 vans/one staff car
- **Ops:** two GOV vans
- **Mx:** one GOV van for spray mx, crew chiefs, rental car for SMS (b) (6)
- **Entomologist:** one staff car- (b) (6) and MC

**f. Billeting Office:** COM: (757) 764-4667 EXT 2606 POC (b) (6)  
DSN 574-4667, EXT 2528; FAX 574-3038

- **Staying at Candlewood Hotel COM 757-766-8976**
- **Group Confirmation 20130299959**
- Pick up Non Available Slips at Langley Billeting

**2. PPR: 0115TP01**

**3. SCHEDULE: (All times local)**

**15 Aug (Monday):**

0900: Show at KYNG  
1100: Depart KYNG  
1215: Land KLFI  
1230: Mission Safety Briefing  
1530: Spray In-Briefing  
1600: Showtime, Weather Decision, Load Dibrom  
1730: Take off KLFI (Adulticide Spray Sortie)  
1957: Sunset

**16 Aug (Tuesday):**

1530: Showtime, Weather Decision, Load Dibrom  
1730: Take off KLFI (Adulticide Spray Sortie)  
1830: Quiet hours begin  
2000: Quiet hours end  
1956: Sunset

**17 Aug (Wednesday):**

1530: Showtime, Weather Decision, Load Dibrom  
1730: Take off KLFI (Adulticide or Spray Training Sortie)  
1954: Sunset

**18 Aug (Thursday):**

1530: Showtime, Weather Decision, Load Dibrom  
1730: Take off KLFJ (Adulticide or Spray Training Sortie)  
1953: Sunset

**19 Aug (Friday):**

0800: Show time Hotel Lobby  
1000: Take off for KYNG  
1115: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
  - (1) Ops phone DSN878-3588
  - (2) Tower phone DSN 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9** or 348.6 (phone 877-0221 ops)
  - (2) Tower – **118.7** (phone DSN 877-2862) voice mail 7-2962
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB:** Tower DSN 574-7999
  - (1) Tower - **125.0** or 253.5
  - (2) Ground - **121.7** or 275.8
  - (3) Clearance – **118.85** or 271.3
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15,** Tower Supervisor DSN 262-3443
- e. **Norfolk Approach: 124.9**
- f. **Spray Ground: Primary 392.2; Secondary: 308.6**

**7. IN-BRIEFING:** 1530 hrs; CE Conference Room

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** ten 8005 nozzles -- straight down
- c. **Aircraft:** 89-9107
- d. **Mission Identifier:** QZNRKA766227

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
- g. **Swath Width:** 2000 foot

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp

c. **When:** 1600 hrs each day pending weather and heat index.

d. **Furnished by Installation:**

- (1) Pesticide
- (2) Loading Equipment/Crew
- (3) Hazardous Waste Disposal

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT-Langley AFB 15-18 Aug 2005

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB, VA
- b. Mission Duration: 15-18 Aug 2005
- c. Purpose of Application: Control of adult mosquitoes transmitting arboviruses
- d. Application Dates: 15-18 Aug 2005
- e. Times of Application (Local): 1835-2010 (15 Aug); 1745-1945 (16 Aug); 1800-2006 (17 Aug)
- f. Acres Treated: 79,616 total: 13,824 (15 Aug); 31,744 (16 Aug); 34,048 (17 Aug)
- g. Project Coordinator (Name, Phone #): (b) (6)
- h. Date Spray Map Last Approved: 15 Aug 2005
- i. Date of Waste Generation Letter: 4 April 1996
- j. Installation In-Briefing: 1 CE Conference Room, Langley AFB; Maj (b) (6) & Maj (b) (6)
- k. Mission identifier: QZNRKA766227

### 2. OPERATIONAL:

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMPs (Category 11): LTC (b) (6) , MAJ (b) (6) , CPT (b) (6)
- c. Aircrew:
  - (1) Pilots: MAJ (b) (6) , LTC (b) (6) , MAJ (b) (6) , CPT (b) (6)
  - (2) Navigator(s): MAJ (b) (6)
  - (3) Flight Engineer(s): MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) , MSG (b) (6) , SSG (b) (6)
- d. Safety Briefer: CPT (b) (6)
- e. Spray Maintenance: SMS (b) (6) , MSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- f. Crew Chiefs: TSG (b) (6) , SSG (b) (6)
- g. Avionics: TSG (b) (6)
- h. Observer: Col (b) (6) 910MXG/CC
- i. Flying Data:
  - (1) Spray Sorties/Hours: 3/5.7
  - (2) Ferry Sorties/Hours: 2/3.0

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 210 (15 Aug); 60 (16 Aug); 45 (17 Aug)
- e. Gallons Pesticide Applied: 56 (15 Aug); 124 (16 Aug); 133 (17 Aug)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 18 gallons marvel oil
- h. Other Additives Used: n/a
- i. Application Rate: 0.5 oz/acre (15-16 Aug); 0.6 oz/acre (17 Aug)

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 90-9107
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles

- e. Nozzle Orientation & Number Used: 10 straight back (9 used 15-16 Aug; 10 used 17 Aug)
- f. Pressure (PSI): 18-37 (15 Aug); 35-55 (16 Aug) & 40-60 (17 Aug)
- g. Flow Rate: 3.5 gpm (15-16 Aug); 4.3 gpm (17 Aug)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): 060°/7 (15 Aug); 070°/8 (16 Aug); 080°/8 (17 Aug)
- b. Temperature (°F): 88-82 °F (15 Aug); 84-80 °F (16 Aug); 80-77 °F (17 Aug)
- c. Dew Point: 79 °F (15 Aug); 76 °F (16 Aug); 72 °F (17 Aug)
- d. Cloud Cover: Mostly Cloudy (15 Aug); Mostly Cloudy/thunderstorms (16 Aug); Scattered clouds (17 Aug)
- e. Source: Ground observations/at altitude during spray

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
  - (2) Results: DGPS shows spray block completed.
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: Communities did not report numerical figures but reported that mosquito densities had dropped significantly.

**8. REMARKS:** Evidence of mosquito vectored viruses (namely Eastern Equine Encephalitis and West Nile Virus) has shown up in the tidewater area for the summer season 2005. As of 8 August 2005, 94 mosquito pools, 45 sentinel chickens, and 5 horses tested positive for virus or antibodies against encephalitides. In contrast to high levels of virus, mosquito populations were lower than normally encountered this time of the year. While popular local opinion related these depressed mosquito populations to the predaceous work of dragonflies, seen in abundance this year, it is more likely correlated with a lower than average rainfall. Virus activity prompted the majority of the communities to spray their areas, with the exception of Hampton City and Poquoson. An image showing the aircraft flight path and spray areas for 15-17 August applications is shown in Attachment 1. We received excellent support from Langley AFB, 1 CES to make this mission a success. This was an exceptional training opportunity for us, with 3 pilots receiving aerial spray aircraft commander upgrade training and 1 spray operator finishing ULV spray training. Our next scheduled aerial spray mission to Langley AFB will be 3-7 Oct 2005.

//Signed//

# 910 AW AERIAL SPRAY UNIT -- POST-MISSION REPORT

## MINOT AFB ADULT MOSQUITO CONTROL 15-19 JUNE 2009

### 1. MISSION BASICS:

- a. Installation Sprayed: Minot AFB, North Dakota
- b. Mission Duration: 15-19 June 2009
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date/s: 16 & 17 June 2009
- e. Time/s of Application (Local): 2030-2145 (16 Jun) & 2030-2200 (17 Jun)
- f. Acres Treated: 4,950 (16 Jun) & 12,230 (17 Jun) = 17,180 acres
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Pest control supervisor/spray coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 16 June 2009
- i. Date of Waste Generation Letter: 17 July 2006
- j. Installation In-Briefing: (When/Where/Briefer/s): 16 Jun; 5 CES Conference Room; Lt Col (b) (6) Lt Col (b) (6) (Mission Commander), Maj (b) (6) Lt Col (b) (6)

### 2. OPERATIONAL:

#### a. Aircrew:

- (1) Pilots: Maj (b) (6) Lt Col (b) (6)
- (2) Navigators: Maj (b) (6)
- (3) Flight Engineers: CMS (b) (6)
- (4) Spray Operators: MSgt (b) (6) MSgt (b) (6)

#### b. Maintenance:

- (1) Spray Maintenance: SSgt (b) (6) TSgt (b) (6) MSgt (b) (6) SrA (b) (6) (b) (6)
- (2) Crew Chief(s): TSgt (b) (6) Amn (b) (6)
- (3) Avionics: MSgt (b) (6)

#### c. Entomologist: Lt Col (b) (6)

#### d. Safety Briefer: Lt Col (b) (6)

#### e. Flying Data:

- (1) Spray Sorties/Hours: 2 sorties (1.8+1.9) = 3.7
- (2) Ferry Sorties/Hours: 2 sorties (3.6 + 3.4) = 7.0

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Trumpet<sup>®</sup> EC Concentrate
- b. EPA Registration Number: 59639-90-5481
- c. Formulation Sprayed: Emulsified Concentrate
- d. Gallons Pesticide Loaded: 105 gallons total (16 Jun)
- e. Gallons Pesticide Applied: 31 gal (16 Jun) & 73 gal (17 Jun)
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 100 gallons; water
- h. Other Additives Used: None
- i. Application Rate: 0.8 oz/acre (16 Jun); 0.75 oz/acre (17 Jun)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 8- 8005s total (4 each side) for 1000' swaths (16 Jun) and 16- 8005's (8 each side) for 2000' swaths (16 Jun) oriented straight down
- f. Pressure: 45-60 psi
- g. Flow Rate: 2.9 gallons per minute (16 Jun); 5.5 gallons per minute (17 Jun)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000' (16 Jun); 2000' (17 Jun)
- b. Spray offset: 1000' (16 Jun); 2000' (17 Jun)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 5 knots @ 130° (16 Jun) & light and variable <3 knots @ 180° (17 Jun)
  - (2) Release Altitude: 12 knots @ 130° (16 Jun) & 12 knots @ 180° (17 Jun)
- b. Temperature (Degrees Fahrenheit): 70° (16 Jun) & 77° (17 Jun)
- c. Relative humidity: 69% (16 Jun) & 62% (17 Jun)
- d. Cloud Cover: Clear (16 Jun) & Clear (17 Jun)
- e. Source: Ground observations and aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Minot AFB Pest Control Shop (5 CES/CEOUE) collected 119 mosquitoes/trap night and 56 mosquitoes/trap night the night following the application (47% reduction).
- b. No data was reported from the city of Minot, but judging the excellent environmental conditions and results at the AFB, we expect significant reduction in mosquito activity.

**8. REMARKS:** This was the 5<sup>th</sup> year of spray operations conducted at Minot AFB and the city of Minot to control mosquitoes. The City of Surrey (approximately 2500 acres) was added east of Minot. Areas treated are shown in Attachment 1. Significant spring rainfall produced ponds of water in all fields surrounding Minot AFB. Moderate levels of mosquito abundance were reduced by this application. New emergence and pressure from outside the spray area caused trap numbers to increase to 374 the night after spraying was completed. All spraying was optimized by flying up to sunset (2150) to control the target mosquito species, *Aedes vexans*.

The 5<sup>th</sup> CES and others activities on Minot AFB provided outstanding support for our operation; the people at Minot AFB are great to work with. Special thanks go out to Ms. (b) (6) and SrA (b) (6) for making this mission a success through their conscientious and diligent work.

//signed//

Entomologist and DoD Certified Applicator

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MINOT AFB, ND

### 15-19 June 2009

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Minot AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Lt Col (b) (6)
- (2) Pilots: MAJ Phil Townsend, Lt Col (b) (6)
- (3) Navigators: MAJ (b) (6)
- (3) Flight Engineers: CMS (b) (6)
- (4) Spray Operators: MSG (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SSG (b) (6), TSG (b) (6), MSG (b) (6), SRA (b) (6)
- (2) Crew Chief(s): TSG (b) (6), AMN (b) (6)
- (3) Avionics: MSG (b) (6)

##### c. Entomologist: LTC (b) (6) (TR arriving at MOB @ 1300 hrs)

#### 2. SCHEDULE: (All Local Times)

##### 15 Jun (Monday) PPR: 1501 RM

- 1300: Show at KYNG
- 1500: Depart KYNG
- 1730: Land KMIB/Safety Briefing
- Spray Safety Brief at aircraft

##### 16 Jun(Tuesday):

- 1430: Installation Brief
- 1755: Show time
- 1800 Load and Calibration
- 1955: Take off KMIB for area review (Adulticide Spray Sortie will begin @ 2000 hrs)
- 2148: Sunset

##### 17 Jun (Wednesday):

- 1800: Show time
- 1800 Load Chemical
- 2000: Take off KMIB (Adulticide Spray Sortie)
- 2149: Sunset

##### 18 Jun (Thursday): Wx backup or training sortie

- TBD: Show time
- TBD Load Chemical
- TBD: Take off KMIB (Adulticide Spray Sortie)
- 2149: Sunset

##### 19 Jun (Friday):

- 0700: Show time
- 0900 Depart KMIB
- 1300 Land YNG

\*\*Time will adjust if using weather day

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, Compass, Pest Safety Binder,  
1 UHF Radio, 1 VHF radio Project Notebook
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

#### 4. PPR: 1501RM

#### 5. RADIO FREQUENCIES: Air To Ground Primary VHF 123.45

Minot AFB Tower 120.65 V, 236.6, 253.5; Minot International 118.2 V or Unicom 122.95

#### 6. CONFIGURATION: SP2G

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down

- c. **Number:** ULV: 8 8005s total (4 each side) for 1000' swaths and 16 8005's (8 each side) for 2000' swaths  
e. **Aircraft:** 89-9107  
f. **Mission Identifier:** QZNRKA446166

**7. SPRAY PARAMETERS:**

**a. Adulticide**

- (1) **Area to be treated:** 14,000 acres
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 1000 feet for AFB; 2000' City of Minot or as determined by the PMP
- (4) **Flow Rate.** 2.7 gallons/minute for 1000' swaths; 5.5 gal/min for 2000' swaths
- (5) **Application Rate.** 0.75 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots (338 Feet/Second)
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** 90 gallons will be loaded

**9. TRANSPORTATION:** 2 six packs + 2 staff vehicles (or equivalent)

18 APR 2006

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft 89-9108 available 15-19 May 2006

**3. Concept of Operations:**

**15 May (Monday)**

0900: Showtime  
1100: Depart KYNG  
1300: Land KGFK/Safety Briefing  
1500: Spray In Brief (CPMP, MC, AC).

**16 May (Tuesday):**

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0550: Sunrise

**17 May (Wednesday):**

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0549: Sunrise

**18 May (Thursday):**

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0547: Sunrise

**19 May (Friday):**

0800: Show time  
1000: Take off KGFK  
1400: Land KYNG

#### 4. Spray Parameters:

- a. **Altitude:** 100' AGL for Larvicide swath when no trees are present.
- b. **Swath Width.** 200 feet for LV or as determined by the CPMP
- c. **Flow Rate.** 1.86 gallons/minute LV
- d. **Application Rate.** 0.75 oz/acre Altosid<sup>®</sup>)
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 1,800 acres

5. **Mission Commander:** Major (b) (6)

6. **Aircraft Commander:** Capt (b) (6)

7. Support at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6), DSN (b) (6).

7. HQ AFRC/DOOM approval via email.

##### 18 May (Thursday):

0430: Show time  
0530 Load Chemical  
0600: Take off KGFK (Larvicide Spray Sortie)  
0547: Sunrise

##### 19 May (Friday):

0800: Show time  
1000: Take off KGFK  
1400: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 UHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit, Trakstar Receiver and Antenna

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

**4. PPR: 051501CA**

**5. RADIO FREQUENCIES: Air To Ground Primary** UHF 392.2; VHF 123.45  
KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/ Fuselage Booms
- b. Nozzle Tips/Orientation:**  
Larvicide: Raindrop nozzles straight back
- c. Number:**  
Larvicide: fuselage only, 12 total (6 each side) straight back
- d. Booms:** Fuselage
- e. Aircraft:** 899108
- f. Mission Identifier:** QZNRKA311125

**7. SPRAY PARAMETERS:**

- a. Larvicide**
  - (1) **Area to be treated:** 1608
  - (2) **Altitude:** 100' for Larvicide application
  - (3) **Swath Width.** 200 feet
  - (4) **Flow Rate.** 186 gallons/minute
- b. Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)
- c. Ground Speed:** 200 Knots

**8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)**

- a. Composition of each Gallon:**
  - (1) 0.375 ounces of Altosid® 20
  - (2) 0.64 ounces of AirexDC™ drift retardant
  - (3) Water
- b. Typical load:** (2 tanks of 450 gallons each)
  - (1) Fill with 450 gallons of water/tank. Total water in tanks = 900 gal.
  - (2) Total water added = 900 gallons
  - (3) Add 1.33 (1 1/3) gallons of Altosid® per tank (2 2/3 gallons total).
  - (4) 2.5 gal AirexDC per tank (5 Gal total) while agitating approximately 15 min
  - (5) Total quantity mix. 908 gallons
- c. Final Load for complete flush**
  - (1) Fill tanks with the amount of water necessary for a proper system flush
- d. Mixing Instructions:**  
SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.  
PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

**9. TRANSPORTATION: 3 x 6 Paks and 1 van provided by 319 CES, Col (b) (6) has a staff car. Transportation (bus) will be provided to the In-Brief , vehicles will be picked up there.**

- 1-Aircrew**
- 1-Spray MX**
- 1-Crew Chiefs & Specialists**

**10. LODGING: On Base Billeting:** DSN 362-3070/6189 or (701) 594-8431, FAX 362-3069

- Prime Knight DSN 362-3844 or (701) 747-3844
- 17 Rooms Reserved

## 11. CONTACTS:

### a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205

**910 AW AERIAL SPRAY UNIT -- POST-MISSION REPORT  
MINOT AFB ADULT MOSQUITO CONTROL & ARMY CORPS  
OF ENGINEERS PROPERTY NEAR WILLISTON 15-22 JUL 2009**

**1. MISSION BASICS:**

- a. Installation Sprayed: Minot AFB, North Dakota and Army Corps of Engineers Property near Williston, ND.
- b. Mission Duration: 15-22 July 2009
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date/s: 20 & 21 July 2009
- e. Time/s of Application (Local): 2020-2140 (20 Jul) & 1957-2133 (21 Jul)
- f. Acres Treated: 24,364 (20 Jul) & 16,972 (21 Jul) = 41,336 acres
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) Pest control supervisor/spray coordinator, DSN (b) (6) (b) (6) Land Manager, (b) (6)
- h. Date Spray Map Last Approved: 15, 20 July 2009
- i. Date of Waste Generation Letter: 17 July 2006
- j. Installation In-Briefing: (When/Where/Briefer/s): 16 Jul; 5 CES Conference Room; Maj (b) (6) (Mission Commander)

**2. OPERATIONAL:**

- a. Mission Commander: Maj (b) (6)
- b. Certified PMP/Entomologists (Category 11): Maj (b) (6) Maj (b) (6) (b) (6) safety briefer)
- c. Aircrew:
  - Pilots: LtCol (b) (6) LtCol (b) (6)
  - Navigators: LtCol (b) (6) Capt (b) (6)
  - Flight Engineers: MSgt (b) (6)
  - Spray Operators: MSgt (b) (6) , SSgt (b) (6) MSgt (b) (6)
- d. Maintenance:
  - Spray Maintenance: TSgt (b) (6) SSgt (b) (6) SrA (b) (6) (b) (6)
  - Crew Chief(s): SRA (b) (6) A1C (b) (6)
  - Avionics: SSgt (b) (6)

**Flying Data:**

- (1) Spray Sorties/Hours: 2 sorties (2.9 + 2.5) = 5.4
- (2) Ferry Sorties/Hours: 2 sorties (4.2 + 3.5) = 7.7

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Trumpet<sup>®</sup> EC Concentrate (78% naled); Zenivex (20% etofenprox)
- b. EPA Registration Number: 59639-90-5481 Trumpet; 2724-791 Zenivex
- c. Formulation Sprayed: Emulsified Concentrate; E20
- d. Gallons Pesticide Loaded: 60 gal Zenivex (20 Jul); 90 gal Trumpet (21 Jul)
- e. Gallons Pesticide Applied: 60 gal (20 Jul) & 90 gal (21 Jul)
- f. Gallons and Name Diluent Used: 50 gal BVA-13 with Zenivex
- g. Gallons and Name of Flush Used: 150 gal; water
- h. Other Additives Used: None
- i. Application Rate: 0.32 oz/acre (20 Jul); 0.68 oz/acre (21 Jul)

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 99107
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet<sup>®</sup> 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 10-8005s total (5 each side-20 Jul) and 16- 8005's (8 each side-21 Jul) oriented straight down
- f. Pressure: 35-37 psi
- g. Flow Rate: 4.4 gallons per minute (20 Jul); 5.3 gallons per minute (21 Jul)

### 5. APPLICATION PARAMETERS:

- a. Swath Width Flown: 2000'
- b. Spray offset: 4000' (20 Jul); 2000' (21 Jul)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

### 6. WEATHER OBSERVATIONS:

- a. Winds (Direction/Speed):
  - (1) Ground: 5-8 knots @ 280° (20 Jul) & 7 knots @ 310° (21 Jul)
  - (2) Release Altitude: 12-18 knots @ 290° (20 Jul) & 12 knots @ 310 (21 Jul)
- b. Temperature (Degrees Fahrenheit): 70-64° (20 Jul) & 70° (21 Jul)
- c. Relative humidity: 39-58% (16 Jul) & 53% (17 Jul)
- d. Cloud Cover: Scattered clouds
- e. Source: Ground observations and aircraft

### 7. SPRAY MONITORING (Pre- and Post-Treatment):

- a. Monitoring in Williston was done with New Jersey light traps, wild-collected mosquitoes in bioassay cages, droplet density collectors, and landing counts.
- b. Minot AFB Pest Control Shop (5 CES/CEOUE) collected 119 mosquitoes/trap night and 56 mosquitoes/trap night the night following the application (47% reduction). No data was reported from the city of Minot, but judging the excellent environmental conditions and results at the AFB, we expect significant reduction in mosquito activity.

8. **REMARKS:** This was the 1<sup>st</sup> year of spray operations conducted for the Army Corps of Engineers and surrounding areas. A large larviciding project was completed earlier in the year and adult mosquitoes had been depressed relative to previous years (see attachment 1). However, large numbers of adult mosquitoes were present in Williston just before the spray with pre-spray landing counts recorded at over 100+/per minute and traps were collecting over 300 females in 12 hrs. This area was treated with Zenivex, a newly EPA registered mosquito adulticide with low mammalian toxicity. We gathered efficacy data for this application with help from (b) (6) (Leading Edge Associates, LLC); caged mosquitoes exhibited a 95% mortality rate within 24 hrs of the application (see attachment 2). In addition, 2 hr post-spray landing

rates dropped to 0 from a pre-spray rate of 100+/minute. Attachment 3 shows the area treated around Williston on 20 July. However, landing rates and trap counts had rebounded to 75% of the original density within two days following sprays. Several strategies may need to be considered for future missions to increase the period of relief from mosquitoes, including: increasing the size of the spray area to buffer the Williston residents from mosquitoes migrating into the area, delaying sprays until more adults have emerged, adding an additional application a few days after the first. Strategies for next year will be discussed with the local vector control personnel. This was the last application for the Williston area this year. Pending funding of the project next year, we hope to apply larvicides and complete additional operational work with Zenivex.

This was the 5<sup>th</sup> year of spray operations conducted at Minot AFB and the city of Minot to control adult mosquitoes. Areas treated are shown in Attachment 4. The City of Surrey (approximately 2500 acres) was added east of Minot. Significant spring rainfall produced ponds of water in all fields surrounding Minot AFB. Moderate levels of mosquito abundance were reduced by this application and we consider these results to be acceptable. Because the mosquito species *Aedes vexans* has a peak flight period close to sunset, it is this timeframe which is particularly important to utilize for optimal control. On this sortie, events were time quite well, with the final spray application taking place only minutes before sunset.

Once again the 5<sup>th</sup> CES at Minot AFB provided outstanding support for our operation; the people at Minot AFB are great to work with. Special thanks go out to Ms. (b) (6) and SrA (b) (6) for making this mission proceed smoothly through their conscientious and diligent work.

(b) (6) MAJ, USAFR  
Entomologist and DoD Certified Applicator

Attachment 1. Mosquito numbers collected in traps, Williston ND., 2007-2009. Wide-area larviciding may have contributed to lower numbers of adult mosquitoes in Williston in 2009.

Attachment 2. 24-hr mortality observed in caged mosquitoes following Zenivex spray at Williston, ND.

Cage Location	24-hrs Post Mortality		
	Dead	Total	% mortality

Brotherinlaw (control)	2	27	7%
Walmart	19	20	95%
Ol'			
Police St	24	26	92%
Bermuda	29	29	100%
Skunk Hollow	23	25	92%

Attachment 3. Shows the Williston area spray block. The black outline represents the proposed treatment area. The red lines are the track of the aircraft while spraying. Areas sprayed outside the spray block were treated so that the pesticide would drift back into the target area with the prevailing wind direction.

Attachment 4. Shows the Minot Area spray blocks. The black outline represents the proposed treatment area. The purple blocks are the track of the aircraft while spraying. Areas sprayed outside the spray block were treated so that the pesticide would drift back into the target area with the prevailing wind direction.

11 June 2001

**MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)**

**FROM: 757 AS/DOS**

**SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB ND Control of Mosquitoes**

1. **Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.
2. **Capability:** Spray Aircraft Available on 15 – 22 June 2001
3. **Concept of Operations:**
  - a. **15 Jun 01 (Friday):**
    - 1000 Take Off KYNG **PPR Not Required**
    - 1230 Land KRDR
    - 1240 Safety Briefing (upon arrival)
  - b. **16 Jun 01 (Saturday):**
    - 0340 Show Time for all personnel  
Times for chemical mix & load determined by Spray MX Superv
    - 0530 Take Off KRDR
    - 0543 Begin larvicide spray
  - c. **17 Jun 01 (Sunday):**
    - 0340 Show Timefor all personnel  
Times for chemical mis/load determined by Spray MS Superv
    - 0530 Take Off KRDR
    - 0541 Begin larvicide spray

**FLUSH BETWEEN LARVICIDE AND ADULTICIDE MISSIONS**

- d. **18 Jun 01 (Monday):**
  - 1730 Load Chemical
  - 1930 Take-Off KRDR
  - 2110 Land KRDR
- e. **19 Jun 01 (Tuesday):**
  - 1730 Load Chemical
  - 1931 Take-Off KRDR
  - 2110 Land KRDR

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 15-22 JUNE 2001

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6)
- (2) Pilots: MAJ (b) (6) , 1LT (b) (6)
- (3) Navigators: LTC (b) (6) ; CAPT (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6) , TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6) , TSG (b) (6) , TSG (b) (6) ,
- (2) Crew Chief(s): TSG (b) (6) , SRA (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Entomologists/Ground Support: LTC (b) (6) & 1LT (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 15 JUNE (Friday)

0800: Show at KYNG  
1000: Depart KYNG  
1230: Land KRDR/Safety Briefing  
1345: Meet Base Commander  
1400: In-brief

##### 16 JUNE (Saturday):

1730: Show time  
1930: Take Off KRDR  
2130: Sunset/Land

##### 17 JUNE (Sunday):

1730: Show time  
1930: Take Off KRDR  
2130: Sunset/Land

#### NOTE: FLUSH BETWEEN ADULTICIDE/LARVICIDE MISSIONS

##### 18 JUNE (Monday):

0528: Sunrise  
1300: Aircrew Report  
1330: Take Off KRDR for Flush  
1500: Land KRDR  
2130: Sunset

##### 19 JUNE (Tuesday):

0430: Report  
0529: Sunrise  
0614: Take Off KRDR  
0615: Begin larvicide spray (aiming for two lifts if weather permits)  
2131: Sunset

**20 JUNE (Wednesday)**

0330: Report

0514: Take Off KRDR

0515: Begin larvicide spray (aiming for two lifts if weather permits)

0530: Sunrise

2132: Sunset

**21 JUNE (Thursday)**

0330: Report

0514: Take Off KRDR

0515: Begin larvicide spray

0531: Sunrise

2133: Sunset

**22 JUNE (Friday)**

TBA: Out-brief

1100: Take Off KRDR

1500: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder, 2 Signal Mirrors, 1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries, Kodak Camera
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

**4. PPR:** Not required weekdays**5. RADIO FREQUENCIES:** Air To Ground Primary 392.2; VHF 123.45**6. SPRAY CONFIGURATION:**

- a. **System:** 2-Module System/Stainless Steel ULV Wing Booms and Fuselage Booms
- b. **Nozzle Tips/Orientation:**
  - (1) Larvicide: Raindrop nozzles straight back
  - (2) ULV: 8008 TeeJet oriented straight down
- c. **Number:**
  - (1) Larvicide: Fuselage only, 6 total (3 each side) 45° back
  - (2) ULV: wing only, 6 8008s total (3 each side)
- d. **Booms:** Full Wing or Fuselage Booms as required (see above)
- e. **Aircraft:** 105; **Mission Identifier:** QZNRKA463166

## 7. **SPRAY PARAMETERS:**

- a. **Altitude:** 100' AGL for larvicide swath when no trees are present. 150' for ULV application
- b. **Swath Width.** 90 feet for larvicide; 1500 feet for ULV or as determined by the PMP
- c. **Flow Rate.** 83.6 gallons/minute larvicide; 3.3 gallons/minute ULV
- d. **Application Rate.** 2 gal/acre (water with 0.75 oz of Altosid®), larvicide; 0.60 oz/acre Trumpet, ULV
- e. **Ground Speed:** 200 Knots

## 8. **SPRAY MIXING AND LOADING:**

- a. Composition of each Gallon:
  - (1) 0.375 ounces of Altosid 20
  - (2) 0.08 ounces of Control® drift retardant
  - (3) Water
- b. First Load (2 tanks of 475 gallons each + sump of 35 gallons)
  - (1) Fill with 475 gallons of water/tank. Total water in tanks = 950 gal.
  - (2) 35 gallons of water in sump
  - (3) Total water added = 985 gallons
  - (4) Add 1.5 gallons of Altosid® per tank (3 gallons total).
  - (5) Add 1 bottle of Control®/tank while agitating approximately 15 min
  - (6) Total quantity mix. 988 gallons
- c. Subsequent Loads (2)
  - (1) Fill with 475 gallons of water/tank. Total water = 950 gal
  - (2) Add 1.4 gallons of Altosid® per tank. Total Altosid® = 2.8 gal
  - (3) Add 1 bottle of Control/Tank.
  - (4) Total quantity mix. 952.8 Gallons (does not include 35 Gal already mixed in sump)
- d. Final Load (1 tank only)
  - (1) Fill with 450 gallons of water. Total water = 450 gal
  - (2) Add 1.3 gallons of Altosid®.
  - (3) Add 1 bottle of Control®.
  - (4) Total quantity of mix 451.3 gallons (Does not include 35 Gal already mixed in sump)
- e. Mixing Instructions:
  - SHAKE WELL BEFORE USING. Altosid may separate on standing and must be thoroughly agitated prior to dilution.
  - PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

## 9. **SPRAY MIXING AND LOADING:**

The amount of Trumpet to load will be determined on site

## 10. CONTACTS:

- a. **319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks ND 58205**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 15-22 June 2001
- c. Purpose of Application: Control nuisance and vector mosquitoes (adult & larval stages)
- d. Application Date/s: 16 Jun, 18-21 Jun 01
- e. Time/s of Application (Zulu): 0010-0255Z (16 Jun); 1130-1315Z (19 Jun); 1140-1255Z and 1405-1505Z (Jun 20); 1135-1325Z (21 Jun)
- f. Acres Treated: 22,400 (16 Jun); 478 (19 Jun); 754 (20 Jun); 461 (21 Jun)
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Environmental Officer, DSN (b) (6) and SSG (b) (6), NCOIC Pest Management Shop, DSN (b) (6)
- h. Date Spray Map Last Approved: 15 June 2001
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 15 June, CE Conference Room, LTC (b) (6) and MAJ (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMP/s (Category 11): LTC (b) (6), 1LT (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: MAJ (b) (6)
  - (2) CoPilot: 1LT (b) (6)
  - (3) Navigator(s): LTC (b) (6), CAPT (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - Spray Operators: MSG (b) (6), SSG (b) (6)
- d. Safety Briefer: 1LT (b) (6)
- e. Spray Maintenance: TSG (b) (6), TSG (b) (6), TSG (b) (6)
- f. Spray Ground Monitors: LTC (b) (6), 1LT (b) (6)
- g. Crew Chiefs: TSG (b) (6), SRA (b) (6)
- h. Avionics: TSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 5/8.5
  - (2) Ferry Sorties/Hours: 2/6.2

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled), Altosid Liquid Larvicide Concentrate (20% methoprene)
- b. EPA Registration Number: Trumpet® EC 59639-90-5481, Altosid Liquid Larvicide Concentrate 272446
- c. Gallons Pesticide Loaded: 105 Gal Trumpet® (16 June); 2.8 Gal (19 Jun); 4.5 (20 Jun); 2.7 Altosid®
- d. Gallons Pesticide Applied: 105 Gal Trumpet® (16 June); 2.8 Gal (19 Jun); 4.5 (20 Jun); 2.7 Altosid®
- e. Gallons and Name of Flush Used: Water
- f. Other Additives Used: Control® drift reduction agent
- g. Application Rate: 0.60 Oz/acre Trumpet®; .75 Oz/acre Altosid®

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 899105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms; fuselage
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan; Raindrop nozzles
- e. Nozzle Orientation & Number Used: 8008 6 straight down; raindrop 10 straight back
- f. Pressure (PSI): 40 (16 Jun) & 40-50 (19-21 Jun)
- g. Flow Rate: 3.3 GPM for ULV; 186 GPM for LV (19-21 Jun)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1500' ULV; 200' LV (19 Jun); 150' LV (20 Jun)
- b. Spray Off Set: 3000' (16 Jun); 200' (19-21 Jun)
- c. Spray Release Altitude: 150' ULV; 100'/150' LV
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 270° (16 Jun) & 290-330° (19-21 Jun)
  - (1) Ground: 2-4 Knots (16 Jun); 2-10 knots (18-21 Jun)
  - (2) Release Altitude: 8-10 knots (Jun 16); 6-18 Knots (19-21 Jun)
- b. Temperature (Degrees Fahrenheit): 65-73° 16-21 Jun
- c. Dew Point: 48-54 °F (16-21 Jun) during applications
- d. Cloud Cover: Clear (16 Jun); Partly Cloudy/light showers/clear (19-21 Jun)
- e. Source: Ground observations and National Weather Service

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. The Grand Forks AFB Public Health Unit conducts adult mosquito trapping and larval sampling to monitor mosquito densities on base. Prior to the 16 June application, mosquito traps collected greater than 40 mosquitoes per night. This exceeds the accepted nuisance level, thus, indicating a need for mosquito control.
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito traps/larval dip samples
  - (2) Results: The Grand Forks AFB Public Health Unit did not place traps on the first few days following the spray. Therefore, relative adult mosquito abundance was not quantified following the spray. The Grand Forks AFB Pest Management Shop is coordinating with the Public Health Unit to ensure that surveillance trapping is in place by the next application. Larval counts will be made in spray blocks that were treated with Altosid® larvicide to determine the insecticide's efficacy.

**8. REMARKS:** This is the first spray application at Grand Forks AFB using Trumpet® EC and Altosid® Concentrate. The use of both Ultra Low Volume and Low Volume sprays in order to treat the adults and larvae had not been accomplished by the 910 AW/757 AS before. This mission has proven to be an excellent training opportunity because the use of multiple spray configurations are needed during a contingency operations. The planning and flexibility displayed by the Grand Forks AFB spray coordinators and operations personnel, as well as, the 910<sup>th</sup> Airlift Wing Spray Team was commendable and essential to the success of this mission. The next spray mission to Grand Forks AFB is scheduled 29 June - 03 July 2001 and will be specifically to control adult mosquitoes.

Aerial Spray Mission Set up Check list  
Minot/Williston 15-24 July 2009

Pre Planning:

2 Months out:

1. Confirm Dates with Entos
2. Request Range Times

1-2 Months out:

3. Arrange Cars/Hotels

1. Concept Message sent to AFRC DOOM, Aerial Spray SITREP and 22AF CP
2. Set up flights
  - a. Flying Planner-
  - b. Aircraft Scheduled – Ext 1672
  - c. Input Flights into SMS
  - d. Add Mission ID's to Local Flying Schedule- Send to Current Ops
  - e. Email to : Susie (757 orderly room), (b) (6) (TMO), (b) (6) , (b) (6) , (b) (6) , (b) (6) , Plans Contact list.: MSN ID, Rental Car Info
3. Build Mission Plan:
  - a. Contact Spray/Maintenance: (b) (6) (spray), (b) (6) (Maint/crew chiefs), (b) (6) (avionics)
  - b. Arrange PPR
  - c. Arrange Billeting-
  - d. Arrange Vehicles/transportation- DSN 453-3121
  - e. Arrange for Ravens when needed ((b) (6) )
4. Contact Plans and set up a concept briefing:
  - a. Send copy of Mission Plan to the Plans office
  - b. Plans will coordinate with Maint, SF, etc. to be at meeting
5. Build Folders:
  - a. Setup sheet/Form 33
  - b. Suitability reports
  - c. Billeting Letters
  - d. mission notes
  - e. Sunrise/Sunset tables

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **Minot AFB, ND and Williston ACE, ND**

### **15-24 July 2009**

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Minot AFB, North Dakota and the developed areas surrounding the Army Corp of Engineers property near Williston, ND.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Pilots: LTC (b) (6) , LTC (b) (6)
- (2) Navigators: LTC (b) (6) , Capt (b) (6)
- (3) Flight Engineers: MSgt (b) (6)
- (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6) , SSgt (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: TSgt (b) (6) , MSgt (b) (6) , SSgt (b) (6)
- (2) Crew Chief(s): SRA (b) (6) , A1C (b) (6)
- (3) Avionics: SSgt (b) (6)

##### **c. Entomologists:** Maj (b) (6) , Maj (b) (6) , LTC (b) (6) (TR arriving at MOT @ 1300 hrs, 18 Jul)

#### **2. SCHEDULE: (All Local Times)**

- a. 15 Jul (Wednesday)
  - 1505L Show KYNG
  - 1705L Depart KYNG
  - 1940L Land KMIB
- b. 16 Jul (Thursday) Spray Minot AFB
  - 1800L Show KMIB
  - 2000L Depart KMIB
  - 2145L Land KMIB
- c. 17 Jul (Friday) WX Backup for Minot AFB
  - 0500L Show KMIB
  - 0700L Depart KMIB
  - 0845L Land KMIB
- d. 18 Jul (Saturday) Static Display for Minot AFB Air Show
- e. 19 Jul (Sunday) Down Day Per User's Request
- f. 20 Jul (Monday) Spray Williston
  - 1800L Show KMIB
  - 2000L Depart KMIB
  - 2200L Land KMIB
- g. 21 Jul (Tuesday) Spray Minot or Williston Backup
  - 1800L Show KMIB
  - 2000L Depart KMIB
  - 2200L Land KMIB
- h. 22-23 Jul (Wednesday & Thursday) WX Backup for Minot and Williston
  - 1800L Show KMIB
  - 2000L Depart KMIB
  - 2200L Land KMIB
- i. 24 Jul (Friday)
  - 1000L Show KMIB
  - 1200L Depart KMIB
  - 1635L Land KYNG

#### **3. ITEMS TO TAKE**

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, Compass, Pest Safety Binder, 1 UHF Radio, 1 VHF radio Project Notebook
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

**4. PPR: 1501WX**

**5. RADIO FREQUENCIES: Air To Ground Primary VHF 123.45**

Minot AFB Tower 120.65 V, 236.6, 253.5; Minot International 118.2 V or Unicom 122.95

**6. CONFIGURATION: SP2G**

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down
- c. **Number:** ULV: 8 8005s total (4 each side) for 1000' swaths and 16 8005's (8 each side) for 2000' swaths at Williston 8 8003s (4 each side)
- d. **Aircraft:** 89-9107
- e. **Mission Identifier:** QZNRKA592196

**7. SPRAY PARAMETERS:**

**a. Adulticide (Minot AFB- Trumpet)**

- (1) **Area to be treated:** 14,000 acres
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 1000 feet for AFB; 2000' City of Minot or as determined by the PMP
- (4) **Flow Rate.** 2.7 gallons/minute for 1000' swaths; 5.5 gal/min for 2000' swaths
- (5) **Application Rate.** 0.75 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots (338 Feet/Second)
- (7) **Flush:** With water, triple rinse, then air purge

**b. Adulticide (Williston ACE - Zenivex)**

- (1) **Area to be treated:** ~6,500 acres
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000' City of Williston or as determined by the PMP
- (4) **Flow Rate.** 2.2 gal/minute
- (5) **Application Rate.** 0.035 lbs/acre A.I. Zenivex, ULV (0.30 oz/acre)
- (6) **Ground Speed:** 200 Knots (338 Feet/Second)
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** See Ento

**9. TRANSPORTATION:** 2 six packs (MC, MX) + 1 fifteen pax van (Ops). Trans will pick you up at the plane and take you to Motorpool. POC: SRA Wheel

**10. LODGING:** International Inn, 1505 N Broadway, Minot. (701) 833-0773 Billeting POC: (b) (6) DSN 453-6161  
Non-A's will be at the International Inn front desk upon check-in

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **Grand Forks AFB, ND**

### **16-18 APR 2001**

**Purpose and benefit:** Site survey in preparation for adulticide and larvicide application to control vector mosquitoes.

Monday 16 April Depart YNG 1300L for Grand Forks Land 1515L

Hotel Ramada Inn  
1205 North 43rd Street  
Grand Forks ND 58203  
701-775-3951

(Non-availability packet at base operations)

Tuesday 17 April

0900 Meet with (b) (6) (Environmental Office) and (b) (6) (Flightline Manager) and perhaps 2 individuals representing local townships.

1030 Tour of the aircraft

- > We can park the plane near the side of the Bravo Ramp and people can walk
- > out to it. Lets decide on a time and one of our people will escort the
- > people out there. You won't need a letter.
- > Tell the people to park in the Base Ops parking lot and come in  
-flightline manager

1200 Aerial survey of surrounding regions  
Ground survey for mosquito breeding sites  
Visit support shops and personnel

1430 Meeting with all participants (Pest Management/Environmental, local community representatives, public affairs, civil engineering, support group representative, fire dept., etc.

Wednesday 18 April Depart RDR 0900L for YNG Land 1300L

12 DEC 2006

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Avon Park, FL

1. Purpose/Objectives/Benefits: Perform proficiency and continuation training for aerial spray aircrew and ground crew. Concurrently, a flight demonstration conducted with the Florida Mosquito Control Association is scheduled.
2. Capability: Spray Aircraft Available, 16-18 Jan 2006.
3. Concept of Operations:
  - 16 JAN (Tuesday): PPR # - Not Req
    - 0900: Show Time KYNG
    - 1100: Depart KYNG
    - 1400: Land KAGR
  - 17 JAN (Wednesday): Range Times TBD, call AGR Tower & Fire Dept
    - 0530: Show Time
    - 0700: Depart to Lee County airport for Mosquito Control Association
    - 0930: Training at Range
    - 1330: Land
  - 18 JAN (Thursday):
    - 0800: Show Time
    - 0930: Depart
    - 1130: Land
    - 1300 Depart KAGR
    - 1600 Arrive KYNG
4. Spray Configuration:
  - a. MASS – SP2G
  - a. Aircraft Number: 90-9107
  - b. Mission Identifier: QZNRKA411016
5. Mission Protocols:
  - A. Aircrew spray operation training at 100'-150' AGL over Avon Park Bombing Range.
  - B. Flight demonstration with Florida Mosquito Control Association:

Spray aircraft will participate in an demonstration with the Florida Mosquito Control Association during their short course on aerial spray. Entomologists from the 757 AS will be on the ground working with the spray course personnel during the exercise. The exercise will simulate the application of mosquito larvicide down a runway at Buckingham Army airfield using water. Water sensitive cards will be used in collection and analysis of spray. A SSS is in the process to obtain approval of the demonstration.
6. Aircraft Commander: Major (b) (6)

7. Support required at Avon Park Bombing Range is thru the Range Manager.
8. If you have any questions concerning this mission please contact DSN (b) (6) .

19 January 2007

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

**SUBJECT:** Aerial Spray Demonstration at the FMCA Aerial Spray Fly-in.

**1. Purpose:** To complete initial and continuing spray training for aircrew, and to conduct a training exercise/demonstration with the Florida Mosquito Control Association, simulating a typical larvicide application.

**2. Participants:**

**a. Aircrew:**

1. Pilots: Maj (b) (6) (b) (6) Capt (b) (6)
2. Navigators: Maj (b) (6) (b) (6)
3. Flight Engineers: Msgt (b) (6)
4. Spray Operators: Msgt (b) (6) , Msgt (b) (6) , Msgt (b) (6)

**b. Maintenance:**

1. Spray Maintenance: TSgt (b) (6) , TSgt (b) (6) , TSgt (b) (6)
2. Avionics: None
3. Crew Chiefs: (b) (6) (b) (6) (b) (6)

**c. Entomologists:** Capt (b) (6)

**d. Admin Support:** SMSgt (b) (6) (b) (6)

**3. Spray Configuration:**

Mass-SP2G  
Aircraft Number: 99107  
Mission Identifier: QZNRKA411016

**4. Spray Parameters:**

Booms—Fuselage only.  
Nozzles—Raindrop.  
Number of Nozzles— 6 per side  
Airspeed—200 knots ground speed.  
Altitude—100' AGL.  
Flow Rate-- 186 Gallons/Minute  
Spray—Water Only

**5. Itinerary:**

16 January: Personnel Arrive at Avon Park from YARS. Total ferry time was 3.5 hours (KYNG-KAGR).

17 January: One training/demonstration mission of 1.5 hrs was flown. The pest management professional was in place at the Lee County Mosquito control district at Buckingham Airfield and directed spray operations for the demonstration. The aircraft flew a total of 3 passes during the demonstration. The first pass was down the centerline of runway 24 and was a dry pass to check conditions. A line of water sensitive cards was deployed perpendicular to and centered on the runway to determine the effective width of the swath. The second pass was similar to the first, although water was dispensed from the system. Spray on time for this pass was 15 seconds. Wind conditions were 040 at 10 degrees and resulted in a left-hand drift. Following the first wet pass, the cards were collected and new cards were redeployed. The aircraft then made a 3<sup>rd</sup> and final pass, though swath lane was shifted 200 feet to the right (pilots' perspective) to compensate for the drift. The second set of cards were then collected and analyzed, and the demonstration was complete. The pest management professional also took part in the Aerial Spray Fly-Inn, and conducted a television interview with the local broadcast news who were covering the event. Total demonstration and training time for aircrew was 1.5 hours.

18 January: Personnel return to YARS from Avon Park. Total ferry time was 3.2 hours. (KAGR-KYNG).

**Comments:** This is the second year we have conducted aerial spray demonstrations at the FMCA fly-in. The Pest Management Professionals consider it critical to maintain dialogue with municipal mosquito control agencies, and demonstrations such as this one allow a tremendous opportunity to interact, to share the latest research and techniques regarding aerial spray, and to help individuals outside of the DoD understand the mission of the Aerial Spray Flight. All of the feedback received from the participants at the Fly-Inn about the demonstration was positive. The organizers of the event were very pleased with the outcome of the demonstration, and considered it an excellent learning tool for the participants. We have been invited back next year.

(b) (6) CAPT, USAFR  
Research Entomologist

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **AVON PARK, FL**

### **16-18 Jan 07 DRAFT**

**PURPOSE/OBJECTIVE/BENEFIT:** Complete initial spray training/continuation training for aircrew. Second, aerial spray will run a training exercise with the Florida Mosquito Control Association. 1 or 2 passes will be flown down the runway with a LV/HV spray of water applied to water sensitive cards set up by FMCA. Contact PMP to coordinate times and radio communications.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

1. Pilots: Maj (b) (6) Capt (b) (6)
2. Navigators: Maj (b) (6)
3. Flight Engineers: Msgt (b) (6)
4. Spray Operators: Msgt (b) (6), Msgt (b) (6), Msgt (b) (6)

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Parris Island  
MCRD SC for Control of Sand fly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft 89-9107 available on 16-19 May 05

3. Concept of Operations:

**15 May (Monday):**

**PPR # 292-01**

1000: Show Time  
1200: Take off KYNG  
1400: Land KNBC  
1415: Safety Briefing

**16 May (Tuesday):** see www.beaufort.usmc mil for weather, etc

1500: Show Time  
1530: Weather decision /Load Chemical  
1800: Take off KNBC  
2015: Sunset

**17 May (Wednesday):** Weather Backup/Training

1500: Show Time  
1530: Weather decision /Load Chemical  
1800: Take off KNBC  
2015: Sunset

**18 May (Thursday):**

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate
- d. Deploy: 2.0 Hrs
- e. Re-Deploy: 2.0 Hrs
- f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Capt (b) (6) ]

6. Mission Commander: Maj (b) (6) ]

7. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator (b) (6) DSN (b) (6)

8. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

// SIGNED //

##### **19 May (Thursday):**

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

#### **3. ITEMS TO TAKE:**

##### **a. Entomologist/CPMP:**

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) DGPS Computers & Maps
- (5) Oil Sensitive Papers

##### **b. Navigators:**

- (1) Maps
- (2) Templates

c. **Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

4. **SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** Open for ULV spray; 8 8005's oriented straight down (4 per side)
- d. **Differential GPS:** Installed
- e. **Aircraft:** 89-9107      **Mission Identifier:** QZNRKA143136

5. **SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 2.72 gallons/Minute

6. **AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission

7. **PPR REQUIREMENTS: 136-01**

8. **PARKING PLAN:** Beaufort MCAS Ramp

9. **AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 118.8 CTAF (Check on the chart in Beaufort Base Ops)  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

10. **TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

11. **SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

12. **CONTACTS:**

**910 AW AERIAL SPRAY**  
**PMP'S POST-MISSION REPORT**  
**PARRIS ISLAND MARINE CORPS RECRUIT DEPOT**  
**16-19 MAY 2005**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 16-19 May 2005
- c. Purpose of Application: Biting Midge (*Culicoides* spp.) and Mosquito Control
- d. Application Date: 18 May 2005
- e. Time/s of Application (Local): 1800-1900 hrs
- f. Acres Treated: 853 (approx. 10% of the projected area)
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) Spray Coordinator  
(NREAO), DSN (b) (6)
- h. Date Spray Map Last Approved: 17 May 2005
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 17 May 2005; Assistant Chief of Staff,  
Installation and Logistics (COL (b) (6) Maj (b) (6) Capt (b) (6) et al.

**2. OPERATIONAL:**

- a. **Aircrew:**
  - (1) Mission Commander: MAJ (b) (6)(b) (6)
  - (2) Pilots: MAJ (b) (6)(b) (6) CPT (b) (6)
  - (3) Navigators: MAJ (b) (6)(b) (6)
    - (a) Flight Engineers: MSG (b) (6)
    - (a) Spray Operators: SMS (b) (6) , MSG (b) (6) , MSG (b) (6)(5)
- b. **Maintenance:**
  - (1) Spray Maintenance: SMS (b) (6) TSG (b) (6) , TSG (b) (6)  
MSG (b) (6)
  - (2) Crew Chiefs: MSgt (b) (6) , SRA (b) (6)
  - (3) Avionics: SMS (b) (6)
- c. **Certified Applicator/Entomologist:** CPT (b) (6) (b) (6)
- d. Flying Data:
  - (1) Spray Sorties/Hours: 1 Sortie/1.0 hr
  - (2) Ferry Sorties/Hours: 2 Ferries/4.2 Hrs

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60 gal Dibrom<sup>®</sup>
- e. Gallons Pesticide Applied: 5 gallons
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 17 gallons Marvel Oil
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99107
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 8 oriented straight down (4 per side)
- f. Pressure: 40 PSI
- g. Flow Rate: 2.73 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: ESE/5 knots
  - (2) Release Altitude: ESE/10 knots
- b. Temperature (Degrees Fahrenheit): 75° F
- c. Humidity: 70 %
- d. Cloud Cover: Scattered clouds
- e. Source: Ground observations at the MCRD Marina and at the small arms range.

Observations at spray altitude are from Doppler radar on the aircraft (SCNS).

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern: not used
- b. Effectiveness: Effects were not measured because a leak halted the spray application early (see below).

**8. Results:** The sortie planned for 17 May was weather cancelled because of severe thunderstorms. Early on the 18 May spray sortie, a fitting connector from the MASS system hose to the right fuselage boom was found to be leaking Dibrom. The aircrew shut the system down, donned oxygen masks, and contacted the mission commander and certified applicator on the ground. The lines were air purged and the aircraft returned to the Marine Corps Air Station (MCAS), Beaufort. On the ground, the crew assessed themselves as not affected by any potential negative effects from inhaling insecticide. In fact, only the loadmaster/spray operator in the rear of the aircraft reported smelling any odor. Spray maintenance used proper personal protective equipment, investigated the leak and determined that the cleanup procedures would use up the additional available window of time for the application and, thus, no additional sorties were possible that day. Both the loadmaster and spray maintenance supervisor estimated that approximately 1 quart of Dibrom had leaked from the system. The mission commander and certified applicator interviewed all aircrew members and spray maintenance personnel. Spray maintenance personnel worked with a safety observer and cleaned the airframe. All cleanup materials were properly disposed of with MCAS, Beaufort. The spray maintenance supervisor determined the leak was a result of tight tolerances between the hose connection and the fuselage adapter, which allowed the connection to appear secured when it actually wasn't. The adapters have been corrected and positive hose connection has been confirmed. Additional details along with a report from spray maintenance are available from the POC below. The 757<sup>th</sup> AS will coordinate with the Parris Island NREAO to make another application, if warranted by insect numbers.

# 910 AW AERIAL SPRAY UNIT -- POST-MISSION REPORT

## MINOT AFB ADULT MOSQUITO CONTROL 16-20 JULY 2007

### 1. MISSION BASICS:

- a. Installation Sprayed: Minot AFB, North Dakota
- b. Mission Duration: 16-20 July 2007
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date/s: 17 & 18 July 2007
- e. Time/s of Application (Local): 2020-2150 (17 Jul) & 2000-2212 (18 Jul)
- f. Acres Treated: 5,158 (17 Jul) & 9,011 (18 Jul) = 14,169 acres
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Pest control supervisor/spray coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 16 July 2007
- i. Date of Waste Generation Letter: 17 July 2006
- j. Installation In-Briefing: (When/Where/Briefer/s): 17 Jul; MAJ (b) (6) CPT (b) (6)  
(b) (6) LT (b) (6) (b) (6) LTC (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: CPT (b) (6); (b) (6)
- b. Certified PMP/s (Category 11): MAJ (b) (6)
- c. Aircrew:
  - (1) Pilots: CPT (b) (6); (b) (6) LT (b) (6) (b) (6)
  - (2) Navigators: LTC (b) (6)
  - (3) Flight Engineers: MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6), MSG (b) (6)
- d. Maintenance:
  - (1) Spray Maintenance: MSG (b) (6) (lead), TSG (b) (6), TSG (b) (6), SSG (b) (6)
  - (2) Crew Chief(s): TSG (b) (6), TSG (b) (6)
  - (3) Avionics: SRA (b) (6)
- e. Safety Briefer: MAJ (b) (6)
- f. Flying Data:
  - (1) Spray Sorties/Hours:  $1.5 + 2.2 = 3.7$
  - (2) Ferry Sorties/Hours:  $4.2 + 3.4 = 7.6$

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Trumpet® Concentrate
- b. EPA Registration Number: 59639-90-5481
- c. Formulation Sprayed: Emulsified Concentrate
- d. Gallons Pesticide Loaded: 30 Gal Trumpet® (17 Jul); 60 gal (18 Jul); 90 gallons total
- e. Gallons Pesticide Applied: 30 Gal (17 Jul) & 60 Gal (18 Jul)
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 100 gallons; water
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 13 oriented straight down
- f. Pressure: 42 (17 Jul) & 39 (18 Jul) psi
- g. Flow Rate: 5.45 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray offset: 2000' (17 Jul); 2000' (18 Jul)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 4-7 knots @ 60° (17 Jul) & 6-7 knots @ 90° (18 Jul)
  - (2) Release Altitude: 8-15 Knots @ 60° (17 Jul) & 6-15 knots @ 90-110° (18 Jul)
- b. Temperature (Degrees Fahrenheit): 82°(17 Jul) & 74° (18 Jul)
- c. Relative humidity: 80% (17 Jul) & 76% (18 Jul)
- d. Cloud Cover: Overcast (17 Jul) & Clear (18 Jul)
- e. Source: Ground observations and aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. No data have been collected from the city of Minot to date.

**8. REMARKS:** This represents the 3<sup>rd</sup> year of spray operations conducted at Minot AFB and the city of Minot to control mosquitos. 2006 had been a particularly dry year, with 2007 being slightly wetter than average. These conditions probably resulted in a smaller than usual population of *Aedes vexans* mosquitos, and a larger than normal population of *Culex tarsalis* mosquitos. Mosquito control was good immediately following application. However, the trap collected the day following application yielded over 100 mostly *Culex* mosquitos. Prior to application, the trap count had been slightly over 200 mosquitos caught per night. Since *Culex* mosquitos are most active at night, difficulty in controlling this species is not surprising, since our application times are day/dusk, and effective control demands adulticide application when the target species is most active. This data highlights the importance of being able to spray at night to control disease vectors such as *Culex* mosquitos.

On-site equipment calibration was also conducted at Minot. This procedure took less than 1 hour, and insured accurate pesticide application rates. I strongly recommend on-site calibrations with actual pesticides for ULV applications.

As usual, the people at Minot AFB were great to work with. Many thanks to (b) (6) and the staff at Minot for taking care of a lot of details and being very helpful.

**19 JUN (Thursday):**

1230: Show Time  
1430: Takeoff KLFI  
1600: Land KYNG

3. **ITEMS TO TAKE:**
  - a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, VHF Radios, Laptop Computer
  - b. **Navigator:** Maps/Map Bag, Validation Map
  - c. **Spray Operator:** Safety Gear, Calibration Tables
  - d. **Spray Maintenance:** Deployment Kit/Supply Kit
4. **NOTIFICATION NECESSARY FOR THIS MISSION:**
  - a. **Langley Tower:** DSN 574-5326
  - b. **Langley Base Ops:** DSN 574-2504
  - c. **Consideration calls:**
    - i. Newport News
    - ii. Ft Eustis/Felker AAF Tower
    - iii. Norfolk NS/Chambers Tower
5. **PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.
6. **RADIO FREQUENCIES:**
  - a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
    - (1) Ops phone DSN878-3588
    - (2) Tower phone DSN 878-3530
    - (3) Flight Service 122.2
  - b. **Newport News-Williamsburg Int: CTAF – 118.7** (Operating Hours 1000Z-0200Z)
    - (1) Ground – **121.9** or 348.6 (phone 877-0221 ops)
    - (2) Tower – **118.7** (phone DSN 877-2862) voice mail 7-2962
    - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - c. **Langley AFB:** Tower DSN 574-7999
    - (1) Tower - **125.0** or 253.5
    - (2) Ground - **121.7** or 275.8
    - (3) Clearance – **118.85** or 271.3
    - (4) Metro - **239.8**
  - d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15,** Tower Supervisor DSN 262-3443
  - e. **Norfolk Approach: 125.7**
  - f. **Spray Ground: Primary 392.2; Secondary: 308.6**
7. **IN-BRIEFING:** 1430 hrs; CE Conference Room
8. **SPRAY CONFIGURATION:**
  - a. **System:** SP2G - MASS ULV; Fuselage booms
  - b. **Nozzle Tips/Orientation:** ten 8005 nozzles -- straight down
  - c. **Aircraft:** 89-9105
  - d. **Mission Identifier:** QZNRKA657168
9. **SPRAY PARAMETERS:**
  - a. **Altitude:** 150' AGL
  - b. **Ground Speed:** 200 KNOTS
  - c. **Pesticide:** Dibrom® Concentrate
  - d. **Application Rate:** 0.5 oz/acre
  - e. **Flow Rate:** 3.6 Gallons/Minute
  - f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
  - g. **Swath Width:** 2000 foot
10. **PESTICIDE LOADING:**
  - a. **How Much Pesticide:** see entomologist
  - b. **Where:** Taxi Way F Aero Club Ramp
  - c. **When:** 1600 hrs each day pending weather and heat index.
  - d. **Furnished by Installation:**
    - (1) Pesticide
    - (2) Loading Equipment/Crew
    - (3) Hazardous Waste Disposal
    - (4) Two B-5 or B-1 Stands

**11. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT-Langley AFB 16-20 June 2008

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB and surrounding areas
- b. Mission Duration: 16-20 June 2008
- c. Purpose of Application: Control of adult mosquitoes transmitting arboviruses
- d. Application Dates: 17-18 June 2008
  - e. Times of Application (GMT): 2300-2352 (17 June); 2155-0016 (18 June)
  - f. Acres Treated: 39860 total: 3350 (17 June); 36510 (18 June)
- g. Project Coordinator (Name, Phone #): (b) (6), (b) (6)
- h. Date Spray Map Last Approved: 16 Aug, 2009
- i. Date of Waste Generation Letter: 4 April 1996
- j. Installation In-Briefing: 1 CE Conference Room, Langley AFB; 16 June 2008; LTC (b) (6) (b) (6) LTC (b) (6) (b) (6) MAJ (b) (6)
- k. Mission identifier: QZNRKA657168

### 2. OPERATIONAL:

- a. Mission Commander: LTCOL (b) (6)
- b. Certified PMPs (Category 11): LTC (b) (6) (b) (6) MAJ (b) (6)
- c. Aircrew:
  - (1) Pilots: CPT (b) (6) (b) (6) MAJ (b) (6)
  - (2) Navigator(s): MAJ (b) (6)
  - (3) Flight Engineer: CMS (b) (6)
  - (4) Spray Operators: MSG (b) (6) (b) (6), MSG (b) (6), TSG (b) (6)
- d. Safety Briefer: MAJ (b) (6)
- e. Spray Maintenance: MSG (b) (6), TSG (b) (6), TSG (b) (6) SRA (b) (6)
- f. Crew Chiefs: SSG (b) (6) SRA (b) (6)
- g. Avionics: TSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 2/0.9 (17 June), 2.4 (18 June)
  - (2) Ferry Sorties/Hours: 2/1.6 (16 June), 1.6 (19 June)
  - (3) Training Sorties/Hours: 1/0.6 (16 June; WX CNX)

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 180 (16 June)
- e. Gallons Pesticide Applied: 15 (17 June); 160 (18 June)
- f. Gallons and Name Diluent Used: 10 gallons marvel oil
- g. Gallons and Name of Flush Used:
- h. Other Additives Used: n/a
- i. Application Rate: 0.5 oz/acre

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 90-9105
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV
- c. Spray System Configuration: 2-Module System/Fuselage Booms

- d. Nozzle Type/Size: TeeJet 8010 flat fan nozzles
- e. Nozzle Orientation & Number Used: 6 straight down; 3 left, 3 right
- f. Pressure (PSI): 46
- g. Flow Rate: 3.63 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): 290°/10 (17 June); 355°/8 (18 June)
- b. Temperature (°F): 80-84 degrees (17-18 June)
- c. Cloud Cover: 50 % OVC (17 June); Clear (18 June)
- d.. Source: at altitude during spray

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: Traps place in treated areas showed significant reductions in mosquito populations. The Harris creek area demonstrated declines in populations from over 1000 mosquitos collected pre-spray, to 0 mosquitos collected post-spray. Unfortunately, our coverage was limited this year due to technical difficulties, thus complete data is not available.

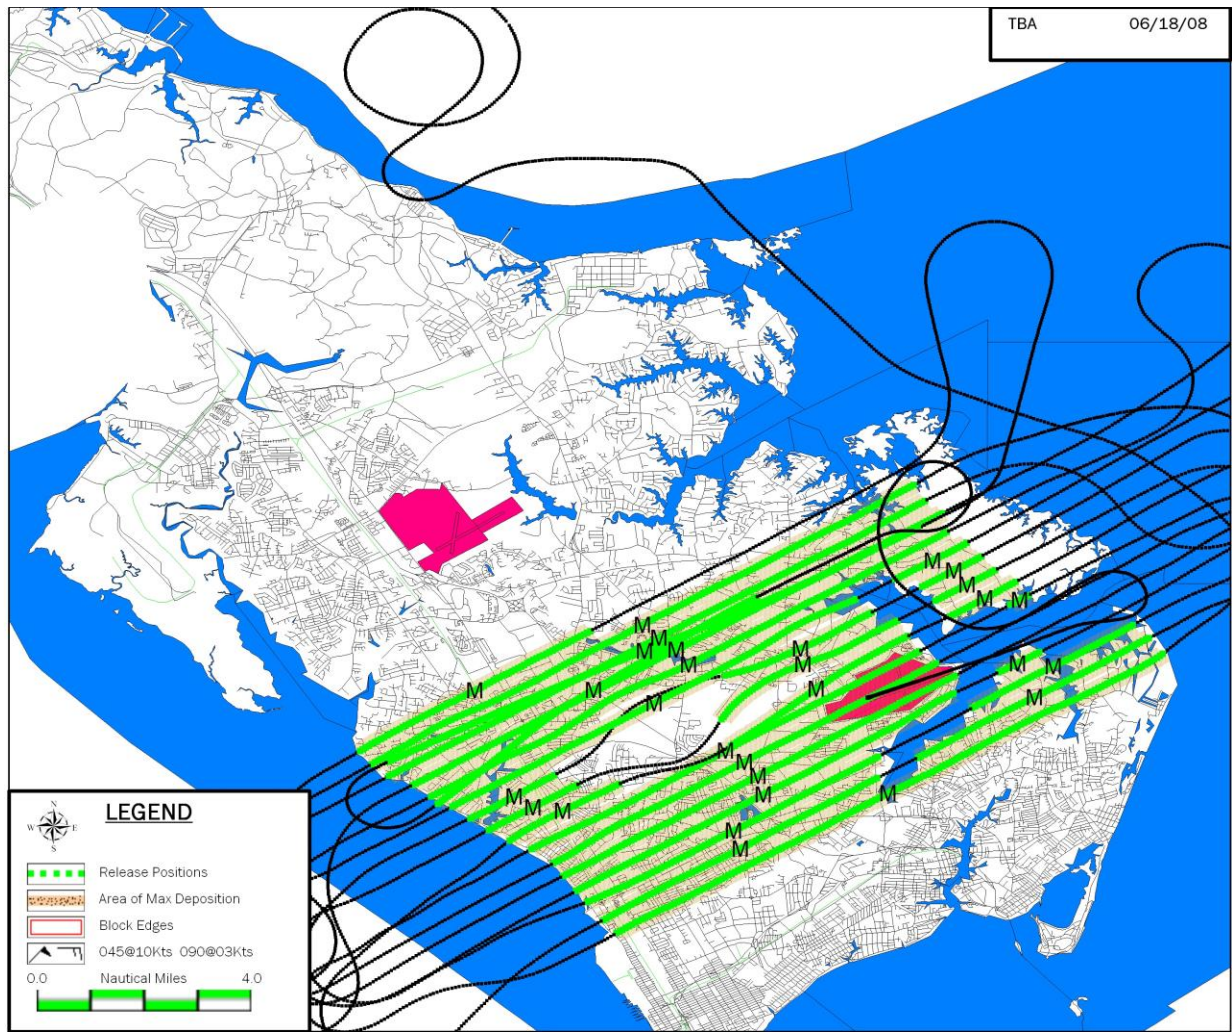

- 8. REMARKS:** Significant difficulties were encountered on this mission. Weather for the first 2 evenings was uncooperative, with extremely turbulent air associated with microbursts and unstable air. On 17 June, only one pass was attempted before calling the spray activities off. In addition, significant nozzle clogging was experienced, rendering the spray system inoperative on 17 June. Further investigation revealed that the supplied stocks of Dibrom were contaminated with some type of grainy, black material. The speculation was that either elements of stainless steel closed loading system incorporated into the drums of Dibrom had corroded severely, causing the material to accumulate, or that the material had simply spontaneously crystallized (see pictures in attachment 2). The local AMVAC technical representative, Mr. (b) (6), came at the request of LTC (b) (6)/(b) (6) to investigate, and collected samples for analysis. The results of that analysis are pending. To attempt to minimize nozzle fouling, 8010 nozzles were opted for on the final day of spraying. A significant portion of the Southern Langley peninsula was completed on 18 June (see Attachment 1). Unfortunately, spray operations had to cease because of an air show scheduled at Langley for the remainder of that week and weekend. However, in the areas that were treated, control was effective, and there were no complaints about spray operations. Many thanks to aerial spray maintenance for working the problem of the chemical contamination, and many thanks as usual to the staff at the pest control shop at Langley AFB.

//Signed//

(b) (6)

MAJ USAFR  
Certified Pest Management Professional

MEMORANDUM FOR HQ AFRC/DOOM

2 Sep 05

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT  
Annual Weed Control Spray Mission on the Utah Test and Training Range (UTTR)

1. **Capability:** Two aircraft will be available 16-23 Sep 05 for the requested spray mission. The RAS will provide mission support 16-17 & 22-23 Sep 05.
2. **Concept of Operations:**
  - a. **16 Sep (Friday):**
    - 0800 Show at KYNG
    - 0810 Pre-Mission Briefing
    - 0830 LM's released to assist in loading aircraft
    - 1000 Spray Aircraft 99107 Take-Off KYNG
    - 1005 Spray Aircraft 99108 Take-Off KYNG
    - 1000 RAS Aircraft 91022 Take-Off KYNG
    - 1330 Land HIF
    - 1400 Safety Brief
  - b. **17- Sep (Saturday) – 21 Sep (Wednesday):** Schedule of daily events will be determined by the Mission Commander as required.  
**(Range times 0600-1500)**
    - 0430 Ground Support Team departs for UTTR
    - 0515 FEs, Crew Chiefs, & Spray MX report and Mix/Load Chemical
    - 0700-1200 Target areas sprayed as designated by PMP
  - c. **22 Sep (Thursday):** Flush and clean up day.  
Schedule of daily events will be determined by the Mission Commander as required. Support Aircraft returns to Hill AFB.
  - d. **23 Sep (Friday):**
    - 0700 Aircrew report for duty
    - 0730 All personnel report
    - 0900-0915 Spray Aircrafts & Support aircraft take-off
    - 1600-1700 Mission completed, all personnel and aircraft arrive at KYNG
3. **Spray Parameters and Sequencing:** (See attached Operational Schedule)
4. **Mission Commander:** Maj (b) (6) (6) ]
5. **Aircraft Commanders:** Maj's (b) (6) (6) (b) (6) (6) (b) (6) (6) (6) ]  
(b) (6) (6) (6) ] Capt (b) (6) (6) (6) (6) ]
6. **Support required at Hill AFB and the UTTR has been completed.**  
  
(b) (6) (6) (6) ] Maj, USAFR

# SPRAY OPERATIONAL SCHEDULE

## UTAH TEST AND TRAINING RANGE MISSION

### 16-23 SEPTEMBER 2005

Aircrew 1 A/C #107, Report Time: 0805 Take Off: 1005 Arrive: 1330L QZNRKA946259  
Aircrew 2 A/C #108, Report Time: 0810 Take Off: 1010 Arrive: 1335L QZNRKA947259  
Support A/C #022, Report Time: 0800 Take Off: 1000 Arrive: 1340L

**PURPOSE/BENEFIT/OBJECTIVE:** To control vegetation on Targets 21, 24 and Nord LZ at the Utah Test and Training Range (UTTR)

#### 1. AIRCREW 1: AC 107-In place CALLSIGN: SPRAY 07

- a. Pilots: MAJ (b) (6) MAJ (b) (6), CPT (b) (6)
- b. Navigators: LTC (b) (6) (b) (6)
- c. Flight Engineers: MSG (b) (6), SRA (b) (6) (b) (6)
- d. Spray Operators: SMS (b) (6), MSG (b) (6), MSG (b) (6)
- e. Crew Chiefs: MSG (b) (6), SRA (b) (6)

#### AIRCREW 2: AC 108-In place CALL SIGN: SPRAY 08

- a. Pilots: MAJ (b) (6) (b) (6) MAJ (b) (6) (b) (6) MAJ (b) (6)
- b. Navigator: LTC (b) (6)
- c. Flight Engineer: MSG (b) (6)
- d. Spray Operators: MSG (b) (6), MSG (b) (6), TSG (b) (6)
- e. Crew Chiefs: TSG (b) (6), SSG (b) (6)

#### SUPPORT CREW AC 022

- a. Pilots: LTC (b) (6), 1LT (b) (6)
- b. Navigator: 2LT (b) (6)
- c. Flight Engineer: MSG (b) (6)
- d. Loadmasters: MSG (b) (6)
- e. Crew Chiefs: TSG (b) (6), SRA (b) (6)

#### 2. MISSION SUPPORT:

- a. Mission Commander: MAJ (b) (6)
- b. Entomologist: CPT (b) (6)
- b. Spray Maintenance: MSG (b) (6), TSG (b) (6), TSG (b) (6)  
TSG (b) (6), \*TSG (b) (6), TSG (b) (6)

#### 3. UTTR GROUND PARTY:

- a. Entomologist/Pest Management Professional(s): \*In place  
\*LTC (b) (6) (b) (6) \*LTC (b) (6) \*MAJ (b) (6) (b) (6) CPT (b) (6)

#### 4. MAINTENANCE: \*In place

- a. 910 MA Supervisor: \*SMS (b) (6)
- b. Avionics/Hydraulics: MSG (b) (6), TSG (b) (6), TSG (b) (6) (b) (6)
- c. Engine/Propulsion: TSG (b) (6) TSG (b) (6) TSG (b) (6)

#### 5. COM: MSG (b) (6), MSG (b) (6), TSG (b) (6), SSG (b) (6),

**6. IN-BRIEFING: (UTTR Staff)**

- a. When/Time:** 16 Sep 05, 1400
- b. Where:** Air Freight Terminal
- c. Who: EVERYONE!!**
- d. Briefing Plan**
  - a. Billeting- See item **g** below
  - b. Vehicles- See item **h** below
  - c. Schedule of events
  - d. Weather call
  - e. Cellular Phone numbers for all personal

**7. PLANNED SEQUENCE OF EVENTS: Hill AFB Tower Control and Runway Hours 24/7**

**NOTE: Scheduling reflects no weather or maintenance delays.**

**ALL TIMES MAY BE ADJUSTED BY MISSION COMMANDER.**

**DUTY DAY FOR CIVILIANS WILL BE STD DAY (8 HOURS).**

**MILITARY STATUS PERSONNEL WILL WORK AS  
REQUIRED WITHIN CREW REST CONSTRAINTS.**

**Tower Control, Runway & Airfield hours 24/7**

**UTTR RANGE TIMES: 0600-1500L**

**END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE MIX.**

**ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS PRE-  
FLIGHTED FOR THE NEXT DAY OR RELEASED BY THE AIRCRAFT  
COMMANDER.**

**16 Sep (Fri):**

0800 Show at KYNG  
0810 Mission Brief  
1000 Aircraft 07 Take off  
1005 Aircraft 08 Take off  
1010 Aircraft 22 Take off – AFRC RAS  
1330 Arrive Hill AFB  
1400 Mission Commander/Safety Briefing

**17-22 Sep (Sat-Thur): (First Spray Sortie, Range Times 0600-1500 (1200Z-2100Z 18-23 Sep)**

0500: Spray Maintenance starts on first full day of mission and adjust as directed  
0500: Show time, aircrew Spray 07  
0530: Show time, aircrew Spray 08  
0712: Sunrise (see attach Sunrise/Sunset Chart in mission folders)  
0715: Spray 07 Take off  
0745: Spray 08 Take off  
0715-1400: Spray 07 & 08 spray UTTR Targets as directed by the MC  
**\*NOTE: Spray 07 & 08 will alternate show/take off each day**  
**\*\* NOTE: First crew to base ops files flight plans and gets weather brief for second crew**

**22 Sep (Thur): Weather Back-up/Flush, Clean Up; Support Aircraft arrives at Hill**

0530: Show time aircrew Spray 07  
0600: Show time aircrew Spray 08  
0715-1200 Spray 07 & Spray 08 Flush sorties, plan 2 sorties each pending spray mx

**23 Sep (Fri): All personnel and aircraft return to YNG**

0700: All Aircrew report  
0730: All Personnel report

0900: Aircraft 07 Takes off  
0905: Aircraft 08 Takes off  
0910: Aircraft 022 Takes off  
1600: Lands YNG

## 8. ITEMS TO TAKE:

- a. **PMP:**
  - (1) Project Notebook with Recording Sheets and Maps
  - (2) Laptop Computer and Batteries
  - (3) 2 Compasses and Stop Watch
  - (4) 2 Signal Mirrors and 2 Spot Lights
  - (5) Measuring Wheels and Tape
  - (6) Entomologists' Tool Kit
  - (7) UHF/VHF Radios and VHF Radios
  - (8) Cellular Phone
- b. **Mission Commander:** Cellular Phone, Mission Info
- c. **Navigator:** Maps
- d. **Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Herbicide Safety Binder
  - (4) Safety Equipment
- e. **Maintenance:** Applicable Equipment

## 9. SPRAY CONFIGURATION: SP3G

- a. Two Aircraft, Systems 3 and 5
- b. MASS Modules 1, 2 and 3
- c. UHV Fuselage booms oriented straight back

10. **PPR REQUIREMENTS:** All required, see Form 33 setup sheets for aircraft

11. **PARKING PLAN:** Air Freight Ramp – on West side of the airfield, Spots 11/12  
Alternate Spot 10 for support aircraft

## 12. RADIO FREQUENCIES:

- **Clover Range Control:** UHF 285.65, 275.9, 361.4
- **Eagle Tower:** UHF 351.0; Mawk 4 (**Gary Potter**)
- **Diddle Knoll & Spray Ops Freq:** UHF 398.1 (Primary), 383.2 (Back-up); VHF 134.1, 118.45
- **Spray Inter plane:** UHF 237.05 / VHF 138.375
- **Spray Ground to Spray Maintenance:** See Iridium Phones
- **Base OPS:** 139.3
- **HF Operations:** 04912.35 (p), 10923.35, 12208.35, 14827.35
- **Communications Ground Freq:** LMR nets are trunked at Hill.
  
- **IRIDIUM PHONES**
  - Mission Commander (b) (6)
  - Maintenance Supervisor (b) (6)
  - Entomologist/Pest Management (b) (6)

## 13. SPRAY PARAMETERS:

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24 and a couple passes on Nord LZ)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL

- f. Swath Width:** 35 Feet
- g. Flow Rate:** 366.1 Gallons/Minute

**14. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
- (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

**b. When:** Start at 0515 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be furnished by installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**15. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**16. CONTACTS:** (Commercial prefix (801) 777-XXXX; DSN 777-xxxx)

**a. 388<sup>th</sup> RANS/RSO, Range Control Officer/Installation Spray Coordinator:**

**17. SEQUENCING:**

**a.** Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling.

**b.** Spray ops aircraft must stay south of Base Leg Knoll during turns on north run on Target 21. Coordination with range control is essential to assure that this portion of the range is released for air operations.

**c. When** winds blow directly from one side of the target to the middle of the target or during early morning when wind speed is low, ground monitors will direct the “dress up” of the target edges.

**d. Spraying Priorities:**

- (1) Target 21
- (2) Target 24
- (3) NORDLZ

**f. Multiple-Target Alignments for Possible Future Operations.**

Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required).

- (1) The west edges of Targets 21 & 24 are contiguous and can be treated on the same pass with a spray-off gap between targets.

**18. GENERAL TARGET INFORMATION:**

**a. Target 21:**

- (1) Dimensions: 4,980' X 7,770'
- (2) Acreage: 888
- (3) Acres Sprayed in 2004: 888
- (4) Aircraft Loads: 18,869 Gal
- (5) Sorties: 17
- (6) Passes (35' Swath): 157
- (7) Spray-On Time/Pass: 23 Seconds
- (8) Spray Heading: 00/180

**b. Target 24:**

- (1) Dimensions: 1,600' X 6,080'
- (2) Acreage: 223
- (3) Acres Sprayed in 2004: 223
- (4) Aircraft Loads: 5,263 Gal
- (5) Sorties: 7
- (6) Passes (35' Swath): 47
- (7) Spray-On Time/Pass: 18 Seconds
- (8) Spray Heading: 00/180

**UTTR GEOGRAPHIC LOCATION**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and

close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

.

# SPRAY OPERATIONAL SCHEDULE

## UTAH TEST AND TRAINING RANGE MISSION

### 16-26 MARCH 2010

**PURPOSE/BENEFIT/OBJECTIVE:** Aerial spray herbicide mission controlling Halogeton on Targets 21, 24, and Wildcat at the Utah Test and Training Range(UTTR) aiding vegetation control for bombing mission test evaluations and unexploded ordnance recovery.

#### 1. AIRCREW1: AC 108-CALL SIGN: SPRAY 06

- a. Pilots: MAJ (b) (6); (b) (6), Capt (b) (6), (b) (6), MAJ (b) (6), Maj (b) (6)
- b. Navigators: LTC (b) (6)
- c. Flight Engineers: TBD
- d. Spray Operators: TBD
- e. Crew Chiefs: TBD

#### AIRCREW 2: AC 108- CALL SIGN: SPRAY 08

- f. Pilots: MAJ (b) (6), Maj (b) (6), Capt (b) (6), Maj (b) (6)
- g. Navigators: TBD
- h. Flight Engineers: TBD
- i. Spray Operators: TBD
- j. Crew Chiefs: TBD

#### 2. MISSION SUPPORT:

- a. Mission Commander: TBD
  - 1. Makes final decision on all changes to the schedule
  - 2. Confirm all hotel information is correct upon check in
  - 3. Report flight data to AFRC daily (See contact info on reporting sheet)
- b. Entomologists: Maj (b) (6) (b) (6), LtCol (b) (6) (b) (6)
- c. ARMS: TBD

#### 3. UTTR GROUND PARTY:

- a. Entomologist/Pest Management Professional(s): TBD 3 aircrew who will swap with aircrew above ½ way through

#### 4. MAINTENANCE:

- a. 910 MX Supervisor: \*SMSgt (b) (6) (27 Mar 09);
- b. 910 Spray MX: Tsgt (b) (6) (27 Mar 09), Tsgt (b) (6) (27 Mar 09), Tsgt (b) (6) (b) (6) (27Mar09), Ssgt (b) (6), SRA (b) (6), Tsgt (b) (6) (1 Apr), Tsgt (b) (6) (1 Apr)
- c. Instruments/Avionics: Tsgt (b) (6), Tsgt (b) (6)
- d. Hydraulics/Electrician: Tsgt (b) (6), Ssgt (b) (6)
- e. Engine: Tsgt (b) (6)

#### 5. COMM: None

#### 6. IN-BRIEFING: (UTTR Staff)

- a. When/Time: 17 Mar 2010, 1400
- b. Where: Air Freight Ramp/Base Operations
- c. Who: EVERYONE!! Do Not leave area until cleared out by the MC.
- d. Briefing Plan
  - a. Vehicles- See item 16.h below
  - b. FLT Line Driving
  - c. Schedule of events
  - d. Billeting- See item 16.g below
  - e. Weather call

f. Cellular Phone numbers for all personnel

**7. PLANNED SEQUENCE OF EVENTS: Hill AFB Tower Control and Runway Hours 24/7**

**NOTES:**

1. Scheduling reflects no weather or maintenance delays. In the event of weather or maintenance delays, the missions will be adjusted as required. ALL TIMES SUBJECT TO ADJUSTMENT BY MISSION COMMANDER
2. DUTY DAY FOR CIVILIANS WILL BE AS REQUIRED WITHIN CREW REST CONSTRAINTS.
3. Tower Control, Runway & Airfield hours 24/7
4. UTTR RANGE TIMES: 1500-2000Z
5. ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS PRE-FLIGHT COMPLETE AND RELEASED BY THE MISSION COMMANDER.

**a. 16 March (Tuesday)**

**Vader?? MI: ?????? PPR: ????**

0800 Show KYNG

1000 Depart KYNG with extra crew, maintenance, and support equipment

1330 Land KHIF drop off extra crew, maintenance, and support equipment

Time TBD: MC, Maint, and extra crew members work out logistics of buildings, access cards, vehicles, and obtain billeting information prior to crews arriving on 17 March.

**b. 17 March (Wednesday)**

**PPR: AS0101**

0900 Show KYNG load spray module

1100 Spray ?? Depart KYNG

1105 Spray ?? Depart KYNG

1430 Spray ?? Arrive KHIF

1435 Spray ?? Land KHIF

**c. 18-19 March (Thursday-Friday) 2 sorties as wx permits each day.**

0500 Show KHIF Spray ?? crew 1; 0545 Spray ?? Crew 2 (Alternating daily)

0530 Weather call and mixing begin

0700 Depart KHIF

1300 Land KHIF

\*\*Weekend flying is currently unavailable due to range funding. If wx delayed, then weekend operations will be considered as a last resort per Hill AFB.

**d. 22-25 March (Monday-Thursday) 2 sorties as wx permits each day.**

0500 Show KHIF

0530 Weather call and mixing begin

0700 Depart KHIF

1300 Land KHIF

**25 March Support Aircraft**

0700 Show KYNG

0900 Depart KYNG

1230 Arrive KHIF

**e. 26 March (Friday) All personnel**

0700 Show KHIF

1000/1005/1010 Depart KHIF

1600/1605/1610 Land KYNG

\*\*If completed early, the aircrews and airframes may return early. TBD by the mission commander.

## 8. ITEMS TO TAKE:

- a. **PMP:**
  - (1) Project Notebook with Recording Sheets and Maps
  - (2) Laptop Computer and Batteries
  - (3) 2 Compasses and Stop Watch
  - (4) 2 Signal Mirrors and 2 Spot Lights
  - (5) Measuring Wheels and Tape
  - (6) Entomologists' Tool Kit
  - (7) UHF/VHF Radios and VHF Radios
  - (8) Cellular Phone
- b. **Mission Commander:** Mission Folder, Cellular Phone
- c. **Navigator:** Maps
- d. **Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Herbicide Safety Binder
  - (4) Safety Equipment
- e. **Maintenance:** Applicable Equipment

## 9. SPRAY CONFIGURATION: SP3G

- a. Two Aircraft and Systems
- b. MASS Modules 1, 2 and 3
- c. UHV Fuselage booms oriented straight back

## 10. PPR REQUIREMENTS: All required, see Form 33 setup sheets for aircraft

## 11. PARKING PLAN: Forestry Ramp and Building requested

## 12. RADIO FREQUENCIES:

- **Clover Range Control:** UHF 285.65, 275.9, 361.4 (p)
- **Eagle Tower:** UHF 351.0; Mawk 4 (**Matt Bolduc**)
- **Diddle Knoll & Spray Ops Freq:** UHF 398.1 (Primary), 383.2 (Back-up); VHF 134.1, 118.45
- **Spray Inter plane:** UHF 237.05 / VHF 138.375
- **Spray Ground to Spray Maintenance:** See Iridium Phones
- **Base OPS:** 139.3
- **HF Operations:** Designated by Comm. See attached list.
- **Communications Ground Freq:** LMR nets are trunked at Hill.

### - IRIDIUM PHONES

- Mission Commander (b) (6)
- Entomologist/Pest Management at UTTR (b) (6)

## 13. SPRAY PARAMETERS:

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24 and a couple passes on Nord LZ)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

## 14. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)

- a. **Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes
- b. When:** Start at 0500 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be furnished by installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**15. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**17. SEQUENCING:**

- a. Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling.
- b. Spray ops aircraft must stay south of Base Leg Knoll during turns on north run on Target 21. Coordination with range control is essential to assure that this portion of the range is released for air operations.
- c. When winds blow directly from one side of the target to the middle of the target or during early morning when wind speed is low, ground monitors will direct the “dress up” of the target edges.
- d. **Spraying Priorities:**
  - (1) Target 21
  - (2) Target 24
  - (3) Wildcat (Rinse/excess material)
- k. **Multiple-Target Alignments for Possible Future Operations.**  
Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required).
  - (1) The west edges of Targets 21 & 24 are contiguous and can be treated on the same pass with a spray-off gap between targets.

**18. GENERAL TARGET INFORMATION:**

- a. **Target 21:**
  - (1) Dimensions: 4,980' X 7,770'
  - (2) Acreage: 888
  - (3) Acres Sprayed in 2004: 888
  - (4) Aircraft Loads: 18,869 Gal
  - (5) Sorties: 17
  - (6) Passes (35' Swath): 157
  - (7) Spray-On Time/Pass: 23 Seconds
  - (8) Spray Heading: 00/180
- b. **Target 24:**
  - (1) Dimensions: 1,600' X 6,080'
  - (2) Acreage: 223
  - (3) Acres Sprayed in 2004: 223
  - (4) Aircraft Loads: 5,263 Gal
  - (5) Sorties: 7
  - (6) Passes (35' Swath): 47
  - (7) Spray-On Time/Pass: 18 Seconds
  - (8) Spray Heading: 00/180
- c. WildCat

**UTTR GEOGRAPHIC LOCATION**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113

degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

**MEMORANDUM FOR HQ AFRC/DOOM**

**FROM:** 757AS/DOS  
3976 King Graves Rd  
Vienna Ohio 44473-0910

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT

1. Aerial Spray flight proficiency training will be accomplished on targets 21, 24, and Wildcat at the Utah Test and Training Range(UTTR) applying Krovar controlling vegetation (i.e Halogenton) growth aiding bombing mission test evaluations and unexploded ordinance recovery. Two Spray configured C-130's will be available 17-26 March 10 for the requested spray mission. One Support C-130 will be used for position and deposition of spray ground personnel and maintenance equipment.

2. Concept of Operations:

- a. 16 March (Tuesday)
  - 0800 Show KYNG
  - 1000 Depart KYNG with extra crew, maintenance, and support equipment
  - 1330 Land KHIF drop off extra crew, maintenance, and support equipment
- b. 17 March (Wednesday)
  - 0800 Show KYNG load spray module
  - 1000 1<sup>st</sup> Spray aircraft depart KYNG
  - 1005 2<sup>nd</sup> Spray aircraft depart KYNG
  - 1330 1<sup>st</sup> Spray aircraft Land KHIF
  - 1335 2<sup>nd</sup> Spray aircraft Land KHIF
- c. 18-19 March (Thursday-Friday)
  - 0500 Show KHIF
  - 0745 Depart KHIF
  - 1300 Land KHIF
  - \*\* 2 sorties planned each day per aircraft
- d. 22-25 March (Monday-Thursday)
  - 0500 Show KHIF
  - 0745 Depart KHIF
  - 1300 Land KHIF
  - \*\* 2 sorties planned each day per aircraft

- e. 26 March (Friday)
  - 0800 Show KHIF
  - 1000 1<sup>st</sup> Spray aircraft depart KHIF
  - 1005 2<sup>nd</sup> Spray aircraft depart KHIF
  - 1600 1<sup>st</sup> Spray aircraft land KYNG
  - 1605 2<sup>nd</sup> Spray aircraft land KYNG

- 3. Maj (b) (6) (b) (6) will act as Mission Commander.
- 4. Maj (b) (6) and Maj (b) (6) (b) (6) will act as Aircraft Commanders
- 5. Support required at Hill AFB and the UTTR has been completed.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Parris Island MCRD SC for Control of Sand fly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft 89-9108 available on 17-20 Apr 06

3. Concept of Operations:

**17 Apr (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

1330: Show Time  
1530: Take off KYNG  
1730: Land KNBC  
1800: Safety Briefing/installation brief

**18 Apr (Tuesday):**

1500: Showtime  
1530: Load Chemical/Wx Decision  
1730: Take off KNBC  
1955: Sunset

**19 Apr (Wednesday)** Wx back up or training

1500: Showtime  
1530: Load Chemical/Wx Decision  
1730: Take off KNBC  
1955: Sunset

**20 Apr (Thursday):** Return YNG

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate
- d. Deploy: 2.0 Hrs
- e. Re-Deploy: 2.0 Hrs
- f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Maj (b) (6)

6. Mission Commander: Major (b) (6)

7. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) DSN (b) (6) .
8. Four official Air Force Artists will accompany the 757AS to take pictures. All details are worked out the 910AW Public Affairs, MSgt (b) (6) . The artists and Public Affairs representative will get picked up by another 910AW aircraft on 20 Apr 06.

// SIGNED //

(b) (6) (b) (6) Major, USAFR  
Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 17-20 APR 2006 **Change 1**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### 1. 910 AW PARTICIPANTS:

- a. **Mission Commander:** Maj (b) (6)
- b. **Aircrew:**
  - (1) **Pilots:** Maj (b) (6), Maj (b) (6),
  - (2) **Navigators:** LTC (b) (6)
  - (3) **Flight Engineers:** CMS (b) (6)
  - (4) **Spray Operators:** MSgt (b) (6) son, MSgt (b) (6)
- c. **Maintenance:**
  - (1) **Spray Maintenance:** TSG (b) (6), MSgt (b) (6), TSG (b) (6)
  - (2) **Crew Chiefs:** TSG (b) (6), SRA (b) (6)
  - (3) **Avionics:** TSG (b) (6)
- d. **Pest Management Professionals/Entomologist:** MAJ (b) (6) (b) (6)
- e. **Public Affairs:** TSG (b) (6)
- f. **AF Artists:** (b) (6), (b) (6), (b) (6)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car keys and vehicles at Base Ops, Beaufort MCAS.

#### 2. PPR REQUIREMENTS: 107-02

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local)

**17 Apr (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc **PPR 107-02**

1030: Show Time  
1230: Take off KYNG  
1430: Land KNBC  
1500: Safety Briefing/installation brief

**18 Apr (Tuesday):**

1500: Showtime  
1530: Load Chemical/Wx Decision  
1730: Take off KNBC (We will aim to begin the application 1.5 hrs prior to sunset for best success against biting midges)  
1955: Sunset

**19 Apr (Wednesday)** Wx back up or training

1500: Showtime  
1530: Load Chemical/Wx Decision  
1730: Take off KNBC  
1955: Sunset

**20 Apr (Thursday):** Return YNG

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

#### 4. ITEMS TO TAKE:

- a. **Mission Commander:**

- (1) 20 Rooms reserved at Hampton Inn, ensure no rooms charged on Current Ops Credit card.

**b. Entomologist/CPMP:**

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) DGPS Computers & Maps

**c. Navigators:**

- (1) Maps
- (2) Templates

**d. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 6 open for ULV spray; 6 8003's oriented straight down (3 per side)
- c. **Differential GPS:** Installed
- d. **Aircraft:** 89-9108
- e. **Mission Identifier:** QZNRKA194107

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

**a. Pesticide:**

Anvil® 10+10  
Sumithrin (synthetic pyrethrin) and Piperonyl Butoxide  
Signal Word: Caution  
Antidote: not applicable  
Flushing Agent: Marvel Mystery Oil

- b. **Application:** 0.62 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 2.25 gallons/Minute

- 7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 40 gallons of Anvil per mission. Depending on coverage we will likely have some material left over. Spray maintenance will download; save for next mission.

- 8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 118.8 CTAF  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

- 10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

- 11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

- 12. CONTACTS:**

  - (4) Spray Operators: MSgt (b) (6) , MSgt (b) (6)
- c. **Maintenance:**
  - (1) Spray Maintenance: TSgt (b) (6) , MSgt (b) (6) , TSgt(b) (6)
  - (2) Crew Chiefs: TSgt (b) (6) , SrA (b) (6)
  - (3) Avionics: TSgt (b) (6)
- d. **Entomologist:** MAJ (b) (6) (b) (6)
- e. **Public Affairs:** TSG (b) (6)
- f. **AF Artists:** (b) (6)
- g. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.9
  - (2) Ferry Sorties/Hours: 2/4.4

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Anvil® 10+10 (10% Sumithrin and 10% Piperonyl Butoxide)
- b. EPA Registration Number: 1021-1688-8329
- c. Gallons Pesticide Loaded: 36 gal Anvil® (18 Apr)
- d. Gallons Pesticide Applied: 36 gal (18 Apr)
- e. Gallons and Name of Flush Used: 8 gal/marvel oil
- f. Application Rate: 0.62 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8003 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 30-55 p.s.i.
- g. Flow Rate: 2.25 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 1000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS (19 Apr):**

- a. Winds (Direction/Speed):
  - (1) Ground: 110°/2-5 Knots
  - (2) Release Altitude: 080° /5-7 Knots
- b. Temperature (Degrees Fahrenheit): 69° F dropping to 63° F
- c. Relative Humidity: 60-67%
- d. Cloud Cover: Partly Cloudy
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: visual observation of aircraft course (GPS)
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Weekly collections of midges and mosquitoes with carbon-dioxide baited traps/landing rates in regions frequented by recruits involved in training.
  - (2) Results: Poor control was noted in all areas sampled.

**8. REMARKS:** We utilized a widely accepted mosquito insecticide, Anvil 10+10, for this mission to evaluate the usefulness of this compound in controlling biting midges. This insecticide is classified as a synthetic pyrethroid and is representative of a class of chemicals related to a compound occurring naturally in Chrysanthemums. Biting midge activity levels during this mission were moderate-high based on trap collections from the previous two weeks and landing counts from the day prior. Ground monitors reported that the target pest (*Culicoides* spp.) was very active during the application. Attachment 1 shows the path of the aircraft while making the application. The spraying which occurred outside the spray block is necessary to let the wind drift material over the spray block and is representative of normal spray operations. Post spray sampling indicated poor control. Midge landing rates were equal to pre-spray rates. Attachment 2 shows relative numbers before and after sprays on Parris Island and a non-spray area (Spring Island). There are always natural fluctuations in numbers of midges collected between trap dates. However, we would expect collections to drop to nearly zero following an effective application. In this case, we had a slight increase in midges at Parris Island and a slight decrease at Spring Island where no applications were made.

Taking in account these simple measurements and anecdotal information from post-spray landing rates, the results indicate poor efficacy for this application. More detailed sampling will be carried out during the next scheduled application. A second application scheduled for 19 April was cancelled due to adverse weather conditions (thunderstorms/high winds).

The next Parris Island mission is scheduled for 1-5 May 2006 and will involve further evaluations of Anvil for biting midge control. Final analysis of material will be discussed once evaluations are completed.

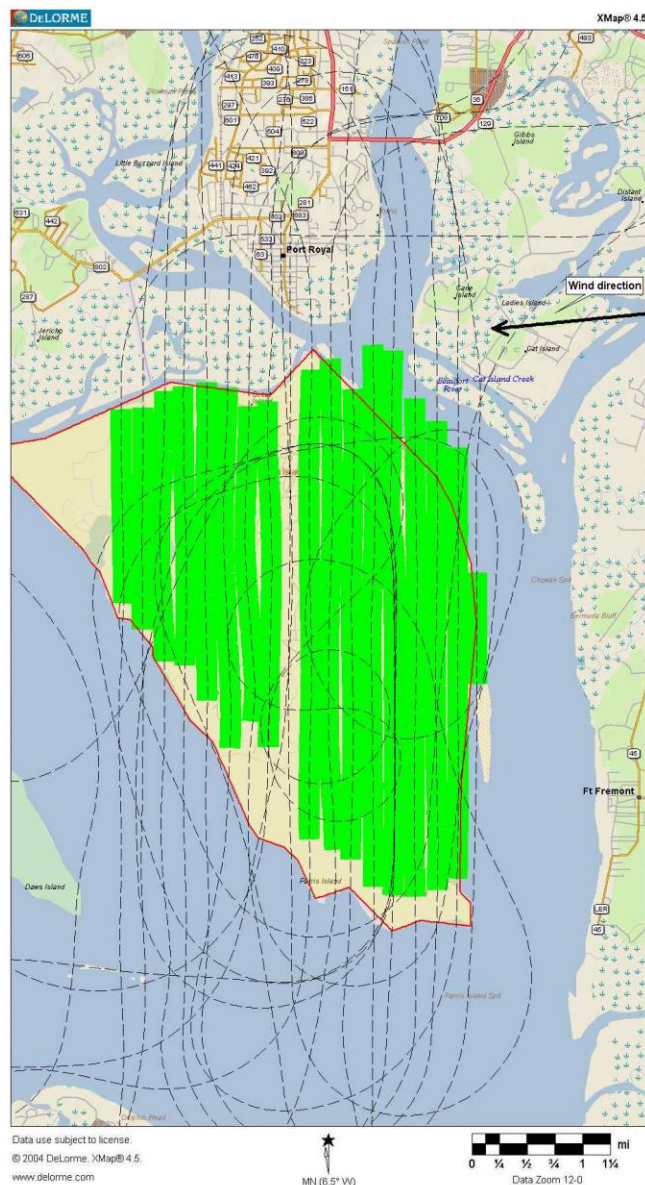

//signed//

4 May 04

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Parris Island  
MCRD SC for Control of Sandfly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft Available on 17-20 May 04

3. Concept of Operations:

a. 17 May 04 (Monday):

0730 Show Time  
0930 Take Off KYNG  
1130 Land KNBC  
1200 Safety Briefing  
1430 Load Chemical  
1630 Take Off KNBC  
1830 Land KNBC

b. 18 May 04 (Tuesday):

1430 Load Chemical  
1630 Take Off KNBC  
1830 Land KNBC

c. 19 May 04 (Wednesday):

1430 Load Chemical  
1630 Take Off KNBC  
1830 Land KNBC

d. 20 May 04 (Thursday):

1000 Take Off KNBC  
1200 Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate (naled)
- d. Deploy: 1.6 Hrs
- e. Re-Deploy: 1.6 Hrs
- f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Major (b) (6) (b) (6)

6. Mission Commander: Major (b) (6) (b) (6)

7. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) DSN (b) (6) .

8. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

(b) (6) (b) (6) Major, USAFR  
Chief of Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 17-20 May 2004

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6) (b) (6)
- (2) Pilots: MAJ (b) (6) (b) (6) , MAJ (b) (6)
- (3) Navigators: MAJ (b) (6) (b) (6)
  - (a) Flight Engineers: MSG (b) (6) , TSG (b) (6)
  - (a) Spray Operators: SMS (b) (6) , MSG (b) (6) , TSG (b) (6) (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) TSG (b) (6) , SSG (b) (6)
- (2) Crew Chiefs: SSG (b) (6) , SRA (b) (6)
- (3) Avionics: SSG (b) (6)

##### c. Pest Management Professionals/Entomologist: CPT (b) (6) (b) (6) (Ground Mission Cmdr)

#### 2. PLANNED SEQUENCE OF EVENTS: (All times local)

##### 17 May (Monday):

0830: Show Time  
1000: Take off KYNG  
1200: Land KNBC **PPR # 13801**  
1230: Safety Briefing/weather decision (by 1600 hrs)  
1630: Load Chemical  
1830: Take off KNBC  
2032: Sunset (end of spray)  
2100: Land  
Note: This is a single spray event, we will RTB the following date following successful application

##### 18 May (Tuesday): see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

1600: Show Time/weather decision  
1630: Load Chemical  
1830: Take off KNBC  
2032: Sunset (end of spray)  
2100: Land

##### 19 May (Wednesday):

1600: Show Time/weather decision  
1630: Load Chemical  
1830: Take off KNBC  
2032: Sunset (end of spray)  
2100: Land

##### 20 May (Thursday):

0900: Show Time  
1100: Take off KNBC  
1300: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist/CPMP:**
  - (1) Wind Gauge & Compass
  - (2) UHF/VHF Radios and Cellular Phone
  - (3) Pesticide Safety Binder
  - (4) DGPS Computers & Maps
  - (5) Oil Sensitive Papers
  - (6) Trackstar Equipment
- b. **Navigators:**
  - (1) Maps
  - (2) Templates
  - (3) Laptop Computer
- c. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**4. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 105; **Mission Identifier:** QZNRKA

**5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: HAN
- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

**6. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission and 25 gallons HAN in flush tank.

**7. PPR REQUIREMENTS:** Required:

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**12. CONTACTS :**

a. **Parris Island MCRD SC: (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 17-20 May 2004
- c. Purpose of Application: Biting Midge (*Culicoides* spp.) and Mosquito Control
- d. Application Date/s:
- e. Time/s of Application (Local):
- f. Acres Treated:
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6)  
Environmental/Spray Coordinator, DSN(b) (6)
- h. Date Spray Map Last Approved: 17 May 2004
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 17 May; Assistant Chief of Staff, Installation and Logistics, Capt (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: Maj (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): Capt (b) (6) (b) (6)
- c. Aircrew:
  - Pilots: Maj (b) (6) (b) (6) Maj (b) (6)
  - (2) Navigator: Maj (b) (6) (6)
  - (3) Flight Engineer(s): MSG (b) (6) , TSG (b) (6)
  - (4) Spray Operators: SMS (b) (6) , MSG (b) (6) , TSG (b) (6) (6)
- d. Safety Briefer: Capt (b) (6) (b) (6)
- e. Spray Maintenance: MSG (b) (6) TSG (b) (6) , SSG (b) (6)
- f. Spray Ground Monitor: Capt (b) (6) (b) (6)
- g. Crew Chiefs: SSG (b) (6) SRA (b) (6)
- h. Avionics: SSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: Sorties/ Hrs
  - (2) Ferry Sorties/Hours: 2 Ferry(s)/4.3 Hrs

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded:
- e. Gallons Pesticide Applied:
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 50 gallons VM & P NAPHTHA
- h. Other Additives Used: None
- i. Application Rate: 1 Oz/Acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number):
- b. Spray System (Modules Used) and System ID #:
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 40 PSI
- g. Flow Rate: 3.6 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000
- b. Spray Off Set: 3000 feet
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground:
  - (2) Release Altitude:
- b. Temperature (Degrees Fahrenheit):
- c. Humidity:
- d. Cloud Cover:
- e. Source:

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1-meter dowels.
  - (2) Results: Good coverage throughout spray area; swath determination was based on historical conditions.
- b. Effectiveness: (see remarks).

**8. REMARKS:**

(b) (6) (b) (6) **Capt, AFRC**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL**

### **3. ITEMS TO TAKE:**

- a. **Navigator:** Maps with “No-Spray” Areas Marked
- b. **Certified Pest Management Professionals:**
  - (1) Water-Sensitive Cards
  - (2) 1 Signal Mirror
  - (3) 1 Spot Light
  - (4) 1 Engineer Wheel
  - (5) Ground Maps
  - (6) Laptop Computer
  - (7) Digital Camera
  - (8) Oil-sensitive cards
  - (9) Spinners
  - (10) Wooden dowels

### **4. AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s)
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

### **5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 99106
- c. Mission Identifier: QZNRKA246320

### **6. SPRAY PARAMETERS (use for all tests):**

- a. Booms -- Fuselage only.
- b. Nozzles – 8008 TeeJet
- c. Number of Nozzles – 4 per side (8 total) oriented straight down
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 150’ above ground level.
- f. Wind -- Headwind/tailwind.
- g. Flow Rate – 3.6 gallons/minute

### **7. MISSION PROTOCOLS:**

#### **A. ULV Water test for aircraft contamination (Tuesday)**

20 water sensitive cards per side (40 cards) will be taped to rear fuselage and tail section of the aircraft (empennage). Spray aircraft will enter spray area on Avon Park range and go to “spray-on” for one minute with water at 150’ AGL. After landing, the cards will be inspected for presence of water. Test can be repeated if it is deemed appropriate and/or there is enough range time left.

#### **B. ULV oil test for aircraft contamination (Wednesday)**

20 oil sensitive cards per side (40 cards) will be taped to rear fuselage and tail section of the aircraft (empennage). Spray aircraft will enter spray area on Avon range and go to “spray-on” for one minute with soybean oil at 150’ AGL. After landing, the cards will be inspected for presence of water. Test can be repeated if it is deemed appropriate and/or there is enough range time left.

**C. ULV droplet characterization test using fuselage spray configuration and into the wind (Thursday)**

Glass droplet collectors will be deployed over a 2000 ft transect at 200 ft intervals. Aircraft will fly with either tailwind or headwind over center collector, which will be indicated by a vehicle, lamp, or mirror flash (coordinated prior to takeoff). Spray will be turned on for 30 seconds prior to and 30 after the collecting point (assuming headwind) maintain 150' AGL. Glass droplet collectors will be collected after waiting 15 minutes for droplets to settle; droplets will be counted and measured.

**8. CONTACTS:**

- a. Quarters:  
-- **Sebring/Avon Park: Quality Inn** (863) 385-4500 (\$69)  
  
--MacDill Lodging: DSN: 968-4259, FAX 2660 (Gp 968-2617/2594)

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **MINOT AFB, ND**

### **17-23 JULY 2006**

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Minot AFB, City of Minot, Grand Forks AFB, and City of Grand Forks in North Dakota. A secondary mission is to participate in the Grand Forks AFB air show using the aerial spray plane stay as a static display.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Pilots: LTC (b) (6) , Maj (b) (6)
- (2) Navigators: MAJ (b) (6)
- (3) Flight Engineers: MSG (b) (6)
- (4) Spray Operators: MSG (b) (6) , MSG (b) (6) , SSG (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: TSG (b) (6) (lead), MSG (b) (6) , TSG (b) (6) , SSG (b) (6)
- (2) Crew Chief(s): MSG (b) (6) , SRA (b) (6)
- (3) Avionics: TSG (b) (6)

##### **c. Entomologist: LTC (b) (6) MAJ (b) (6) (b) (6)**

#### **2. SCHEDULE: (All Local Times)**

##### **17 JUL (Monday): PPR: CW198001**

0900 Show time  
1100 Depart KYNG  
1345 Land KMIB  
1500 Installation Brief

##### **18 JUL (Tuesday):**

1800 Show time/WX Decision  
1830 Load Chemical  
2030 Take off KMIB (Adulticide Spray Sortie)  
2139 Sunset

##### **19 JUL (Wednesday):**

1800 Show time/WX Decision  
1830 Load Chemical  
2030 Take off KKMIB (Adulticide Spray Sortie)  
2138 Sunset

##### **20 JUL (Thursday): Training/Weather back up**

1800 Show time/WX Decision  
1830 Load Chemical  
2030 Take off KMIB (Adulticide Spray Sortie)  
2137 Sunset

##### **21 JUL (Friday) PPR: 072105-MH**

0900 Show time  
1030 Take off KMIB  
1115 Land KRDR – Position for Grand Forks Airshow static display  
1200 KRDR airfield closes

##### **22 JUL (Saturday)**

**Airshow Static Display**

##### **23 JUL (Sunday)**

0800 Show time  
1000 Depart KRDR  
1430 Land YNG

#### **3. ITEMS TO TAKE**

- a. Mission Commander:** Cellular Phone, Mission Folder

- b. **Entomologist:** Cell Phone, Wind Gauge, Compass, Pest Safety Binder,  
1 UHF Radio, 1 VHF radio Project Notebook
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

**4. KMIB PPR: CW197001, KRDR PPR: 072105-MH**

**5. RADIO FREQUENCIES: Air To Ground Primary UHF 392.2; VHF 123.45**  
Minot AFB Tower 120.65 V, 236.6, 253.5; Minot International 118.2 V, 393.1 or Unicom 122.95

**6. CONFIGURATION: SP2G**

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down
- c. **Number:** ULV: various configurations; see entomologist
- e. **Aircraft:** 89-9105
- f. **Mission Identifier:** QZNRKA906198

**7. SPRAY PARAMETERS:**

- a. **Adulticide**
  - (1) **Area to be treated:** 14,000 acres (Minot)
  - (2) **Altitude:** 150' for Adulticide application
  - (3) **Swath Width.** TBD
  - (4) **Flow Rate.** Various flow rates; see entomologist
  - (5) **Application Rate.** Various flow rates; see entomologist
  - (6) **Ground Speed:** 200 Knots (338 Feet/Second)
  - (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** Amount of Trumpet will be determined on site.

**9. TRANSPORTATION:**

Minot: **4 six PACs, 2 Ops, 2 Mx**  
Grand Forks: **3 x 6 PACs provided by 319 CES**

**10. LODGING:**

**MINOT:** Holiday Inn, Com 701-852-2504—out the main gate then South HWY 83 turn into Broadway St, Left on Burdick Expressway for 2 miles, across from State Fair Grounds, 2200 Burdick is the street address.

**GRAND FORKS:** Ramada Inn, Com 800- 570-3951--Located at the Junction of I-29 & Hwy. #2, Exit 141

**11. CONTACTS:**

**Minot AFB ND: DSN prefix: 453- Commercial area code and prefix (701) 723—**

# 910 AW AERIAL SPRAY UNIT -- POST-MISSION REPORT

## MINOT AFB ADULT MOSQUITO CONTROL & STATIC

### DISPLAY GRAND FORKS AFB 17-23 JULY 2006

#### 1. MISSION BASICS:

- a. Installation Sprayed: Minot AFB, North Dakota (Further travel to Grand Forks for static display of ULV mosquito spray configuration)
- b. Mission Duration: 17-23 July 2006
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date/s: 18 & 19 July 2006
- e. Time/s of Application (Local): 2030-2145 (18 Jul) & 2030-2216 (19 Jul); 1405-1451 (20 Jul flush sortie)
- f. Acres Treated: 5,158 (18 Jul) & 9,011 (19 Jul) = 14,169 acres
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Pest control supervisor/spray coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 17 July 2006
- i. Date of Waste Generation Letter: 17 July 2006
- j. Installation In-Briefing: (When/Where/Briefer/s): 17 Jul; Deputy Base Civil Engineer, (b) (6); LTC (b) (6) MAJ (b) (6)

#### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11): LTC (b) (6) & MAJ (b) (6) (b) (6)
- c. Aircrew:
  - (1) Pilots: LTC (b) (6), Maj (b) (6) (3)
  - (2) Navigators: MAJ (b) (6)
  - (3) Flight Engineers: MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6), MSG (b) (6) SSG (b) (6)
- d. Maintenance:
  - (1) Spray Maintenance: TSG (b) (6) (lead), MSG (b) (6), TSG (b) (6), SSG (b) (6)
  - (2) Crew Chief(s): MSG (b) (6), SRA (b) (6)
  - (3) Avionics: TSG (b) (6)
- e. Safety Briefer: MAJ (b) (6)
- f. Flying Data:
  - (1) Spray Sorties/Hours:  $1.3+1.8+0.8 = 3.9$
  - (2) Ferry Sorties/Hours:  $4.2+.0.9+3.0 = 8.1$

#### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Trumpet<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-90-5481
- c. Formulation Sprayed: Emulsified Concentrate
- d. Gallons Pesticide Loaded: 60 Gal Trumpet<sup>®</sup> (18 Jul); 30 gal (19 Jul); 90 gallons total
- e. Gallons Pesticide Applied: 30 Gal (18 Jul) & 60 Gal (19 Jul)
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 80 gallons; water
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre (18 Jul); 0.85 oz/acre (19 Jul)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 13 oriented straight down
- f. Pressure: 35 (18 Jul) & 33 (19 Jul) psi
- g. Flow Rate: 5.45 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray offset: 2000' (18 Jul); 2000' (19 Jul)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 4-7 knots @ 290-310° (18 Jul) & 6-7 knots @ 320° (19 Jul)
  - (2) Release Altitude: 8-15 Knots @ 290-310° (18 Jul) & 6-15 knots @ 320-330° (19 Jul)
- b. Temperature (Degrees Fahrenheit): 85° (18 Jul) & 75° (19 Jul)
- c. Relative humidity: 38% (18 Jul) & 44% (19 Jul)
- d. Cloud Cover: Partly Cloudy (18 Jul) & Partly Cloudy (19 Jul)
- e. Source: Ground observations and aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Effectiveness:
  - (1) Technique/s Used: Daily mosquito trapping.
  - (2) Results: Mosquito numbers reduced by over 95% relative to pre-spray counts.

**8. REMARKS:** Mosquito activity had been low to medium at Minot AFB as a result of below average precipitation. Nonetheless, mosquito traps using carbon dioxide had collected around 150 mosquitoes per night prior to the spray. Additionally, several dead crows had been found in the area, indicating possible West Nile virus activity. These factors justify aerial applications per the Minot Environmental Assessment regarding mosquito control. Applications were made over Minot AFB and Minot City during the final hour before sunset to maximize target pest exposure (*Aedes vexans* and *Culex tarsalis*). The flight paths for the spray sorties are shown for both nights in Attachment 1 (A & B). Trap counts from the morning after the spray dropped to below 5 mosquitoes, representing a 95% reduction in mosquito activity. This is the last programmed spray flight to Minot AFB this year. Projected dates and types of sprays (adult mosquito or mosquito larvae) will be coordinated for next year. Many thanks to Minot AFB personnel (especially PA, Pest Control Shop, and Transportation) who did an excellent job; without their participation, this mission could not have been a success. En route to home station from Minot AFB, the spray team traveled to Grand Forks AFB, as invited Air Show participants and provided a static display of the ULV configuration and short video. Many favorable comments were received from air show attendees living in the Grand Forks area regarding the reduction of mosquitoes from Air Force applications.

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

18 Sep 04

FROM: 757 AS/DOS (DSN (b) (6) 1531; FAX 346-1616)

SUBJECT: Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT  
Annual Weed Control Spray Mission on the Utah Test and Training Range (UTTR)

1. **Capability:** Two aircraft will be available 17-24 Sep 04 for the requested spray mission. The support aircraft are available 17-18 & 23-24 Sep 04 in support of the mission.

2. **Concept of Operations:**

a. **17 Sep (Friday):**

0800 Show at KYNG  
0810 Pre-Mission Briefing  
0830 LM's released to assist in loading aircraft  
1000 Support Aircraft 19123 Take-Off KYNG  
1005 Spray Aircraft 99107 Take-Off KYNG  
1010 Spray Aircraft 99108 Take-Off KYNG  
1330 Land HIF  
1345 Safety Brief

b. **18 Sep (Saturday) – 22 Sep (Wednesday):** Schedule of daily events will be determined by the Mission Commander as required.

**(Range times 0600-1600)**

0430 Ground Support Team departs for UTTR  
0515 FEs, Crew Chiefs, & Spray MX report and Mix/Load Chemical  
0700-1200 Target areas sprayed as designated by PMP

c. **23 Sep (Thursday):** Flush and clean up day.

Schedule of daily events will be determined by the Mission Commander as required. Support Aircraft returns to Hill AFB.

d. **24 Sep (Friday):**

0800 Aircrew report for duty  
0830 All personnel report  
1000-1015 Spray Aircrafts & Support aircraft take-off  
1700-1800 Mission completed all personnel and aircraft arrive at KYNG

3. **Spray Parameters and Sequencing:** (See attached Operational Schedule)
4. **Mission Commander:** Lt Col (b) (6)
5. **Support required at Hill AFB and the UTTR has been completed.**

(b) (6) (b) (6) Maj, USAFR  
Aerial Spray Mission Commander  
757 AS/DOS

Attachment  
Spray Operations Schedule

- 6. IN-BRIEFING:** (UTTR Staff)
- a. **When/Time:** 17 Sep 04, 1530
  - b. **Where:** Air Freight Terminal
  - c. **Who:** Everyone
  - d. **Briefing Plan**
    - a. Billeting
    - b. Vehicles
    - c. Schedule of events
    - d. Weather call
    - e. Cellular Phone numbers for all personal

- 7. PLANNED SEQUENCE OF EVENTS:** Hill AFB Tower Control and Runway Hours 24/7  
**NOTE: Scheduling reflects no weather or maintenance delays.**

**ALL TIMES MAY BE ADJUSTED BY MISSION COMMANDER.  
DUTY DAY FOR CIVILIANS WILL BE STD DAY (8 HOURS).  
MILITARY STATUS PERSONNEL WILL WORK AS  
REQUIRED WITHIN CREW REST CONSTRAINTS.**

**Tower Control, Runway & Airfield hours 24/7**

**RANGE TIMES: 0600-1600L  
END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE MIX.  
ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS  
PRE-FLIGHTED FOR THE NEXT DAY OR RELEASED BY THE AIRCRAFT  
COMMANDER.**

**17 Sep (Fri):** Ground Support personnel depart for Wendover Stateline Inn

**18-23 Sep (Sat-Thur):** (First Spray Sortie, Range Times 0600-1600 (1200Z-  
2200Z 18-24 Sep)

0500L: Spray Maintenance starts on first full day of mission and adjust as directed

0712L: Sunrise (see attach Sunrise/Sunset Chart)

0700-1400L: Spray UTTR Targets as directed

Targets as directed by the Mission Commander or Ground Support Director

**23 Sep (Thur):** Weather Back-up/Flush, Clean Up; Support Aircraft arrives at Hill

**24 Sep (Fri):** All personnel and aircraft return to YNG

0800L: All Aircrew report

0830L: All Personnel report

1000L: Spray Aircraft Takes Off Hill AFB

1005L: Spray Aircraft Takes Off Hill AFB

1010L: Support Aircraft Takes off Hill AFB

1700L: Spray Lands YNG

1715L: Support A/C Lands YNG

**8. ITEMS TO TAKE:**

**a. PMP:**

- (1) Project Notebook with Recording Sheets and Maps
- (2) Laptop Computer and Batteries

- (3) 2 Compasses and Stop Watch
- (4) 2 Signal Mirrors and 2 Spot Lights
- (5) Measuring Wheels and Tape
- (6) Entomologists' Tool Kit
- (7) UHF/VHF Radios and VHF Radios
- (8) Cellular Phone
- b. Mission Commander:** Cellular Phone, Mission Info
- c. Navigator:** Maps
- d. Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Herbicide Safety Binder
  - (4) Safety Equipment
- e. Maintenance:** Applicable Equipment

**9. SPRAY CONFIGURATION:**

- a.** Two Aircraft, Systems 3 and 5
- b.** MASS Modules 1, 2 and 3
- c.** UHV Fuselage booms oriented straight back

**10. PPR REQUIREMENTS:** All required, see Form 33 setup sheets for aircraft

**11. PARKING PLAN:** Air Freight Ramp – on West side of the airfield, Spots 11/12  
Alternate Spot 10 for support aircraft

**12. RADIO FREQUENCIES:**

- **Clover Range Control:** UHF 285.65, 275.9, 361.4
- **Eagle Tower:** UHF 351.0; Mawk 4 ((b) (6) )
- **Diddle Knoll & Spray Ops Freq:** UHF 398.1 (Primary), 383.2 (Back-up); VHF 134.1, 118.45
- **Spray Inter plane:** UHF 349.35
- **Spray Ground to Spray Maintenance:** See Iridium Phones
- **Base OPS:** 139.3
- **HF Operations:** 11215.4 (p), 13213.4, 15011.4, 20904.5
- **Communications Ground Freq:** LMR nets are trunked at Hill. Requesting Hill Spectrum Manager support.
- **IRIDIUM PHONES**
  - Mission Commander ((b) (6))
  - Maintenance Supervisor ((b) (6))
  - Entomologist/Pest Management ((b) (6))

**13. SPRAY PARAMETERS:**

- a. Herbicide:** Krovar 1DF®
- b. Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. Acreage:** 1,283 Acres (Targets 21, 24 and a couple passes on Nord LZ)
- d. Ground Speed:** 200 Knots (337.55 ft/sec)
- e. Spray Altitude:** 100 Feet AGL
- f. Swath Width:** 35 Feet
- g. Flow Rate:** 366.1 Gallons/Minute

**14. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

**b. When:** Start at 0515 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be furnished by installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**15. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**17. SEQUENCING:**

**a.** Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling. Target 21 is the priority.

**b.** Spray ops aircraft must stay south of Base Leg Knoll during turns on north run on Target 21. Coordination with range control is essential to assure that this portion of the range is released for air operations.

**c. When** winds blow directly from one side of the target to the middle of the target or during early morning when wind speed is low, ground monitors will direct the "dress up" of the target edges.

**d. Spraying Priorities:**

- (1) Target 21
- (2) Target 24
- (3) NORDLZ

**e. Multiple-Target Alignments for Possible Future Operations.**

Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required).

- (1) The west edges of Targets 21 & 24 are contiguous and can be treated on the same pass with a spray-off gap between targets.

**18. GENERAL TARGET INFORMATION:**

**a. Target 21:**

- (1) Dimensions: 4,980' X 7,770'
- (2) Acreage: 888
- (3) Acres Sprayed in 2002: 888
- (4) 2000 Aircraft Loads: 18,869 Gal
- (5) Sorties: 17
- (6) Passes (35' Swath): 157
- (7) Spray-On Time/Pass: 23 Seconds
- (8) Spray Heading: 00/180

**b. Target 24:**

- (1) Dimensions: 1,600' X 6,080'
- (2) Acreage: 223
- (3) Acres Sprayed in 2002: 223
- (4) 2000 Aircraft Loads: 5,263 Gal
- (5) Sorties: 7
- (6) Passes: 47

- (7) Spray-On Time/Pass: 18 Seconds
- (8) Spray Heading: 00/180

### **UTTR GEOGRAPHIC LOCATION**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

# 910 AW AERIAL SPRAY--PMP'S POST-MISSION REPORT

## UTAH TEST AND TRAINING RANGE

### 17-24 SEPTEMBER 2004

#### 1. MISSION BASICS:

- a. **Installation Sprayed:** Utah Test and Training Range, UT
- b. **Mission Duration:** 17-24 Sep 04
- c. **Purpose of Application:** Weed Control over designated UTTR targets/facilitate UXO recovery
- d. **Date/s and Time/s of Application (Local):** 20 Sept: 1340-1750 Z. 21 Sept: 1320-1911Z. 22 Sept: 1300-1851 Z 23 Sept 1400-1530 Z.
- e. **Acres Treated:** 1038 acres
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** (b) (6) , Aerial Spray Coordinator, Hill/UTTR AFB, DSN(b) (6)
- g. **Date Spray Map Last Approved:** 17 Sep 04
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 17 Sep/1430, Base OPS, LtC (b) (6) /Maj (b) (6) Capt (b) (6)

#### 2. OPERATIONAL:

- a. **Mission Commander:** LtC (b) (6)
- b. **Certified PMP (Category 11):** LtC (b) (6) (b) (6) LtC (b) (6) Maj (b) (6)(b) (6) Capt (b) (6)
- c. **Aircrew:**
  - (1) Aircraft CMDR/Pilot: Maj (b) (6) (b) (6) Maj (b) (6)3
  - (2) Navigators: Maj (b) (6)(b) (6) Maj (b) (6)6
  - (3) Flight Engineer: MSG (b) (6) , MSG (b) (6) , SRA (b) (6) (b) (6)
  - (4) Spray Operators: MSG (b) (6) , MSG (b) (6) , TSG (b) (6) , TSG (b) (6)6
- d. **Safety Briefer:** Capt (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** SMS (b) (6) TSG (b) (6) , TSG (b) (6)  
TSG (b) (6) TSG (b) (6) SSG (b) (6) SSG (b) (6)
- f. **Spray Ground Monitors:** LtC (b) (6) (b) (6) LtC (b) (6) Maj (b) (6)(b) (6) Capt (b) (6)
- g. **Crew Chief(s):** MSG (b) (6) , TSG (b) (6) , SSG (b) (6) , SRA (b) (6)
- h. **910 MA/LG Superv:** SMS (b) (6)
- i. **Avionics/Hydraulics:** MSG (b) (6) , MSG (b) (6) , SSG (b) (6)
- j. **Engine/Propulsion:** TSG (b) (6) , SSG (b) (6) (b) (6) SSG (b) (6)
- k. **Flying Data:** Spray A/C 899106: Ferry: 2, Hours: 10.3; Spray Sorties: 7, Hours: 8.8.  
Spray A/C 909107: Ferry: 2, Hours: 10.2; Spray Sorties: 8, Hours: 10.1.  
Support A/C 923023, Ferry: 2, Hours: 10.3

#### 3. PESTICIDE:

- a. **Trade Name (% Active Ingredient):** Krovar I DF®
- b. **EPA Registration Number:** 352-505
- c. **Formulation Sprayed:** 10 pounds in 22.5 gallons of water per acre
- d. **Gallons Pesticide Loaded:** 1800 per sortie
- e. **Gallons Pesticide Applied:** 23036 gallons
- f. **Gallons and Name Diluent Used:** 23036 gallons water
- g. **Other Additives Used:** 14 Gal Foam Fighter F®, 114 Gal StaPut®, 45 Gal Hi-Light® Dye
- h. **Application Rate:** 22.5 Gal per acre

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** C-130H (899106 and 909107)
- b. **Spray System (Modules Used) and System ID #:** Modules 1, 2, and 3; Systems 3 and 5.
- c. **Spray System Configuration:** SP-3G
- d. **Nozzle Type/Size:** 3 inch herbicide nozzles.
- e. **Nozzle Orientation & Number Used:** 2, oriented straight back.
- f. **Pressure:** 40 psi
- g. **Flow Rate:** 366 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 35 feet.
- b. **Spray Off Set:** Variable, determined by spotters on the ground.
- c. **Spray Release Altitude:** 100 feet.
- d. **Ground Speed:** 200 knots.

**6. WEATHER OBSERVATIONS (Ground Wind Direction (degrees)/Speed (knots):**

- a. **20 Sep:** 310-320/7-12
- b. **21 Sep:** 0/1-4
- c. **22 Sep:** 090-152/4-6
- d. **23 Sep:** Variable/0-2

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Monitoring:**
  - (1) Technique/s Used: Ground/Aircraft direct observation of dye markings
  - (2) Results: Spray off-set determined via direct observation of application coverage
- b. **Effectiveness:**
  - (1) Technique/s Used: Visual field observations of coverage and amount of spring vegetation germination.
  - (2) Results: (See Remarks)

- 8. REMARKS:** Ground coverage was complete with no skips in sprayed areas. Mission goals were met (Targets 21 & 24 treated). Two airframes are critical to this mission. In contrast to last years' mission (2003) 2, aircraft minimized turn-around time and relieved the workload on the aircrews. UTTR staff and Hill AFB provided excellent support as did the Aerial Spray Maintenance personnel who worked uncommonly long shifts. The 910<sup>h</sup> Communications Flight deployed on this spray mission and enhanced the operation through their equipment and knowledge. Communications with spray maintenance and spray operations are impossible with cellular phones and are difficult and awkward via VHF or UHF communications. Satellite phones provided by the Communications flight made communications much more streamlined. Stakes on targets 21 & 24 should be replaced and synchronized using the western target edges as the starting point. Diddle Knoll was found to serve as an excellent target Command and Control Site, since targets 21 & 24 can be monitored simultaneously. It does not replace the need for monitors on target, however.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 18-21 Apr 2005

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6)(b) (6)
- (2) Pilots: MAJ (b) (6)(b) (6) MAJ (b) (6) , CPT (b) (6)(b) (6)
- (3) Navigators: MAJ (b) (6)
  - (a) Flight Engineers: CMS (b) (6)
  - (a) Spray Operators: CMS (b) (6)(5) , MSG (b) (6) , MSG (b) (6) MSG (b) (6)(5)

##### b. Maintenance:

- (1) Spray Maintenance: CMS (b) (6) , TSG (b) (6) , TSG (b) (6) TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , MSG (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Pest Management Professionals/Entomologist: LTC (b) (6) CPT (b) (6)(b) (6)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car

#### 2. PLANNED SEQUENCE OF EVENTS: (All times local)

##### 18 Apr (Monday):

- 1000: Show Time
- 1200: Take off KYNG
- 1400: Land KNBC
- 1415: Safety Briefing

##### 19 Apr (Tuesday): see www.beaufort.usmc mil for weather, etc

- 1400: Show Time
- 1500: Weather decision /Load Chemical
- 1755: Take off KNBC
- 1955: Sunset

##### 20 Apr (Wednesday): Weather Backup

- 1400: Show Time
- 1500: Weather decision /Load Chemical
- 1755: Take off KNBC
- 1956: Sunset

##### 21 Apr (Thursday):

- 0900: Show Time
- 1100: Take off KNBC
- 1300: Land KYNG

#### 3. ITEMS TO TAKE:

##### a. Entomologist/CPMP:

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) DGPS Computers & Maps
- (5) Oil Sensitive Papers
- (6) Trackstar Equipment

##### b. Navigators:

- (1) Maps

(2) Templates

c. **Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

4. **SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 89-9106      **Mission Identifier:** QZNRKA997108

5. **SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

6. **AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission and 25 gallons HAN in flush tank.

7. **PPR REQUIREMENTS: 108-01**

8. **PARKING PLAN:** Beaufort MCAS Ramp

9. **AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

10. **TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing. In addition, LTC (b) (6) and Capt (b) (6) will have cars on their orders.

11. **SPRAY MONITORING/TESTING:** Ground monitoring by CPMP &Parris Island MCRD Project Coordinator.

12. **CONTACTS:**

**910 AW AERIAL SPRAY**  
**PMP'S POST-MISSION REPORT**  
**PARRIS ISLAND MARINE CORPS RECRUIT DEPOT**  
**18-21 APRIL 2005**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 18-21 April 2005
- c. Purpose of Application: Biting Midge (*Culicoides* spp.) and Mosquito Control
- d. Application Date: 19 April 2005
- e. Time/s of Application (Local): 1750-1950 (19 April 2005)
- f. Acres Treated: 7,296
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6)  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 18 April 2005
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 18 April 2005; Assistant Chief of Staff, Installation and Logistics (COL (b) (6) ), Maj (b) (6) Lt Col (b) (6) et al

**2. OPERATIONAL:**

- a. **Aircrew:**
  - (1) Mission Commander: MAJ (b) (6) (b) (6)
  - (2) Pilots: MAJ (b) (6) (b) (6) MAJ (b) (6) , CPT (b) (6) (b) (6)
  - (3) Navigators: MAJ (b) (6)
    - (a) Flight Engineers: CMS (b) (6)
    - (a) Spray Operators: MSG (b) (6) , MSG (b) (6) MSG (b) (6) (b) (6)
- b. **Maintenance:**
  - (1) Spray Maintenance: CMS (b) (6) , TSG (b) (6) , TSG (b) (6) TSG (b) (6) (b) (6) , TSG (b) (6)
  - (2) Crew Chiefs: MSG (b) (6) , MSG (b) (6)
  - (3) Avionics: TSG (b) (6)
- c. **Pest Management Professionals/Entomologists:** LTC (b) (6) CPT (b) (6) (b) (6)
- d. **Flying Data:**
  - (1) Spray Sorties/Hours: 1 Sortie/2.0 Hrs, 1 Spray training sortie 1.2 hrs
  - (2) Ferry Sorties/Hours: 2 Ferries/5.0 Hrs

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60 gal Dibrom<sup>®</sup>
- e. Gallons Pesticide Applied: 57 gallons
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 17 gallons Marvel Oil
- h. Other Additives Used: None
- i. Application Rate: 1 Oz/Acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 40 PSI (21-44 recorded)
- g. Flow Rate: 3.6 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 175-200/3-8 knots
  - (2) Release Altitude: 200/10 knots
- b. Temperature (Degrees Fahrenheit): 73° F
- c. Humidity: 43 %
- d. Cloud Cover: Scattered clouds
- e. Source: Ground observations at the MCRD Marina and at the small arms range.

Observations at spray altitude are from Doppler radar on the aircraft (SCNS).

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern: not used
- b. Effectiveness: pre/post-spray surveillance of midge and mosquito populations were carried out using carbon dioxide baited traps; 24 hrs prior and 24 hrs after the application. Effect of the spray on non-target insects was also monitored. Results are discussed in section 8 and figures presented in Attachment 1.

**8.** Using data from the ongoing MCRD/757<sup>th</sup> AS midge/mosquito surveillance project the timing of this application appears to have been projected perfectly to be synchronized with high titers of biting insects. The primary nuisance mosquito was *Aedes vexans*, which will bite in the shade during the day and breeds in temporary pools during spring months. The most abundance biting midge (sand flea) was *Culicoides hollensis*. Excellent control was achieved during this single application (see attachment 1). Attachment 2 shows the path of the aircraft over the Depot as the crew made the application. Because there was not an eagle nesting this year, the application covered the entire Depot. Steady winds from the south added to mission success by assuring an even distribution of chemical. Low numbers of biting insects remained the norm into the weekend. This should improve conditions for those training outdoors by reducing the number of insect related dermatitis cases and overall exposure to mosquito-borne viruses. Non-target insects, especially insects larger than mosquitoes did not appear to be adversely affected by the spray, since their numbers remained steady or quickly rebounded in our collections. Non-target insects will be identified and counted for a detailed analysis available next year. The 757<sup>th</sup> AS has coordinated with the Parris Island NREAO to make another application, if warranted by insect numbers, 16-19 May 2005.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Minot AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Minot AFB ND.

**2. Capability:** Spray Aircraft 89-9107 available 18-22 Jul 05

**3. Concept of Operations:**

**18 Jul (Monday)**

0900: Show at KYNG  
1100: Depart KYNG  
1300: Land KMIB/Safety Briefing  
1500: Spray In Brief (CPMP, MC, AC)

**19 Jul (Tuesday):**

1730: Show time  
1800 Load Chemical  
1930: Take off KMIB (Adulticide Spray Sortie)  
2137: Sunset

**20 Jul (Wednesday):**

1730: Show time  
1800 Load Chemical  
1930: Take off KMIB (Adulticide Spray Sortie))  
2136: Sunset

**21 Jul (Thursday):**

1730: Show time  
1800 Load Chemical  
1930: Take off KMIB (Adulticide Spray Sortie)  
2135: Sunset

**22 Jul (Friday):**

1130: Show time  
1330: Take off KMIB  
1730: Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 150' AGL for Adulticide swaths when no trees are present.
- b. **Swath Width.** 1000 feet for ULV or as determined by the CPMP
- c. **Flow Rate.** 4.36 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 6,000 acres

5. **Mission Commander:** Maj (b) (6)

1330: Take off KMIB  
1730: Land KYNG

3. **ITEMS TO TAKE**

- a. Mission Commander:** Cellular Phone, Mission Folder
- b. Entomologist:** Cell Phone, Wind Gauge, Compass, Pest Safety Binder,  
1 UHF Radio, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit
- c. Navigator:** Maps/Map Bag, Validation Map
- d. Spray Operator:** Safety Gear, Calibration Tables
- e. Spray Maintenance:** Deployment Kit, Support Equipment

**4. PPR: 1801CW**

**5. RADIO FREQUENCIES: Air To Ground Primary** UHF 392.2; VHF 123.45  
Minot AFB Tower 120.65 V, 236.6, 253.5; Minot International 118.2 V or Unicom 122.95

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. Nozzle Tips/Orientation:** ULV (adulicide): 8005 Tee Jet oriented straight down
- c. Number:** ULV: 6 8005s total (3 each side)
- e. Aircraft:** 89-9107
- f. Mission Identifier:** QZNRKA620199

**7. SPRAY PARAMETERS:**

- a. Adulicide**
  - (1) **Area to be treated:** 4,951 acres
  - (2) **Altitude:** 150' for Adulicide application
  - (3) **Swath Width.** 1000 feet for ULV or as determined by the PMP
  - (4) **Flow Rate.** 2.72 gallons/minute ULV
  - (5) **Application Rate.** 0.75 oz/acre Trumpet, ULV
  - (6) **Ground Speed:** 200 Knots (338 Feet/Second)
  - (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION:** 4 six packs, 2 Ops, 2 Mx

**10. LODGING:** International Inn Hotel, Com 701-852-3161, MC will pick up non A slips at the hotel, billeting is faxing them.  
Go South on Hwy 83 from the base. It will be on the right hand side about a ¼ mile south of the airport.

**11. CONTACTS:**

**a. Minot AFB ND: DSN prefix: 453- Commercial area code and prefix (701) 723---**

## **PMP'S POST-MISSION REPORT**

### **Minot AFB, ND (11-22 July 2005)**

#### **1. MISSION BASICS:**

- a. Installation Sprayed: Minot AFB, ND
- b. Mission Duration: 18-22 July 2005
- c. Purpose of Application: Control nuisance and vector mosquitoes (adult stage)
- d. Application Date: 19-20 July 2005
- e. Time of Application (Local): 1915-2136 (19 July); 1935-2135 (20 July)
- f. Acres Treated: 14,163
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) , Pest Controller, DSN (b) (6)
- h. Date Spray Map Last Approved: 18 June 2005
- i. Date of Waste Generation Letter: 18 June 2005
- j. Installation In-Briefing: (When/Where/Briefer/s): 18 June 2005; Minot AFB CE Building  
MAJ (b) (6) MAJ (b) (6) (b) (6) CAPT (b) (6) (b) (6) .

#### **2. OPERATIONAL:**

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMP/s (Category 11): CAPT (b) (6) MAJ (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: MAJ (b) (6) (b) (6)
  - (2) CoPilot: MAJ (b) (6)
  - (3) Navigator: MAJ (b) (6) , MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6) , MSG (b) (6)
  - (5) Spray Operators: SMS (b) (6) , MSG (b) (6) , MSG (b) (6) , SSG (b) (6) (b) (6)
- d. Safety Briefer: CAPT (b) (6)
- e. Spray Maintenance: MSG (b) (6) , SSG (b) (6) , TSG (b) (6)
- f. Spray Ground Monitors: CAPT (b) (6) MAJ (b) (6) (b) (6)
- g. Crew Chiefs: TSG (b) (6) , SSG (b) (6)
- h. Avionics: MSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 2/4.4 (flush sortie on 21 July)
  - (2) Ferry Sorties/Hours: 2/7.4

#### **3. PESTICIDES:**

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-548127
- c. Gallons Pesticide Loaded: 90 (19 July)
- d. Pesticide Applied: 82 (19-20 July)
- e. Other Additives Used: none
- f. Gallons and Name of Flush Used: 150 gallons water
- g. Application Rate: 0.75 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 89-9107
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005
- e. Nozzle Orientation & Number Used: 6 straight down (July 19); 11 (July 20)
- f. Pressure (PSI): 14-18
- g. Flow Rate: 2.72 gallons per minute (19 July); 5.44 gallons per minute (20 July)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000 feet (Minot AFB), 2000 feet (City of Minot)
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 knots (338 feet/second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 300°/5 knots (July 19); 090°/3 knots (July 20)
  - (2) Altitude: 310°/8 knots (July 19); 090°/5 knots (July 20)
- b. Temperature: 76-82 °F
- c. Dew Point: 52-55 °F
- d. Cloud Cover: Clear
- e. Source: Ground/altitude observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Techniques and results:

The Air Force Base (Minot AFB) conducts adult mosquito trapping. Public health reported mosquito trap counts in excess of 3000/trap, indicating extremely high mosquito populations, probably due to the extremely wet season. At this time, trap counts were not submitted for the day following the application and results are pending. However, comments from local personnel indicate that the application was quite effective, and written comments were received from the citizens of the city of Minot to the same effect.

- 8. REMARKS:** This was the first aerial spray mission conducted at Minot AFB and the City of Minot, ND. Operationally, the mission went extremely well, due in large part to excellent weather conditions for aerial application of pesticides. The 910<sup>th</sup> received outstanding support from the Pest control shop as well as the Civil Engineering section. Both of these groups went out of their way to meet our needs. There was extensive involvement by 910<sup>th</sup> public affairs personnel in this mission. A static display of the C-130 for the public was conducted, with approximately 200 participants. In addition, several aircrew members (MAJ((b) (6)(S)) MAJ((b) (6)(b) (6)) availed themselves for interviews for the local television media, with overall positive effect. With the continued support of Minot AFB, we hope to make this mission a recurring one.

//Signed//

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 18-22 JUN 07 DRAFT

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes around LFI and the surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6) (b) (6)
- (2) Pilots: LTC (b) (6) CPT (b) (6)
- (3) Navigator: LTC (b) (6), MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: Msg (b) (6) MSG (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6), MSG (b) (6), TSG (b) (6), TSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6), TSG (b) (6)
- (2) Avionics: TSG (b) (6)

##### c. Entomologists: CPT (b) (6) MAJ (b) (6) (In place)

##### d. Vehicles:

- Vehicle Dispatch: Will supply us with 2x9pax vans and 2 cars
- MC / Entomologist: One Car
- Ops: One van (9 pax), one car
- Mx: One Van (9 Pax)

##### e. Billeting Office: COM: (757) 764-4667 POC TSG Cox DSN 574-4667, EXT 2528; FAX 574-3038

##### Holiday Inn - 1815 W Mercury Blvd

- Non Available slips are in mission folder behind lodging info

#### 2. PPR: SPRAY01 0925TX01

#### 3. SCHEDULE: (All times local)

##### 18 JUN (Monday):

- 1000: Show Time
- 1200 Take Off YNG
- 1330 Land KLF w/ Safety Briefing immediately following
- 1430: Installation Briefing
- 1530 Calibrate system with Dibrom

##### 19 JUN (Tuesday):

- 1430 Show time
- 1500 Wx/Decision, load Dibrom
- 1650 Take off LFI
- 2027 Sunset

##### 20 JUN (Wednesday):

- 1430 Show time
- 1500 Wx/Decision, load Dibrom
- 1650 Take off LFI
- 2027 Sunset

##### 21 JUN (Thursday):

- 1430 Show time
- 1500 Wx/Decision, load Dibrom
- 1650 Take off LFI
- 2028 Sunset

## **22 JUN (Friday) Deploy to YNG**

1000: Show Time

1200: Take off KNBC

1400: Land KYNG

### **3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

### **4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

### **5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

### **6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**

### **7. IN-BRIEFING:** 1430 hrs; CE Conference Room

### **8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** ten 8005 nozzles -- straight down
- c. **Aircraft:** 89-9106
- d. **Mission Identifier:** QZNRKA373169

### **9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
- g. **Swath Width:** 2000 foot

### **10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 1600 hrs each day pending weather and heat index.
- d. **Furnished by Installation:**
  - (1) Pesticide

- (2) Loading Equipment/Crew
- (3) Hazardous Waste Disposal
- (4) Two B-5 or B-1 Stands

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Parris Island  
MCRD SC for Control of Sand fly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft 89-9108 available on 18-22 Oct 04

3. Concept of Operations:

18 Oct (Monday):

PPR # 292-01

1000: Show Time  
1200: Take off KYNG  
1400: Land KNBC  
1415: Safety Briefing

19 OCT (Tuesday):

**3. ITEMS TO TAKE:**

**a. Entomologist/CPMP:**

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) DGPS Computers & Maps
- (5) Oil Sensitive Papers
- (6) Trackstar Equipment

**b. Navigators:**

- (1) Maps
- (2) Templates
- (3) Laptop Computer

**c. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**4. SPRAY CONFIGURATION: SP-2G**

- a. Mass:** 2-Module System (PI)
- b. Booms:** Stainless Steel ULV Fuselage Booms
- c. Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. Differential GPS:** Installed
- e. Aircraft:** 89-9108      **Mission Identifier:** QZNRKA077292

**5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

**a. Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: HAN

- b. Application:** 1 Ounce Dibrom®/Acre
- c. Spray Altitude:** 150 Feet
- d. Swath Width:** 1,000 Feet
- e. Ground Speed:** 200 Knots (338 Feet/Second)
- f. Acreage:** 7,500 Acres
- g. Spray-On Time:** 16 Minutes
- h. Flow Rate:** 3.634 Gallons/Minute

**6. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission and 25 gallons HAN in flush tank.

**7. PPR REQUIREMENTS: 292-01**

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing. In addition, Capt (b) (6) and Capt (b) (6) has rental car on their orders if needed.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 18-22 October 2004
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 19 Oct 2004
- e. Time/s of Application (Local): 1630-1751 (19 Oct)
- f. Acres Treated: 7,040 (19 Oct)
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6)  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 19 Oct 2004
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 19 Oct; Assistant Chief of Staff,  
Installation and Logistics, Col (b) (6) Capt (b) (6) Capt (b) (6) (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: CAPT (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): CAPT (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander/Co-pilot: MAJ (b) (6) MAJ (b) (6)
  - (2) Navigator: MAJ (b) (6)
  - (3) Flight Engineer(s): MSG (b) (6), SSG (b) (6)(b) (6)
  - (5) Spray Operators: MSG (b) (6) TSG (b) (6)
- d. Safety Briefer: CAPT (b) (6) (b) (6)
- e. Spray Maintenance: TSG (b) (6), TSG (b) (6), SSG (b) (6)
- f. Crew Chiefs: MSG (b) (6), TSG (b) (6)
- g. Avionics: SMS (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 1/1.4
  - (2) Ferry Sorties/Hours: 2/4.5

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup> (19 Oct)
- e. Gallons Pesticide Applied: 55 Gal (19 Oct)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 20 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 1 Oz/Acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 20-31 (19 Oct) p.s.i.
- g. Flow Rate: 3.6 GPM

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 1000' (19 Oct)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): (19 Oct)
  - (1) Ground: 210°/2-5 Knots
  - (2) Release Altitude: 220° /5-7 Knots
- b. Temperature (Degrees Fahrenheit): 78° (19 Oct)
- c. Relative Humidity: 73% (19 Oct)
- d. Cloud Cover: Partly Cloudy, with front approaching (19 Oct)
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1 meter dowels
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Weekly collections of midges and mosquitoes with carbon-dioxide baited traps
  - (2) Results: The efficacy will be determined by the following weeks' collections from traps; results are expected to be favorable based on the coverage observed on the indicator cards.

**8. REMARKS:** A single application was made over the Parris Island MCRD on 19 Oct 04. Midge activity levels were moderate-low based on trap collections from the day prior. This mission was flown about 30 minutes earlier than desired in order to accommodate quiet hours at the Beaufort MCAS. As a result, only 95% of the area was covered. Ground monitors reported the target pest (*Culicoides* spp.) was active during the application. A second application was cancelled when weather conditions on 21 Oct did not meet required minimums for spray sorties (e.g.,  $\geq 1500$  ft ceiling). The relative efficacy will be determined by trap collections the following week. The next Parris Island mission will be scheduled for spring of 2005.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 18-23 AUGUST 2002

**Purpose/Objectives/Benefits:** control nuisance and vector mosquitoes in order to improve working conditions and lower the incidence of arthropod borne illness for members operating at Langley AFB and surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: Maj (b) (6) (b) (6), Capt (b) (6), Lt (b) (6) (b) (6)
- (3) Navigators: Maj (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6), MSG (b) (6), TSG (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6), MSG (b) (6) TSG (b) (6), TSG (b) (6), SSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) SRA (b) (6)
- (3) Avonics: TSG (b) (6)

##### c. Certified Pest Management Professionals: CPT (b) (6) (b) (6)

Gov Vehicles: 2 ea 9 pax van, 1 staff, 1 pick-up truck

#### 2. SCHEDULE: (All time Local)

##### 18 AUG (Sunday):

**PPR # 721CL01**

1200: Show at KYNG  
1400: Depart KYNG  
1530: Land KLF  
1545: Safety Briefing

##### 19 AUG (Monday):

0900: In-Briefing at CE Conference Room  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1952: Sunset

##### 20 AUG (Tuesday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1951: Sunset

##### 21 AUG (Wednesday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1949: Sunset

**22 AUG (Thursday):**

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1948: Sunset

**23 AUG (Friday):**

0900: Report  
1100: Depart KLFI  
1230: Land KYNG

**3. ITEMS TO TAKE:**

- |                              |   |
|------------------------------|---|
| <b>a. Entomologist:</b>      | Cellular Phones, Kestrel Weather Monitor, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker and Laptop Computer |
| <b>b. Navigator:</b>         | Maps/Map Bag, Validation Map, Laptop Computer   |
| <b>c. Spray Operator:</b>    | Safety Gear, Calibration Tables   |
| <b>d. Spray Maintenance:</b> | Deployment Kit  |

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. Langley Tower:** DSN 574-5326
- b. Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- a. Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops phone 878-3588
  - (2) Tower phone 878-3530
  - (3) Flight Service 122.2
- b. Newport News-Williamsburg Int: (Operating Hours 1000Z-0200Z)**
  - (1) Ground – **121.9 or 348.6** (phone 877-0221 ops)
  - (2) Tower – **124.9 or 280.1** (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - (4) CTAF – **118.7**
- c. Langley AFB: Tower OIC MSG (b) (6) Lt (b) (6) 1st OSS SQ**
  - (1) Tower - **125.0 or 253.5** (phone 4-5326)
  - (2) Ground - **121.7 or 275.8**
  - (3) Clearance – **118.85 or 271.3**
  - (4) Metro - **239.8**
- d. Norfolk NAS (Chambers Fld): Tower - 124.3, 126.375, 340.2, 318.7**
- e. Spray Ground: Primary 392.2 / 308.6 Secondary**

7. **IN-BRIEFING:** Required; IAW the Schedule above.
8. **SPRAY CONFIGURATION:**
- System:** SP2G - MASS ULV; Modules 1 and 2
  - Nozzle Tips/Orientation:** 8 8008's for 2000' swathes and 4 8008's for 1000' swathes oriented straight down.
  - Aircraft:** 99106
9. **SPRAY PARAMETERS:**
- Altitude:** 150' AGL
  - Ground Speed:** 200 KNOTS
  - Pesticide:** Dibrom® Concentrate
  - Application Rate:** 0.5 oz/acre
  - Flow Rate:** 1.8 Gallons/Minute at Craney Island; 3.6 Gallons/Minute at Langley areas
  - Acreage:** Approximately 86,000 Acres
  - Swath Width:** 1,000 Feet at Craney Island; 2,000 Feet at Langley areas.
10. **PESTICIDE LOADING:**
- How Much Pesticide:** 334 Gallons for 86,000 acres sprayed.
  - Where:** Aero Club Ramp
  - When:** 1430 hrs each day.
  - Furnished by Installation:**
    - Pesticide
    - Loading Equipment/Crew
    - Hazardous Waste Disposal
    - Two B-5 or B-1 Stands
11. **SPRAY MONITORING OR TESTING:**  
The local mosquito control districts and Langley Pest Control will conduct mosquito surveillance using either trapping or biting count pre- and post-spray data to determine spray effectiveness. Oil sensitive cards will be used to confirm application within the spray blocks.
12. **CONTACTS:** LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB
- b. Mission Duration: 18-23 August 2002
- c. Purpose of Application: Adult Mosquito Control
- d. Application Dates and times (Local): 20 Aug (1650-1900); 21 Aug (1655-1945);  
22 Aug (1750-2005)
- e. Acres Treated: 41,216 (20 Aug); 57,600 (21 Aug); 4,864 (22 Aug)
- f. Project Coordinator (Name/Title, Phone #): (b) (6), Pest Control Manager (b) (6)
- g. Date Spray Map Last Approved: 22 Jul 02
- h. Date of Waste Generation Letter: 4 April 1996
- i. Installation In-Briefing: (When/Where/Briefer/s): 19 Aug 02, CE Conference Room, Langley AFB;  
Maj (b) (6) Maj (b) (6) (b) (6)

## 2. OPERATIONAL:

- a. Mission Commander: Maj (b) (6) (b) (6)
- b. Certified PMP's (Category 11): LtCol (b) (6) (b) (6) Maj (b) (6) (b) (6) Capt (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander/Pilot: Maj (b) (6) (b) (6)
  - (2) Co-Pilot(s): Capt (b) (6), 1Lt (b) (6) (b) (6) (observing)
  - (3) Navigator: Maj (b) (6)
  - (4) Flight Engineer(s): SMS (b) (6)
  - (5) Spray Operators: MSG (b) (6), TSG (b) (6)
- d. Safety Briefer: Capt (b) (6) (b) (6)
- e. Spray Maintenance/Pesticide Loaders: MSG (b) (6), MSG (b) (6) (b) (6),  
TSG (b) (6), TSG (b) (6)
- f. Crew Chief(s): MSG (b) (6), SRA (b) (6)
- g. Avionics: TSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 3 Sorties; 7.3 Hours
  - (2) Ferry Sorties/Hours: 2 Ferries; 3.0 Hours

## 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom® Concentrate (97% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom® Concentrate (neat)
- d. Gallons Pesticide Loaded: 240 (20 Aug); 146 (21 Aug); 19 (22 Aug)
- e. Gallons Pesticide Applied: 161 (20 Aug); 225 (21 Aug); 19 (22 Aug)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 75 gallons 20-22 (Aug) HAN
- h. Application Rate: 0.5 ounce/acre

4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): C-130 (99106 & 99105 22 & 23 Aug)
- b. Spray System (Modules Used) and System ID #: System SP2G - MASS ULV; Modules 1 & 2
- c. Spray System Configuration: ULV Wing Booms; Modules 1 and 2/MASS ULV
- d. Nozzle Type/Size: 8008 TeeJet (Flat Fan)
- e. Nozzle Orientation & Number Used: 8 8008's for 2000' swathes;  
4 8008's for 1000' swathes; oriented straight down
- f. Pressure: 45-55 psi
- g. Flow Rate: 3.6 gallons/minute; 1.8 gal/min on Craney Island

5. APPLICATION PARAMETERS:

- a. Swath Width Flown: 1000 ft at Craney Island & 2000 ft on Langley Peninsula
- b. Spray Off Set: 2000-4000' depending on wind speed
- c. Spray Release Altitude: 150 feet AGL
- d. Ground Speed: 200 knots

6. WEATHER OBSERVATIONS:

- a. Winds (Direction/Speed): 070° @ 7 mph (20-22 Aug)
- b. Temperature (Degrees Fahrenheit): 87-86° (20 Aug); 82-77° (21 Aug); 84-82° (Aug 22)
- c. Relative Humidity: 43-55% (Aug 20); 62-74% (21 Aug); 62-58% (22 Aug)
- d. Cloud Cover: cloudy to overcast
- e. Source: Ground observations/aircraft

7. SPRAY MONITORING (Pre- and Post-Treatment):

- a. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities
  - (2) Results: 93% average reduction of mosquitoes collected by Langley AFB Pest Management.

8. REMARKS: The need for a spray application was determined by absolute numbers of mosquitoes in surveillance traps and by the threat of encephalitis transmission (West Nile Virus/Eastern Equine Encephalitis). Birds and mosquitoes have recently been found to be carrying these viruses in and around the Tidewater region. Three complete spray sorties were flown and a 0.5 oz/acre application rate was used. 1LT (b) (6) observed the flight as part of his spray co-pilot training. A 93% decrease in mosquito activity was observed at Langley. Other local mosquito abatement officials reported a significant decrease in the number of mosquitoes, as well.

(b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MACDILL AFB / AVON PARK, FL

### 18 - 23 JAN 2000

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander/Navigator: LTC (b) (6) (b) (6) (18-23)
- (2) Pilots: LTC (b) (6) (18-21), MAJ (b) (6) (b) (6) (18-23),  
CAPT (b) (6) (b) (6) (21-23)
- (3) Navigators: MAJ (b) (6) (18-21), Maj (b) (6) (21-23)
- (4) Flight Engineers: MSG (b) (6) (18-21),  
(21-23) MSG (b) (6) & TSG (b) (6)
- (5) Spray Operators: (18-23) CMS (b) (6), MSG (b) (6) \*\*  
TSG (b) (6) & (21-23) TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6), SSG (b) (6), SSG (b) (6) \*
- (2) Crew Chiefs: SSG (b) (6) \*, TSG (b) (6)

##### c. Certified PMP/Entomologist: MAJ (b) (6) 1LT (b) (6) (b) (6) (21-23)

##### d. Ground Support: TSG (b) (6) & SSG (b) (6) \*

\*Mid Size Car/\$39 per day, \*\*Van/\$73 per day; Interprise Agency Confirmation # 485554 (Dave)

#### 2. SCHEDULE: (All time Local)

**18 JAN (Tuesday):** No range time.

**PPR # - 018RJ1**

0830: Show at KYNG

1200: Depart YNG

1500: Land MCF

**19 JAN (Wednesday): Range Time 0800-0900**

: Sunrise

Call Tower and Fire Dept at AGR

0730: Depart MCF

Entomologists at MacDill

0930: Land MCF

Determine Max. Flow Rate at Avon / Overwater

**20 JAN (Thursday): Range Time 0800-0900 and 1230-1300**

**Test Day – According to Parameter section**

: Sunrise

0730: Depart MCF

0930: Land MCF

1200: Depart MCF

1330: Land MCF

**21 JAN (Friday):**

1000: Depart MCF for Swap-out

1300: Land YNG

Entomologists at MacDill

1700: Depart YNG

2000: Land MCF

**22 JAN (Saturday): Range Time 0800-1230**

**Test Day – According to Parameter section**

1000: Depart MCF

1245: Land MCF

**23 JAN (Sunday):**

0900: Depart MCF

1200: Land YNG

**3. ITEMS TO TAKE:**

- a. **Navigator:** Maps with “No-Spray” Areas Marked and Laptop Computer
- b. **Certified Pest Management Professionals:**
  - (1) 1000 Kromecoat Cards
  - (2) 4 Boxes of Plastic Card Holders & Index Cards
  - (3) 2 Signal Mirrors
  - (4) 2 Spot Lights
  - (5) 2 Measuring Wheels
  - (6) Weather Monitoring Equipment
  - (7) UHF Radio with Antenna and VHF Radio
  - (8) 2 Laptop Computers with Mapping System
  - (9) Digital Camera
  - (10) SATLOC Trackstar Equipment

**4. AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s)
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

**5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 09107

**6. SPRAY PARAMETERS:**

- a. Ground Speed. 170 Knots
- b. Altitude AGL. 100 Feet
- c. Swath Width. 35 Feet
- d. Application Rate. 86.75 gal/acre
- e. Total Spray-On Time/Load. 45 Seconds
- f. Spray-On Time/Pass. 8 Seconds
- g. Number of Passes/Load. 5

**7. LOADING AND MIXING:**

- a. Configuration
  - (1) Nozzles. 3 Inch Ultra-High Volume (UHV) Fuselage (1 each side)
  - (2) Nozzle Orientation. Straight Back
- b. Flow Rate. 1000 Gal/Min
- c. Spray Mix 20 Jan 2000: 950 Gal Water, 2 Gal StaPut in each tank (4 gal total), 320 Oz Hi-Light Dye, 70 Gal Water in sump.
- d. Spray Mix 22 Jan 2000: 950 Gal Water, 1 pint Control in each tank (1 quart total), 320 Oz Hi-Light Dye, 70 Gal Water in sump.

**MEMORANDUM FOR 757 AS/DO**

**FROM:** 757 AS/DOS

**SUBJECT:** Avon Park Ultra-High Volume Test, 18-23 January 2000

1. **PURPOSE:** The purpose for this test was first to work with MacDill AFB CE personnel, Jason Kirkpatrick and Lewis Lantner, on a statement of need for aerial spray for mosquito control for the MacDill Air Force Base. And, second, to test ultra-high volume (UHV) dispersal for simulation of critical area decontamination at Avon Park Air Force Bombing Range.
2. **PARTICIPANTS:** All personnel participating in this mission are listed in Attachment 1, the Avon Park Operational Schedule for January 18-23, 2000.
3. **SCHEDULE OF EVENTS:** The daily schedule of events is included in Attachment 1.
4. **OVERVIEW OF MISSION.** The UHV test was conducted with our C-130 flying at 170 knots and 100 feet above ground level (AGL). The flow rate was 650 gallons per minute. The test material used was water with highlight dye collected on kromekote cards. Using these methods, it was determined that three passes over the same swath line gave 82% coverage, four passes gave 90% coverage, and five passes gave 92% coverage for critical area decontamination across a 35 ft swath width (Figure 1). This is much better than in previous tests that required ten passes to exceed 90% coverage with the aircraft flying at 200 knots and the flow rate at 407 gallons per minute. However it was determined that as the number of passes increases, the amount of additional coverage diminishes; 8% between pass three and four, and 2% between pass four and five. This is because the spray droplets overlap, dry between passes, and do not spread out enough.

**5. CONCLUSIONS/RECOMMENDATIONS:**

a. It was concluded that a statement of need for aerial spray for mosquito control needed to be prepared and approved before aerial mosquito control can resume at MacDill Air Force Base. The current environmental assessment adequately addresses mosquito species present, the pesticide to be used, and environmental concerns.

b. Two things need to be tried in the next test for critical area decontamination. First, increase the flow rate. Theoretically, we can increase flow rate by removing the three-inch restriction plate in the four-inch line to the fuselage booms, a minor modification. Second, add a spreading agent to our spray solution to cause the droplets to spread instead of beading.

(b) (6) Maj, AFRC  
Research Entomologist

##### 4 Apr (Thursday): Training/Clean Up Day

##### 5 Apr (Friday):

0800: Show Time  
1000: Depart  
1700: Land

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Cellular Phones, Wind Gauge, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit, Ground Loading Station, Spray Booms for Testing and Oil Spill Exercise

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Tower:**
- b. **Base Ops:** (503) 861-6201

**5. PARKING PLAN:** The Forest Service Ramp located at the west end of Santa Barbara Regional Airport

**6. RADIO FREQUENCIES Call Sign:**

- a. **US Coast Guard Air Station Ops Center Radio Frequency:**
- b. **US Coast Guard Air Station Ops Center Call Sign:**
- c. **Spray Ground: Primary / Secondary**

**7. IN-BRIEFING:** Required. See the Schedule, or as determined by Mission Commander.

**8. SPRAY CONFIGURATION:**

- a. **MASS – SP2G**
- b. **Aircraft Number:**
- c. **Mission Identifier: QZNRKA**

**9. SPRAY PARAMETERS:**

**FOR OVERWATER EXERCISE**

- a. **Nozzles –** Raindrop nozzles oriented straight back.
- b. **8 (16 total) on each fuselage boom; evenly spaced.**
- c. **Booms –** fuselage only
- d. **Airspeed –** 170 knots ground speed.
- e. **Altitude –** 100 feet above water.
- f. **Application Rate –** 7 Gal/Acre
- g. **Flow Rate –** 277 Gal/Min
- h. **Spray --** water only.
- i. **Number of passes –** 6 per sortie. Do not decrease flow rate in order to increase passes.
- j. **Pressure –** 40 psi

**3 Apr 02 – 3 SORTIES**

- a. **Nozzles –** Raindrop nozzles oriented straight back.
- b. **Booms –** Full fuselage and wing booms.
- c. **Number of Nozzles; 68; 14 on each wing boom and 20 on each fuselage boom; evenly spaced.**
- d. **Ball valve configuration to isolate booms; adapter for high volume spray.**
- e. **Airspeed –** 170 knots ground speed.
- f. **Altitude –** 150 feet above ground level

- g. Spray -- water with Control drift retardant, one bottle per tank.
- h. Number of passes – 3 per sortie; pass 1 head wind with both wing booms – switch to fuselage booms 2 seconds before second card line; pass 2 tail wind with both wing booms – switch to fuselage booms 8 seconds before second card line; pass 3 head wind with both wing booms and fuselage booms for both card lines.
- i. Pressure – 80 psi for first sortie; 40 psi for second sortie.
- j. Flow rate. – system flow rate for each pass at each pressure will be given to spray ground via radio.

## **10. LOADING: Water**

- a. **How Much:**
- b. **Where:**
- c. **When:**
- d. **Furnished by Installation:**
  - (1) Water
  - (2) Truck

3 May 2001

**MEMORANDUM FOR 757 AS/DO**

FROM: 757 AS/DOS

**SUBJECT: High Volume Oil Spill Dispersal Test at Astoria Oregon, 18-24 March 2001**

1. Purpose: Conduct over water oil spill dispersal training with the U.S. Coast Guard and characterize spray aircraft for into wind oil spill dispersal. Six spray sorties totaling 6.9 hours and three ferry sorties totaling 13.5 hours were flown for the exercise.
2. Traveler(s): The participants are listed in Attachment 1, the Astoria OR Aerial Spray Operational Schedule for 18-24 March 2001.
3. Itinerary: The itinerary is listed in the Astoria Operational Schedule.
4. Discussion:
  - a. Previous spray characterization tests were done for crosswind spray application. Uneven patterns and gaps in spray deposition along with observations of spray falling from aircraft spray booms indicate that spray from different sections of our spray booms deposit in different areas downwind of the aircraft. Observations indicate that better spray patterns might be achieved by flying parallel to the wind.
  - b. Previous experience also indicates that spray volume from fuselage booms is higher than from wing booms. Fourteen nozzle sites were open for each wing boom, and 20 nozzle sites for each fuselage boom. Forty psi of pressure was used in all boom sections. High volume raindrop nozzles rated at 20 gallons per minute at 40 psi were used for the characterization. The test solution was water with 20 ounces of Control<sup>®</sup> per 500 gallons of water as a drift retardant.
  - c. Characterization trials were flown parallel with the wind on 21 and 22 March 2001. Those on 21 March were flown at 150 feet above ground level and those on 22 March were flown at 175 feet above ground level.
5. Conclusions and Recommendations:
  - a. The discussion of results is given in averages for the trials at each altitude flown. Because of the limited sample size and highly variable data, the data were not analyzed statistically and the differences between averages may not be statistically significant.

b. Spray application with the wind produced more even spray distribution than previous crosswind applications although there were still gaps between spray deposition from the wing booms and the fuselage boom (Figure 1). This gap was an average of 31 feet on either side of deposition from the fuselage boom when flown at 150 feet above ground level (AGL), and an average of 15 feet on either side of deposition from the fuselage boom when flown at 175 feet AGL. Either flying at 200 feet AGL or increasing the length of the fuselage booms would probably close the 15-foot gap. If gaps in spray deposition were closed, the effective swath width would be 280 feet at 150 feet AGL and 300 feet at 175 feet AGL. The effective swath from the fuselage boom was 93 feet at 150 feet AGL and 125 feet at 175 feet AGL. The distance between the effective swaths from the two wing booms was 155 feet at both altitudes.

c. The average flow rate from the wing booms was 290 gallons per minute (GPM). At 170 knots ground speed and 150 feet AGL, this calculates to 6 gallons per acre (GPA) for the effective swath. At 175 feet AGL it calculates to 5 GPA. However, the recovery rate on the ground averaged only 0.7 GPA or 12% on March 21 when flown at 150 feet AGL and 0.79 GPA or 14% on March 22 when flown at 175 feet AGL. In contrast, the average flow rate from the fuselage booms was 460 GPM. This calculates to 12.5 GPA for the effective swath from the fuselage booms when flown at 170 knots ground speed and 150 feet AGL and 9.3 GPA for the effective swath from the fuselage booms when flown at 175 feet AGL. The recovery on the ground was 89% when flown at 150 feet AGL on March 21 and 65% when flown at 175 feet on March 22. The spray from the wing booms is probably broken into smaller droplets than that from the fuselage booms, and all of it is entrapped in the wingtip vortices causing it to remain aloft longer before it deposits than spray from the fuselage booms. Therefore, evaporation, wind drift, and possibly drying from the engine exhaust combine to cause much less recovery from the wing booms. Photographs from the spray operation seem to show exhaust from the outboard engines also being entrapped in the wingtip vortices (Figure 2). Spraying volatile compounds, such as the aqueous solution used in this test, from the wing booms is ineffective unless addition of anti-evaporative compounds can be used to prevent loss.

d. The average volume median diameter was 275 microns for spray from the fuselage booms, and 200 microns or 27% less for spray from the wing booms. However, since much of the spray from the wing booms was not recovered, the true volume median diameter from the wings was probably much less.

e. We need to repeat the testing several times to get enough data for statistical analysis. We also need to test at a third altitude of 200 feet and with longer fuselage booms. Anti-evaporative compounds need to be tested in an effort to increase recovery of spray from the wing booms.

(b) (6) Lt Col, USAFR  
Research Entomologist

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Modules 1 and 2
- b. **Nozzle Tips/Orientation:** 7 8008's for 2500' swathes and 5 8008's for 1000' swathes (unless temperatures are above 85 degrees then use 8010's – 6 for 2500' swathes and 2 or 3 for 1000' swathes), Oriented down.
- c. **Aircraft:** 99106

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL depending upon weather conditions
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 Ounce/Acre
- e. **Flow Rate:** 1.8 Gallons/Minute at Craney Island; 4.5 Gallons/Minute at Langley areas
- f. **Acreage:** Approximately 82,000 Acres
- g. **Swath Width:** 1,000 Feet at Craney Island; 2,500 Feet at Langley areas.

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** 320 Gallons for 82,000 acres sprayed.
- b. **Where:** Aero Club Ramp
- c. **When:** 1430 Hours each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (3) Two B-5 or B-1 Stands

## 11. SPRAY MONITORING OR TESTING:

The local mosquito control districts will put out cages of live mosquitoes and oil-sensitive cards to monitor the control. Also, light trap data and biting count data will be collected pre- and post-spray by the base and the mosquito control districts to determine spray effectiveness.

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **PARRIS ISLAND MCRD, SC**

### **20-23 OCT 08**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Pilots: Maj (b) (6) Capt (b) (6)
- (2) Navigators: Maj (b) (6)
- (3) Flight Engineers: MSgt (b) (6)
- (4) Spray Operators: MSgt (b) (6) MSgt (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: MSgt (b) (6) TSgt (b) (6) TSgt (b) (6)
- (2) Crew Chiefs: TSgt (b) (6) SRA (b) (6)
- (3) Avionics: SSgt (b) (6)

##### **c. Pest Management Professionals/Entomologist:** Maj (b) (6)

#### **2. PPR REQUIREMENTS: 294-01**

**3. PLANNED SEQUENCE OF EVENTS:** (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### **20 OCT (Monday): Deploy to KNBC**

1300: Show Time  
1500: Takeoff KYNG  
1700: Land KNBC  
1730: Safety Briefing

##### **21 OCT (Tuesday): Adulticide Spray**

TBD Installation Brief  
1415: Showtime/WX Decision  
1445: Load Chemical  
1645: Takeoff KNBC  
1843: Sunset

##### **22 OCT (Wednesday): WX Backup/Clean System**

1415: Showtime/WX Decision  
1445: Load Chemical  
1645: Takeoff KNBC  
1842: Sunset

##### **23 OCT (Thursday): Redeploy to KYNG**

1000: Show Time  
1200: Takeoff KNBC  
1400: Land KLFJ

#### **4. ITEMS TO TAKE/NOTES:**

##### **a. Mission Commander:**

- (1) Mission Commander Cell Phone

##### **b. Entomologist/CPMP:**

- (1) Wind Gauge & Compass
- (2) VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

##### **c. Navigators:**

- (1) Maps
- (2) Templates

**d. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 9 open for 8005's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 89-9105
- f. **Mission Identifier:** QZNRKA119294

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 2.72 gallons/Minute

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 118.8 CTAF  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 123.4**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP &Parris Island MCRD Project Coordinator.

**910 AW AERIAL SPRAY  
PMP'S POST-MISSION REPORT-PARRIS ISLAND MCRD  
20-23 Oct 2008**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island MCRD, South Carolina
- b. Mission Duration: 20-23 Oct 2008
- c. Purpose of Application: Control of biting midges and adult mosquitoes
- d. Application Dates: 22 Oct 2008
- e. Times of Application (Local): 1655-1840
- f. Acres Treated: 5078
- g. Project Coordinator (Name, Phone #): (b) (6) (b) (6)
- h. Date Spray Map Last Approved: 06 May 2008
- i. Date of Waste Generation Letter: 10 April 2000.
- j. Installation In-Briefing: 21 Oct, 2008 Maj (b) (6) Maj (b) (6) Maj (b) (6) Capt (b) (6)
- k. Mission identifier: QZNRKA119294

**2. OPERATIONAL:**

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMPs (Category 11): MAJ (b) (6)
- c. Aircrew:
  - (1) Pilots: MAJ (b) (6) (b) (6) CPT (b) (6)
  - (2) Navigator(s): MAJ (b) (6)
  - (3) Flight Engineer: MSGT (b) (6)
  - (4) Spray Operators: MSG (b) (6) MSG (b) (6)
- d. Safety Briefer: MAJ (b) (6)
- e. Spray Maintenance: TSG (b) (6), TSG (b) (6), TSG (b) (6)
- f. Crew Chiefs: SMS (b) (6), SRA (b) (6)
  - (1) Spray Sorties/Hours: 1/1.7 (22 Oct)
  - (2) Ferry Sorties/Hours: 2/2.4 (20 Oct), 2.0 (23 Oct)
  - (3) Training Sorties/Hours: 1/1.4 (21 Oct)

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 60
- e. Gallons Pesticide Applied: 30.0
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: 10 Gallons Marvel Oil
- h. Other Additives Used: n/a
- i. Application Rate: 0.76 oz/acre

#### **4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 90-9105
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles
- e. Nozzle Orientation & Number Used: 7 straight down; 4 left, 3 right
- f. Pressure (PSI): 40
- g. Flow Rate: approx 2.7 gpm

#### **5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

#### **6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): Ground; 040@7.0 knots average; airplane 060 @12 knots average.
- b. Temperature (°F): Ground; 72° at 1700
- c. Humidity: Ground; 62% at 1700
- d. Cloud Cover: 0%
- e. Source: Ground observations/at altitude during spray

#### **7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization.
- b. Effectiveness:
  - (1) Technique/s Used: light traps were used to monitor biting midge and mosquito densities pre- and post-treatment. In addition, ground monitors confirmed midge and mosquito activity at time of spraying
  - (2) Results: Post mission trap counts are pending. Monitors report good control.

#### **8. REMARKS**

This final spray of the 2008 season was quite successful from an operational standpoint. There were no equipment failures of any kind. The only issue experienced was inappropriate weather conditions on the 21<sup>st</sup> of October. The weather actually proved to be “too nice” to spray (there was absolutely no wind whatsoever). The acreage covered was less than originally planned because of high tide conditions. No spray was applied over open water. Once again, thanks to (b) (6) of Parris Island MRD for excellent coordination of the spray activities.

##### 25 OCT (Wednesday):

- 1400: Load Chemical
- 1630: Take off KNBC
- 1839: Sunset
- 1900: Land KNBC

##### 26 OCT (Thursday):

- 1200: Take off KNBC
- 1400: Land KYNG

### 3. ITEMS TO TAKE:

a. **Entomologist/CPMP:**

- (1) Wind Gauge, Compass, and Signal Mirrors
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) Calibration Tables
- (5) DGPS Computers & Maps
- (6) Oil Sensitive Papers
- (7) Trackstar Equipment

b. **Navigators:**

- (1) Maps
- (2) Templates
- (3) Laptop Computer

c. **Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (4) Loading and Clean-up Equipment and Supplies

### 4. SPRAY CONFIGURATION: SP-2G

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- e. **Differential GPS:** Installed
- f. **Aircraft:** 09105

### 5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)

a. **Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: HAN

b. **Application:** 1 Ounce Dibrom®/Acre

c. **Spray Altitude:** 150 Feet

d. **Swath Width:** 1,000 Feet

e. **Ground Speed:** 200 Knots (338 Feet/Second)

f. **Acreage:** 7,500 Acres

g. **Spray-On Time:** 16 Minutes

h. **Flow Rate:** 3.634 Gallons/Minute

### 6. AMOUNT OF SPRAY MATERIAL AVAILABLE:

Load 60 gallons of Dibrom® Concentrate per mission and 25 gallons HAN in flush tank.

### 7. PPR REQUIREMENTS:

Required:

### 8. PARKING PLAN:

Beaufort MCAS Ramp

### 9. AIR TO GROUND RADIO FREQUENCIES:

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

### 10. TRANSPORTATION:

Parris Island will provide two vans for transportation to and from quarters and for messing. There will be an additional vehicle for the CPMP/Entomologists.

### 11. SPRAY MONITORING OR TESTING:

Ground monitoring by CPMP and Parris Island MCRD Project Coordinator.

## 12. CONTACTS :

- a. **Parris Island MCRD SC:** (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 20-26 Oct 2000
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 21, 24, & 25 October 2000
- e. Time/s of Application (Local): 1640-1905 (21 Oct), 1645-1845 (24 Oct), & 1650-1820 (25 Oct)
- f. Acres Treated: 7,680 (21 Oct), 4,480 (24 Oct), & 3,200 (25 Oct)
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6)  
Environmental/Spray Coordinator, DSN(b) (6)
- h. Date Spray Map Last Approved: 10 April 2000
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 23 Oct; Assistant Chief of Staff, Installation and Logistics, COL (b) (6) LTC (b) (6) & 1LT (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): 1LT (b) (6) (b) (6)
- c. Aircrew:
  - (1) Pilots: LTC (b) (6) (22-26 Oct), MAJ (b) (6) & CAPT (b) (6) (b) (6) (20-22 Oct)
  - (2) Navigator: CAPT (b) (6) (b) (6)
  - (3) Flight Engineer(s): MSG (b) (6) (20-22 Oct) & (b) (6) (22-26 Oct)
  - (5) Spray Operators: MSG (b) (6), MSG (b) (6), MSG (b) (6) (20-22 Oct), SSG (b) (6) (22-26 Oct)
- d. Safety Briefer: 1LT (b) (6)
- e. Spray Maintenance: SMS (b) (6), SSG (b) (6), TSG (b) (6), & TSG (b) (6) (b) (6)
- f. Spray Ground Monitor: LTC (b) (6) (b) (6) & 1LT (b) (6) (b) (6)
- g. Crew Chiefs: TSG (b) (6) & SSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 3 Sorties/5.9 Hrs
  - (2) Ferry Sorties/Hours: 4 Ferry(s)/8.8 Hrs

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60 gal Dibrom<sup>®</sup> (21 & 24 Oct); 120 gallons total
- e. Gallons Pesticide Applied: 60 gal (21 Oct), 35 gal (24 Oct), & 25 gal (25 Oct)
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: VM & P NAPHTHA
- h. Other Additives Used: None
- i. Application Rate: 1 Oz/Acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 40 (21 Oct), 40 (24 Oct), & 40 (25 Oct) PSI
- g. Flow Rate: 3.6 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off Set: 1000' (21 Oct); 2000' (24-25 Oct)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 130°/5 (21 Oct), 060°/8 (24 Oct), & 040°/7 (25 Oct)
  - (1) Ground: 2-7 Knots
  - (2) Release Altitude: 5-9 Knots
- b. Temperature (Degrees Fahrenheit): 75° (21 Oct), 75° (24 Oct), & 77° (25 Oct)
- c. Dew Point: 52-58 °F (21, 24-25 Oct)
- d. Cloud Cover: Clear (21, 24-25 Oct)
- e. Source: Ground observations at the MCRD Marina and NOAA.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1 meter dowels; vertical drift was monitored on the flagpole at the Marina (50 ft. vertical distribution).
  - (2) Results: Good coverage throughout spray area; swath determination was based on historical conditions.
- b. Effectiveness:
  - (1) Technique/s Used: Landing counts taken at 4 localities during a one-hour period that corresponded with the previous day's spray sortie on 22 Oct. Light trap collection from 1 or two days.
  - (1) Results: Average landing counts on 22 Oct were 8/min. Light trap collections for the two days following the first spray showed moderate levels of midge activity. The efficacy of the second and third sorties was determined by the MCRD's Environmental Coordinator. A significant reduction in midge numbers were observed initially, however, by the fifth day after the last spray midge numbers were reported to have increased to the original proportions (see remarks).

**8. REMARKS:** The primary pest species of biting midge at Parris Island MCRD is *Culicoides hollensis*. This midge displays a distinct seasonal emergence pattern in April and in October. We have tried to time our applications to correspond with the peak emergence period for this pest in order to disrupt its breeding cycle. Unfortunately, timing of the peak activity is still poorly understood and a rapid resurgence of midge numbers by five days following this application is presumed to be a result of continued emergence. To better understand this problem, we are implementing an increased monitoring program to better assess the optimum spray period. We plan to continue a high level of monitoring for the next few years and apply our results to the present IPM program. This was the final spray mission for the season. The next spray mission to Parris Island MCRD is scheduled April 8 – 13, 2001.

**13 September 2002**

**MEMORANDUM FOR HQ AFRC/DOOM** (FAX: 497-0198)

**FROM:** 757 AS/DOS ((b) (6)) 1531; FAX 346-1616)

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT  
Annual Weed Control Spray Mission on the Utah Test and Training Range (UTTR)

**1. Capability:** Two aircraft will be required for this mission. Two Spray aircraft are available 20-28 Sep 02 in support of the Hill AFB mission request. Support aircraft available 20 & 27/28 Sep 02 in support of the mission.

**2. Concept of Operations:**

**a. 20 Sep (Friday):**

0730 Show at KYNG  
0810 Pre-Mission Briefing  
0830 LM's released to assist in loading aircraft  
1005 Spray aircraft 99105 Take-Off KYNG  
1010 Spray aircraft 99108 Take-Off KYNG  
1015 Support Aircraft 19142 Take-Off KYNG  
1330 Land HIF  
1345 Safety Brief

**b. 21 Sep (Saturday) – 26 Sep (Friday):**

**(Range times 0700-1400, 21-26 Sep 02)**

0430 Ground Support Team departs for UTTR  
0515 FEs, Crew Chiefs, & Spray MX report and Mix/Load Chemical  
0700-1400 Target areas sprayed as designated by PMP

**c. 26 Sep (Thur):** Weather back-up.

**d. 27 Sep (Fri):** Flush and clean up day.

Schedule of daily events will be determined by the Mission Commander as required.  
Support Aircraft returns to Hill AFB

**f. 28 Sep (Sat):**

0800 Aircrew report for duty  
0830 All personnel report  
1000-1015 Spray Aircrafts & Support aircraft take-off  
1700-1800 Mission completed all personnel and aircraft arrive at KYNG

3. **Spray Parameters and Sequencing:** (See attached Operational Schedule)
4. **Mission Commander:** Lt Col (b) (6) (b) (6)
5. Support required at Hill AFB and the UTTR has been completed.

(b) (6) (b) (6) Major, USAFR  
Aerial Spray Operations Scheduler  
757 AS/DOS

Attachment  
Spray Operations Schedule

## **SPRAY OPERATIONAL SCHEDULE UTAH TEST AND TRAINING RANGE MISSION 20-28 SEPTEMBER 2002**

20 Sep – Spray #1 A/C #105, Report Time: 0800 Take Off: 1000 Arrive: 1600  
- Spray #2 A/C #107, Report Time: 0800 Take Off: 1005 Arrive: 1605  
- Support A/C #143, Report Time: 0800 Take Off: 1010 Arrive: 1610

**PURPOSE/BENEFIT/OBJECTIVE:** To control vegetation on selected targets at the Utah Test and Training Range (UTTR)

### **1. AIRCREW:**

- a. **Pilots:** LtC (b) (6) (b) (6) Maj (b) (6) (b) (6) Cpt (b) (6) (b) (6) Lt (b) (6) (b) (6)
- b. **Navigators:** LtC (b) (6) (b) (6) Maj (b) (6) (b) (6) Maj (b) (6) (b) (6)  
Maj (b) (6) (b) (6), (20-24 Sep) LtC (b) (6) (b) (6)
- c. **Flight Engineers:** MSG (b) (6) (b) (6), SMS (b) (6) (b) (6)
- d. **Spray Operators:** MSG (b) (6) (b) (6), MSG (b) (6) (b) (6), MSG (b) (6) (b) (6),  
MSG (b) (6) (b) (6), TSG (b) (6) (b) (6)

### **2. AIRCRAFT/MASS SUPPORT:**

- a. **Mission Commander.** LtC (b) (6) (b) (6)
- b. **Admin Support.** MSG (b) (6) (b) (6)
- c. **Spray Maintenance:** SMS (b) (6) (b) (6), TSG (b) (6) (b) (6), TSG (b) (6) (b) (6)  
SSG (b) (6) (b) (6), SSG (b) (6) (b) (6),  
- 15-21 SEP 02: TSG (b) (6) (b) (6), SSG (b) (6) (b) (6)

### **3. UTTR GROUND PARTY:**

- a. **Entomologist/Pest Management Professional(s):** LtC (b) (6) (b) (6) Maj (b) (6) (b) (6)
- b. **Recorder.** (b) (6) (b) (6)
- c. **DuPont Participants.** (b) (6) (b) (6)

### **4. MAINTENANCE:**

- a. **910 MA Com Nav & MX Supervisor.** SMS (b) (6) (b) (6)
- b. **R & R & Asst MX Superv.** SMS (b) (6) (b) (6)
- c. **AGE:** TSG (b) (6) (b) (6)
- d. **Propulsion.** TSG (b) (6) (b) (6)
- e. **Hydraulic.** MSG (b) (6) (b) (6)
- f. **Environmental/Electric.** TSG (b) (6) (b) (6)
- g. **Engine Shop.** TSG (b) (6) (b) (6)
- h. **Crew Chief:** MSG (b) (6) (b) (6), MSG (b) (6) (b) (6),  
TSG (b) (6) (b) (6), SRA (b) (6) (b) (6)

- 5. **910 Com Flt Personnel:** SMS (b) (6) (b) (6), TSG (b) (6) (b) (6), TSG (b) (6) (b) (6),  
SSG (b) (6) (b) (6), SSG (b) (6) (b) (6), SRA (b) (6) (b) (6)

**6. IN-BRIEFING:** (UTTR Staff)

- a. **When/Time:** 20 Sep 02, 1630
- b. **Where:** Base Operations
- c. **Who:** LtC (b) (6) LtC (b) (6) SMS (b) (6)

**7. ITEMS TO TAKE:**

- a. **PMP:**
  - (1) Project Notebook with Recording Sheets and Maps
  - (2) LapTop Computer and Batteries
  - (3) 2 Compasses and Stop Watch
  - (4) 2 Signal Mirrors and 2 Spot Lights
  - (5) Measuring Wheels and Tape
  - (6) Entomologists' Tool Kit
  - (7) UHF/VHF Radios and VHF Radios
  - (8) Cellular Phone
- b. **Mission Commander:** Cellular Phone
- c. **Navigator:** Maps
- d. **Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Pesticide Safety Binder
  - (4) Safety Equipment
- e. **Maintenance:** Aircraft Engine Spares

**8. SPRAY CONFIGURATION:**

- a. Two Aircraft, Systems 3 and 5
- b. MASS Modules 1, 2 and 3
- c. UHV Fuselage booms oriented straight back

**9. PPR REQUIREMENTS:** V05/07 PPR #MK2001

**10. PARKING PLAN:** Air Freight Ramp – on West side of the airfield, Spots 11/12

**11. RADIO FREQUENCIES:**

- **Clover Control:** UHF 339.0, 275.9, 361.4
- **Eagle Tower:** UHF 351.0; **MAWK 3 & 4**
- **Spray Ground Freq:** VHF 134.1, 118.45; UHF 398.1 (Primary), 383.2 (Back-up)
- **Spray Ground to Spray Maintenance:** **G MNT 1NO (on UTTR Brick)**
- **Base OPS:** 139.3

**12. SPRAY PARAMETERS:**

- a. **Pesticide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24 and 13)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

**13. PESTICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

**b. When:** Start at 0515 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be Furnished by Installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**14. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**15. CONTACTS:** (Commercial prefix (801) 777-XXXX; DSN 777-xxxx

**a. 388<sup>th</sup> RANS/DOO, Range Control Officer/Installation Spray Coordinator:**

**16. SEQUENCING:**

- a. Target sequencing will be determined by UTTR personnel based upon EOD clearance schedule. All spray turns will be made south of Base Leg Knoll when spraying Targets 21, 24, and 23 to allow for maximum utilization of Eagle Range.
- b. Whenever possible, two targets will be treated on one pass. This will necessitate having two separate ground-monitoring and marking parties.
- c. When winds blow directly from one side of the target to the middle of the target, ground monitors will direct the "dress" up of the target edges.
- d. **Spraying Priorities:**  
(1) Nord LDC Runway  
(2) Target 21  
(2) Target 24  
(3) Target 13
- e. **Multiple-Target Alignments.**  
(1) The west edge of Target 23 lines up 1/4 mile west of the west edge of Target 21.  
(2) The west edge of Target 24 lines up with the west edge of Target 21.  
(3) When treating Targets 21 and 23 together on the same pass, treat the western-most stake on Target 23 and stake 139 on Target 21. If treating the east edge of Target 23, start with stake 90 on Target 21. When treating Targets 23 and 21 on the same passes, use stakes 90-139 on Target 21. Be sure to save treatment of stakes 90-139 on Target 21 until treating Targets 21 and 23 together.  
**(4) When treating Targets 21 and 24 together, treat the west edge of Target 24 while aligned with stake 89 on Target 21. Be sure to save stakes 45-89 on Target 21 to treat concurrently with Target 13.**  
**(5) Target 13 should be treated concurrently with stake 45 on Target 21 and those stakes to the east of stake 45.**

**17. GENERAL TARGET INFORMATION:**

**a. Target 21:**

- (1) Dimensions: 4,980' X 7,770'
- (2) Acreage: 888
- (3) Acres Sprayed in 2001: 888
- (4) 2000 Aircraft Loads: 18,869 Gal
- (5) Sorties: 17
- (6) Passes (35' Swath): 157
- (7) Spray-On Time/Pass: 23 Seconds
- (8) Spray Heading: 00/180

**b. Target 24:**

- (1) Dimensions: 1,600' X 6,080'
- (2) Acreage: 223
- (3) Acres Sprayed in 2001: 223
- (4) 2000 Aircraft Loads: 5,263 Gal
- (5) Sorties: 7
- (6) Passes: 47
- (7) Spray-On Time/Pass: 18 Seconds
- (8) Spray Heading: 00/180

**c. Target 13:**

- (1) Dimensions: 3 Concentric Circles, Approximately 2000' diameter
- (2) Acreage: 72
- (3) Acres Sprayed in 2000: 40
- (4) Sorties: 4
- (5) Passes: 29
- (6) Spray-On Time/Pass: 13.5 Seconds
- (7) Aircraft Heading: 00/180

**18. PLANNED SEQUENCE OF EVENTS: Hill AFB Tower Control and Runway Hours 0620L**

**NOTE: Scheduling reflects no weather or maintenance delays.**

**20 Sep (Friday):**

0800L: Report

1005-1015L: 1005, Spray #1 A/C , 1010, Spray #2 A/C & 1015 Support A/C Take-off

1330L: Hill

**ALL TIMES MAY BE ADJUSTED BY MISSION COMMANDER.**

**DUTY DAY FOR CIVILIANS WILL BE STD DAY (8 HOURS).**

**MILITARY STATUS PERSONNEL WILL WORK AS  
REQUIRED WITHIN CREW REST CONSTRAINTS.**

**Tower Control, Runway & Airfield hours start at 0700L**

**RANGE TIMES: 0700-1400 each day (21-25 SEP)**  
**END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE MIX.**  
**ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS**  
**PRE-FLIGHTED FOR THE NEXT DAY OR RELEASED BY THE AIRCRAFT**  
**COMMANDER.**

**21 Sep (Sat):** (First Spray Sortie, Range Times 0700-1400, 21-25 Sep)

0430L: Ground Support personnel depart for UTTR

0500L: Spray Maintenance start on first full day of mission and adjust as directed

0616L: Sunrise (see attach Sunrise/Sunset Chart)

0700-1300L: Spray Targets as directed

**22-25 Sep (Sun-Wed):** Using 22 Sep schedule spray UTTR Targets as directed  
by the Mission Commander or Ground Support Director

**26 Sep (Thu):** Weather Back-up/Flush

**27 Sep (Fri):** Clean-Up; Support Aircraft arrives at Hill AFB

**28 Sep (Saturday):** All personnel and aircraft return to YNG

0800L: All Aircrew report

0830L: All Personnel report

1000L: Spray Aircraft Takes Off Hill AFB

1015L: Support A/C Takes off Hill AFB

1700L: Spray Lands YNG

1715L: Support A/C Lands YNG

## **19. CALCULATIONS:**

### **a. FEET/SECOND:**

$6,076.1 \text{ FT/NAUT MI} \times 200 \text{ N/HR} / 60 \text{ MIN/HR} / 60 \text{ SEC/MIN}$

<< 337.55 FEET PER SECOND >>

### **b. ACRES TREATED/MINUTE:**

$35 \text{ FOOT SWATH} \times 337.55 \text{ FT/SEC} \times 60 \text{ SEC/MIN}$

<< 708,855 SQUARE FEET PER MINUTE >>

$708,855 \text{ SQ FT/MIN} / 43,560 \text{ SQ FT/AC}$

<< 16.27 ACRES PER MINUTE >>

### **c. SPRAY-ON TIME/LOAD:**

$1,750 \text{ GALLONS/LOAD} / 366.1 \text{ GAL/MIN} = 4.78 \text{ MIN/LOAD}$

OR 4 MIN 47 SEC/LOAD OR 287 SEC/LOAD

## **UTTR GEOGRAPHIC LOCATION AND TARGET DIMENSIONS**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

**TARGET 13.** The target is located east of and between targets 23 and 24. Target 13 is three concentric circles. The spray area is 2000 feet in diameter and contains approximately 72 acres. Orientation is generally N-S, although exact spray lines will depend on marker set-up.

**TARGET 21.** The target is the most northerly of the southern group. Target is a large, rectangular area 5000' X 7800'. Orientation is NNE-SSW using right patterns of SSW-NNE using left patterns. Target and surrounding terrain are flat.

**TARGET 22.** Target is located approximately three N.M. N.E. of CBU Valley. Target is a rectangle 2400' X 3700'. To assist in identification, Target 1, a circular target, is located immediately SE of 22. Target orientation is SE to NW with left patterns.

**TARGET 23.** Target is located about three N.M. SSW of Target 21. Target 23 is a rectangle approximately 1850' X 4500'. Terrain is flat. Target orientation is NNE-SSW using right patterns or SSW-NNE using left patterns.

**TARGET 24.** Target is located about one N.M. SSW of Target 23. Target 24 is a 1500' X 6000' rectangle. Orientation is the same as Target 21. Terrain is flat.

**TARGET 26.** Personnel from MMETA, or 6501st RS will be aboard aircraft to assist in identification and orientation of target. Target is located west of Target 21. Target is rectangle 100' X 6000'. Terrain is flat and can be flown as desired.

**CBU VALLEY.** CBU Valley is located on the northeast corner of the range. Spray line is oriented northwest/southwest (320/140). Spray can be accomplished both directions with turn around over the lake bed northwest and at the head of the valley southeast. Alternatively, spray will be northwest using left patterns. The ground rises gradually to the southeast of the target requiring higher power going southeast, lower going northwest.

**EAGLE TARGET.** Eagle is located southwest of CBU Valley and approximately six NM northwest of Target 21. Targets are the run-in areas to the strafing targets and the

bombing targets. Spray line from the northeast run-ins is 023, and spray line for the west run-ins is 293. The centerline is marked by a row of tires. Bombing run-ins are triangular 5200' X 600' at the wide end and 50' at the narrow end. Orientation is northeast to southwest on one and northwest to southeast to the other.

**BIG POPPA.** Big Poppa is a circle 3250' in diameter located N.E. of CBU Valley. Orientation of spray lines is SSW to NNE. The target is dished with higher terrain on the east side and northeast quadrant. Off the target, the terrain rises rapidly to the east. Leaving the northeast quadrant, there is a ridge line about 150' - 200' high to overfly. Patterns are left hand.

**WILDCAT MOUNTAIN.** Target is a simulated airfield located about 30 NM southwest of the northern end of Cedar Mountain. The spray area consists of a runway, parallel taxiway and parking ramp. The runway is 200' X 10,200' the Orientation is NE to SW with left patterns. Target area is flat but the terrain rises rapidly to the west.

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. **Installation Sprayed:** Hill AFB/UTTR UT
- b. **Mission Duration:** 20-28 Sep 02
- c. **Purpose of Application:** Weed Control over designated UTTR targets
- d. **Date/s and Time/s of Application (Zulu):** See Spray Operations Summary Chart
- e. **Acres Treated:** See Spray Operations Summary Chart
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** (b) (6), Aerial Spray Coordinator, Hill/UTTR AFB, DSN 777-5345; LTC (b) (6) (b) (6)
- g. **Date Spray Map Last Approved:** 11 Sep 02
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 20 Sep/1400, Base OPS, LtC (b) (6) (b) (6)

## 2. OPERATIONAL:

- a. **Mission Commander:** LtC (b) (6) (b) (6)
- b. **Certified PMP (Category 11):** LtC (b) (6) (b) (6) Maj (b) (6) (b) (6)
- c. **Aircrew:**
  - (1) Aircraft CMDR & Pilots: Maj (b) (6) (b) (6) Capt (b) (6) (b) (6)
  - (2) Co-Pilots: LtC (b) (6) (b) (6) Lt (b) (6) (b) (6)
  - (3) Navigators: LtC (b) (6) (b) (6) Maj (b) (6) (b) (6) Maj (b) (6) (b) (6) Maj (b) (6) (b) (6)  
LtC (b) (6) (21-23 Sep)
  - (4) Flight Engineer(s): SMS (b) (6), MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6), MSG (b) (6), MSG (b) (6)  
TSG (b) (6)
- d. **Safety Briefer:** LTC (b) (6) (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** MSG (b) (6), TSG (b) (6);  
TSG (b) (6), TSG (b) (6)
- f. **Spray Ground Monitors:** LtC (b) (6) (b) (6) Maj (b) (6) (b) (6) (b) (6)
- g. **Crew Chief(s):** MSG (b) (6), MSG (b) (6), TSG (b) (6) SRA (b) (6)
- h. **910 MA/LG Superv:** SMS (b) (6)
- i. **R & R:** SMS (b) (6)
- j. **AGE:** TSG (b) (6)
- k. **Propulsion:** TSG (b) (6)
- l. **Hydraulic:** MSG (b) (6)
- m. **Environmental/Electric:** TSG (b) (6)
- n. **Engine Shop:** TSG (b) (6)
- o. **Flying Data:** (See Spray Data Charts)
  - (1) Spray A/C 899105: Ferry: 2, Hours: 10.4; Spray Sorties: 9, Hours: 12.6
  - (2) Spray A/C 899107: Ferry: 2, Hours: 10.5; Spray Sorties: 10, Hours: 14.4
  - (3) Support A/C 923024, 20/21 Sep, Ferry: 2, Hours: 10.2
  - (4) Support A/C 919143, 27/28 Sep, Ferry: 2, Hours: 10.1

3. **PESTICIDE:**

- a. **Trade Name (% Active Ingredient):** Krovar I DF®
- b. **EPA Registration Number:** 352-505
- c. **Formulation Sprayed:** 10 pounds in 22.5 gallons of water per acre
- d. **Gallons Pesticide Loaded:** 1,800 per sortie
- e. **Gallons Pesticide Applied:** 26,225 gallons
- f. **Gallons and Name Diluent Used:** 25,200 gallons water
- g. **Other Additives Used:** 15 Gal Foam Fighter F®, 114 Gal StaPut®, 45 Gal Hi-Light® Dye
- h. **Application Rate:** 22.5 Gal per acre

4. **APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** C-130H 899105 and 909107
- b. **Spray System (Modules Used) and System ID #:** 3 and 5.
- c. **Spray System Configuration:** SP-3G
- d. **Nozzle Type/Size:** 3 inch herbicide nozzles.
- e. **Nozzle Orientation & Number Used:** 2, oriented straight back.
- f. **Pressure:** 40 psi
- g. **Flow Rate:** 366 gallons per minute

5. **APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 35 feet.
- b. **Spray Off Set:** Variable, determined by spotters on the ground.
- c. **Spray Release Altitude:** 100 feet.
- d. **Ground Speed:** 200 knots.

6. **WEATHER OBSERVATIONS (Ground Wind Direction (degrees)/Speed (knots):**

- a. **21 Sep:** North – 310-010/4-15
- b. **22 Sep:** 21-300/0-9
- c. **23 Sep:** 140-200/0-4
- d. **24 Sep:** 140-200/0-4
- e. **25 Sep:** Flush

7. **SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Pattern:**
  - (1) Technique/s Used: Ground Observation
  - (2) Results: Spray off-set determined each day
- b. **Effectiveness:**
  - (1) Technique/s Used: Visual field observations
  - (2) Results: (See Remarks)

8. **REMARKS:** Ground coverage was complete with no skips in sprayed areas. Eight passes totaling 17 seconds were flown over NORD LDZ. Efficacy will be determined by field observation next spring.

**CERTIFIED PEST MANAGEMENT PROFESSIONALS**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 21-25 JUL 08 DRAFT

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes at LFI and the surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6)
- (2) Pilots: Capt (b) (6) Capt (b) (6)
- (3) Navigator: LTC (b) (6) (b) (6)
- (4) Flight Engineers: MSgt (b) (6) SSgt (b) (6)
- (5) Spray Operators: MSgt (b) (6) MSG (b) (6)

##### b. Maintenance:

1. Spray Maintenance: TSgt (b) (6) MSgt (b) (6) TSgt (b) (6) SRA (b) (6)
2. Crew Chiefs: TSgt (b) (6) SRA (b) (6)
3. Avionics: SSgt (b) (6)

##### c. Entomologists: MAJ (b) (6) (b) (6)

##### d. Vehicles:

- Vehicle Dispatch: Will supply us with 2x9pax vans and 2 cars
- MC / Entomologist: One Car
- Ops: One van (9 pax), one car
- Mx: One Van (9 Pax)

##### e. Billeting Office: COM (757) 764-4667, DSN 574-4667, FAX 574-3038, POC TSG (b) (6) EXT 2528 Holiday Inn - 1815 W Mercury Blvd, 18 rooms blocked// cxd 11 july 08

#### 2. PPR: call 7 days out (14 Jul)

#### 3. SCHEDULE: (All times local)

##### 21 JUL (Monday):

- 1100 Show Time
- 1300 Takeoff KYNG
- 1430 Land KLFI w/ Safety Briefing immediately following
- 1530 Installation Briefing

##### 22 JUL (Tuesday):

- 1530 Show time
- 1600 WX Decision, load Dibrom
- 1800 Takeoff KLFI
- 2020 Sunset

##### 23 JUL (Wednesday):

- 1530 Show time
- 1600 WX Decision, load Dibrom
- 1800 Takeoff KLFI
- 2020 Sunset

##### 24 JUL (Thursday):

- 1530 Show time
- 1600 WX Decision, load Dibrom
- 1800 Takeoff KLFI
- 2019 Sunset

##### 25 JUL (Friday):

1000 Show Time  
1200 Takeoff KLF1  
1400 Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
  - (1) Ops phone DSN878-3588
  - (2) Tower phone DSN 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7 (Operating Hours 1000Z-0200Z)**
  - (1) Ground – 121.9 or 348.6 (phone 877-0221 ops)
  - (2) Tower – 118.7 (phone DSN 877-2862) voicemail 7-2962
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB: Tower DSN 574-7999**
  - (1) Tower - 125.0 or 253.5
  - (2) Ground - 121.7 or 275.8
  - (3) Clearance - 118.85 or 271.3
  - (4) Metro - 239.8
- d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15, Tower Supervisor DSN 262-3443**
- e. **Norfolk Approach: 124.9**
- f. **Spray Ground: Primary 392.2; Secondary: 308.6**

**7. IN-BRIEFING:** 1430 hrs; CE Conference Room

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** ten 8005 nozzles -- straight down
- c. **Aircraft:** 89-9106
- d. **Mission Identifier:**

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
- g. **Swath Width:** 2000 foot

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 1600 hrs each day pending weather and heat index.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

**11. CONTACTS:** LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX

1500 Land KYNG

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander Cell Phone

##### b. Entomologist:

- (1) Wind Gauge & Compass
- (2) VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

**c. Navigators:**

- (1) Maps
- (2) Templates

**d. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** size = 8005; 15 open for 5.5; oriented straight down (Kings Bay); 2.7 for PI and 7 8005s.
- d. **Differential GPS:** Wingman Installed
- e. **Aircraft:** 89-9105
- f. **Mission Identifier:** QZNRKA263112

**6. Adult mosquito control spray Parameters: (Kings Bay)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 1.0 oz/acre or 0.75 oz/acre see entomologist
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 2,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 15,000 Acres
- g. **Spray-On Time:** 32 Minutes
- h. **Flow Rate:** 7.4 gallons/minute or 5.55 gal/min see entomologist

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 3 or 4 drums of Dibrom for Kings Bay (see entomologist).

**8. PARKING PLAN NAS Jacksonville, FL** at the Hot cargo ramp. Personnel will need to be taken to and from the aircraft via Transient Alert. Please plan this accordingly into your schedule for showing at the aircraft since you will not be able to transit back and forth without the assistance of TA.

**9. AIR TO GROUND RADIO FREQUENCIES:**

Navy Jax Ops-	310.2	Tower	120.0/340.2
Ground	128.6/336.4	<b>Spray Ground:</b>	<b>123.45 VHF</b>
ATIS	281.0

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MCRD, PARRIS ISLAND, SC

### 21-24 April 2008

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: MC: Col (b) (6) (b) (6) LTC (b) (6) (b) (6) Maj (b) (6) ,
- (2) Navigators: Maj (b) (6) (b) (6)
- (3) Flight Engineers: Msgt (b) (6) (b) (6)
- (4) Spray Operators: Msgt (b) (6) (b) (6) , Tsgt (b) (6) , Msgt (b) (6) , Msgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: Tsgt (b) (6) , Tsgt (b) (6) , Tsgt (b) (6)
- (2) Crew Chiefs: Tsgt (b) (6) , Ssgt (b) (6)
- (3) Avionics: (b) (6)

##### c. Entomologist: LTC (b) (6)

#### 2. PPR REQUIREMENTS: 112-04

**3. PLANNED SEQUENCE OF EVENTS:** (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### 21 APR (Monday)

0900 Show  
1100 Depart YNG  
1300 Land KNBC  
1315 Safety Brief

##### 22 APR (Tuesday)

16 April 2002

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Parris Island  
MCRD SC for Control of Sandfly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft Available on 21 April through 25 April 2002

3. Concept of Operations:

a. 21 Apr 02 (Sunday):

1400 Take Off KYNG

1600 Land KNBC

1630 Safety Briefing

b. 22 Apr 02 (Monday):

1430 Load Chemical

1630 Take Off KNBC

1900 Land KNBC

c. 23 Apr 02 (Tuesday):

1400 Load Chemical

1630 Take Off KNBC

1900 Land KNBC

d. 24 Apr 02 (Wednesday):

1400 Load Chemical

1700 Take Off KNBC

1900 Land KNBC

e. 25 Apr 02 (Thursday):

1200 Take Off KNBC

1400 Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate (naled)
- d. Deploy: 1.6 Hrs
- e. Re-Deploy: 1.6 Hrs
- f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander/Mission Commander: Capt (b) (6) (b) (6)

6. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) DSN(b) (6)

7. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

(b) (6) (b) (6) Major, USAFR  
Chief, Aerial Spray (757 AS/DOS)

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **PARRIS ISLAND MCRD, SC**

### **21-25 APR 2002**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Mission Commander: Capt (b) (6)
- (2) Pilots: Capt (b) (6) (b) (6) Capt (b) (6)
- (3) Navigators: Maj (b) (6) , Maj (b) (6) (b) (6)
- (4) Flight Engineers: MSG (b) (6) , SMS (b) (6)
- (5) Spray Operators: MSG (b) (6) , TSG (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6)  
TSG (b) (6) , SSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , SSG (b) (6) ,
- (3) Avionics: TSG (b) (6) SRA (b) (6)

##### **c. Pest Management Professionals/Entomologist:** Capt (b) (6) (b) (6)

#### **2. PLANNED SEQUENCE OF EVENTS:** (All times local)

##### **21 APR (Sunday):**

1400: Take off KYNG  
1600: Land KNBC  
1630: Safety Briefing

**PPR # 111-01**

##### **22 APR (Monday):**

1400: Facility In-Brief and Load Chemical  
1630: Take off KNBC HAN 10 Gallon boom flush.  
1900: Land KNBC  
1957: Sunset

##### **23 APR (Tuesday):**

1400: Load Chemical  
1630: Take off KNBC  
1900: Land KNBC  
1958: Sunset

##### **24 APR (Wednesday):**

1400: Load Chemical  
1630: Take off KNBC  
1900: Land KNBC  
1959: Sunset

##### **25 APR (Thursday):**

1200: Take off KNBC  
1400: Land KYNG

### 3. ITEMS TO TAKE:

a. **Entomologist/CPMP:**

- (1) Wind Gauge, Compass, and Signal Mirrors
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder, Calibration Tables, and Oil Sensitive Papers
- (4) DGPS Computers, Trackstar Equipment, and Maps

b. **Navigators:**

- (1) Maps
- (2) Templates
- (3) Laptop Computer

c. **Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

### 4. SPRAY CONFIGURATION: SP-2G

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft Tail #:** 105
- f. **Mission Identifier:** QZNRKA321111

### 5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)

a. **Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: HAN

- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

### 6. AMOUNT OF SPRAY MATERIAL AVAILABLE: Load 60 gallons of Dibrom® Concentrate per sortie and 25 gallons of HAN in flush tank.

### 7. PPR REQUIREMENTS: Required: PPR # 111-01

### 8. PARKING PLAN: Beaufort MCAS Ramp

## 9. AIR TO GROUND RADIO FREQUENCIES:

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

**10. TRANSPORTATION:** Parris Island will provide two vans for transportation to/from quarters and dining. An additional vehicle will be available for the CPMP/Entomologists/Ground Support personnel.

**11. SPRAY MONITORING OR TESTING:** CPMP and Parris Island MCRD Project Coordinator.

## 12. CONTACTS:

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 21-25 April 2002
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 23 April 2002  
Time/s of Application (Local): 1925-1945 hrs
- f. Acres Treated: 7,680
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 7 April 2002
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-briefing: (When/Where/Briefer/s): Assistant Chief of Staff, Installation and Logistics, Col Semmler (Office); (b) (6) & Capt (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: Capt (b) (6)
- b. Certified PMP/s (Category 11): Capt (b) (6) (b) (6)
- c. Aircrew:
  - (1) Pilots: Capt (b) (6), Capt (b) (6)
  - (2) Navigator(s): Maj (b) (6), Maj (b) (6)
  - (3) Flight Engineer(s): SMS (b) (6), MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6), TSG (b) (6)
- d. Safety Briefer: Capt (b) (6)
- e. Spray Maintenance: SMS (b) (6), TSG (b) (6), TSG (b) (6), SSG (b) (6)
- f. Spray Ground Monitors: Capt (b) (6) (b) (6)
- g. Crew Chiefs: TSG (b) (6), SSG (b) (6) (b) (6)
- h. Avionics: (b) (6), SRA (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 2/4.1
  - (2) Ferry Sorties/Hours: 2/4.3

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60
- e. Gallons Pesticide Applied: 60
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 15 gal of Heavy Aromatic Naptha
- h. Other Additives Used: None
- i. Application Rate: 1 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System; Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: straight down; 6
- f. Pressure: 37 p.s.i.
- g. Flow Rate: 3.6 gallons/minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000 foot
- b. Spray Off Set: 2000 foot
- c. Spray Release Altitude: 150 AGL
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground (Knots): 6 knots/140-160°
  - (2) Release Altitude: 7 knots/130°
- b. Temperature (Degrees Fahrenheit): 78°
- c. Relative Humidity: 33%
- d. Cloud Cover: clear
- e. Source: direct observation

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1 meter dowels
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Comprehensive insect trapping program
  - (2) Results: A noticeable reduction of midge activity was observed the day following the spray. Carbon dioxide baited traps showed a 50-99 % decrease in biting midge species, depending on trap location, and 90-99 % decrease in the salt marsh mosquito, *Ochlerotatus taeniorhyncus*.

- 8. REMARKS:** We continue to get excellent support from the staff at Parris Island MCRD, which helps us in keeping our members mission qualified. Furthermore, the trapping program is helping us pinpoint the seasonal activity peaks for the three pest species of biting midges at Parris Island, which in turn will allow to project our application with better accuracy. We plan to continue trapping insects on a weekly basis during the coming year. The next scheduled mission to Parris Island is 20-25 October 2002.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## CHERRY POINT NC

### LAVICIDE TEST

### 21 - 25 AUG 2000

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander/Pilot: \*Capt (b) (6) (b) (6)
- (2) Co-Pilot: Maj (b) (6) (b) (6)
- (3) Navigator: MAJ (b) (6)
- (4) Flight Engineer: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) & \*MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: \*SMS (b) (6), TSG (b) (6), SSG (b) (6)
- (2) Crew Chief: MSG (b) (6)
- (3) Avionics: (b) (6)

##### c. Certified Pest Management Professionals: \*Maj (b) (6) 1LT (b) (6) (b) (6)

##### d. 910 AW Public Affairs. \*Lt (b) (6) (b) (6)

##### e. Lockheed Representatives. (b) (6) (b) (6), (b) (6)

\*U-SAFE RENTAL CAR AGENCY Mid-Size \$36.95 per day

#### 2. SCHEDULE: (All time Local)

##### 21 AUG (Monday):

**PPR # 234-1      Call Sign: Vader07**

0800: Show at KYNG

1000: Depart KYNG

1230: Land KNKT (Safety Briefing upon arrival)

1500: Meet with (b) (6), Craven County Health Department, 2818 Neuse Boulevard, New Bern, NC.

**Test will be done 22-24 Aug starting at sunrise for 2 hrs each day**

##### 22 AUG (Tuesday):

0500: Report

0633: Sunrise

0634: Start of Test

0834: End of Test

1946: Sunset

##### 23 AUG (Wednesday):

0500: Report

0634: Sunrise

0635: Start of Test

0835: End of Test

1945: Sunset

##### 24 AUG (Thursday):

0500: Report

0635: Sunrise

0636: Start of Test

0836: End of Test

1944: Sunset

##### 25 AUG (Friday):

0800: Report

1000: Depart KNKT

1230: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Cellular Phones, Wind Gauge, Compass, UHF Radio, Pest Safety Binder, Signal Mirrors, Satloc Trackstar, kromekote cards, swath kit.
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Base Ops:** DSN 582-2233
- b. **Trans Alert:** Gunney Commins, 582-2312/3232/2427
- c. **Fire Department:** Gunney Notar, 582-3231

**5. PARKING PLAN:** as directed.

**6. RADIO FREQUENCIES:**

**7. IN-BRIEFING:** Determined by Mission Commander

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS Modules 1 and 2
- b. **Nozzle Tips/Orientation:** Ultra-high volume herbicide booms.
- c. **Aircraft:** 99107; Mission Identifier: QZNRKA502234

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL depending upon weather conditions
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** VectoBac *Bti*
- d. **Application Rate:** 24 ounces in 10 gal water per acre.
- f. **Flow Rate:** 233 gallons/minute
- g. **Swath Width:** 50 feet.

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:**
- b. **Where:**
- c. **When:** 0600 (22-24 Aug)
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (1) Two B-5 or B-1 Stands

**11. SPRAY MONITORING OR TESTING:**

The local mosquito control districts will put out cages of live mosquitoes and oil-sensitive cards to monitor the control. Also, light trap data and biting count data will be collected pre- and post-spray by the base and the mosquito control districts to determine spray effectiveness.

**12. QUARTERS.**

**Billeting Office: DSN 574-4667 Contract Quarters:**

- HOLIDAY INN \$64 +TAX, 1800-949-2629

**13. U-SAFE Rental Car, \$36.95 day, 1000 free miles; 252-447-3999; FAX 252-447-2439**

Confirmation Number: MCCSCPT001 (Lt (b) (6) (b) (6))

Confirmation Number: MCCSCPT002 (Maj (b) (6))

Confirmation Number: MCCSCPT003 (Capt (b) (6) (b) (6))

Confirmation Number: MCCSCPT004 (SMS (b) (6) )

**14. CONTACTS:**

**a. Vector Control Program Manager, Craven Co., NC. (b) (6)**

**b. C.O., Preventive Medicine, Cherry Point NC. Lt (b) (6)**

**c. Extension Entomologist, NCSU, (b) (6)**

**d. Field R&D Specialist, Valent Biosciences, (b) (6)**

**e. Youngstown ARS OH: DSN: 346-XXXX; COM (330) 609-XXXX**

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. Installation Sprayed: Cherry Point NC
- b. Mission Duration: 21-25 Aug 00
- c. Purpose of Application: Lavicide Testing
- d. Application Date(s) and time(s) (Local): (see paragraph 8, Remarks)
- e. Acres Treated: N/A – Tests with bioassays repeated on same swaths
- f. Project Coordinator/s (Name/Rank, Title):
  - (1) (b) (6), Craven County Vector Control Program Manager
  - (2) Lt (b) (6), C.O Preventive Medicine of Cherry Point NC
  - (3) (b) (6), Extension Entomologists
  - (4) (b) (6), Field R&D Specialist, Valent Biosciences
- g. Date Spray Map Last Approved: 22 Aug 00
- h. Date of Waste Generation Letter:
- i. Installation In-Briefing: (When/Where/Briefer/s): 1500, 21 Aug 00/Craven Co Health Department  
Maj (b) (6) 1Lt (b) (6) (b) (6) & Capt (b) (6) (b) (6)

## 2. OPERATIONAL:

- a. Mission Commander: Capt (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): Maj (b) (6) 1Lt (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: Capt (b) (6) (b) (6)
  - (2) Co-Pilot(s): Maj (b) (6) (b) (6)
  - (3) Navigator: Maj (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6), MSG (b) (6)
- d. Safety Briefer: Lt (b) (6)
- e. Spray Maintenance/Pesticide Loaders: SMS (b) (6), TSG (b) (6), TSG (b) (6)
- f. Crew Chief(s): MSG (b) (6)
- g. Public Affairs: Lt (b) (6) (b) (6)
- h. Lockheed PA Representatives: (b) (6) (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 5 Sortie; 6.5 Hours
  - (2) Ferry Sorties/Hours: 2 Ferries; 3.4 Hours

## 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): VectoBac *Bti*
- b. EPA Registration Number:
- c. Formulation Sprayed: Water Dispersible Granule
- d. Pounds Pesticide Loaded: 220.4
- e. Pounds Pesticide Applied: 220.4
- f. Gallons and Name Diluent Used: 2,260 Water
- g. Gallons and Name of Flush Used: 2,000 Water
- h. Other Additives Used: StaPut; Hi-Lite dye
- i. Application Rate:
  - (1) 22 Aug: 0.93 Oz/Gal Water (860 Gal)
  - (2) 23 Aug: 1 Oz/Gal Water (800 Gal)
  - (3) 24 Aug: 3.2 Oz/Gal Water (600 Gal)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99107)
- b. Spray System (Modules Used) and System ID #: Modules 1 and 2 of SP2G - MASS ULV
- c. Spray System Configuration: Fuselage Booms (22 Aug); Fuselage & Wing Booms (23 & 24 Aug)
- d. Nozzle Type/Size: 3" Nozzles (22 Aug); 8070 Flat Fan (23 & 24 Aug)
- e. Nozzle Orientation/Total: 2/Straight Back (22 Aug); 70/Straight Back (23 Aug); 24/Straight Back (24 Aug)
- f. Pressure: 40 PSI
- g. Flow Rate: 233 gpm (22 Aug); 488 gpm (23 Aug); 163 gpm (24 Aug)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 50 feet (22 Aug); 350 feet (23 & 24 Aug)
- b. Spray Off Set: 75 feet (22 Aug); No off-set 23 Aug; 100 feet (24 Aug)
- c. Spray Release Altitude: 150 feet AGL
- d. Ground Speed: 200 knots ground speed

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 350°/3.4 mph (22 Aug); Calm (23 Aug); 160°/2.5 mph (24 Aug)
  - (2) Release Altitude: 350° 6 Knots (22 Aug); 230° 4 Knots (23 Aug); 160° 8 Knots (24 Aug)
- b. Temperature (Degrees Fahrenheit): 62.5° (22 Aug); 65° (23 Aug); 73° (24 Aug)
- c. Relative Humidity: 84.5% (22 Aug); 93% (23 Aug); 82.5% (24 Aug)
- d. Cloud Cover: Clear (22 & 23 Aug); 80% Cloud Cover (24 Aug)
- e. Source: Ground Observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Kromekote Cards
  - (2) Results: Good disposition in open and under moderate forest canopy;  
Poor deposition under heavy forest canopy
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito larvae bioassays
  - (2) Results: (See Remarks)

**8. REMARKS:**

- a. 22 Aug: 10 gal/acre application rate; 98% mortality of mosquito larvae in open and under moderate forest canopy; 73% mortality under heavy canopy.
- b. 23 Aug: 3 gal/acre application rate; 94% mortality in open; 79% mortality under moderate forest canopy; 54% mortality under heavy canopy.
- c. 24 Aug: 1 gal/acre application rate; 98% mortality in open; 4% mortality under moderate canopy; 1% mortality under heavy canopy.

(b) (6) **PhD, Maj, USAFR**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL**

FILENAME: 21-25 Aug 00 PMP Report

OPR: (b) (6)

**DEPARTMENT OF THE AIR FORCE**  
**Air Reserve Command**

**TO: 757 AS/DOS**

**26 Jan. 02**

**SUBJECT: SITE SURVEY REPORT**

**FROM: 910 MXS/LGMZ**

1. Aerial Spray MXS attended a site survey of the proposed exercise site with Coast Guard representatives @ Santa Barbara, CA. (21-25 Jan. 02).
2. Attendees were as follows:
  - (b) (6) USCG Dist. #13 Marine Safety
  - Lt. Commander (b) (6) USCG Dist. #11 Commander Marine Safety
  - (b) (6) USAFR, Aerial Spray Maint. Flight Chief
  - Charles Foley local FFA manager Central CA. Hub
  - (b) (6) (b) (6) assistant manager Central CA. Hub
  - (b) (6) airport manager
  - (b) (6) airport operations specialist
  - (b) (6) Clean Seas local operations manager
  - Lt. (b) (6) Santa Barbara County Sheriff's Dept. Training Branch
  - Lt. Col. (b) (6) California Air Guard Maint. Officer
3. Attendees met with Exxon Oil Rep. and flew over natural oil seeps of the coast of Santa Barbara. Something we should attempt to practice while we are flying our sorties over the coordinated spray site south of Santa Barbara @ Carpenter City location.
4. We will be parking the Aircraft @ the Forest Service ramp, located at the west end of Santa Barbara Regional Airport. ( See Airport Map, Parking spot outlined in Green). The ramp is fenced in and has a limited access gate and roving security patrols hourly. (Need for Ravens?). If we take Ravens they can store weapons @ the Santa Barbara County Sheriff's Dept.
5. Clean Seas will supply the surface vessels @ the Oil Spill location. (2-3 vessels). One 45' cleanup vessel and two 21' work boats for transportation. The spray site can be viewed from shoreline. So there should be several observers from the USCG, commercial applicators, oil company rep's. and the local news agencies.
6. California Air Guard @ Oxnard, CA. will supply ground support equipment @ Santa Barbara. Coast Guard Strike team will pick up the items and transport them from Oxnard to Santa Barbara. POC's for Oxnard: (b) (6)

(b) (6) , transportation mgr. DSN (b) (6) , Reed Allen, powered and non-power ground support equipment mgr. DSN (b) (6) , Lt. Col. (b) (6) , 146<sup>th</sup> MXS officer, DSN (b) (6) .

7. Quarters will be @ either Holiday Inn, Phone #805-964-6241 or Best Western South Coast Inn, Phone #800-350-3614 @ \$114.00 per night. Airport has several car rental facilities, or we can call local Enterprise Company for rentals. Mid size cars @ \$50.00 per day and Vans @ \$65.00 per day.
8. Santa Barbara County Fire Department will supply water truck for our reload exercises. The USCG Strike team will use 55 gal. drums filled with water to simulate a re-supply exercise for the water truck.
9. Aircraft & ground support equipment fuel will be supplied by Mercury Air at the airport.
10. The exercise is planned to proceed as follows:
  - A. 1 Apr. 02 C-130 departs Youngstown ARS, OH.
  - B. 2 Apr. 02 Meeting/Ground Training day. This will include inflight safety briefings for Aircraft commanders. Begins @ 0830, location TDA. Aircraft/Spray Mxs crew will configure aircraft with oil spill booms & have aircraft ready for Show & Tell @ 1600-1700. Happy Hour will be @ Elephant Bar 1730-1900 hrs.
  - C. 3 Apr. 02 0800 crew show @ TBA for final coordination briefings. 0830 Mxs will show at aircraft for preparation for 1000 takeoff for spray site loaded with 1000 gals of water. 1130 hrs C-130 aircraft returns to base for engine running upload exercise. 1200 hrs C-130 takeoff for spray site. 1330 hrs C-130 returns to base for engine running upload exercise. 1400 hrs C-130 takes off for spray site. 1530 hrs C-130 returns to base for termination of exercise. 1600 hrs hot wash @ Forest service meeting room for aircrew/mxs/uscg/clean seas and Exxon/mobile.
  - D. 4 Apr. 02 C-130 can depart for home station or have an additional training day @ location. Water can be supplied @ parking site with water hydrant, but aircraft will have to self-contained start because ground support equipment will departing this date with USCG strike team.
  - E. 5 Apr. 02 C-130 departs for YARS?
11. Suggest we take a Public Affairs rep. With us to coordinate with press and USCG PA rep. For any additional info please contact me at (b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 21-25 MAY 2001

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6) (b) (6)
- (2) Pilots: LTC (b) (6) (b) (6) Major (b) (6) (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6), MSG (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6) (b) (6) TSG (b) (6) (b) (6) TSG (b) (6) (b) (6)  
SSG (b) (6) (b) (6)
- (2) Crew Chiefs: MSG (b) (6), TSG (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Entomologists/Ground Support: LTC (b) (6) & 1LT (b) (6) (b) (6)

#### 2. SCHEDULE: (All Local) Times

##### 21 MAY (Monday)

0800: Show at KYNG  
1100: Depart KYNG  
1330: Land KRDR/Safety Briefing  
1430: In-brief

##### 22 MAY (Tuesday):

0340: Show time  
0530: Take Off KRDR  
0543: Sunrise  
0543: Begin larvicide spray (aiming for two lifts if weather permits)

##### 23 MAY (Wednesday):

0340: Show time  
0530: Take Off KRDR  
0541: Sunrise  
0541: Begin larvicide spray (aiming for two lifts if weather permits)

##### 24 MAY (Thursday):

1730: Load chemical  
1930: Take Off KRDR (Begin ULV sortie)  
2110: Land KRDR  
2111: Sunset

##### 25 MAY (Friday):

TBA: Out-brief  
1100: Take Off KRDR  
1500: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder, 2 Signal Mirrors, 1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries, Kodak Camera
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

### 4. PPR: Not required weekdays

### 5. RADIO FREQUENCIES: Air To Ground Primary 392.2

### 6. SPRAY CONFIGURATION:

- a. **System:** 2-Module System/Stainless Steel ULV Wing Booms and Fuselage Booms
- b. **Nozzle Tips/Orientation:**
  - i. larvicide: Raindrop nozzles 45° back
  - ii. ULV: 8008 TeeJet oriented straight down
- c. **Number:**
  - i. larvicide: Fuselage only, 6 total (3 each side) 45° back
  - ii. ULV: wing only, 4 8008s total (2 each side)
- d. **Booms:** Full Wing or Fuselage Booms as required (see above)
- e. **Aircraft:** 99108

### 7. SPRAY PARAMETERS:

- a. **Altitude:** 150' AGL for both applications on swath when no trees are present for larvicide. 150' for ULV application
- b. **Swath Width.** 90 feet for larvicide; 1000 feet for ULV.
- c. **Flow Rate.** 83.6 gallons/minute larvicide; 2.18 gallons/minute ULV
- d. **Application Rate.** 2 gal/acre (water with 0.75 oz of Altosid®), larvicide; 0.60 oz/acre Trumpet, ULV
- e. **Ground Speed:** 200 Knots

**8. SPRAY MIXING AND LOADING:  
Tuesday & Wednesday 22 & 23 May**

- a. Composition of each Gallon:
- (1) 0.375 ounces of Altosid 20
  - (2) 0.08 ounces of Control® drift retardant
  - (3) Water
- b. First Load (2 tanks of 475 gallons each + sump of 70 gallons)
- (1) Fill with 475 gallons of water/tank. Total water in tanks = 950 gal.
  - (2) 70 gallons of water in sump
  - (3) Total water added = 1,020 gallons
  - (4) Add 1.5 gallons of Altosid® per tank (3 gallons total).
  - (5) Add 1 bottle of Control®/tank while agitating approximately 15 min
  - (6) Total quantity mix. 1023 gallons
- c. Subsequent Loads (2)
- (1) Fill with 475 gallons of water/tank. Total water = 950 gal
  - (2) Add 1.4 gallons of Altosid® per tank. Total Altosid® = 2.8 gal
  - (3) Add 1 bottle of Control/Tank.
  - (4) Total quantity mix. 952.8 Gallons (does not include 70 Gal already mixed in sump)
- d. Final Load (1 tank only)
- (1) Fill with 450 gallons of water. Total water = 450 gal
  - (2) Add 1.3 gallons of Altosid®.
  - (3) Add 1 bottle of Control®.
  - (4) Total quantity of mix 451.3 gallons (Does not include 70 Gal already mixed in sump)
- e. Mixing Instructions:
- SHAKE WELL BEFORE USING. Altosid may separate on standing and must be thoroughly agitated prior to dilution.
- PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

**SPRAY MIXING AND LOADING:**

**Thursday 24 May**

The amount of Trumpet to load will be determined on site

**9. CONTACTS:**

- a. **319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks ND 58205**  
**DSN 362-xxxx; Commercial (701) 747-xxxx**
- (1) **Base Operations:** (b) (6) Airfield Manager or 1LT (b) (6) DSN (b) (6)

**MEMORANDUM FOR HQ AFRC/DOOM** (FAX: 497-0198)

**FROM:** 757 AS/DOS (b) (6) (b) (6) FAX 346-1616)

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Langley AFB

1. **Purpose/Objectives/Benefits:** Control nuisance and vector mosquitoes in order to improve working conditions for members operating at Langley AFB VA.
2. **Capability:** Spray Aircraft Available 21-26 Jul 02.
3. **Concept of Operations:**
  - a. **21 Jul (Sunday):**
    - 1200 Show at KYNG
    - 1400 Take-Off KYNG
    - 1530 Land KLFI
    - 1545 Safety Brief
  - b. **22 Jul (Monday):**
    - 1100 In-Briefing with Langley AFB, CE Conference Room
    - 1400 Show Time/Weather Decision
    - 1430 Load Chemical
    - 1700 Take-Off KLFI, Spray Areas Designated by PMP
    - 2020 Land KLFI
  - c. **23 Jul (Tuesday):**
    - 1100 Daily meeting for PMP/MC in the hotel lobby
    - 1400 Show Time/Weather Decision
    - 1430 Load Dibrom
    - 2020 Sunset
  - d. **24 Jul (Wednesday):**
    - 1100 Daily meeting for PMP/MC in the hotel lobby
    - 1400 Show Time/Weather Decision
    - 1430 Load Dibrom
    - 1700 Depart KLFI, Spray Areas Designated by PMP
    - 2019 Land KLFI

**e. 25 Jul (Thursday):**

1100 Daily meeting for PMP/MC in the hotel lobby  
1400 Show Time/Weather Decision  
1430 Load Dibrom  
1700 Depart KLFI, Spray Areas Designated by PMP  
2019 Land KLFI

**f. 26 Jul (Friday):**

0900 Report  
1100: Depart KLFI  
1230: Land KYNG

**4. Spray Parameters:**

- a. Acreage: approximately 86,000 Acres
- b. Altitude: 150 Ft AGL
- c. Ground Speed: 200 Knots
- d. Pesticide: Dibrom® Concentrate
- e. Application Rate: 0.5 Ounce per Acre
- f. Flow Rate: 1.8 Gal per Minute at Craney Island; 3.6 Gallons per Minute for Langley AFB designated areas
- g. Swath Width: 1000' swaths at Craney Island; 2000' to 2500' swaths at Langley AFB
- h. System: SP2G – MASS ULV; Modules 1 and 2
- i. Nozzle Tips/Number/Orientation: 8008/8 oriented straight down for 2000' swaths; 8008/4 oriented straight down for 1000' swaths oriented straight down
- j. Aircraft Tail Number: 99106
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Aircraft/Mission Commander: Major (b) (6) (b) (6)**

**6. Support required at Langley AFB has been requested via FAX message.**

**7. If you have any questions concerning this mission please contact DSN (b) (6)**

(b) (6) (b) (6) Major, USAFR  
Chief, Aerial Spray  
757 AS/DOS (b) (6) )

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 21-26 JULY 2002

**Purpose/Objectives/Benefits:** control nuisance and vector mosquitoes in order to improve working conditions and lower the incidence of arthropod borne illness for members operating at Langley AFB and surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6) (b) (6)
- (2) Pilots: MAJ (b) (6) (b) (6) MAJ (b) (6)
- (3) Navigators: Maj (b) (6) (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: CMS (b) (6) MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6) TSG (b) (6) ,  
SSG (b) (6)
- (2) Crew Chiefs: SSG (b) (6) , SRA (b) (6)
- (3) Avonics: TSG (b) (6) , TSG (b) (6)

##### c. Certified Pest Management Professionals, LTC (b) (6) (b) (6) MAJ (b) (6) (b) (6) CPT (b) (6) (b) (6)

Gov Vehicles: 9 pax van, 6 pax van, sedan, 1/2 ton truck

#### 2. SCHEDULE: (All time Local)

##### 21 JUL (Sunday):

**PPR # 721CL01**

1200: Show at KYNG  
1400: Depart KYNG  
1530: Land KLF  
1545: Safety Briefing

##### 22 JUL (Monday):

0900: In-Briefing at CE Conference Room  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2020: Sunset

##### 23 JUL (Tuesday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2020: Sunset

##### 24 JUL (Wednesday):

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2019: Sunset

**25 JUL (Thursday):**

1100: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
2019: Sunset

**26 JUL (Friday):**

0900: Report  
1100: Depart KLFI  
1230: Land KYNG

**3. ITEMS TO TAKE:**

- |                              |   |
|------------------------------|---|
| <b>a. Entomologist:</b>      | Cellular Phones, Kestrel Weather Monitor, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker and Laptop Computer |
| <b>b. Navigator:</b>         | Maps/Map Bag, Validation Map, Laptop Computer   |
| <b>c. Spray Operator:</b>    | Safety Gear, Calibration Tables   |
| <b>d. Spray Maintenance:</b> | Deployment Kit  |

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- |    |                                       |
|----|---------------------------------------|
| a. | <b>Langley Tower:</b> DSN 574-5326    |
| b. | <b>Langley Base Ops:</b> DSN 574-2504 |

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- |  |   |
|--|---|
| <b>a. Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0</b>                |   |
| (1)  | Ops phone 878-3588                                  |
| (2)  | Tower phone 878-3530                                |
| (3)  | Flight Service 122.2                                |
| <b>b. Newport News-Williamsburg Int: (Operating Hours 1000Z-0200Z)</b>     |   |
| (1)  | Ground - <b>121.9 or 348.6</b> (phone 877-0221 ops) |
| (2)  | Tower – <b>124.9 or 280.1</b> (phone 877-2962)      |
| (1)  | FSS – 122.1R, 122.2, 122.65, OR 124.9               |
| (2)  | CTAF – <b>118.7</b>                                 |
| <b>c. Langley AFB: Tower OIC MSG (b) (6) Lt (b) (6) 1st OSS SQ</b>         |   |
| (1)  | Tower - <b>125.0 or 253.5</b> (phone 4-5326)        |
| (2)  | Ground - <b>121.7 or 275.8</b>                      |
| (3)  | Clearance – <b>118.85 or 271.3</b>                  |
| (4)  | Metro - <b>239.8</b>                                |
| <b>d. Norfolk NAS (Chambers Fld): Tower - 124.3, 126.375, 340.2, 318.7</b> |   |
| <b>e. Spray Ground: Primary 392.2 / 308.6 Secondary</b>                    |   |

7. **IN-BRIEFING:** Required; IAW the Schedule above.
8. **SPRAY CONFIGURATION:**
- a. **System:** SP2G - MASS ULV; Modules 1 and 2
  - b. **Nozzle Tips/Orientation:** 8 8008's for 2000' swathes and 4 8008's for 1000' swathes oriented straight down.
  - c. **Aircraft:** 99106
9. **SPRAY PARAMETERS:**
- a. **Altitude:** 150' AGL
  - b. **Ground Speed:** 200 KNOTS
  - c. **Pesticide:** Dibrom<sup>®</sup> Concentrate
  - d. **Application Rate:** 0.5 Ounce/Acre
  - e. **Flow Rate:** 1.8 Gallons/Minute at Craney Island; 3.6 Gallons/Minute at Langley areas
  - f. **Acreage:** Approximately 86,000 Acres
  - g. **Swath Width:** 1,000 Feet at Craney Island; 2,000 Feet at Langley areas.
10. **PESTICIDE LOADING:**
- a. **How Much Pesticide:** 334 Gallons for 86,000 acres sprayed.
  - b. **Where:** Aero Club Ramp
  - c. **When:** 1430 each day.
  - d. **Furnished by Installation:**
    - (1) Pesticide
    - (2) Loading Equipment/Crew
    - (3) Hazardous Waste Disposal
    - (4) Two B-5 or B-1 Stands
11. **SPRAY MONITORING OR TESTING:**
- The local mosquito control districts and Langley Pest Control will conduct mosquito surveillance using either trapping or biting count pre- and post-spray data to determine spray effectiveness. Oil sensitive cards will be used to confirm application within the spray blocks.
12. **CONTACTS:** LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB
- b. Mission Duration: 21-26 July 2002
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date(s) and time(s) (Local): 1715-2020 (22 July) & 1720-1940 (25 July)
- e. Acres Treated: 62,208 (22 July) & 16,128 (25 July)
- f. Project Coordinator/s (Name/Title, Phone #):  
Langley AFB: (b) (6)
- g. Date Spray Map Last Approved: 22 Jul 02
- h. Date of Waste Generation Letter: 4 April 1996
- i. Installation In-Briefing: (When/Where/Briefer/s): 22 Jul 02, CE Conference Room, Langley AFB;  
Maj (b) (6) & Maj (b) (6)

## 2. OPERATIONAL:

- a. Mission Commander: Major (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): Capt (b) (6) (b) (6) Maj (b) (6) (b) (6) LTC (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander/Pilot: MAJ (b) (6) (b) (6)
  - (2) Co-Pilot(s): Maj (b) (6)
  - (3) Navigator: Maj (b) (6) (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: CMS (b) (6), MSG (b) (6)
- d. Safety Briefer: Capt (b) (6) (b) (6)
- e. Spray Maintenance/Pesticide Loaders: MSG (b) (6), TSG (b) (6),  
TSG (b) (6) SSG (b) (6)
- f. Crew Chief(s): SSG (b) (6), SRA (b) (6)
- g. Avonics: TSG (b) (6), TSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 3 Sorties; 6.8 Hours
  - (2) Ferry Sorties/Hours: 2 Ferries; 3.2 Hours

## 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (97% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 330
- e. Gallons Pesticide Applied: 330
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 48 HAN
- h. Other Additives Used:
- i. Application Rate: 1.0 oz/acre at Craney Island & 0.5 acre elsewhere

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99106)
- b. Spray System (Modules Used) and System ID #: System SP2G - MASS ULV; Modules 1 and 2
- c. Spray System Configuration: ULV Wing Booms; Modules 1 and 2/MASS ULV
- d. Nozzle Type/Size: 8008 TeeJet<sup>®</sup> Flat Fan
- e. Nozzle Orientation & Number Used: 8 8008's for 2000' swathes; 7 8008's for 1000' swathes (and higher flow rate); oriented straight down
- f. Pressure: 45-55 psi
- g. Flow Rate: 3.6 gallons/minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000 ft at Craney Island & 2000 ft on Langley Peninsula
- b. Spray Off Set: 2000-4000 depending on wind speed
- c. Spray Release Altitude: 150 feet AGL
- d. Ground Speed: 200 knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 22 July 210° @ 4-8 knots; 25 July 060-075° @ 4-8 knots
- b. Temperature (Degrees Fahrenheit): 22 July 85-90°; 25 July 75-78°
- c. Relative Humidity: 22 July 40-60%; 25 July 83%
- d. Cloud Cover: 22 July scattered clouds; 25 July overcast skies
- e. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil sensitive cards on dowels
  - (2) Results: all cards within spray area were positive for spray
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities
  - (2) Results: 91% decrease in mosquito numbers, on average.

**8. REMARKS:** This was the first spray of the Langley AFB region for 2002. The need for an application was determined by nuisance level mosquitoes in surveillance traps and the threat of encephalitis transmission (West Nile Virus/Eastern Equine Encephalitis). Birds and mosquitoes have recently been found to be carrying these viruses. Three spray sorties were flown with one of these cancelled because of weather before any chemical was released. A 0.5 oz/acre application rate was used on the Langley Peninsula and 1.0 oz/acre rate was used at Craney Island, based on relative mosquito numbers between the locations. The Langley AFB Pest Management Shop felt that this was an extremely well timed application, based on the emergence of salt marsh mosquitoes just prior to the application and the subsequent drop in mosquito numbers after the spray. A 91% decrease in mosquito activity was observed at Langley. Other local mosquito abatement officials reported a significant decrease in the number of mosquitoes, as well. The next spray at Langley AFB is scheduled for 18-23 August.

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### SMOKY HILL ANGR, KS 21-28 Oct 2006

#### 1. MISSION BASICS:

- a. **Installation Sprayed:** Smoky Hill ANGR, Salina KS
- b. **Mission Duration:** 21-28 October 2006
- c. **Purpose of Application:** Control of Musk Thistle (*Cardus nutans*) on Smoky Hill, ANGR.
- d. **Application Date/s:** 22-24 Oct 06  
**Time/s of Application (Zulu):** 1533-1945 (22 Oct); 1505-1651 (23 Oct); 1450-1625 (24 Oct)
- e. **Acres Treated:** 3221
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** (b) (6), Aerial Spray Coordinator, Smoky Hill ANGR, DSN (b) (6)
- g. **Date Spray Map Last Approved:** 7 Nov 05
- h. **Date of Waste Generation Letter:** N/A

#### 2. OPERATIONAL:

- a. **Mission Commander:** LTC (b) (6) (b) (6)
- b. **Certified PMP (Category 11):** CPT (b) (6)
- c. **Aircrew:**
  - (1) Aircraft Pilots: MAJ (b) (6) (b) (6)
  - (2) Co-Pilot: 1 LT (b) (6) (b) (6)
  - (3) Navigator: LTC (b) (6) (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6) (b) (6) MSG (b) (6) (b) (6) SRA (b) (6)
- d. **Safety Briefer:** CPT (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** TSG (b) (6) ; TSG (b) (6) ; TSG (b) (6) (b) (6)
- f. **Spray Ground Monitors:** CAPT (b) (6)
- g. **Crew Chief(s):** MSG (b) (6) ; TSG (b) (6)
- h. **Avionics:** (b) (6) (b) (6)
- i. **AGE:** TSG (b) (6)
- j. **Engine:** None
- k. **Ground Support/CPM Professionals:** CAPT (b) (6)
- l. **Security Police:** TSG (b) (6) (b) (6) TSG (b) (6) ; SSG (b) (6) ; A1C (b) (6) (b) (6)
- m. **Flying Data:**
  - 1. Spray Sorties/Hours: 2/2.6 (22 Oct); 1/1.8 (23 Oct); 1/1.6 (24 Oct); 1/0.9 (ULV Training): Total 4/6.0
  - 2. Ferry Sorties/Hours:
    - (a) Spray A/C 909107 Ferry Sorties/Hours: 1/3.6 (21 Oct); 2.7 (28 Oct)

#### 3. PESTICIDE:

- a. **Trade Name (% Active Ingredient):** Tordon® 22K
- b. **EPA Registration Number:** 62719-6
- c. **Formulation Sprayed:** Tordon® 22K mixed with water, AirEx DC and Prevent foam control
- d. **Gallons Pesticide Loaded:** 240 gallons Tordon® 22K
- e. **Gallons Pesticide Applied:** 240 gallons Tordon® 22K
- f. **Gallons and Name Diluent Used:** 6047 gallons of water
- g. **Gallons and Name of Flush Used:** 200 gallons of water

- h. **Other Additives Used:** 14 gallons of AirexDC® per load
- i. **Application Rate:** 2 gallons spray/acre (water with 10 oz. of Tordon® and Drift control)

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** 909107
- b. **Spray System (Modules Used) and System ID #:** 3-Module system
- c. **Spray System Configuration:** Fuselage Booms
- d. **Nozzle Type/Size:** 8070 Flat Fan TeeJet®
- e. **Nozzle Orientation & Number Used:** 40 Fuselage (20 each side, straight back)
- f. **Pressure:** 55-61 PSI (22-23 Oct); 51-59 PSI (24 Oct)
- g. **Flow Rate:** 215-281 GPM (22 Oct); 257-324 GPM (23 Oct); 265-294 GPM (24 Oct)

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 300'
- b. **Spray Off Set:** 3 swath widths
- c. **Spray Release Altitude:** 100-150 depending on wind speed
- d. **Ground Speed:** 200 Knots

**6. WEATHER OBSERVATIONS:**

- a. **Winds (Direction/Speed):**  
Ground: 270°/8 KT (22 Oct); 150/4 KT (23 Oct); 180/8 KT (24 Oct)
- b. **Temperature Range During Application (°F):** 56°- 75°
- c. **Cloud Cover:** 0% (22-24 Oct)
- d. **Source:** Ground observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Pattern:**  
(1) Ground monitors observed/confirmed swath width from ground positions
- b. **Effectiveness:**  
(1) Technique/s Used: Visual field observations will be carried out in the spring by the Smoky Hill Staff.

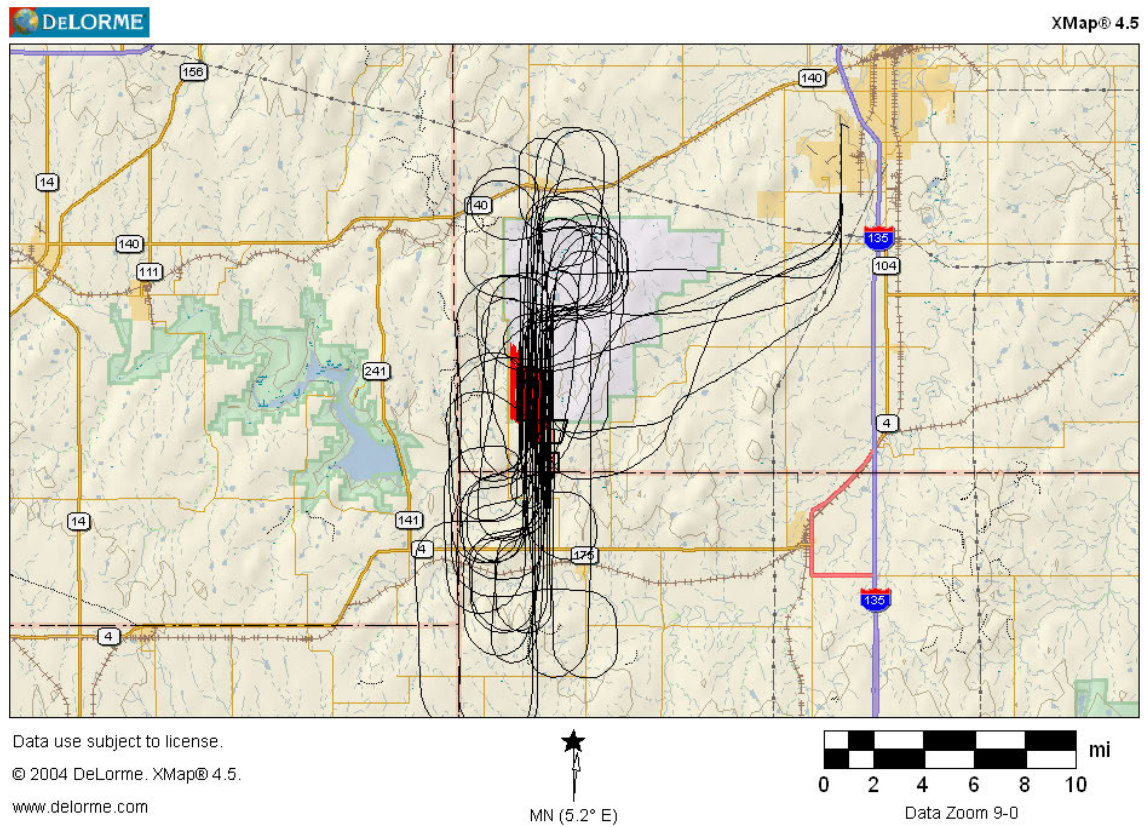

- 8. REMARKS:** Musk thistle has been reduced to the point that spray flights are not required every year; which speaks highly of the effectiveness of prior missions in controlling thistles. This year frost conditions resulted in later takeoff times. However the mission was completed in 4 lifts in 3 days. Additional acreage was covered at the range managers' discretion in order to completely use up the available herbicide and cover some "hot spots". Apart from the frost, meteorological conditions were favorable for the application. Colder temperatures resulted in less evaporation and thus, good coverage. As usual, coordination of the host facility was excellent and ensured a smoothly run mission.

//Signed//

# AERIAL SPRAY OPERATIONAL SCHEDULE

## SMOKY HILL ANG RANGE, KS

### 21-28 OCT 2006

**PURPOSE/OBJECTIVE/BENEFIT:** Control musk thistle at the Smoky Hill ANGR, to improve grazing areas, to eliminate the Range as a source of infestation to neighboring farms from wind-blown musk thistle seeds and to support state and local noxious weed control efforts.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: MAJ (b) (6), 1Lt (b) (6)
- (3) Navigators: LTC (b) (6)
- (4) Flight Engineers: Msgt (b) (6)
- (5) Spray Operators: Msgt (b) (6), SRA (b) (6)

##### b. Maintenance:

- (1) Spray MX: TSG (b) (6), SSG (b) (6), Tsgt (b) (6)
- (2) Crew Chiefs: MSG (b) (6), Tsgt (b) (6)
- (3) Avionics: (b) (6)
- (4) AGE: TSG (b) (6)
- (5) Engine: None

##### c. Ground Support/CPM Professionals: CPT (b) (6)

##### d. Security Police: TSG (b) (6), Tsgt (b) (6), SSG (b) (6), A1C (b) (6)

#### 2. SCHEDULE: (All Local) Times

**Range Schedule: 0700-1200 Local Daily\* Check with Range Scheduler for any changes**  
**21 OCT (Saturday) \* Support Aircraft will depart 1 hour after Spray aircraft**

0900: Show at KYNG

1100: Depart KYNG

1430: Land KSLN/Safety Briefing

A/R: Maintenance configures aircraft; Aircrew plan next day's mission

##### **22 OCT (Sunday): 1 or 2 Spray Sorties**

0545: Show time

0747: Sunrise

0745: Take Off KSLN

Range time (Coordinate MARSA as needed after 1200)

1200: Land KSLN

##### **23 OCT (Monday): 1 or 2 Spray Sorties**

0545: Show time

0748: Sunrise

0745: Take Off KSLN

Range time (Coordinate MARSA as needed after 1200)

1200: Land KSLN

**24 OCT (Tuesday): 1 or 2 Spray Sorties**

0545: Show time

0749: Sunrise

0745: Take Off KSLN

Range time (Coordinate MARSA as needed after 1200)

1200: Land KSLN

**25 OCT (Wednesday): 1 or 2 Spray Sorties**

0545: Show time

0750: Sunrise

0745: Take Off KSLN

Range time (Coordinate MARSA as needed after 1200)

1200: Land KSLN

**26 OCT (Thursday): 1 or 2 Spray Sorties**

0545: Show time

0751: Sunrise

0745: Take Off KSLN

Range time (Coordinate MARSA as needed after 1200)

1200: Land KSLN

**27 OCT (Friday): 1 or 2 Spray Sorties/ System cleanout and purge**

0545: Show time

0752: Sunrise

0745: Take Off KSLN

Range time (Coordinate MARSA as needed after 1200)

1200: Land KSLN

**28 OCT (Saturday) Return**

0800: Show time

1000: Take Off KSLN

1230: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phone, Wind Gauge, 2 Compasses, 1 UHF Radio, Pest Safety Binder, 2 Signal Mirrors, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries
- c. **Navigator:** Maps/Map Bag, Validation Map,
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Stake Bed Truck, Support Equipment

**4. NOTIFICATION NECESSARY FOR THIS MISSION:** None Required.

**5. PARKING PLAN:** North Ramp (same as last time) Highway Patrol Ramp (by the Civil Air Patrol Hangar).

**6. RADIO FREQUENCIES:**

- a. **Air To Ground:** Primary 392.2; VHF 123.45

**b. Salina:** CTAF: 119.3, UNICOM: 122.95, ATIS: 120.15, TWR: 119.3 / 257.7, GND: 121.9 / 397.9, NG OPS: 49.95 / 304.6

**c. Smoky Hill:** Primary 316.9, Secondary 304.9; Victor Freq: 139.7 Smoky Hill departure. Expect IFR clearance from KCC on 363.2 UHF 134.9 VHF. Advise them you are departing R3601

**7. IN-BRIEFING:** Upon Arrival.

**8. SPRAY CONFIGURATION:** (Note: File support a/c Chap 3 to AFJI 24-204)

**a. System:** SP-3G

**b. Nozzle Tips/Orientation:** 8070 Flat Fan TeeJet/90° straight back

**c. Number:** Fuselage. 40 Total (20 each side)

**d. Booms:** Fuselage Booms.

**e. Aircraft:** 90-9107

**f. Mission Identifier:** QZNRKA087294

**9. SPRAY PARAMETERS:**

**Altitude:** 100' AGL

**Swath Width.** 300 feet.

**Flow Rate.** 279 Gallons/Minute (approximately 2941 acres to be sprayed)

**Application Rate.** 2 Gal spray/Acre (water with 2 Oz of AirexDC® & 10 Oz of Tordon®)

**Ground Speed:** 200 Knots

**Total Acres:** 2941

**10. SPRAY MIXING AND LOADING:**

**a. Composition of Each Gallon:**

(1) 5 Ounces of Tordon® 22K

(2) 1 Ounce of AirexDC® Drift Retardant

(3) 122 Ounces of Water

**b. First Load** (4 Tanks of 425 Gallons Each + Sump of 70 Gallons)

(1) Fill to 425 Gal Water/Tank using the pump on the water tanker truck.

This is done by putting the filler hose into the rear tank with all tanks open to the common sump.  
Total water in tanks = 1700 Gal.

(2) 70 Gal/Water in Sump

(3) Total Water Added = 1,770 Gallons

(4) Upload 17.25 Gal/Tordon® 22K/Tank (69 Gallons Total for 4 Tanks + sump) with the ULV uploading system.

Add 3.5 GalAirexDC®/Tank (14 Gallons Total for 4 Tanks + sump) while agitating approximately 15 min

(6) Total Quantity Mix. 1853 Gallons

**c. Subsequent Loads** (2)

(1) Fill to 425 Gal/Water/Tank. Total Water = 1700 Gal

(2) Add 16.5 Gal/Tordon 22K/Tank. Total Tordon 22K = 66 Gal

(3) Add 3.25 Gal AirexDC®/Tank. Total AirexDC® = 13 Gal

(4) Total quantity Mix. 1779 Gallons (does not include 70 Gal already mixed in Sump)

**d. Final** (fourth) Load

(1) Fill to 253 Gal/Water/Tank. Total Water = 1012 Gal (or as necessary determined by PMP)

(2) Add 10 Gal/Tordon 22K/Tank. Total Tordon 22K = 40 Gal

(3) Add 2 Gal AirexDC®/Tank. Total AirexDC® = 8 Gal

(4) Total quantity Mix. 1060 Gallons (does not include 70 Gal already mixed in Sump)

**e. Total gallons of spray mixture for the spray project is 5412. Tordon 22K required is 211 Gal. AirexDC® required is 41 Gal.**

f. Mixing Time/Load. Agitate by recirculating each mix for approximately 15 minutes.

**11. SPRAY MONITORING OR TESTING: Performed by the CPMPs**

**NOTES:**

Ideal to have westerly wind to spray west boundary.

Ideal to have easterly wind to spray east boundary.

(November winds expected to be predominately from the north)

**12. Quarters: JTR Rate Lodging/\$60 Meals/\$28**

**Fairfield Inn \$60+tax, (785) 823-6900 FAX (785) 823-0996)/Debbie**

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

FROM: 757 AS/DOS ((b) (6)) 1531; FAX 346-1616)

SUBJECT: Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT  
Annual Weed Control Spray Mission on the Utah Test and Training Range (UTTR)

1. **Capability:** Two aircraft will be required for this mission. Two Spray aircraft are available 21-29 Sep 01 in support of the Hill AFB mission request. Support aircraft available 21 & 28/29 Sep in support of the mission.

2. **Concept of Operations:**

a. **21 Sep (Friday):**

0730 Show at KYNG  
0810 Pre-Mission Briefing  
0830 LM's released to assist in loading aircraft  
1005 Spray aircraft 99105 Take-Off KYNG  
1010 Spray aircraft 99108 Take-Off KYNG  
1015 Support Aircraft 19142 Take-Off KYNG  
1330 Land LFI  
1345 Safety Brief

b. **22 Sep (Saturday) – 28 Sep (Friday):**

**(Range times 0700-1400, 22-28 Sep 01)**

0500 Ground Support Team departs for UTTR  
0515 FEs, Crew Chiefs, & Spray MX report and Mix/Load Chemical  
0700-1400 Target areas sprayed as designated by PMP

c. **26 Sep (Wed):** Weather back-up.

d. **27 & 28 Sep Thu & Fri):** Flush and clean up day.  
Schedule of daily events will be determined by the Mission Commander as required.

e. **28 Sep (Fri):** Clean up; Support Aircraft returns to Hill AFB

f. **29 Sep (Sat):**

0800 Aircrew report for duty  
0830 All personnel report  
1000-1015 Spray Aircrafts & Support aircraft take-off  
1700-1800 Mission completed all personnel and aircraft arrive at KYNG

3. **Spray Parameters and Sequencing:** (See attached Operational Schedule)
4. **Mission Commander:** Lt Col (b) (6)
5. Support required at Hill AFB and the UTTR has been completed.

(b) (6) Lt Col, USAFR  
Aerial Application Director  
757 AS/DOS

**16. SEQUENCING:**

**a.** Target sequencing will be determined by UTTR personnel based upon EOD clearance schedule. All spray turns will be made south of Base Leg Knoll when spraying Targets 21, 24, and 23 to allow for maximum utilization of Eagle Range.

**b.** Whenever possible, two targets will be treated on one pass. This will necessitate having two separate ground-monitoring and marking parties.

**c.** When winds blow directly from one side of the target to the middle of the target, ground monitors will direct the "dress" up of the target edges.

**d. Spraying Priorities:**

- (1) Wildcat Demarcation Line 4 passes (West to East & East to West)
- (2) Target 21
- (2) Target 24
- (3) Target 23

**e. Multiple-Target Alignments.**

- (1) The west edge of Target 23 lines up 1/4 mile west of the west edge of Target 21.
- (2) The west edge of Target 24 lines up with the west edge of Target 21.
- (3) When treating Targets 21 and 23 together on the same pass, treat the western-most stake on Target 23 and stake 139 on Target 21. If treating the east edge of Target 23, start with stake 90 on Target 21. When treating Targets 23 and 21 on the same passes, use stakes 90-139 on Target 21. Be sure to save treatment of stakes 90-139 on Target 21 until treating Targets 21 and 23 together.
- (4) When treating Targets 21 and 24 together, treat the west edge of Target 24 while aligned with stake 89 on Target 21. Be sure to save stakes 45-89 on Target 21 to treat concurrently with Target 13.
- (5) Target 13 should be treated concurrently with stake 45 on Target 21 and those stakes to the east of stake 45.

## **17. GENERAL TARGET INFORMATION:**

### **a. Target 21:**

- (1) Dimensions: 4,980' X 7,770'
- (2) Acreage: 888
- (3) Acres Sprayed in 2000: 801
- (4) 2000 Aircraft Loads: 18,869 Gal
- (5) Sorties: 14
- (6) Passes (35' Swath): 138
- (7) Spray-On Time/Pass: 23 Seconds
- (8) Spray Heading: 00/180

### **b. Target 23:**

- (1) Dimensions: 1,493' X 4,514'
- (2) Acreage: 155
- (3) Acres Sprayed in 1998: 155
- (4) 1998 Aircraft Loads: 3,565 Gal
- (5) 1998 Passes: 48
- (6) Aircraft Heading: 00/180
- (7) Spray-On Time/Pass: 13.5 Seconds

### **c. Target 24:**

- (1) Dimensions: 1,600' X 6,080'
- (2) Acreage: 223
- (3) Acres Sprayed in 2000: 218
- (4) 2000 Aircraft Loads: 5,263 Gal
- (5) Sorties: 6
- (6) Passes: 41
- (7) Spray-On Time/Pass: 18 Seconds
- (8) Spray Heading: 00/180

## **18. PLANNED SEQUENCE OF EVENTS: Hill AFB Tower Control and Runway Hours 0620L**

**NOTE: Scheduling reflects no weather or maintenance delays.**

**21 Sep (Friday):**

0800L: Report

1005-1015L: 1005, Spray #1 A/C , 1010, Spray #2 A/C & 1015 Support A/C Take-off

1330L: Hill

**ALL TIMES MAY BE ADJUSTED BY MISSION COMMANDER.**

**DUTY DAY FOR CIVILIANS WILL BE STD DAY (8,9,10 HOURS).**

**MILITARY STATUS PERSONNEL WILL WORK AS**

**REQUIRED WITHIN CREW REST CONSTRAINTS.**

**Tower Control, Runway & Airfield hours start at 0700L**

**RANGE TIMES: 0700-1400 each day (22-28 SEP)**

**END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE MIX.**

**ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS PRE-**

**FLIGHTED FOR THE NEXT DAY OR RELEASED BY THE AIRCRAFT**

**COMMANDER.**

**22 Sep (Sat):** (First Spray Sortie, Range Times 0700-1400, 22-28 Sep)

0430L: Ground Support personnel depart for UTTR

0500L: Spray Maintenance start on first full day of mission and adjust as directed

0616L: Sunrise (see attach Sunrise/Sunset Chart)

0700-1300L: Spray Targets as directed

**23-26 Sep (Sun-Wed):** Using 22 Sep schedule spray UTTR Targets as directed by the Mission Commander or Ground Support Director

**27 Sep (Thu):** Weather Back-up/Spray Characterization for Mt Home AFB Oct Mission

**28 Sep (Fri):** Clean-Up; Support Aircraft arrives at Hill AFB

**29 Sep (Saturday):** All personnel and aircraft return to YNG

0800L: All Aircrew report

0830L: All Personnel report

1000L: Spray Aircraft Takes Off Hill AFB

1015L: Support A/C Takes off Hill AFB

1700L: Spray Lands YNG

1715L: Support A/C Lands YNG

## **19. CALCULATIONS:**

**a. FEET/SECOND:**

6,076.1 FT/NAUT MI X 200 N/HR / 60 MIN/HR / 60 SEC/MIN

<< 337.55 FEET PER SECOND >>

**b. ACRES TREATED/MINUTE:**

35 FOOT SWATH x 337.55 FT/SEC X 60 SEC/MIN

<< 708,855 SQUARE FEET PER MINUTE >>

708,855 SQ FT/MIN / 43,560 SQ FT/AC

<< 16.27 ACRES PER MINUTE >>

**c. SPRAY-ON TIME/LOAD:**

1,750 GALLONS/LOAD / 366.1 GAL/MIN = 4.78 MIN/LOAD

OR 4 MIN 47 SEC/LOAD OR 287 SEC/LOAD

## **UTTR GEOGRAPHIC LOCATION AND TARGET DIMENSIONS**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

**TARGET 13.** The target is located east of and between targets 23 and 24. Target 13 is three concentric circles. The spray area is 2000 feet in diameter and contains approximately 72 acres. Orientation is generally N-S, although exact spray lines will depend on marker set-up.

**TARGET 21.** The target is the most northerly of the southern group. Target is a large, rectangular area 5000' X 7800'. Orientation is NNE-SSW using right patterns of SSW-NNE using left patterns. Target and surrounding terrain are flat.

**TARGET 22.** Target is located approximately three N.M. N.E. of CBU Valley. Target is a rectangle 2400' X 3700'. To assist in identification, Target 1, a circular target, is located immediately SE of 22. Target orientation is SE to NW with left patterns.

**TARGET 23.** Target is located about three N.M. SSW of Target 21. Target 23 is a rectangle approximately 1850' X 4500'. Terrain is flat. Target orientation is NNE-SSW using right patterns or SSW-NNE using left patterns.

**TARGET 24.** Target is located about one N.M. SSW of Target 23. Target 24 is a 1500' X 6000' rectangle. Orientation is the same as Target 21. Terrain is flat.

**TARGET 26.** Personnel from MMETA, or 6501st RS will be aboard aircraft to assist in identification and orientation of target. Target is located west of Target 21. Target is rectangle 100' X 6000'. Terrain is flat and can be flown as desired.

**CBU VALLEY.** CBU Valley is located on the northeast corner of the range. Spray line is oriented northwest/southwest (320/140). Spray can be accomplished both directions with turn around over the lake bed northwest and at the head of the valley southeast. Alternatively, spray will be northwest using left patterns. The ground rises gradually to the southeast of the target requiring higher power going southeast, lower going northwest.

**EAGLE TARGET.** Eagle is located southwest of CBU Valley and approximately six NM northwest of Target 21. Targets are the run-in areas to the strafing targets and the bombing targets. Spray line from the northeast run-ins is 023, and spray line for the west run-ins is 293. The centerline is marked by a row of tires. Bombing run-ins are triangular 5200' X 600' at the wide end and 50' at the narrow end. Orientation is northeast to southwest on one and northwest to southeast to the other.

**BIG POPPA.** Big Poppa is a circle 3250' in diameter located N.E. of CBU Valley. Orientation of spray lines is SSW to NNE. The target is dished with higher terrain on the east side and northeast quadrant. Off the target, the terrain rises rapidly to the east. Leaving the northeast quadrant, there is a ridge line about 150' - 200' high to overfly. Patterns are left hand.

**WILDCAT MOUNTAIN.** Target is a simulated airfield located about 30 NM southwest of the northern end of Cedar Mountain. The spray area consists of a runway, parallel taxiway and parking ramp. The runway is 200' X 10,200' the Orientation is NE to SW with left patterns. Target area is flat but the terrain rises rapidly to the west.

# **SPRAY OPERATIONAL SCHEDULE**

## **UTAH TEST AND TRAINING RANGE MISSION**

### **21-29 SEPTEMBER 2001**

21 Sep – Spray #1 A/C #99105 0800 Report Time; 1005 Take Off Arrive @ Hill AFB 1330L

21 Sep – Spray #2 A/C #99108 0800 Report Time; 1010 Take Off Arrive @ Hill AFB 1330L

21 Sep - Support A/C #923021 0800 Report Time; 1015 Take Off; ARV @ Hill AFB 1330L

## 16. SEQUENCING:

a. Target sequencing will be determined by UTTR personnel based upon EOD clearance schedule. All spray turns will be made south of Base Leg Knoll when spraying Targets 21, 24, and 23 to allow for maximum utilization of Eagle Range.

b. Whenever possible, two targets will be treated on one pass. This will necessitate having two separate ground-monitoring and marking parties.

c. When winds blow directly from one side of the target to the middle of the target, ground monitors will direct the "dress" up of the target edges.

d. **Spraying Priorities:**

- (1) Wildcat Demarcation Line 4 passes (West to East & East to West)
- (2) Target 21
- (2) Target 24
- (3) Target 23

e. **Multiple-Target Alignments.**

- (1) The west edge of Target 23 lines up 1/4 mile west of the west edge of Target 21.
- (2) The west edge of Target 24 lines up with the west edge of Target 21.
- (3) When treating Targets 21 and 23 together on the same pass, treat the western-most stake on Target 23 and stake 139 on Target 21. If treating the east edge of Target 23, start with stake 90 on Target 21. When treating Targets 23 and 21 on the same passes, use stakes 90-139 on Target 21. Be sure to save treatment of stakes 90-139 on Target 21 until treating Targets 21 and 23 together.
- (4) When treating Targets 21 and 24 together, treat the west edge of Target 24 while aligned with stake 89 on Target 21. Be sure to save stakes 45-89 on Target 21 to treat concurrently with Target 13.
- (5) Target 13 should be treated concurrently with stake 45 on Target 21 and those stakes to the east of stake 45.

## 17. GENERAL TARGET INFORMATION:

a. **Target 21:**

- (1) Dimensions: 4,980' X 7,770'
- (2) Acreage: 888
- (3) Acres Sprayed in 2000: 801
- (4) 2000 Aircraft Loads: 18,869 Gal
- (5) Sorties: 14
- (6) Passes (35' Swath): 138

(7) Spray-On Time/Pass: 23 Seconds

(8) Spray Heading: 00/180

**b. Target 23:**

(1) Dimensions: 1,493' X 4,514'

(2) Acreage: 155

(3) Acres Sprayed in 1998: 155

(4) 1998 Aircraft Loads: 3,565 Gal

(5) 1998 Passes: 48

(6) Aircraft Heading: 00/180

(7) Spray-On Time/Pass: 13.5 Seconds

**c. Target 24:**

(1) Dimensions: 1,600' X 6,080'

(2) Acreage: 223

(3) Acres Sprayed in 2000: 218

(4) 2000 Aircraft Loads: 5,263 Gal

(5) Sorties: 6

(6) Passes: 41

(7) Spray-On Time/Pass: 18 Seconds

(8) Spray Heading: 00/180

**18. PLANNED SEQUENCE OF EVENTS: Hill AFB Tower Control and Runway Hours 0620L**

**NOTE: Scheduling reflects no weather or maintenance delays.**

**21 Sep (Friday):**

0800L: Report

1005-1015L: 1005, Spray #1 A/C , 1010, Spray #2 A/C & 1015 Support A/C Take-off

1330L: Hill

**ALL TIMES MAY BE ADJUSTED BY MISSION COMMANDER.**

**DUTY DAY FOR CIVILIANS WILL BE STD DAY (8,9,10 HOURS).**

**MILITARY STATUS PERSONNEL WILL WORK AS**

**REQUIRED WITHIN CREW REST CONSTRAINTS.**

**Tower Control, Runway & Airfield hours start at 0700L**

**RANGE TIMES: 0700-1400 each day (22-28 SEP)**

**END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE MIX.**

**ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS**

**PRE-FLIGHTED FOR THE NEXT DAY OR RELEASED BY THE AIRCRAFT COMMANDER.**

**22 Sep (Sat):** (First Spray Sortie, Range Times 0700-1400, 22-28 Sep)

0430L: Ground Support personnel depart for UTTR

0500L: Spray Maintenance start on first full day of mission and adjust as directed

0616L: Sunrise (see attach Sunrise/Sunset Chart)

0700-1300L: Spray Targets as directed

**23-26 Sep (Sun-Wed):** Using 22 Sep schedule spray UTTR Targets as directed by the Mission Commander or Ground Support Director

**27 Sep (Thu):** Weather Back-up/Spray Characterization for Mt Home AFB Oct Mission

**28 Sep (Fri):** Clean-Up; Support Aircraft arrives at Hill AFB

**29 Sep (Saturday):** All personnel and aircraft return to YNG

0800L: All Aircrew report

0830L: All Personnel report

1000L: Spray Aircraft Takes Off Hill AFB

1015L: Support A/C Takes off Hill AFB

1700L: Spray Lands YNG

1715L: Support A/C Lands YNG

## **19. CALCULATIONS:**

### **a. FEET/SECOND:**

$6,076.1 \text{ FT/NAUT MI} \times 200 \text{ N/HR} / 60 \text{ MIN/HR} / 60 \text{ SEC/MIN}$

$<< 337.55 \text{ FEET PER SECOND} >>$

### **b. ACRES TREATED/MINUTE:**

$35 \text{ FOOT SWATH} \times 337.55 \text{ FT/SEC} \times 60 \text{ SEC/MIN}$

$<< 708,855 \text{ SQUARE FEET PER MINUTE} >>$

$708,855 \text{ SQ FT/MIN} / 43,560 \text{ SQ FT/AC}$

$<< 16.27 \text{ ACRES PER MINUTE} >>$

### **c. SPRAY-ON TIME/LOAD:**

$1,750 \text{ GALLONS/LOAD} / 366.1 \text{ GAL/MIN} = 4.78 \text{ MIN/LOAD}$

$\text{OR } 4 \text{ MIN } 47 \text{ SEC/LOAD OR } 287 \text{ SEC/LOAD}$

## **UTTR GEOGRAPHIC LOCATION AND TARGET DIMENSIONS**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

**TARGET 13.** The target is located east of and between targets 23 and 24. Target 13 is three concentric circles. The spray area is 2000 feet in diameter and contains approximately 72 acres. Orientation is generally N-S, although exact spray lines will depend on marker set-up.

**TARGET 21.** The target is the most northerly of the southern group. Target is a large, rectangular area 5000' X 7800'. Orientation is NNE-SSW using right patterns of SSW-NNE using left patterns. Target and surrounding terrain are flat.

**TARGET 22.** Target is located approximately three N.M. N.E. of CBU Valley. Target is a rectangle 2400' X 3700'. To assist in identification, Target 1, a circular target, is located immediately SE of 22. Target orientation is SE to NW with left patterns.

**TARGET 23.** Target is located about three N.M. SSW of Target 21. Target 23 is a rectangle approximately 1850' X 4500'. Terrain is flat. Target orientation is NNE-SSW using right patterns or SSW-NNE using left patterns.

**TARGET 24.** Target is located about one N.M. SSW of Target 23. Target 24 is a 1500' X 6000' rectangle. Orientation is the same as Target 21. Terrain is flat.

**TARGET 26.** Personnel from MMETA, or 6501st RS will be aboard aircraft to assist in identification and orientation of target. Target is located west of Target 21. Target is rectangle 100' X 6000'. Terrain is flat and can be flown as desired.

**CBU VALLEY.** CBU Valley is located on the northeast corner of the range. Spray line is oriented northwest/southwest (320/140). Spray can be accomplished both directions with turn around over the lake bed northwest and at the head of the valley southeast. Alternatively, spray will be northwest using left patterns. The ground rises gradually to the southeast of the target requiring higher power going southeast, lower going northwest.

**EAGLE TARGET.** Eagle is located southwest of CBU Valley and approximately six NM northwest of Target 21. Targets are the run-in areas to the strafing targets and the bombing targets. Spray line from the northeast run-ins is 023, and spray line for the west run-ins is 293. The centerline is marked by a row of tires. Bombing run-ins are triangular 5200' X 600' at the wide end and 50' at the narrow end. Orientation is northeast to southwest on one and northwest to southeast to the other.

**BIG POPPA.** Big Poppa is a circle 3250' in diameter located N.E. of CBU Valley. Orientation of spray lines is SSW to NNE. The target is dishd with higher terrain on the east side and northeast quadrant. Off the target, the terrain rises rapidly to the east. Leaving the northeast quadrant, there is a ridge line about 150' - 200' high to overfly. Patterns are left hand.

**WILDCAT MOUNTAIN.** Target is a simulated airfield located about 30 NM southwest of the northern end of Cedar Mountain. The spray area consists of a runway, parallel taxiway and parking ramp. The runway is 200' X 10,200' the Orientation is NE to SW with left patterns. Target area is flat but the terrain rises rapidly to the west.

**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S**  
**POST-MISSION REPORT (replaces AFRC Form 55)**  
**PARRIS ISLAND MCRD, SC 22-25 JUN 2009**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 22-25 June 2009
- c. Purpose of Application: Mosquito Control
- d. Application Date/s: 24 June 2009
- e. Time/s of Application (Local): 1915-2105
- f. Acres Treated: 7,122
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6)  
Environmental/Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 23 Jun 2009
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 24 Jun; Assistant Chief of Staff,  
Installations and Logistics, COL (b) (6) briefed by Maj (b) (6)
- k. Mission Identifier: QZNRKA465173

**2. OPERATIONAL:**

- a. **Mission Commander:** Maj (b) (6) (b) (6)
- b. **Aircrew:**
  - (1) Pilots: Maj (b) (6) (b) (6) Capt (b) (6) (b) (6)
  - (2) Navigators: Maj (b) (6)
  - (3) Flight Engineers: MSgt (b) (6)
  - (4) Spray Operators: MSgt (b) (6) (b) (6) MSgt (b) (6)
- c. **Maintenance:**
  - (1) Spray Maintenance: TSgt (b) (6) TSgt (b) (6) , TSgt (b) (6)  
(b) (6)
  - (2) Crew Chiefs: SSgt (b) (6) , SRA (b) (6)
  - (3) Avionics: MSgt (b) (6)
- d. **Entomologist:** Maj (b) (6) (b) (6)
- e. **Flying Data:**
  - (1) Spray Sorties/Hours: 1/1.8
  - (2) Ferry Sorties/Hours: 2/4.1

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 60 gal Dibrom<sup>®</sup>
- e. Gallons Pesticide Applied: 54 gal
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 10 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 1.0 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 8 oriented straight down
- f. Pressure: 55 p.s.i.
- g. Flow Rate: 3.6 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 1000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS (19 Apr):**

- a. Winds (Direction/Speed):
  - (1) Ground: 190-210°/3-5 Knots
  - (2) Release Altitude: 220° /5-7 Knots
- b. Temperature (Degrees Fahrenheit): 82° F
- c. Relative Humidity: 65%
- d. Cloud Cover: Partly Cloudy
- e. Source: Ground observations at the MCRD Rifle Range/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: visual observation of aircraft course (GPS)
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito and midge numbers were determined prior to spraying using CO<sub>2</sub>-baited traps. Post-spray monitoring was carried out by Natural Resources personnel.
  - (2) Results: Average reduction at 2 trap sites (golf course & village housing) was 90% two days following application, marked improvement was reported by other personnel on the Depot.

**8. REMARKS:** Significant rainfall promoted mosquito numbers to rise in June. A corrosion problem with a drum of Dibrom forced extended handling procedures and the window of opportunity was lost on 23 June which forced that evenings sortie to cancel. The following evening, environmental conditions were excellent and the entire installation was treated (Attachment 1). The mission was subsequently carried out without additional incident and the Parris Island Environmental staff reported good control. The next application is projected for the second week in October and we plan to test the efficacy of a new formulation of pesticide against biting midges.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## AVON PARK, FL

22-26 FEB 2009

**PURPOSE/OBJECTIVE/BENEFIT:** Flight testing of spray deposition and spray flow pattern around LAIRCM equipped aircraft. Aerial Spray flight training for aircrews over Avon Park Bombing range.

### 1. 910 AW PARTICIPANTS:

#### a. Aircrew:

1. Pilots: Maj (b) (6) (b) (6) Capt (b) (6) (b) (6) Maj (b) (6) , Maj (b) (6)
2. Navigators: Maj (b) (6) (b) (6)
3. Flight Engineers: Msgt (b) (6)

#### b. Spray Operators: Sms (b) (6) , Msgt (b) (6) Msgt (b) (6)

#### c. Maintenance:

1. Spray Maintenance: Smsgt (b) (6) Msgt (b) (6) , Msgt (b) (6)
2. Avionics: Ssgt (b) (6) , Ssgt (b) (6)
3. Crew Chiefs: Tsg (b) (6) , SRA (b) (6)
4. Engine Shop: Tsg (b) (6) (b) (6)

#### d. Entomologist/Ground Support: None

### 2. SCHEDULE: (All time Local) All times and sequence of events are subject to change depending upon the needs of the testing and range.

22 Feb (Monday):

1100: Show time

1300: Depart KYNG

1600: Land KAGR

23 Feb (Tuesday): Range schedule 1200-1500

Ground testing of QIS: Complete remaining ground testing items as required. Upon completion of ground items, flight testing of the EMI will be conducted at MCF. Upon completion of testing, the crew will depart out to KAGR

0800 or TBA Show Time

1200 or TBA Take Off

1500 Land Time

**\*\*Schedule for remainder of week will be flexible depending upon the QIS testing.**

24 Feb (Wednesday): Range schedule 1200-1500

1000 Show at aircraft

1200 T/O MCF

**\*\* Training at Avon Park Range or overwater**

1500 Land MCF

25 Feb (Thursday): Range schedule 1200-1500

1000: Show time

1200: Takeoff KAGR

1500: Land KAGR

26 Feb (Friday):

0900: Show time

1100: Depart KAGR

1430: Land KYNG

**3. ITEMS TO TAKE:**

**9. DECON DEMO SCHEDULE/PARAMETERS:**

**Time ON TARGET:** 1030L/24 MAY 00

**10. SPRAY CONFIGURATION:**

a. MASS: SP2G

b. Aircraft Number: 9105

**11. SPRAY PARAMATERS:**

a. Ground Speed. 170 Knots

b. Altitude AGL. 100 Feet

c. Swath Width. 35 Feet

d. Application Rate. 50.6 gal/acre

e. Total Spray-On Time/Load. 80 Seconds

f. Spray-On Time/Pass. 15 Seconds

g. Number of Passes/Load. 5

**12. MASS:**

a. Configuration

(1) Nozzles. 3 Inch Ultra-High Volume (UHV) Fuselage (1 each side.)

(2) Nozzle Orientation. Straight Back

b. Flow Rate. 700 Gal/Min

c. Spray Mix 24 MAY 2000: 950 Gal Water, 2 Gal StaPut in each tank  
(4 gal total), 320 Oz Hi-Light Dye, 70 Gal Water in sump.

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. **Installation Sprayed:** Hill AFB/UTTR UT
- b. **Mission Duration:** 22-26 Sep 01
- c. **Purpose of Application:** Weed Control over designated UTTR targets
- d. **Date/s and Time/s of Application (Zulu):** See Spray Operations Summary Chart
- e. **Acres Treated:** See Spray Operations Summary Chart
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** (b) (6), Aerial Spray Coordinator, Hill/UTTR AFB, DSN (b) (6); LTC (b) (6) LTC (b) (6) (b) (6)
- g. **Date Spray Map Last Approved:** 11 Sep 01
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 21 Sep 01/1500, Base OPS, LtC (b) (6) (b) (6)

## 2. OPERATIONAL:

- a. **Mission Commander:** LTC (b) (6) (b) (6)
- b. **Certified PMP (Category 11):** LTC (b) (6) LTC (b) (6) (b) (6) MAJ (b) (6) (b) (6)
- c. **Aircrew:**
  - (1) Aircraft CMDR & Pilots: LTC (b) (6) (b) (6) MAJ (b) (6) (b) (6)
  - (2) Co-Pilots: MAJ (b) (6) (b) (6) CPT (b) (6) (b) (6) (21-24 Sep), CPT (b) (6) (b) (6) (24-29 Sep)
  - (2) Navigators: LTC (b) (6) (b) (6) Maj (b) (6), LTC (b) (6) (21-24 Sep), LTC (b) (6) (21-22 Sep)
  - (4) Flight Engineer(s): SMS (b) (6), MSG (b) (6)
  - (5) Spray Operators: CMS (b) (6), MSG (b) (6), MSG (b) (6), MSG (b) (6), TSG (b) (6) (b) (6)
- d. **Safety Briefer:** LTC (b) (6)
- e. **Spray Maintenance/Pesticide Loaders:** MSG (b) (6) (b) (6) TSG (b) (6); TSG Michael Lamantia, TSG (b) (6)
- f. **Spray Ground Monitors:** LTC (b) (6) LTC (b) (6) (b) (6) MAJ (b) (6) (b) (6) CPT (b) (6) Fadem, (b) (6)
- g. **Crew Chief(s):** TSG (b) (6) SSG (b) (6) SRA (b) (6) SRA (b) (6)
- h. **910 MA/LG Superv:** CMS (b) (6)
- i. **Com Nav:** TSG (b) (6)
- j. **AGE:** TSG (b) (6)
- k. **Propulsion:** TSG (b) (6)
- l. **R & R:** TSG (b) (6)
- m. **Hydraulic:** MSG (b) (6)
- n. **Environmental/Electric:** TSG (b) (6)
- o. **Engine Shop:** SMS (b) (6)
- p. **Flying Data:** (See Spray Data Charts)
  - (1) Spray A/C 899105: Ferry: 2, Hours: 11.2; Spray Sorties: 10, Hours: 15.3
  - (2) Spray A/C 899106: Ferry: 2, Hours: 10.8; Spray Sorties: 9, Hours: 13.6
  - (3) Support A/C 923021, 21 Sep, Ferry: 2, Hours: 6.5
  - (4) Support A/C 919141, 28-29 Sep, Ferry: 2, Hours: 10.4

**3. PESTICIDE:**

- a. **Trade Name (% Active Ingredient):** Krovar I DF®
- b. **EPA Registration Number:** 352-505
- c. **Formulation Sprayed:** 10 pounds in 22.5 gallons of water per acre
- d. **Gallons Pesticide Loaded:** 29,110
- e. **Gallons Pesticide Applied:** 29,110
- f. **Gallons and Name Diluent Used:** 28,812 gallons water
- g. **Other Additives Used:** 15 Gal Foam Fighter F®, 114 Gal StaPut®, 45 Gal Hi-Light® Dye
- h. **Application Rate:** 22.5 Gal per acre

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** C-130H 899105 and 899106
- b. **Spray System (Modules Used) and System ID #:** 3 and 5.
- c. **Spray System Configuration:** SP-3G
- d. **Nozzle Type/Size:** 3 inch herbicide nozzles.
- e. **Nozzle Orientation & Number Used:** 2, oriented straight back.
- f. **Pressure:** 40 psi
- g. **Flow Rate:** 366 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 35 feet.
- b. **Spray Off Set:** Variable, determined by spotters on the ground.
- c. **Spray Release Altitude:** 100 feet.
- d. **Ground Speed:** 200 knots.

**6. WEATHER OBSERVATIONS (Ground Wind Direction (degrees)/Speed (knots):**

- a. **22 Sep:** North – 310-010/4-15
- b. **23 Sep:** 21-300/0-9
- c. **24 Sep:** 140-200/0-4
- d. **25 Sep:** 100-330/0-10

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Pattern:**
  - (1) Technique/s Used: Ground Observation
  - (2) Results: Spray off-set determined each day
- b. **Effectiveness:**
  - (1) Technique/s Used: Visual field observations
  - (2) Results: (See Remarks)

**8. REMARKS:** Ground coverage was complete with no skips in sprayed areas. The east side of Target 23 was not sprayed. Efficacy will be determined by field observation next spring.

**CERTIFIED PEST MANAGEMENT PROFESSIONAL**

(b) (6)

**PhD, Lt Col, USAFR**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 22-27 APR 2001

#### 1. 910 AW PARTICIPANTS:

- a. **Aircrew:**
- |     |                           |             |             |
|-----|---------------------------|-------------|-------------|
| (1) | <u>Mission Commander:</u> | LTC         |             |
| (2) | <u>Pilots:</u>            | LTC         |             |
| (3) | <u>Navigators:</u>        | Maj (b) (6) | Maj (b) (6) |
| (3) | <u>Flight Engineers:</u>  | MSG         |             |
| (5) | <u>Spray Operators:</u>   | MSG         |             |
- b. **Maintenance:**
- |     |                           |     |  |
|-----|---------------------------|-----|--|
| (1) | <u>Spray Maintenance:</u> | SMS |  |
| (2) | <u>Crew Chiefs:</u>       | TSG |  |
| (3) | <u>Avionics:</u>          | TSG |  |
- c. **Pest Management Professionals/Entomologist:** Lt (b) (6) (b) (6)
- d. **Ground Safety:** MSG

#### 2. PLANNED SEQUENCE OF EVENTS: (All times local)

- 22 APR (Sunday):
- |       |                 |              |
|-------|-----------------|--------------|
| 1500: | Take off KYNG   |              |
| 1700: | Land KNBC       | <u>PPR #</u> |
| 1730: | Safety Briefing |              |
- 23 APR (Monday):
- |       |  |  |
|-------|--|--|
| 1400: | Load Chemical  |  |
| 1630: | Take off KNBC  |  |
| :     | Sunset (see <a href="http://www.beaufort.usmc.mil">www.beaufort.usmc.mil</a> for weather, etc) |  |
| 1900: | Land KNBC  |  |
- 24 APR (Tuesday):
- |       |               |  |
|-------|---------------|--|

| 1900: | Land KNBC     |  |
- 27 APR (Friday):
- |       |               |  |
|-------|---------------|--|
| 1200: | Take off KNBC |  |
| 1400: | Land KYNG     |  |

#### 3. ITEMS TO TAKE:

- a. **Entomologist/CPMP:**
- |     |   |
|-----|---|
| (1) | Wind Gauge, Compass, and Signal Mirrors |
| (2) | UHF/VHF Radios and Cellular Phone       |
| (3) | Pesticide Safety Binder                 |
| (4) | Calibration Tables                      |
| (5) | DGPS Computers & Maps                   |
| (6) | Oil Sensitive Papers                    |
| (7) | Trackstar Equipment                     |
- b. **Navigators:**
- |     |      |
|-----|------|
| (1) | Maps |
|-----|------|

- (2) Templates
- (3) Laptop Computer
- c. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (4) Loading and Clean-up Equipment and Supplies

#### 4. **SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- e. **Differential GPS:** Installed
- f. **Aircraft:** 0910?

#### 5. **SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: HAN
- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

#### 6. **AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission and 25 gallons HAN in flush tank.

#### 7. **PPR REQUIREMENTS:** Required: PPR #

#### 8. **PARKING PLAN:** Beaufort MCAS Ramp

#### 9. **AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

#### 10. **TRANSPORTATION:** Parris Island will provide two vans for transportation to and from quarters and for messing. There will be an additional vehicle for the CPMP/Entomologists.

#### 11. **SPRAY MONITORING OR TESTING:** Ground monitoring by CPMP and Parris Island MCRD Project Coordinator.

#### 12. **CONTACTS:**

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **PARRIS ISLAND MCRD, SC**

### **22-27 OCT 2001**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Mission Commander: Maj (b) (6) (b) (6)
- (2) Pilots: Capt (b) (6) (b) (6) Capt (b) (6) (b) (6)
- (3) Navigators: Maj (b) (6) (b) (6)
  - (a) Flight Engineers: MSG (b) (6)
  - (a) Spray Operators: MSG (b) (6) CMS (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: MSG (b) (6) TSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) , TSG (b) (6)
- (3) Avionics: TSG (b) (6)

##### **c. Pest Management Professionals/Entomologist:** Capt (b) (6) (b) (6) Maj (b) (6) (b) (6) LtC (b) (6)

#### **2. PLANNED SEQUENCE OF EVENTS:** (All times local)

##### **22 OCT (Monday):**

0900: Show Time  
1100: Take off KYNG  
1300: Land KNBC  
1330: Safety Briefing

**PPR # 295-01**

##### **23 OCT (Tuesday):**

1300: Show Time  
1400: Load Chemical  
1630: Take off KNBC  
1841: Sunset  
1900: Land KNBC

##### **24 OCT (Wednesday):** Weather Back-up, see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

1300: Show Time  
1400: Load Chemical  
1645: Take off KNBC  
1840: Sunset  
1900: Land KNBC

##### **25 OCT (Thursday):**

1300: Show Time  
1400: Load Chemical  
1645: Take off KNBC  
1839: Sunset  
1900: Land KNBC

##### **26 OCT (Friday):** Weather Back-up,

1300: Show Time  
1400: Load Chemical  
1645: Take off KNBC  
1838: Sunset  
1900: Land KNBC

##### **27 OCT (Saturday):**

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Entomologist/CPMP:**
  - (1) Wind Gauge, Compass, and Signal Mirrors
  - (2) UHF/VHF Radios and Cellular Phone
  - (3) Pesticide Safety Binder
  - (4) Calibration Tables
  - (5) DGPS Computers & Maps
  - (6) Oil Sensitive Papers
  - (7) Trackstar Equipment
- b. **Navigators:**
  - (1) Maps
  - (2) Templates
  - (3) Laptop Computer
- c. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (4) Loading and Clean-up Equipment and Supplies

### 4. SPRAY CONFIGURATION: SP-2G

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 09107 **Mission Identifier:** QZNRKA10728295

### 5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: HAN
- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

### 6. AMOUNT OF SPRAY MATERIAL AVAILABLE: Load 60 gallons of Dibrom® Concentrate per mission and 25 gallons HAN in flush tank.

### 7. PPR REQUIREMENTS: Required: 295-01

### 8. PARKING PLAN: Beaufort MCAS Ramp

### 9. AIR TO GROUND RADIO FREQUENCIES:

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

### 10. TRANSPORTATION: Parris Island will provide two vans for transportation to and from quarters and for messing. There will be an additional vehicle for the CPMP/Entomologists. Enterprise Rental Agency: (843) 525-0494

### 11. SPRAY MONITORING OR TESTING: Ground monitoring by CPMP and Parris Island MCRD Project Coordinator.

## 12. CONTACTS :

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 22-26 Oct 2001
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 23 Oct 2001
- e. Time/s of Application (Local): 1645-1905
- f. Acres Treated: 6912
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) Environmental/Spray Coordinator, DSN(b) (6)
- h. Date Spray Map Last Approved: 22 October 2001
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 22 Oct, Office of the Assistant Chief of Staff I & L, MAJ (b) (6) & CAPT (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: MAJ (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): LTC (b) (6) MAJ (b) (6) (b) (6) & CAPT (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: MAJ (b) (6) (b) (6)
  - (2) Co-pilot: CAPT (b) (6) (b) (6)
  - (3) Navigator(s): MAJ (b) (6) (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: CMS (b) (6) & MSG (b) (6)
- d. Safety Briefer: CAPT (b) (6) (b) (6)
- e. Spray Maintenance: MSG (b) (6) TSG (b) (6), TSG (b) (6), & TSG (b) (6)
- f. Spray Ground Monitors: LTC (b) (6) MAJ (b) (6) (b) (6) & CAPT (b) (6) (b) (6)
- g. Crew Chiefs: MSG (b) (6) & TSG (b) (6)
- h. Avionics: TSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties: 1 Hours: 2.4
  - (2) Ferry Sorties: 2 Hours: 4.3

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup>
- e. Gallons Pesticide Applied: 54 Gal Dibrom<sup>®</sup>
- f. Gallons and Name of Flush Used: 15 gal VM & P NAPHTHA
- g. Other Additives Used: None
- h. Application Rate: 1 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99107
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 40 psi
- g. Flow Rate: 3.6 GPM

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off Set: 3000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 160-180°
  - (1) Ground: 4-7 Knots
  - (2) Release Altitude: 6-11 Knots
- b. Temperature (Degrees Fahrenheit): 79 °F
- c. Dew Point: 68 °F
- d. Cloud Cover: Clear
- e. Source: Ground observations at the MCRD Marina and Rifle Range

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1 meter dowels
  - (2) Results: Good coverage throughout spray area, as determined by OSC cards and spinners.
- b. Effectiveness:
  - (1) Technique/s Used: Landing counts taken at 3 localities prior and after application. Trapping midges using carbon-dioxide baited traps.
  - (2) Results: Following the first spray sortie, no biting midges were found at any of the survey locations. Traps counts were reduced by 80-100% following the spray.

**8. REMARKS:** Environmental conditions were excellent during this application and it showed in the results. Mosquitoes (primarily *Aedes taeniorhynchus*) rivaled midges in overall numbers prior to the spray and thus, were a significant portion of the pest population. Trap counts were radically lower on the day following the spray and landing count surveys showed a 100% reduction in midge activity. Cooler weather and high winds (12-20 knots) kept midge activity very low through the end of the week. Our next application at Parris Island MCRD is scheduled for 7-11 Apr 2002.

**MEMORANDUM FOR HQ AFRC/DOOM**

15 FEB 08

**FROM:** 757 AS/DOS

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT  
Annual Weed Control Spray Mission on the Utah Test and Training Range (UTTR)

1. **Capability:** Two aircraft will be available 12-21 Mar 08 for the requested spray mission. The 910AW will provide mission support 12-13 & 20-21 Mar 08.

2. **Concept of Operations:**

**12 Mar (Wednesday)**

0800 Show at KYNG  
0815 Mission Brief  
1000 Spray01 Take off (Crew Per the flying schedule, not spray plan)  
1005 Spray02 Take off (Crew Per the flying schedule, not spray plan)  
1010 Support aircraft Take off  
1330, 1335, 1340 Arrive Hill AFB  
1400 Mission Commander/Safety/Flight operations/ and In-processing Briefings

**13-14 Mar (First Spray Sortie, Range Times (1500Z-2000Z))**

0600: Show time, aircrew 1 (Crew according to spray plan)  
0630: Show time, aircrew 2 (Crew according to spray plan)  
0743: Sunrise  
0800: Spray 01 Take off  
0830: Spray 02 Take off  
0800-1700: Spray 01 & 02 spray UTTR Targets as directed by the MC

**15-16 Mar- Weather back up only; Hill range closed unless needed due to delays**

**17-19 Mar (First Spray Sortie, Range Times (1500Z-2000Z))**

0600: Show time, aircrew 1 (Crew according to spray plan)  
0630: Show time, aircrew 2 (Crew according to spray plan)  
0735: Sunrise  
0800: Spray 01 Take off  
0830: Spray 02 Take off  
0800-1700: Spray 01 & 02 spray UTTR Targets as directed by the MC

**20 Mar : Finish spray areas/Weather Back-up/Flush, Clean Up;**

0600: Show time, aircrew Spray 1  
0630: Show time, aircrew Spray 2  
0732: Sunrise (see attach Sunrise/Sunset Chart in mission folders)  
0800: Spray 01 Take off  
0830: Spray 02 Take off

**\*\*Flush sorties, plan 2 sorties each pending spray mx approval on clean tanks**

**21 Mar (Thur) All aircrew and aircraft return to YNG**

0700: All Aircrew report  
0730: All Personnel report  
0900: Spray01 Takes off  
0905: Spray02 Takes off  
0910: Support airplane Takes off  
1600: Lands YNG

3. **Spray Parameters and Sequencing:**

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24 and Nord LZ)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

4. **Mission Commander:** Lt Col (b) (6) (b) (6)

5. **Aircraft Commanders:** Maj's (b) (6) (b) (6) Capt (b) (6) (b) (6)

6. **Support required at Hill AFB and the UTTR has been completed.**

(b) (6) (b) (6) Capt, USAFR  
Assistant Chief of Aerial Spray

**SPRAY OPERATIONAL SCHEDULE**  
**UTAH TEST AND TRAINING RANGE MISSION**  
**22-29 MARCH 2007 CH 2**

22 Mar A/C #105, MI: QZNRKA464081 Report Time: 0800 Take Off: 1000 Arrive: 1330L  
22 Mar A/C #106, MI: QZNRKA465081 Report Time: 0805 Take Off: 1005 Arrive: 1335L  
22 Mar Supt A/C #103, QDNRKA898081 Report Time: 0810 Take Off: 1010 Arrive: 1340L

**PURPOSE/BENEFIT/OBJECTIVE:** To control *Halogeton* on Targets 21, 24 and Nord LZ at the Utah Test and Training Range (UTTR).

**1. AIRCREW 1: AC 106-In place CALL SIGN: SPRAY 06**

- a. **Pilots:** MAJ (b) (6) (b) (6) Maj (b) (6) , Capt (b) (6) , \*Maj (b) (6)
- b. **Navigators:** LtCol (b) (6) ,
- c. **Flight Engineers:** MSgt (b) (6)
- d. **Spray Operators:** MSgt (b) (6) , MSgt (b) (6) (b) (6) MSgt (b) (6)
- e. **Crew Chiefs:** MSgt (b) (6)

**AIRCREW 2: AC 105-In place CALL SIGN: SPRAY 07**

- a. **Pilots:** Capt (b) (6) (b) (6) Capt (b) (6) , 1Lt (b) (6) (b) (6)
- b. **Navigator:** Maj (b) (6) (b) (6) LTC (b) (6) (b) (6)
- c. **Flight Engineer:** MSgt (b) (6)
- d. **Spray Operators:** MSgt (b) (6) , MSgt (b) (6) (b) (6)
- e. **Crew Chiefs:** TSgt (b) (6)

**2. MISSION SUPPORT:**

- a. **Mission Commander:** LTC (b) (6) (b) (6)
  - 1. Makes final decision on all changes to the schedule
  - 2. Confirm all hotel information is correct upon check in (to prevent extra hotel rooms on our account)
  - 3. Report flight data to AFRC (See contact info on reporting sheet)
  - 4. Plan minimum of 2-3 sorties per day/plane to accomplish in 3 days with 1 additional day for wx back up. Final day is for flush and rinse. (Need 18 sorties for these areas)
- b. **Entomologists:** Maj (b) (6) (b) (6) Capt (b) (6)
- c. **ARMS:** TSgt (b) (6)

**3. UTTR GROUND PARTY:**

- a. **Entomologist/Pest Management Professional(s):** \*In place \*Maj (b) (6) (b) (6) \*LTC (b) (6)  
SMSgt (b) (6) (b) (6)

**4. MAINTENANCE: \*In place**

- a. **910 MX Supervisor:** \*SMSgt (b) (6) In place 18 Mar 07
- b. **910 Spray MX:** \* TSgt (b) (6) (b) (6) - In place 18 Mar 07, MSgt (b) (6) , TSgt (b) (6) TSgt
- c. **Instruments/Avionics:** TSgt (b) (6) , TSgt (b) (6)
- d. **Hydraulics/Electrician:** MSgt (b) (6) , TSgt (b) (6)
- e. **Engine/Propulsion:** TSgt (b) (6)

- 5. **COMM:** MSgt (b) (6) , MSgt (b) (6) (b) (6) TSgt (b) (6) ,  
TSgt (b) (6)

**6. IN-BRIEFING: (UTTR Staff)**

- a. **When/Time:** 22 Mar 2006 , 1400-1430
- b. **Where:** Building 777
- c. **Who:** EVERYONE!! Do Not leave Forestry area until cleared out by the MC.
- d. **Briefing Plan**
  - a. Billeting- See item **16.g** below
  - b. Vehicles- See item **16.h** below
  - c. Schedule of events
  - d. Weather call
  - e. Cellular Phone numbers for all personnel

**7. PLANNED SEQUENCE OF EVENTS:** Hill AFB Tower Control and Runway Hours 24/7

**NOTES:**

- 1. Scheduling reflects no weather or maintenance delays. In the event of weather or maintenance delays, the missions will be adjusted as required. ALL TIMES SUBJECT TO ADJUSTMENT BY MISSION COMMANDER
- 2. DUTY DAY FOR CIVILIANS WILL BE AS REQUIRED WITHIN CREW REST CONSTRAINTS.
- 3. Tower Control, Runway & Airfield hours 24/7
- 4. UTTR RANGE TIMES: 0600-1500L
- 5. END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE MIX.  
ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS PRE-FLIGHT COMPLETE AND RELEASED BY THE MISSION COMMANDER.

**22 Mar (Thursday)**

- 0800 Show at KYNG
- 0815 Mission Brief
- 1000 Vader 06 Take off (Crew Per the flying schedule, not spray plan)
- 1005 Vader 05 Take off (Crew Per the flying schedule, not spray plan)
- 1010 Vader 03 AFRC Support aircraft Take off
- 1330, 1335, 1340 Arrive Hill AFB
- 1400 Mission Commander/Safety Briefing/In-processing briefings: No one leaves for Hotels or anywhere else without the approval of the mission commander. (All mission details must be completed prior to departing the spray building:
  - 1. Rental cars assigned/picked up
  - 2. Personnel and luggage transportation arranged
  - 3. Cell Phone roster complete
  - 4. UTTR Range operation brief

**23-27 Mar (Fri-Tue):** (First Spray Sortie, **Range Times 0700-1500** (1200Z-2100Z))

- 0530: Spray Maintenance starts on first full day of mission and adjust as directed
- 0530: Show time, aircrew Spray 06 (Crew according to spray plan)
- 0600: Show time, aircrew Spray 05 (Crew according to spray plan)
- 0727: Sunrise (see attach Sunrise/Sunset Chart in mission folders)
- 0715: Spray 06 Take off
- 0745: Spray 05 Take off
- 0730-1700: Spray 06 & 05 spray UTTR Targets as directed by the MC
- \*NOTE: Spray 06 & 05 will alternate show & take off each day**
- \*NOTE: First crew to base ops files flight plans and gets weather brief for both crews**

**28 Mar (Wed):** Finish spray areas/Weather Back-up/Flush, Clean Up; Support Aircraft arrives

- 0530: Show time, aircrew Spray 06
- 0600: Show time, aircrew Spray 05
- 0727: Sunrise (see attach Sunrise/Sunset Chart in mission folders)
- 0715: Spray 06 Take off
- 0745: Spray 05 Take off
- \*\*Flush sorties, plan 2 sorties each pending spray mx approval on clean tanks**

**29 Mar (Thur)** All personnel and aircraft return to YNG  
 0700: All Aircrew report  
 0730: All Personnel report  
 0900: Aircraft 06 Takes off  
 0905: Aircraft 05 Takes off  
 0910: Support airplane Takes off  
 1600: Lands YNG

# 8. ITEMS TO TAKE:

- a. **PMP:**
  - (1) Project Notebook with Recording Sheets and Maps
  - (2) Laptop Computer and Batteries
  - (3) 2 Compasses and Stop Watch
  - (4) 2 Signal Mirrors and 2 Spot Lights
  - (5) Measuring Wheels and Tape
  - (6) Entomologists' Tool Kit
  - (7) UHF/VHF Radios and VHF Radios
  - (8) Cellular Phone
- b. **Mission Commander:** Mission Folder, Cellular Phone
- c. **Navigator:** Maps
- d. **Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Herbicide Safety Binder
  - (4) Safety Equipment
- e. **Maintenance:** Applicable Equipment

# 9. SPRAY CONFIGURATION: SP3G

- a. Two Aircraft, Systems 3 and 5
- b. MASS Modules 1, 2 and 3
- c. UHV Fuselage booms oriented straight back

# 10. PPR REQUIREMENTS: All required, see Form 33 setup sheets for aircraft

106- WL2207  
 105- WL2208  
 103- WL2209

# 11. PARKING PLAN: Forestry (Alert) Ramp – on East side of the airfield.

# 12. RADIO FREQUENCIES:

- **Clover Range Control:** UHF 285.65, 275.9, 361.4 (p)
- **Eagle Tower:** UHF 351.0; Mawk 4 (b) (6)
- **Diddle Knoll & Spray Ops Freq:** UHF 398.1 (Primary), 383.2 (Back-up); VHF 134.1, 118.45
- **Spray Inter plane:** UHF 237.05 / VHF 138.375
- **Spray Ground to Spray Maintenance:** See Iridium Phones
- **Base OPS:** 139.3
- **HF Operations:** Designated by Comm. See attached list.
- **Communications Ground Freq:** LMR nets are trunked at Hill.

## - IRIDIUM PHONES

- Mission Commander (b) (6)
- Maintenance Supervisor (b) (6)
- Entomologist/Pest Management (b) (6)

# 13. SPRAY PARAMETERS:

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)

- c. **Acreage:** 1,283 Acres (Targets 21, 24 and a couple passes on Nord LZ)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

**14. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

**b. When:** Start at 0530 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be furnished by installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**15. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**16. CONTACTS:** Commercial prefix (801) 777-XXXX; DSN 777-xxxx

**a. 388<sup>th</sup> RANS/RSO, Range Control Officer/Installation Spray Coordinator:**

(b) (6) 6066 Cedar Lane, Bldg 1274S; (b) (6) FAX: 9205  
Cell Phone #(b) (6)

**17. SEQUENCING:**

- a. Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling.
- b. Spray ops aircraft must stay south of Base Leg Knoll during turns on north run on Target 21. Coordination with range control is essential to assure that this portion of the range is released for air operations.
- c. When winds blow directly from one side of the target to the middle of the target or during early morning when wind speed is low, ground monitors will direct the “dress up” of the target edges.
- d. **Spraying Priorities:**
  - (1) Target 21
  - (2) Target 24
  - (3) NORDLZ

**f. Multiple-Target Alignments for Possible Future Operations.**

Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required).

- (1) The west edges of Targets 21 & 24 are contiguous and can be treated on the same pass with a spray-off gap between targets.

**18. GENERAL TARGET INFORMATION:**

- a. **Target 21:**
  - (1) Dimensions: 4,980' X 7,770'
  - (2) Acreage: 888
  - (3) Acres Sprayed in 2004: 888
  - (4) Aircraft Loads: 18,869 Gal
  - (5) Sorties: 17
  - (6) Passes (35' Swath): 157
  - (7) Spray-On Time/Pass: 23 Seconds
  - (8) Spray Heading: 00/180
- b. **Target 24:**
  - (1) Dimensions: 1,600' X 6,080'
  - (2) Acreage: 223
  - (3) Acres Sprayed in 2004: 223
  - (4) Aircraft Loads: 5,263 Gal
  - (5) Sorties: 7
  - (6) Passes (35' Swath): 47
  - (7) Spray-On Time/Pass: 18 Seconds
  - (8) Spray Heading: 00/180

- c. **Nord LZ-** Any remaining chemical will be used to touch up target

### **UTTR GEOGRAPHIC LOCATION**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

## 910 AW AERIAL SPRAY--PMP'S POST-MISSION REPORT UTAH TEST AND TRAINING RANGE 22-29 MARCH 2007

### 1. MISSION BASICS:

- a. **Installation Sprayed:** Utah Test and Training Range, UT
- b. **Mission Duration:** 22-29 March 2007
- c. **Purpose of Application:** Weed control on UTTR targets; facilitate UXO recovery
- d. **Application Dates:** See Summary Spray Chart
- e. **Acres Treated:** 1,222 acres
- f. **Project Coordinator/s (Name/Rank, Title, Phone #):** (b) (6) Aerial Spray Coordinator, Hill/UTTR AFB, DSN (b) (6)
- g. **Date Spray Map Last Approved:** 22 March 2007
- h. **Date of Waste Generation Letter:** N/A
- i. **Installation In-Briefing: (When/Where/Briefer/s):** 22 March 2007, LtCol (b) (6) (b) (6)

### 2. OPERATIONAL:

- a. **Mission Commander:** LtCol (b) (6) (b) (6)
- b. **Pesticide mixing and loading (Certified PMPs):** Maj (b) (6) (b) (6) Capt (b) (6)
- c. **Aircrew:**  
AIRCREW 1: AC 106  
Pilots: MAJ (b) (6) (b) (6) Maj (b) (6) Capt (b) (6) Maj (b) (6) (b) (6)  
Navigators: LtCol (b) (6)  
Flight Engineers: MSgt (b) (6)  
Spray Operators: MSgt (b) (6) MSgt (b) (6) (b) (6) MSgt (b) (6)  
Crew Chiefs: MSgt (b) (6)  
  
AIRCREW 2:  
Pilots: Capt (b) (6) (b) (6) Capt (b) (6) 1Lt (b) (6) (b) (6)  
Navigator: Maj (b) (6) (b) (6)

Spray Operators: MSgt (b) (6) MSgt (b) (6) (b) (6) (b) (6)  
Crew Chiefs: TSgt (b) (6)  
  
d. **Safety Briefer:** Maj (b) (6) (b) (6)  
e. **Spray Maintenance/Pesticide Loaders:** SMSgt (b) (6) TSgt (b) (6) (b) (6) MSgt (b) (6) TSgt (b) (6) TSgt (b) (6) TSgt (b) (6) (b) (6)  
f. **Spray Ground Monitors:** LtCol (b) (6) Maj (b) (6) (b) (6) SMSgt (b) (6)  
g. **ARMS:** TSgt (b) (6)

- h. **Avionics:** TSgt (b) (6) , TSgt (b) (6)
- i. **Engine/Propulsion:** TSgt (b) (6)
- j. **Hydraulics/Electrician:** MSgt (b) (6) , TSgt (b) (6)
- k. **Flying Data:** (See Spray Data Charts)
  - (1) Spray A/C 899105, 899106: Ferry: 4, Hours: 23.4; Spray Sorties: 15, Hours: 21.9
  - (2) Support A/C Ferry: 2, Hours: 11.6

**3. PESTICIDE:**

- a. **Trade Name (% Active Ingredient):** Krovar DF® (40% Bromacil: 40% Diuron)
- b. **EPA Registration Number:** 352-505
- c. **Formulation Sprayed:** 10 pounds in 22.5 gallons of water per acre
- d. **Gallons Pesticide Loaded:** 1,801 gallons/sortie average (11,830 Pounds of Krovar: Active Ingredients: 4,732 Bromacil and 4,732 lbs Diuron )
- e. **Gallons Pesticide Applied:** 25,210 gallons as formulated
- f. **Gallons of water used as a diluent:** 26,175 gallons
- g. **Other Additives Used:** 119 Gal No Foam, 112.4 Gal StaPut®, 442.6 Gal Hi-Light® Dye
- h. **Application Rate:** 22.5 Gal per acre

**4. APPLICATION EQUIPMENT:**

- a. **Aircraft Type (Tail Number):** C-130H 899105 and 909106
- b. **Spray System (Modules Used) and System ID #:** 3 and 5
- c. **Spray System Configuration:** SP-3G
- d. **Nozzle Type/Size:** 3 inch herbicide nozzles
- e. **Nozzle Orientation & Number Used:** 2, oriented straight back.
- f. **Pressure:** 40 psi
- g. **Flow Rate:** 366 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. **Swath Width Flown:** 35 feet
- b. **Spray Off Set:** Variable, determined by PMP on the target
- c. **Spray Release Altitude:** 100 feet
- d. **Ground Speed:** 200 knots

**6. WEATHER OBSERVATIONS Ground Wind Direction (degrees)/Speed (knots):**

- a. **23 Mar:** 340-360/3-9
- b. **24 Mar:** 345-040/3-11
- c. **25 Mar:** 315-020/2-6
- d. **26 Mar:** 200-090/1-10

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. **Deposition Monitoring:**
  - (1) Technique/s Used: Ground/Aircraft direct observation of dye markings

(2) Results: Spray off-set determined via direct observation of application coverage

**b. Effectiveness:**

(1) Technique/s Used: Visual field observations of coverage and amount of spring vegetation germination.

(2) Results: (See Remarks)

- 8. REMARKS:** Ground coverage was complete with no skips in sprayed areas. Targets 21 & 24 were covered quickly and efficiently with the combined cooperation of experienced aircrew and ground monitors. While spray maintenance personnel repaired the engines and pumps on the mixing spheres prior to the start of the mission, one of the spheres still had a minor leak by the end of the week. This underscores the need for new equipment as the spherical mixers have already outlived their expected lifespan. Funding has been identified for building new mixing apparatus and they will hopefully be available in 2008. The formula mixing process was accomplished in a timely and proficient manner by the synergistic cooperation of 757th entomologists supplementing an adept team of pest controllers from the 75 CES/CESE, headed by (b) (6) (b) (6). Incoming Spray Coordinators (b) (6) and (b) (6) (388 RANS/RSO) did an excellent job securing the success of this mission via effective pre-coordination on all spray issues; a sincere thank you from the Air Force Spray Flight. New herbicides will be considered for use in the coming seasons as we intend to invite chemical companies to provide material for test plots on the UTTR this fall or next spring. This action will be coordinated between 757 AS/DOS, 75 CES/CESE, and 388 RANS/RSO.

3 APR 07

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Parris Island MCRD SC for Control of Sand fly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft available on 23-26 Apr 07

3. Concept of Operations:

**23 APR (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

Check Rifle Range: None

1500: Show Time

1700: Take Off YNG

1900: Land KNBC

**24 APR (Tuesday):** Wx back up, training,

1300: Safety Briefing

1430: Installation in-brief

1500: Showtime

1530: Load Chemical/Wx Decision

1745: Take off KNBC (Training, Then Spray)

1959: Sunset

**25 APR (Wednesday):** Wx back up, training, or redeploy to YNG

1500: Showtime

1530: Load Chemical/Wx Decision

1745: Take off KNBC (Training, then Spray)

1959: Sunset

**26 APR (Thursday):**

1000: Show Time

1200: Take off KNBC

1400: Land KYNG

4. Spray Parameters:

a. Acreage: 7,500 Acres (Only areas determined by PMP)

b. Altitude: 150 Ft AGL

c. Pesticide: Dibrom® Concentrate

d. Deploy: 2.0 Hrs

e. Re-Deploy: 2.0 Hrs

f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Maj (b) (6) (c) (6)

6. Mission Commander: Maj (b) (6) (c) (6)

7. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) DSN (b) (6) .

Installations and Logistics Conference Rm, (b) (6) (b) (6) briefed by Col (b) (6) Maj  
(b) (6)

**2. OPERATIONAL:**

- a. **Mission Commander:** Col (b) (6) (b) (6)
- b. **Aircrew:**
  - (1) Pilots: Maj (b) (6) (b) (6) Maj (b) (6) Capt (b) (6)
  - (2) Navigators: LTC (b) (6) , LTC (b) (6)
  - (3) Flight Engineers: Msgt (b) (6) , Msgt (b) (6)
  - (4) Spray Operators: Msgt (b) (6) Msgt (b) (6)
- b. **Maintenance:**
  - (1) Spray Maintenance: TSG (b) (6) TSG (b) (6) TSG (b) (6)
  - (2) Crew Chiefs: TSG (b) (6) , TSG (b) (6)
  - (3) Avionics: SRA (b) (6)
- c. **Entomologist:** Maj (b) (6) (b) (6)
- d. **Flying Data:**
  - (1) Spray Sorties/Hours: 3/3.2 (1 training sortie 0.8 hrs 24 Apr)
  - (2) Ferry Sorties/Hours: 2/4.0

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup> (24 Apr)
- e. Gallons Pesticide Applied: 2 gal (24 Apr); 58 gal (25 Apr)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 8 gal/marvel oil
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre (24 Apr); 1.0 oz/acre (25Apr)

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan (24 Apr); 8008 (25Apr)
- e. Nozzle Orientation & Number Used: 10 oriented straight down (24 Apr); 12 (25 Apr)
- f. Pressure: 20-25 p.s.i.
- g. Flow Rate: 2.7 gallons per minute (24 Apr); 5.4 gallons per minute (25 Apr)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000' (24 Apr); 1500' (25 Apr)
- b. Spray Off-set: dependent on wind speed
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 180°/3 knots (24 Apr); 140-160°/3 knots
  - (2) Release Altitude: 180°/10 knots (24 Apr); 130°/10 (25 Apr)
- b. Temperature (Degrees Fahrenheit): 74°F dropping to 65°F (24 Apr); 72-68°F (25 Apr)
- c. Relative Humidity: 67% (24 Apr); 74% (25 Apr)
- d. Cloud Cover: Partly Cloudy (24 Apr); Cloudy (25 Apr)
- e. Source: Ground observations at the MCRD Rifle Range/Marina/Aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: visual observation of aircraft course (GPS); 2 Bald eagle's nests were given a 0.5 mile radius for no-fly
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Weekly collections of midges and mosquitoes with light traps and landing rates in regions frequented by recruits involved in training
  - (2) Results: Control efficacy will be determined by Parris Island MCRD staff.

**8. REMARKS:** The 24 Apr application was aborted because of the lack of either analog or digital indication of flow rate. The problem was overcome by increasing the flow rate. Swath width was increased to 1,500 feet and 1 oz/acre for a flow rate of 5.4 gallons per minute; additionally, 8008 nozzles were used. Biting midge (sandflea) activity levels were moderate based on personal observations; deer flies (*Chrysops* sp.) were also present. The application was confined to 1.25 hours prior to sunset to correspond with peak flight period of the pests. The path of the aircraft on 25 April, is shown in attachment 1. Two bald eagle nest sites were purposefully avoided by a 0.5 radius. The relative efficacy will be determined by trap collections but highly conducive meteorological conditions suggest that the result should be excellent. Post flight data were called into the AFRC Command Post after each mission. Six calls each day were received from home station and AFRC Command Post looking for updated information after deployed crew had already called-in the information in question. The next Parris Island mission is scheduled for 30 April 2007.

- (3) Pesticide Safety Binder

**c. Navigators:**

- (1) Maps
- (2) Templates

**d. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 10 flat fan 8005 nozzles (5 per side) oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 90-9107
- f. **Mission Identifier:** QZNRKA030113

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 2.72 gallons/Minute

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

- Air Traffic Control: 119.05 Beaufort MCAS TWR
- Hilton Head Arpt: 118.8 CTAF
- Beaufort Co Arpt: 122.7 UNI
- Spray Ground: Primary 392.2; Secondary 340.8**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC:** (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 23-26 JUL 2007

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota and the city of Grand Forks if requested.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: LtCol (b) (6) Capt (b) (6)
- 2) Navigators: LtCol (b) (6) (b) (6) Maj (b) (6)
- 3) Flight Engineers: MSgt (b) (6) , TSgt (b) (6)
- 4) Spray Operators: SMSgt (b) (6) , MSgt (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: TSgt (b) (6) , TSgt (b) (6) , SSgt (b) (6) , Sra (b) (6)
- 2) Crew Chief(s): Sra (b) (6) , SSgt (b) (6)
- 3) Avionics: SSgt (b) (6)

##### c. Entomologists/Ground Support: Maj (b) (6) (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 23 JUL (Monday)

1100: Showtime  
1300: Depart KYNG  
1500: Land KRDR/Safety Briefing  
1600: Spray In Brief (CPMP, MC, AC).  
1830: Load Chemical/WX Decision  
2000: Takeoff KRDR  
2115: Sunset

##### 24 JUL (Tuesday):

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
2114: Sunset

##### 25 JUL (Wednesday):

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
2113: Sunset

##### 26 JUL (Thursday):

0945: Show time  
1145: Depart KRDR  
1545 Land KYNG

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 VHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit, Trakstar Receiver and Antenna
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

#### 4. PPR: 072301AM

#### 5. RADIO FREQUENCIES: Air To Ground Primary VHF 123.45 KRDR Tower 124.9 V; Grand Forks International 118.4 V

#### 6. CONFIGURATION: SP2G

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down
- c. **Number:** ULV: 14 8005s total (7 each side)
- e. **Aircraft:** 89-9106
- f. **Mission Identifier:** QZNRKA624204

**7. SPRAY PARAMETERS:**

**a. Adulticide**

- (1) **Area to be treated:** 11488 acres (Grand Forks AFB) and city of Grand Forks
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION:** four SIX-PACKS provided

**10. LODGING:** On base billeting.

**Billeting :** DSN 362-7200 or (701) 594-8431, FAX 362-3069  
 -- Prime Knight DSN 362-3844 or (701) 747-3844  
 16 Rooms Reserved

**11. CONTACTS:**

**a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

- (1) **Base Operations:** Airfield Manager DSN 362-4409  
 -- DSN 362-xxxx or (701) 747-xxxx20
- (2) **Pest Management NCOIC:** TSgt (b) (6) , DSN (b) (6) FAX 3432)

Vienna OH 44473-5926

18 Aug 04

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497-0198)

FROM: 757 AS/DOS

SUBJECT: Ch1, Capability and Concept of Operations for Aerial Spray at Grand Forks AFB ND,

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft Available 23-27 Aug 04

**3. Concept of Operations:**

**23 Aug (Monday)**

0800: Show at KYNG  
1000: Depart KYNG  
1200: Land KRDR/Safety Briefing  
1430: In-brief

**24 Aug (Tuesday)**

1530: Show time  
1700: Take off KRDR (Adulticide Spray Sortie)  
2026: Sunset

**25 Aug (Wednesday)**

1530: Show time  
1700: Take off KRDR (Adulticide Spray Sortie)  
2024: Sunset

**26 Aug (Thursday)**

1530: Show time  
1700: Take Off KRDR (Adulticide Spray Sortie)  
2022: Sunset

**27 Aug (Friday)**

0900: Show time  
1100: Depart KRDR  
1600: Land KYNG

**4. Spray Parameters:**

**a. Altitude:** 150' AGL for Adulticide swath when no trees are present.

- b. **Swath Width.** 2000 feet for ULV or as determined by the PMP
- c. **Flow Rate.** 4.35 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet<sup>®</sup>), ULV
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 40,000 acres
- g. **Mission Identifier:** QZNRKA906234

5. **Mission Commander/Aircraft Commander:** Major (b) (6)5)

6. Support required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6) (b) (6) DSN (b) (6) .

7. HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 23-27 August, 20-04
- c. Purpose of Application: Control nuisance and vector mosquitoes
- d. Application Dates: 24 August
- e. Time/s of Application (Local): 1700
- f. Acres Treated: 7246
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) (b) (6) Environmental Officer, DSN 362-4655
- h. Date Spray Map Last Approved: 23 Aug 2004
- i. Installation In-Briefing: (When/Where/Briefer/s): CE Conference Room, MAJ (b) (6) Maj (b) (6) (b) (6) (b) (6) Capt (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: Maj (b) (6) (5)
- b. Certified PMP/s (Category 11): Maj (b) (6) (b) (6) Capt (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: Maj (b) (6) (5)
  - (2) Pilot(s): Maj (b) (6) (5) LTC (b) (6) (b) (6)
  - (3) Navigator: Maj (b) (6) (6)
  - (4) Flight Engineer: MSG (b) (6)
  - (5) Spray Operators: TSG (b) (6) TSG (b) (6) (b) (6)
- d. Safety Briefer: Capt (b) (6)
- e. Spray Maintenance: TSG (b) (6) TSG (b) (6) TSG (b) (6)
- f. Spray Ground Monitors: Capt (b) (6)
- g. Crew Chiefs: MSG (b) (6) , MSG (b) (6)
- h. Avionics: MSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 1 sorties/ 2.7 hours
  - (2) Ferry Sorties/Hours: 2 sorties/6.5 hours

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-548127
- c. Gallons Pesticide Loaded: 35 Trumpet® EC
- d. Gallons Pesticide Applied: 35 Trumpet® EC
- e. Gallons and Name of Flush Used: 90 gallons water
- f. Other Additives Used: none
- g. Application Rate: 0.6-0.7 oz/acre Trumpet® EC

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 909106 Mission Identification # QZNRKA906234
- b. Spray System (Modules Used) and System ID #: Modules 1 and 2 of SP2G ULV
- c. Spray System Configuration: 2-Module System & Fuselage Booms
- d. Nozzle Number & Orientation Used: 8 nozzles (8008); straight down
- e. Pressure (PSI): 18-41
- f. Flow Rate: 4.36 gallons/minute 2000' swaths

### 5. APPLICATION PARAMETERS:

- a. Swath Width Flown: 2000
- b. Spray Off Set: 2000
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - 1) Ground: 270 degrees at 10 knots
  - 2) Release Altitude: 230 degrees at 12 knots
- b. Temperature (Degrees Fahrenheit): 72°
- c. Cloud Cover: partly cloudy
- d. Relative humidity: 70-80%
- e. Source: Direct observation

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Validation of spray area:
  - (1) Technique/Used: PMP onboard aircraft verified spray area
- b. Effectiveness:
  - (1) Technique/s Used: Trapping of mosquitoes by Public Health and 757 AS personnel
  - (2) Results: Decrease in mosquito activity following application

**8. REMARKS:**

This was a regularly scheduled application at Grand Forks AFB to control adult mosquitoes. Upon arrival mosquito counts were anecdotally low, as public health operations were severely understaffed, and had not been running insect collection traps. Further, uncharacteristically cold weather might have contributed to relatively few instances of mosquito attack. Traps deployed by 757<sup>th</sup> Entomologists indicated nightly mosquito counts in an individual trap at 35 prior to pesticide application, and 2 following application. Further information from public health is pending.

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

FROM: 757 AS/DOS ((b) (6)) ((b) (6)); FAX 346-1616)

SUBJECT: Concept of Operations for Aerial Spray Training at Avon Park AFR/MacDill AFB FL

1. **Purpose/Objectives/Benefits:** This training mission will provide ULV, LV, HV and UHV training for the aircrew, on-hand training for the spray operators and ground training for the spray maintenance personnel. Continuous aerial spray training is required for all spray mission participants.
2. **Capability:** Spray Aircraft Available 23-27 Jul 01.
3. **Concept of Operations:**
  - a. **23 Jul (Monday):**
    - 1030 Show at KYNG
    - 1330 Take-Off KYNG
    - 1700 Land KMCI
    - 1715 Safety Brief
  - b. **24 Jul (Tuesday):** 1200-1400 Range Times Tues, Wed and Thurs
    - 0800 Show Time/Weather Decision/Load Water
    - 1145 Depart LMCF/Call Tower & Fire Department at AGR
    - 1200-1400 Spray water over designated area of the Avon Park Bombing Range
    - 1445 Land KMCF
  - c. **25 Jul (Wednesday):** 1200-1400 Range Times Tues, Wed and Thurs
    - 0800 Show Time/Weather Decision/Load Water
    - 1145 Depart LMCF/Call Tower & Fire Department at AGR
    - 1200-1400 Spray water over designated area of the Avon Park Bombing Range
    - 1445 Land KMCF
  - d. **26 Jul (Thursday):** 1200-1400 Range Times Tues, Wed and Thurs
    - 0800 Show Time/Weather Decision/Load Water
    - 1145 Depart LMCF/Call Tower & Fire Department at AGR
    - 1200-1400 Spray water over designated area of the Avon Park Bombing Range
    - 1445 Land KMCF
  - e. **27 Jul (Friday):**
    - 0830: Report
    - 0900: Out-Briefing
    - 1000: Depart KLFI
    - 1130: Land KYNG

4. **Spray Parameters:**
- a. Acreage: N/A
  - b. Altitude: 150 Ft AGL
  - c. Ground Speed: 200 Knots
  - d. Pesticide: N/A (Training with dyed water only)
  - e. Application Rate: 0.5 Ounce per Acre
  - f. Flow Rate: Approximately 307 Gallons per minute
  - g. Swath Width: 300' swaths over designated area of Avon Park Bombing Range
  - h. System: SP2G – MASS ULV; Modules 1 and 2
  - i. Nozzle Tips/Number/Orientation: Will be determined by Mission Commander.
  - j. Aircraft Tail Number: 99106
  - k. Deploy/Re-Deploy Time: 3.5 hrs
  - l. Spray Time: 2 hrs (or as called by Mission Commander)
5. **Mission Commander:** Major (b) (6) (b) (6)
6. Support required at MacDill AFB and Avon Park Bombing Range AFB have been approved via telephone conversations with MacDill AFB Ops and the Range Manager at Avon Park AFRB.
7. This mission replaces the Langley AFB Mosquito Control Mission (23-29 Jul 01). If you have any questions concerning this mission please contact DSN (b) (6)

(b) (6) (b) (6) Major, USAFR  
Chief, Aerial Spray  
757 AS/DOS

27 July 2001

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

SUBJECT: Aerial Spray Training Mission Report,  
Avon Park AFR/MacDill AFB FL (23-27 July 2001)

**1. PURPOSE.** The primary purpose of this mission was to provide initial and upgrade refresher UHV, HV, LV, ULV training over water and land to the aircrew which also included training on the DGPS. The Spray Maintenance personnel received training on the mixing, loading and downloading procedures.

- a. The Spray Maintenance personnel loaded 1000 gallons of water into the SP2G MASS System for a simulated spray sortie each day.
- b. Five 8008 raindrop nozzles on each side of the wing booms were oriented straight back for the UHV and HV training sorties while one nozzle per side was oriented straight back for the ULV and LV training sorties.
- c. A total of 14.2 Flight Time was logged during this mission.

(1) Total Ferrys: 3    Total Ferry Flight Hours: 7.2  
(2) Total Sorties: 3    Total Sortie Flight Hours: 7.0

**2. TRAINING:**

- a. Capt(b) (6) completed spray qualification training in the Navigator's category.
- b. TSG (b) (6) (b) (6) received initial training in the Spray Operator's category.
- c. MSG (b) (6) (b) (6) received initial Spray Maintenance training. TSG (b) (6) (b) (6) received continuation training in the Spray Maintenance category.
- d. The remaining aircrew and participants accomplished currency training as required.

**3. ITINERARY.** The mission departed Youngstown on 23 Jul (1330L), however the aircraft had to return for the transponder to be replaced and proceeded on/or about 1400L to MacDill AFB FL. During this mission the crewmembers worked out of MacDill AFB and flew the C130 over Avon Park AFR Bombing Range for the duration of the training sorties as scheduled.

**4. EXECUTION.** The deployment and briefings went as planned. The in-briefing was with all crewmembers and ground support participants in attendance. No problems were experienced during the mission.

**5. SUPPORT.** Contract quarters and rental car support were excellent. MacDill AFB and Avon Park AFR personnel were exceptionally cooperative.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft available 23-26 JUL 2007

**3. Concept of Operations:**

**23 JUL (Monday)**

1100: Showtime  
1300: Depart KRDR  
1500: Land KGFK/Safety Briefing  
1600: Spray In Brief (CPMP, MC, AC).  
1830 Load Chemical/WX Decision  
2000 Takeoff KRDR  
Sunset 2115

**24 JUL (Tuesday):**

1500: Show time for Calibration testing (See note in configuration)  
1830 Load Chemical  
2000: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2115

**25 JUL (Wednesday):**

1730: Show time  
1800 Load Chemical  
2000: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2115

**26 JUL (Thursday):**

1130: Show time  
1330: Take off KGFK  
1730: Land KYNG

**4. Spray Parameters:**

**a. Adulticide**

- (1) **Area to be treated:** 11488 acres (Grand Forks AFB)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**5. Aircraft Commander:** LTC (b) (6)(5)

**6.** Support at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator.

**7.** HQ AFRC/DOOM approval via email.

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 23-27 May 2005
- c. Purpose of Application: Control nuisance and vector mosquitoes (larval stages)
- d. Application Date/s: 24, 25, and 26 May, 2005
- e. Time/s of Application (Zulu): 0925-1015 (24 May); 0650-1000 (25 May); 0820-1455 (26 May)
- f. Acres Treated: 1673.0
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6), Environmental Officer, DSN (b) (6)
- h. Date Spray Map Last Approved: 23 May 2005
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 23 May, 2005 CAPT (b) (6) MAJ (b) (6) COL (b) (6) (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: MAJ (b) (6)
- b. Certified PMP/s (Category 11): CAPT (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: COL (b) (6) (b) (6) LTC (b) (6)
  - (2) CoPilot: CAPT (b) (6) (b) (6) MAJ (b) (6)
  - (3) Navigator(s): MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
- d. Spray Operators: MSG (b) (6), MSG (b) (6) MSG (b) (6) (b) (6)
- e. Safety Briefer: CAPT (b) (6)
- f. Spray Maintenance: MSG (b) (6), TSG (b) (6), SSG (b) (6)
- g. Spray Ground Monitors: CAPT (b) (6)
- h. Crew Chiefs: SRA (b) (6), TSGT (b) (6)
- i. Avionics: MSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 7/6.6
  - (2) Ferry Sorties/Hours: 2/6.0

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Altosid Liquid Larvicide Concentrate (20% methoprene)
- b. EPA Registration Number: Altosid Liquid Larvicide Concentrate 272446
- c. Gallons Pesticide Loaded: 5.678 Gal Altosid® (24 May); 5.678 Gal Altosid® (25 May) Gallons Pesticide Applied: 5.678 Gal Altosid® (25 May); 5.678 Gal Altosid® (26 May) ; 5.678 Gal Altosid® ; Gallons and Name of Flush Used: Water (483 Gallons).
- d. Other Additives Used: AirexDC® drift reduction agent
- e. Application Rate: 0.75 Oz/acre Altosid®

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 9107
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: Raindrop nozzles
- e. Nozzle Orientation & Number Used: 10 straight back
- f. Pressure (PSI): 36-68 (24 May); 41-53 (25 May) & 49-57 (26 May)
- g. Flow Rate: 155-189 gpm (24 May); 184-192 gpm (25 May) & 170-188 gpm (26 May)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 200' LV (24, 25, and 26 May)
- b. Spray Off Set: 200' (24, 25, and 26 May)
- c. Spray Release Altitude: 100'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 310° (24 May); 300° (25 May); 290° (26 May)  
(1) Ground: 8 knots (24 May); 10 knots (25 May); 9 knots (26 May)
- b. Temperature (Degrees Fahrenheit): 45-73° (24-26 May)
- c. Dew Point: 48-54 °F (24-26 May) during applications
- d. Cloud Cover: Mostly Cloudy/ showers (24 May); Mostly Cloudy/ showers (25 May); Partly Cloudy (26 May)
- e. Source: Ground observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. The Grand Forks AFB Environmental officer conducts adult mosquito trapping and larval sampling to determine mosquito densities on base. Prior to the 24-26 May application, no systematized monitoring was conducted, however, increased larval densities within spray blocks was observed by the environmental officer. In addition, larval dip sampling was conducted at 4 locations on the base by the entomologist.
- b. Effectiveness:
  - (1) Technique/s Used: Larval dip samples
  - (2) Results: Pre application averages at the 4 locations ranged from 6 larvae/dip to 215 larvae/dip. The greatest numbers were collected in the swales adjacent to the golf course. Other sampling locations included the ditches to the west of the horse barns, the ditches to the north of the smokehouse, and the area west of the alert pad by the perimeter road. The Grand Forks AFB Environmental section will conduct larval counts in spray blocks that were treated with Altosid® larvicide to determine the insecticide's efficacy.

**8. REMARKS:** This is the fourth spray season at Grand Forks AFB. The use of Low Volume sprays in order to treat mosquito larvae has been accomplished by the 910 AW/757 AS before. Despite the fact that several operational difficulties were encountered, this mission was completed to the satisfaction of the customer. One of the principle difficulties encountered was with the MASS system. Apparently, a flow control valve had been installed incorrectly, resulting in an overpressure which in turn resulted in multiple seal failures. New procedures regarding pre-operational checks have been instituted insuring future incidents of this type may be avoided. Poor weather also contributed to operational difficulties. On 24 May, an attempt was made to spray in a light rain. However, forward visibility was impaired and further spray activity was aborted.

## 3. ITEMS TO TAKE:

### a. Entomologist/CPMP:

- (1) Wind Gauge, Compass, and Signal Mirrors
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder, Calibration Tables, and Oil Sensitive Papers
- (4) DGPS Computers, Trackstar Equipment, and Maps

### b. Navigators:

- (1) Maps
- (2) Templates
- (3) Laptop Computer

### c. Spray Maintenance:

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

## 4. SPRAY CONFIGURATION: SP-2G

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft Tail #:** 09106
- f. **Mission Identifier:** QZNRKA082

## 5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)

### a. **Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: HAN

- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

## 6. AMOUNT OF SPRAY MATERIAL AVAILABLE: Load 60 gallons of Dibrom® Concentrate per sortie and 25 gallons of HAN in flush tank.

## 7. PPR REQUIREMENTS: Required: PPR #

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft 89-9107 available 23-28 May 05

**3. Concept of Operations:**

**23 MAY (Monday)**

0900: Show at KYNG  
1100: Depart KYNG  
1300: Land KRDR/Safety Briefing  
1500: Spray In Brief

**24 MAY (Tuesday):**

0430: Show time  
0600: Take off KGFK (Larvicide Spray Sortie)  
0539: Sunrise

**25 MAY (Wednesday):**

0430: Show time  
0600: Take off KGKF (Larvicide Spray Sortie)  
0538: Sunrise

**26 MAY (Thursday):**

0430: Show time  
0600: Take off KGFK (Larvicide Spray Sortie)  
0537: Sunrise

**27 MAY (Friday):**

0430: Show time  
0600: Take off KGFK (Larvicide Spray Sortie)  
0537: Sunrise

**28 MAY (Saturday):**

0800: Show time  
1000: Take off KGFK  
1400: Land KYNG

#### 4. Spray Parameters:

- a. **Altitude:** 100' AGL for Larvicide swath when no trees are present.
- b. **Swath Width.** 200 feet for LV or as determined by the CPMP
- c. **Flow Rate.** 1.86 gallons/minute LV
- d. **Application Rate.** 0.75 oz/acre Altosid®)
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 1,800 acres

5. **Mission Commander:** Major (b) (6) (b) (6)

6. **Aircraft Commander:** Capt (b) (6) (b) (6)

6. Support including Security Forces for the aircraft parking at Grand Forks Intl Airport due to Grand Forks AFB runway closure required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6) (b) (6) DSN (b) (6) .

7. HQ AFRC/DOOM approval via email.

// Signed //

(b) (6) (b) (6) Maj, USAFR  
AERIAL SPRAY CHIEF

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 23-28 MAY 05

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6) (5)
- (2) Pilots: COL (b) (6) (b) (6) LTC (b) (6) , CPT (b) (6) (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6) MSG (b) (6) (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6) , TSG (b) (6) , MSG (b) (6)
- (2) Crew Chief(s): TSgt (b) (6) , SRA (b) (6)
- (3) Avionics: MSG (b) (6)

##### c. Entomologists/Ground Support: CPT (b) (6)

#### 2. SCHEDULE: (All Local Times) PPR: N/A

##### 23 MAY (Monday)

0900: Show at KYNG  
1100: Depart KYNG  
1300: Land KRDR/Safety Briefing  
1500: Spray In Brief (CPMP, MC, AC, COL (b) (6))

##### 24 MAY (Tuesday):

0430: Show time  
0600: Take off KGFK (Larvicide Spray Sortie)  
0539: Sunrise

##### 25 MAY (Wednesday):

0430: Show time  
0600: Take off KGFK (Larvicide Spray Sortie)  
0538: Sunrise

##### 26 MAY (Thursday):

0430: Show time  
0600: Take off KGFK (Larvicide Spray Sortie)  
0537: Sunrise

##### 27 MAY (Friday):

0430: Show time  
0600: Take off KGFK (Larvicide Spray Sortie)  
0537: Sunrise

##### 28 MAY (Saturday):

0800: Show time  
1000: Take off KGFK  
1400: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 UHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit, Trakstar Receiver and Antenna

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

**4. PPR: Not Required**

**5. RADIO FREQUENCIES: Air To Ground Primary** UHF 392.2; VHF 123.45  
KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/ Fuselage Booms
- b. Nozzle Tips/Orientation:**  
Larvicide: Raindrop nozzles straight back
- c. Number:**  
Larvicide: fuselage only, 10 total (5 each side) straight back
- d. Booms:** Fuselage
- e. Aircraft:** #9107
- f. Mission Identifier:** QZNRKA288143

**7. SPRAY PARAMETERS:**

- a. Larvicide**
  - (1) **Area to be treated:**
  - (2) **Altitude:** 100' for Larvicide application
  - (3) **Swath Width.** 200 feet
  - (4) **Flow Rate.** 186 gallons/minute
- b. Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)
- c. Ground Speed:** 200 Knots

**8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)**

- a. Composition of each Gallon:**
  - (1) 0.375 ounces of Altosid® 20
  - (2) 0.64 ounces of AirexDC™ drift retardant
  - (3) Water
- b. Typical load:** (2 tanks of 450 gallons each)
  - (1) Fill with 450 gallons of water/tank. Total water in tanks = 900 gal.
  - (2) Total water added = 900 gallons
  - (3) Add 1.33 (1 1/3) gallons of Altosid® per tank (2 2/3 gallons total).
  - (4) 2.5 gal AirexDC per tank (5 Gal total) while agitating approximately 15 min
  - (5) Total quantity mix. 908 gallons
- c. Final Load for complete flush**
  - (1) Fill tanks with the amount of water necessary for a proper system flush
- d. Mixing Instructions:**

SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours;  
always agitate before spraying.

**9. TRANSPORTATION: Some 5 vehicle combination of vans and 6 packs provided by 319 CES. Transportation provided to lodging, vehicles will be picked up there. Col (b) (6) has a staff car.**

**10. CONTACTS:**

- a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

  - e. **27 Jul (Friday):**
    - 1400 Show Time/Weather Decision
    - 1430 Load Chemical
    - 1700 Take-Off KLFI, Spray Areas Designated by PMP
    - 2000 Land KLFI

**f. 28 Jul (Saturday):**

1400 Show Time/Weather Decision  
1430 Load Chemical  
1700 Take-Off KLFI, Spray Areas Designated by PMP  
2000 Land KLFI

**g. 29 Jul (Sunday):**

0830: Report  
0900: Out-Briefing  
1000: Depart KLFI  
1130: Land KYNG

**4. Spray Parameters:**

- a. Acreage: approximately 114,000 Acres
- b. Altitude: 150 Ft AGL
- c. Ground Speed: 200 Knots
- d. Pesticide: Dibrom<sup>®</sup> Concentrate
- e. Application Rate: 0.5 Ounce per Acre
- f. Flow Rate: 1.8 Gal per Minute at Craney Island; 4.5 Gallons per Minute for 2500' swaths and 3.6 Gallons per Minute for 2000' swaths on the Peninsula
- g. Swath Width: 1000' swaths at Craney Island; 2000' to 2500' swaths at Langley AFB designated spray areas
- h. System: SP2G – MASS ULV; Modules 1 and 2
- i. Nozzle Tips/Number/Orientation: 8008/8 oriented straight down for 2500' swaths; 8008/7 oriented straight down for 2000' swaths; 8008/5 oriented straight down for 1000' swaths; if temperatures are above 85 degrees use 8010/6 for 2500' swaths and 2 – 3 for 1000' swaths all oriented straight down.
- j. Aircraft Tail Number: 99106
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Mission Commander: Major (b) (6) (b) (6)**

**6. Support required at Langley AFB has been requested via FAX message.**

**7. If you have any questions concerning this mission please contact DSN (b) (6)**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## MACDILL AFB / AVON PARK, FL

### TRAINING

### 23- 27 JUL 2001

**PURPOSE/OBJECTIVES/BENEFITS:** UHV, HV, LV and standard ULV aerial spray training with dyed water over designated areas on the bombing range.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6) (b) (6)
- (2) Pilot: Maj (b) (6)
- (3) Navigators: Maj (b) (6) , Maj (b) (6) , Capt (b) (6)
- (4) Flight Engineer: MSG (b) (6)
- (5) Spray Operators: TSG (b) (6) , MSG (b) (6) , TSG (b) (6) (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) MSG (b) (6) (b) (6) TSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , SSG (b) (6)
- (3) Avionics: MSG (b) (6)

#### 2. SCHEDULE: (All time Local)

##### 23 Jul (Monday):

**PPR # - 204KG02**

1030: Show at KYNG  
1330: Depart KYNG  
1700: Land KMCF

##### 24 Jul (Tuesday): Range Times 1200-1400 Tuesday, Wednesday & Thursday

0800: Show Time  
1145: Depart KMCF Call Tower and Fire Dept at AGR  
1200-1400: Range Time  
1445: Land KMCF

##### 25 Jul (Wednesday): Range Times 1200-1400 Tuesday, Wednesday & Thursday

0800: Show Time  
1145: Depart KMCF Call Tower and Fire Dept at AGR  
1200-1400: Range Time  
1445: Land MCF

##### 26 Jul (Thursday): Range Times 1200-1400 Tuesday, Wednesday & Thursday

0800: Show Time  
1145: Depart KMCF Call Tower and Fire Dept at AGR  
1200-1400: Range Time  
1445: Land MCF

##### 27 Jul (Friday):

0800: Show Time  
1000: Depart KMCF  
1330: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Navigator:** Maps with “No-Spray” Areas Marked and Laptop Computer
- b. **Certified Pest Management Professionals:** Not Required

### 4. AIR TO GROUND FREQUENCIES:

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497-0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft Available 23-29 May 04

**3. Concept of Operations:**

**23 SEP (Sunday)**

1000: Show at KYNG  
1200: Depart KYNG  
1430: Land KRDR/Safety Briefing  
1530: In-brief

**24 SEP (Monday):**

0539: Sunrise  
0530: Show time  
0640: Take off KRDR (Larvicide Spray Sortie)  
0940: Land KRDR

**25 SEP (Tuesday):**

0538: Sunrise  
0530: Show time  
0640: Take off KRDR (Larvicide Spray Sortie)  
0940: Land KRDR

**26 SEP (Wednesday):**

0537: Sunrise  
0530: Show time  
0640: Take off KRDR (Larvicide Spray Sortie)  
0940: Land KRDR

**27 SEP (Thursday):**

0537: Sunrise  
0530: Show time  
0640: Take off KRDR (Larvicide Spray Sortie)  
0940: Land KRDR

**28 SEP (Friday):**

0536: Sunrise

0530: Show time

0640: Take off KRDR (Larvicide Spray Sortie)

0940: Land KRDR

**29 SEP (Saturday):**

0800: Show time/Out Brief

1000: Take Off KRDR

1230: Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 150' AGL for Larvicide swath when no trees are present.
- b. **Swath Width.** 2000 feet for ULV or as determined by the PMP
- c. **Flow Rate.** 4.35 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet<sup>®</sup>), ULV
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 40,000 acres

**5. Mission Commander/Aircraft Commander:** Major (b) (6)

**6.** Support required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6) DSN (b) (6) .

**7.** HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

(b) (6) (b) (6) Maj, USAFR  
AERIAL SPRAY CHIEF

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 23-29 MAY 04

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: LTC (b) (6) MAJ (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6), MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6), TSG (b) (6), SRA (b) (6)
- (2) Crew Chief(s): SRA (b) (6), SRA (b) (6)
- (3) Avionics: SSG (b) (6)

##### c. Entomologists/Ground Support: CPT (b) (6) (b) (6) CPT (b) (6)

#### 2. SCHEDULE: (All Local (b) (6) PPR: 052301LC

##### 23 MAY (Sunday)

1000: Show at KYNG

1200: Depart KYNG

1430: Land KRDR/Safety Briefing

In-brief (will conduct via conference call on Thursday May 20 at 1000)

##### 24 MAY (Monday):

0430: Show time

0530: Take off KRDR (Larvicide Spray Sortie)

0539: Sunrise (begin spray)

##### 25 MAY (Tuesday):

0430: Show time

0530: Take off KRDR (Larvicide Spray Sortie)

0538: Sunrise (begin spray)

##### 26 MAY (Wednesday):

0430: Show time

0530: Take off KRDR (Larvicide Spray Sortie)

0537: Sunrise (begin spray)

##### 27 MAY (Thursday):

0537: Sunrise

0630: Show time

0730: Take off KRDR (System flush)

0940: de-configure; return to KYNG

**Note: Four sorties are required for the spray block. Plus, a final sortie will be needed for a complete flush of the system followed by spray equipment inspection**

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder, 1 UHF Radio, Water Sensitive Cards, Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors, Project Notebook, Entomologist's Tool Kit, Trakstar Receiver and Antenna

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

#### 4. PPR: 052301LC

#### 5. RADIO FREQUENCIES: Air To Ground Primary UHF 392.2; VHF 123.45

KRDR Tower 124.9 V; Grand Forks Int'l 118.4 V

## 6. CONFIGURATION: SP2G

**a. System:** 2-Module System/ Fuselage Booms

**b. Nozzle Tips/Orientation:**

Larvicide: Raindrop nozzles straight back

**c. Number:**

Larvicide: fuselage only, 10 total (5 each side) straight back

**d. Booms:** Fuselage

**e. Aircraft:** #9105

**f. Mission Identifier:** QZNRK 276 144

## 7. SPRAY PARAMETERS:

**a. Larvicide**

(1) **Area to be treated:**

(2) **Altitude:** 100' for Larvicide application

(3) **Swath Width.** 200 feet

(4) **Flow Rate.** 186 gallons/minute

**b. Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)

**c. Ground Speed:** 200 Knots

## 8. SPRAY MIXING AND LOADING: (For Larvicide Spray Sorties)

**a. Composition of each Gallon:**

(1) 0.375 ounces of Altosid® 20

(2) 0.64 ounces of AirexDC™ drift retardant

(3) Water

**b. Typical load:** (2 tanks of 450 gallons each)

(1) Fill with 450 gallons of water/tank. Total water in tanks = 900 gal.

(2) Total water added = 900 gallons

(3) Add 1.33 (1 1/3) gallons of Altosid® per tank (2 2/3 gallons total).

(4) 2.5 gal AirexDC per tank (5 Gal total) while agitating approximately 15 min

(5) Total quantity mix. 908 gallons

**c. Final Load for complete flush**

(1) Fill tanks with the amount of water necessary for a proper system flush

**d. Mixing Instructions:**

SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

## 9. TRANSPORTATION: 2 – 7Pax Vans & 6 Pax truck provided by 319 CES

## 10. CONTACTS:

**a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

(1) **Base Operations:** Gene Crouse Airfield Manager or 1 LT (b) (6) DSN (b) (6)

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 24-29 AUGUST 2003

**Purpose/Objectives/Benefits:** control nuisance and vector mosquitoes in order to improve working conditions and lower the incidence of arthropod borne illness for members operating at Langley AFB and surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6) (b) (6)
- (2) Pilots: LTC (b) (6) (b) (6) Maj (b) (6) (b) (6)
- (3) Navigators: Maj (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: CMS (b) (6) , MSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6) , SSG (b) (6)  
TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6) SSG (b) (6)
- (3) Avonics: MSG (b) (6)
- (4) Observer: Lt (b) (6)

##### c. Certified Pest Management Professionals: LTC (b) (6) (b) (6) Maj (b) (6) (b) (6) Capt (b) (6) (b) (6) , (b) (6)

Gov Vehicles: 2 ea 9 pax van, 1 staff, 1 pick-up truck

#### 2. SCHEDULE: (All time Local)

##### 24 AUG (Sunday):

**PPR # 0824CL01**

1500: Show at KYNG  
1700: Depart KYNG  
1830: Land KLF  
1845: Safety Briefing

##### 25 AUG (Monday):

0900: In-Briefing at CE Conference Room  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1645: Spray Sortie  
1944: Sunset

##### 26 AUG (Tuesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1645: Spray Sortie (land by 1845)  
1900-2030 Airfield is closed  
1942: Sunset

##### 27 AUG (Wednesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1645: Spray Sortie

1941: Sunset

**28 AUG (Thursday):**

TBA: Daily meeting for PMP/MC in the hotel lobby

1400: Show Time / Weather Decision

1430: Load Dibrom

1645: Spray Sortie

1940: Sunset

**29 AUG (Friday):**

0800: Report

TBA: Outbrief (b) (6) (b) (6)

1000: Depart KLFJ

1130: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Cellular Phones, Kestrel Weather Monitor, Compass, Pest Safety Binder, Signal Mirrors, UHF Radio, Satloc Ground Tracker and Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops phone 878-3588
  - (2) Tower phone 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int:** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9 or 348.6** (phone 877-0221 ops)
  - (2) Tower – **124.9 or 280.1** (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - (4) CTAF – **118.7**
- c. **Langley AFB:** Tower OIC MSG (b) (6) Lt (b) (6) 1st OSS SQ
  - (1) Tower - **125.0 or 253.5** (phone 4-5326)
  - (2) Ground - **121.7 or 275.8**
  - (3) Clearance – **118.85 or 271.3**
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld):** Tower - **124.3, 126.375, 340.2, 318.7**
- e. **Spray Ground:** Primary **392.2; Secondary: 308.6**

**7. IN-BRIEFING:** Required; IAW the Schedule above.

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Modules 1 and 2 (system #4)

- b. **Nozzle Tips/Orientation:** 8 8008's for 2000' swathes and 4 8008's for 1000' swathes oriented straight down.
- c. **Aircraft:** 99106

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 1.8 Gallons/Minute at Craney Island; 3.6 Gallons/Minute at Langley areas
- f. **Acreage:** Approximately 86,000 Acres
- g. **Swath Width:** 1,000 Feet at Craney Island; 2,000 Feet at Langley areas.

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** 334 Gallons for 86,000 acres sprayed.
- b. **Where:** Aero Club Ramp
- c. **When:** 1430 hrs each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

**11. SPRAY MONITORING OR TESTING:**

The local mosquito control districts and Langley Pest Control will conduct mosquito surveillance using either trapping or biting count pre- and post-spray data to determine spray effectiveness. Oil sensitive cards will be used to confirm application within the spray blocks.

**12. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT – LANGLEY AFB AUG 03'

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB
- b. Mission Duration: 24-29 August 2003
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date(s) and time(s) (Local): 26 Aug (1635-2056); 27 Aug (1645-1931); 28 Aug (1550-1711)
- e. Acres Treated: 26 Aug 76,800; 27 Aug 32,256; 28 Aug 8,258 (total = 117,314 acres)
- f. Project Coordinator/s (Name/Title, Phone #): (b) (6)
- g. Date Spray Map Last Approved: 25 Aug 2003
- h. Date of Waste Generation Letter: 4 April 1996
- i. Installation In-Briefing: 1CE Conference Room, Langley AFB; LTC (b) (6) & Maj (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): Capt (b) (6) (b) (6) Maj (b) (6) (b) (6) LTC (b) (6) (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander/Pilot: LTC (b) (6) (b) (6)
  - (2) Co-Pilot(s): Maj (b) (6) (b) (6)
  - (3) Navigator: Maj (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: CMS (b) (6), MSG (b) (6)
- d. Safety Briefer: Capt (b) (6) (b) (6)
- e. Spray Maintenance/Pesticide Loaders: MSG (b) (6), TSG (b) (6), TSG (b) (6)  
TSG (b) (6)
- f. Crew Chief(s): MSG (b) (6), SSG (b) (6)
- g. Avonics: MSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 3 Sorties; 8.6 Hours
  - (2) Ferry Sorties/Hours: 2 Ferries; 3.0 Hours

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 300 (26 Aug); 210 (27 Aug); downloaded 44 (28 Aug)
- e. Gallons Pesticide Applied: 300 (26 Aug); 126 (27 Aug); 40 (28 Aug)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 15 gallons HAN (26-28 Aug)
- h. Other Additives Used: n/a
- i. Application Rate: 0.62 oz/acre at Craney Island & 0.5 oz/acre elsewhere

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99108)
- b. Spray System (Modules Used) and System ID #: System SP2G - MASS ULV; Modules 1 and 2
- c. Spray System Configuration: ULV Wing Booms; Modules 1 and 2/MASS ULV
- d. Nozzle Type/Size: 8008 TeeJet<sup>®</sup> Flat Fan
- e. Nozzle Orientation & Number Used: 8 8008's; oriented straight down
- f. Pressure: 29-37 psi
- g. Flow Rate: 3.6 gallons/minute on the peninsula; 3.7 gallons/minute at Craney Island

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1500 ft at Craney Island & 2000 ft on Langley Peninsula
- b. Spray Off Set: 2000-4000 depending on wind speed
- c. Spray Release Altitude: 150 feet AGL
- d. Ground Speed: 200 knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Speed/Direction): 6-8mph/230 (Aug 26); 5-8 mph/065 (Aug 27); 7.0 mph/265
- b. Temperature (Degrees Fahrenheit): 92°F (Aug 26-27); 84°F Aug 28
- c. Relative Humidity: 62% Aug 26; 40 % Aug 27; 70 %Aug 28
- d. Cloud Cover: Haze/Cloudy Aug 26; partly cloudy Aug 27; partly cloudy Aug 28
- e. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
  - (2) Results: DGPS shows spray block completed.
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: City of Hampton: 47-99% decrease in mosquito numbers; York County approximately 90 % reduction in biting activity; Ft. Eustis reported 94% reduction in mosquitoes; Langley AFB reported mixed results depending on species but at least a 90% overall.

**8. REMARKS:**

First spray of the season following one of the peninsula's wettest summers in years and the return of the 757 AS from a deployment. Several pest mosquito species were present (i.e., saltmarsh/container breeding). A new spray block including the DoD properties of the Navel Weapons Station and Cheatham Annex was added to this mission. The new area is approximately 14,000 acres. The area was surveyed on the ground and by air prior to the application. A total of 117,314 acres were sprayed during the week. The greatest control was seen in the saltmarsh species but reductions were seen for all mosquito species. Positive community feedback was near an all-time high after this mission. The results are tallied above but all communities reported at least 90% reductions in their mosquitoes.

3 February 2004

MEMORANDUM FOR 757 AS/DO

FROM: 757 AS/DOS

SUBJECT: Swath Characterization Test and Training Mission

**1. Purpose:** The purpose of this series of tests was to determine swath characteristics (i.e. Volume Mean Diameter of dispensed droplets and drift distance) of a mimic insecticide (soybean oil) dispersed at altitudes of 150' and 300' AGL by the C-130 aerial spray platform. This test consisted of swath characterization using a C-130 equipped with a Modular Aerial Spray System (MASS) with fuselage booms equipped with 8005 TeeJet nozzles.

**2. Participants:** A list of test participants are included in Attachment 1.

**3. Spray Configuration:**

Mass-SP2G

Aircraft Number: 99106

Mission Identifier: QZNRKA347

**4. Spray Parameters:**

Booms—Fuselage only.

Nozzles—8005 TeeJet.

Number of Nozzles—4 per side, oriented straight down.

Airspeed—200 knots ground speed.

Altitude—150' and 300' AGL.

Wind—90 degree crosswind component.

**5. Itinerary:**

24 January: Personnel Arrive at Avon Park. Total ferry time was 4.8 hours.

25 January: One testing sortie was flown with 2 individual testing passes completed. Ten spinning impingers ("spinners") were placed on Frostproof road, running southeast to northwest. Spinners were located 1500' feet apart and were equipped with Teflon-coated microscope slides to document droplet size and distance from point of release. Spinners were also equipped with oil-sensitive cards located on the spinner mounting poles. The aircraft flew a spray pass on the southeast end of Frostproof road, perpendicular to the line of spinners. Spray on time for the oil was 40 seconds, half of which was dispensed prior to the aircrafts' point of intersection with Oliver road. Aircraft offset was 1500' to the southeast of the 1<sup>st</sup> spinner unit. Spray altitude was 300' AGL. Ground wind conditions were light and variable. Flow rates for both passes ranged from 4.4 to 4.6 gph at 25 psi. Total flight time was 0.5 hours.

26 January: One testing sortie was flown with 2 individual testing passes completed. Spinners were placed in north-south orientation on Oliver road. Spinners were located approximately 1500' apart. The aircraft flew a spray pass on the south end of Oliver Road, perpendicular to the line of spinners. Spray-on time for the oil was 40 seconds, half of which was dispensed prior to the aircraft's point of intersection with the spinner line as in the previous test. Aircraft offset was 1500' south of the 1<sup>st</sup> spinner location. Aircraft altitude was 150' AGL. Ground wind conditions were 7 to 8 kts from 190 to 200 degrees. Flow rates for both passes ranged from 4.4 to 4.6 gph at 25 psi. Total flight time was 0.6 hours.

27 January: No sorties were flown due to inclement weather.

28 January: No sorties were flown due to mechanical difficulties.

29 January: Mission complete. Personnel return to Youngstown ARS. Total ferry time 3.3 hours.

**6. Results:** Volume Mean Diameter (VMD) of the collected spray droplets from the 150' spray altitude ranged from 12.5 to 5.0 microns after a spread factor had been calculated with the raw data (Table 1). Average diameter of the droplets is also shown in Figure 1. VMD was largest at the first sampling station (1500 feet from flight path), with a value of 12.5 microns. At 3000', VMD decreased to 10 microns, followed by an additional decrease to 7.5 microns at 4500 feet from the flight path. At the remainder of the spinner locations droplet size were under 5 microns, with an exception at 7500 feet, where VMD was approximately 9.4. The range of the droplet sizes collected was greatest near the flight path of the aircraft, and dropped substantially as downwind distance from the flight path increased. No data was collected for the 300' spray test. Very few drops were observed on the Teflon slides following this test, and presumably most of the spray material was carried downwind. Shifting winds may have been to blame for lack of usable data.

**7. Conclusions:** Swath characteristics generated from the 150' spray pass appear to be quite typical of many published characterizations including our own C-130 ULV wing-boom configuration, with the majority of large droplets collected from spinners nearest the flight path. The 150' test was an attempt to replicate a previous test conducted under similar conditions with fuselage booms, and the data are in close agreement. VMD of droplets at 3000' and beyond indicate a droplet size suitable for effective control of biting flies when conducting space sprays, however, it should be noted that VMD is a descriptive statistic that which only indicates the median droplet diameter, and does not describe the distribution of droplet sizes at a particular collection point. In order to elucidate the effective swath width, in future tests using fuselage spray booms, insect bioassays at each collection point will also be necessary, using material with an active ingredient. Despite this current limitation, this replicate 150' test confirms that using fuselage booms to apply active ingredient in a space spray from a C-130 may be effective. Lack of data from the 300' test indicate the difficulty in characterizing swaths when material is applied at higher altitudes. Environmental conditions were probably to

blame although this cannot be proven. We plan to test more sprays at 300' and higher altitudes in the future to determine if these types of application are effective.

### **3. ITEMS TO TAKE:**

- a. **Navigator:** Maps with “No-Spray” Areas Marked
- b. **Certified Pest Management Professionals:**
  - (1) Water-Sensitive Cards
  - (2) 1 Signal Mirror
  - (3) 1 Spot Light
  - (4) 1 Engineer Wheel
  - (5) Ground Maps
  - (6) Laptop Computer
  - (7) Digital Camera
  - (8) Oil-sensitive cards
  - (9) Spinners
  - (10) Wooden dowels

### **4. AIR TO GROUND FREQUENCIES:**

- a. Spray: Primary 392.2; Secondary 340.8
- b. Interplane: Primary 123.45; Secondary 122.9
- c. Patrick: TWR-133.75; GND-124.35; CMD POST-383.0; PTD-372.2
- d. Avon Park: TWR-292.2 (p), 126.15, 276.6 (s)
- e. MacDill: TWR-123.7; GND-121.65; ATIS-133.825; CMD POST-311.0; PTD-372.2

### **5. SPRAY CONFIGURATION:**

- a. MASS – SP2G
- b. Aircraft Number: 99106
- c. Mission Identifier: QZNRKA347

### **6. MISSION PROTOCOLS:**

#### **Avon Park Spray Testing Itinerary 24-30 Jan 04**

- 1. Test 1: Determination of effective swath width with fuselage ULV configuration @ **300’** AGL
  - a. Spray soybean oil from fuselage booms using 8 (4 per side) 8005 nozzles at 200 knots
    - We are looking for a crosswind spray (see below)
  - b. Test 2: Other altitudes will be tested dependent on results from first altitude test. Protocols will be discussed at morning weather decision
    - Crosswind pattern
- 3. Spray Parameters (use for all tests):
  - a. Booms -- Fuselage only.
  - b. Nozzles - 8005 TeeJet
  - c. Number of Nozzles – 8 nozzles 4 per side
  - d. Airspeed -- 200 knots ground speed.
  - e. Altitude -- 300’ above ground level (other altitudes to be determined)
  - f. Wind – Crosswind component
  - g. Flow Rate – 4.5 gallons/minute

#### 4. Mission Protocols:

- a. Purpose: Swath Characterization as delivered for a simulated mosquito adulticide spray using the fuselage ULV configuration. Glass slides will be used to collect droplets. Ten sampling stations will be setup along a 3-mile stretch of road in the Avon Park Bombing Range. Depending on wind direction, the likely locations will be Smith Road (east-west) or Oliver Road (north-south). Other options are possible but will be determined on-site. Additionally, we need the average winds to be below 10 mph.
- b. Aircrew: We need the system to have stabilized prior to reaching the sampling points. Twenty seconds prior to the sampling point and 20 seconds after should be sufficient (40 seconds total) but this value could change as we increase the altitude. Spray Operators: Please record the spray-on time and pressure at 5 second intervals. Navigator: Please record winds at altitude every ten seconds. If conditions are stable (little variation in wind direction and speed) two spray-on passes will be used for each 300' test.
- c. Microscope slides will be retrieved 20 minutes after the plane has passed. Number and size of the droplets will be determined.
- d. If the of 300' altitude is completed, other altitudes will be examined.

#### 7. CONTACTS:

- 2) Pilots: Col (b) (6) Capt (b) (6)
- 3) Navigators: LTC (b) (6)
- 4) Flight Engineers: SSgt (b) (6)
- 5) Spray Operators: MSG (b) (6) , TSgt (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: TSgt (b) (6) TSgt (b) (6) MSgt (b) (6) TSgt (b) (6)
- 2) Crew Chief(s): TSgt (b) (6) SRA (b) (6)
- 3) Avionics: SRA (b) (6)

##### c. Entomologists/Ground Support: Maj (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 25 AUG (Monday):

1200: Showtime  
1400: Depart KYNG  
1600: Land KRDR/Safety Briefing

##### 26 AUG (Tuesday):

1400: Spray In Brief (CPMP, MC, AC)  
1600: Show time/WX decision  
1630: Load Chemical  
1830: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2020

##### 27 AUG (Wednesday):

1600: Show time/WX decision  
1615 Load Chemical  
1815: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2018

##### 28 AUG (Thursday):

1130: Show time  
1330: Takeoff KRDR  
1730: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 VHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

#### 4. PPR: 08-25-01/ES

5. **RADIO FREQUENCIES:** Air To Ground Primary VHF 123.45 KRDR Tower 124.9 V; Grand Forks International 118.4 V

#### 6. CONFIGURATION: SP2G

- a. System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down
- c. Number:** ULV: 18 8005s total (9 each side)
- e. Aircraft:** 90-9108
- f. Mission Identifier:** QZNRKA173238

**7. SPRAY PARAMETERS:**

**a. Adulticide**

- (1) **Area to be treated:** 11518 acres (Grand Forks AFB), 18346 (Grand Forks) and 877 (Grand Forks Intl)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION:** Transportation provided by base (DSN362-3976): One 15 pax van (OPS), three 6 pax trucks (MC, OPS, MX), one 1.5 ton truck (spray MX).

**10. LODGING:** Onbase, 15 rooms reserved. DSN 362-7200 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844

**11. CONTACTS:**

**a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

- (1) **Base Operations:** Airfield Manager DSN 362-4409  
-- DSN 362-xxxx or (701) 747-xxxx20
- (2) **Pest Management:** TSgt (b) (6) or Ssgt (b) (6) DSN (b) (6) , FAX 3432)
- (3) **Base Civil Engineer:** Lt Col (b) (6)
- (4) **Environmental Officer:** (b) (6) , DSN (b) (6) , FAX 6155
- (5) **Public Affairs:** DSN 362-5608/5023 (off duty CP ext 6711)
- (6) **Weather:** DSN 362-4396
- (6) **Billeting:** DSN 362-3070/6189/7200 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks and Grand Forks AFB ND.

**2. Capability:** Spray Aircraft available 25-29 August 2008

**3. Concept of Operations:**

**25 AUG (Monday):**

1200: Showtime  
1400: Depart KYNG  
1600: Land KRDR/Safety Briefing

**26 AUG (Tuesday):**

1400: Spray In Brief (CPMP, MC, AC).  
1600: Show time/WX decision  
1630: Load Chemical  
1830: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2020

**27 AUG (Wednesday):**

1600: Show time/WX decision  
1630 Load Chemical  
1830: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2018

**28 AUG (Thursday): WX Day**

1600: Show time/WX decision  
1630 Load Chemical  
1830: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2016

**29 AUG (Friday):**

1130: Show time  
1330: Takeoff KRDR  
1730: Land KYNG

**4. Spray Parameters:**

**a. Adulticide**

- (1) **Area to be treated:** 18,400 acres (Grand Forks) and 11,488 acres (Grand Forks AFB)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**5. Aircraft Commander:** Capt (b) (6) (b) (6)

**6.** Support at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator.

**7.** HQ AFRC/DOOM approval via email.

# 910 AW AERIAL SPRAY UNIT POST-MISSION REPORT

## GRAND FORKS AFB – ADULT MOSQUITO CONTROL 28-31 July, 2008

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 25-28 August 2008
- c. Purpose of Application: Control adult nuisance and vector mosquitoes
- d. Application Date: 27 August 2008
- e. Time/s of Application (Local): 1940-0270 hrs
- f. Acres Treated: 11520
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) , DSN (b) (6) ; TSG (b) (6) NCOIC Pest Management Shop, DSN (b) (6)
- h. Date Spray Map Last Approved: 26 August 2008
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 26 August 2008, CE Conference Room, COL (b) (6) LTC (b) (6) LTC (b) (6) CAPT (b) (6) MAJ (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11): MAJ (b) (6)
- c. Aircrew:
  - 1) Pilots: COL (b) (6) CAPT (b) (6)
  - 2) Navigators: LtCol (b) (6)
  - 3) Flight Engineers: SSGT (b) (6)
  - 4) Spray Operators: MSG (b) (6) TSGT (b) (6)
- d. Safety Briefer: MAJ (b) (6)
- e. Spray Maintenance: TSGT (b) (6) MSGT (b) (6) MSGT (b) (6) TSGT (b) (6)
- f. Spray Ground Monitors: LTC (b) (6)
- g. Crew Chief: TSgt (b) (6) TSGT (b) (6) SRA (b) (6)
- h. Avionics: SSGT (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 1/1.3
  - (2) Ferry Sorties/Hours: 2/5.9

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-5481
- c. Gallons Pesticide Loaded: 90 gal Trumpet® (27 August)
- d. Gallons Pesticide Applied: 90 gal Trumpet® (27 August)
- e. Gallons and Name of Flush Used: 50 gal/water
- f. Other Additives Used: none
- g. Application Rate: 1.0 oz/acre Trumpet®

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 18 straight down
- f. Pressure (PSI): 36
- g. Flow Rate: 7.26 GPM

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray Off Set: 1000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 250° @ 7 knots (ground observation)
- b. Temperature (Degrees Fahrenheit): 62 °F
- c. Relative Humidity: 75%
- d. Cloud Cover: 100% Overcast
- e. Source: Ground observations and National Weather Service

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. The 319 MDG/ADS conducts adult mosquito trapping to monitor mosquito densities on base and reported an average of 80 mosquitoes/trap on 26 August.
- b. Effectiveness:
  - (1) Technique/s Used: Mosquito traps
  - (2) Results: Trap data pending from 319 MDG/ADS.

**8. REMARKS:** North and South Dakota are leading the United States in West Nile virus cases thus far in 2008. Mosquito counts were relatively low prior to this spray. However, the threat of West Nile Virus prompted public health to make the decision to spray the base with Trumpet EC. Application was postponed from the 26<sup>th</sup> to the 27<sup>th</sup> because of unacceptable wind speeds. The application was made during the last 1.5 hrs of daylight to maximize the correlation between the spray period and mosquito activity. Meteorological conditions were good during the AFB application, with a moderate (6 knot), unidirectional wind assuring good coverage. Preliminary post-spray observations indicate excellent control of mosquitos. Pending trap count data will undoubtedly confirm this. The City of Grand Forks declined to spray aerially as they continue with an effective ground-based adulticiding program. Many thanks as usual to the 319 CE Environmental and Pest Management sections.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 25-28 Jul 2005

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6) (b) (6)
- (2) Pilots: MAJ (b) (6) , Maj (b) (6) (b) (6)
- (3) Navigators: LTC (b) (6) , MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6) SSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) , TSG (b) (6) , MSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , SRA (b) (6)
- (3) Avionics: MSG (b) (6)
- (4) MX Officer: 2LT (b) (6)

##### c. Pest Management Professionals/Entomologist: CPT (b) (6)

##### d. Wing Safety Observer: LTC (b) (6)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car keys and vehicles at Base Ops.

#### 2. PPR REQUIREMENTS: 20601

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local)

##### 25 Jul (Monday):

1200: Show Time Rifle Range is clear  
1400: Take off KYNG  
1600: Land KNBC  
1615: Safety Briefing  
1700: Take off KNBC-Training Sortie for Wing Safety  
1800: Land KNBC

##### 26 Jul (Tuesday): see www.beaufort.usmc mil for weather, etc

Rifle Range Live Fire starting 2000L

1530: Show Time

##### 28 Jul (Thursday):

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

#### 4. ITEMS TO TAKE:

##### a. Mission Commander:

- (1) 19 Rooms reserved at Hampton Inn, ensure no rooms charged on Current Ops Credit card.

##### b. Entomologist/CPMP:

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone

- (3) Pesticide Safety Binder
- (4) DGPS Computers & Maps

**c. Navigators:**

- (1) Maps
- (2) Templates

**d. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** Open for ULV spray; 8 8005's oriented straight down (4 per side)
- c. **Differential GPS:** Installed
- d. **Aircraft:** 89-9106      **Mission Identifier:** QZNRKA652206

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 2.72 gallons/Minute

- 7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission. Depending on coverage we will likely have some material left over. Spray maintenance will download; save for next mission.

- 8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

- Air Traffic Control: 119.05 Beaufort MCAS TWR
- Hilton Head Arpt: 118.8 CTAF
- Beaufort Co Arpt: 122.7 UNI
- Spray Ground: Primary 392.2; Secondary 340.8**

- 10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

- 11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC:** (MCRD/MCAS Com: (843) 228-XXXX); Off Station Com: (843) 525-XXXX

- e. Spray Maintenance: MSG (b) (6) , TSG (b) (6) , MSG (b) (6) , TSG (b) (6)  
Redarowicz
- f. Spray Ground Monitor: Capt (b) (6)
- g. Crew Chiefs: TSG (b) (6) , SRA (b) (6)
- h. Avionics: MSG (b) (6)
- i. MX Officer: 2LT (b) (6)
- j. Flying Data:
  - (1) Spray Sorties/Hours: 1 Sortie/2.1 Hrs
  - (2) Spray Training Sorties/Hours: 1 Sortie/1.0 Hrs
  - (3) Ferry Sorties/Hours: 2 Ferry(s)/4.4 Hrs

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: gal Dibrom<sup>®</sup> (26 July); 60 gallons
- e. Gallons Pesticide Applied: 54 gal (26 July)
- f. Gallons and Name Diluent Used: None
- g. Name of Flush Used: Marvel Mystery Oil
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 89-9108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 8 oriented straight down
- f. Pressure: 26-41 PSI
- g. Flow Rate: 2.5-3.1 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 200°/4-5 knots
  - (2) Release Altitude: 210°/7 knots
- b. Temperature (Degrees Fahrenheit): 87° F
- c. Humidity: 78 %
- d. Cloud Cover: 50% and haze
- e. Source: Ground observations at the MCRD small arms range on 26 July.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

Trap counts of Culicoides and Mosquitos compiled by CE warranted aerial application. Pre-application exposure of the Pest Management Professional indicated heavy Culicoides populations, despite the extremely hot weather. Results are pending with regards to post-application trap counts.

- 8. REMARKS:** Both biting midges and mosquitoes were targets of this aerial spray. The mosquitoes were targets because of West Nile Virus positive mosquito pools. On July 26, conditions for aerial spray were acceptable, and the entire island was treated. There were no exclusionary areas present. Operationally, there were no major problems. Extremely hot, humid, and generally uncomfortable weather made uploading and downloading of chemical problematic. In addition, the weather factors undoubtedly reduced insect activity, reducing the populations effectively exposed to the chemical. Radio communication between the aircraft and the ground monitors continues to be problematic with the current UHF radios. Recommend that the radios be range tested and equipped with more effective antennas, or the purchase of more effective radios.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## NSB, KINGS BAY, GA

### 25-28 JUN 2009

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at NSB, Kings Bay, GA.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: LTC (b) (6)3 Maj (b) (6)
- (2) Navigators: Maj (b) (6)
- (3) Flight Engineers: MSgt (b) (6)
- (4) Spray Operators: MSgt (b) (6) MSgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSgt (b) (6), MSgt (b) (6), SSgt (b) (6)
- (2) Crew Chiefs: TSgt (b) (6), SrA (b) (6)
- (3) Avionics: TSgt (b) (6)

##### c. Entomologist: (MC) Maj (b) (6) Maj (b) (6) (b) (6)

##### d. Flight Surgeon: Maj (b) (6) (observer)

#### 2. PPR REQUIREMENTS: 062501 **\*\*Must squawk 5107 and call sign will be Spray07 regardless of tail number\*\***

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

25 JUN (Thursday)

1600: Show

1800: Depart KYNG

2030: Land KNIP/Safety brief

26 JUN (Friday)

1300: In-Brief with Kings Bay Personnel @ CO's conference room.

1545: Weather call/Crew show

1600: Load Chemical/Calibrate

1830: Depart KNIP

Sunset: 2032

27 JUN (Saturday) WX Backup/Training

TBD

Sunset: 2032

28 JUN (Sunday)

1000: Show time

1200: Depart KNIP

1430: Land KYNG

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander – inbrief materials

##### b. Entomologist:

- (1) Wind Gauge & Compass
- (2) VHF Radios
- (3) Pesticide Safety Binder

##### c. Navigators:

- (1) Maps
- (2) Templates

**d. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** size = 8005; 20 open for 7.4 flow rate; 15 open for 5.5); oriented straight down.
- d. **Differential GPS:** Wingman Installed
- e. **Aircraft:** 90-9107
- f. **Mission Identifier:** QZNRKA471176

**6. Adult mosquito control spray Parameters: (Kings Bay)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 1.0 oz/acre or 0.75 oz/acre see entomologist
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 2,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 15,000 Acres
- g. **Spray-On Time:** 32 Minutes
- h. **Flow Rate:** 7.4 gallons/minute or 5.55 gal/min see entomologist

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 3 or 4 drums of Dibrom for Kings Bay (see entomologist).

**8. PARKING PLAN:** Parking will be on the T-33 Line at NAS Jacksonville, FL.

**9. AIR TO GROUND RADIO FREQUENCIES:**

Navy Jax Ops-	310.2/134.775	Tower	120.0/340.2
Ground	128.6/336.4	Spray Ground:	123.45 VHF
ATIS	281.0	St Marys:	122.8 VHF

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 25-28 JUNE 2007

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: COL (b) (6) (b) (6) Capt (b) (6) (b) (6)
- 2) Navigators: LTC (b) (6) (b) (6) Maj (b) (6)
- 3) Flight Engineers: CMSG (b) (6) MSG (b) (6)
- 4) Spray Operators: MSG (b) (6) , MSG (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: Tsgt (b) (6) , Tsgt (b) (6) , Tsgt (b) (6) , (b) (6)
- 2) Crew Chief(s): SSG (b) (6) , Tsgt (b) (6)
- 3) Avionics: (b) (6)

##### c. Entomologists/Ground Support: MAJ (b) (6) MAJ (b) (6) (b) (6)

#### 2. SCHEDULE: (All Local Times) PPR: 06-25-01-ES

##### 25 JUN (Monday)

0900: Showtime  
1100: Depart KRDR  
1300: Land KGFK/Safety Briefing  
1400: Spray In Brief (CPMP, MC, AC).

##### 26 JUN (Tuesday):

1500: Show time for Calibration testing (See note in configuration)  
1830 Load Chemical  
2015: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 27 JUN (Wednesday):

1730: Show time  
1800 Load Chemical  
2000: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 28 JUN (Thursday):

1730: Show time  
1800 Load Chemical  
2000: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 29 JUN (Friday):

1130: Show time  
1330: Take off KGFK  
1730: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 UHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit, Trakstar Receiver and Antenna

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

**4. PPR: 062501ES**

**5. RADIO FREQUENCIES: Air To Ground Primary** UHF 392.2; VHF 123.45  
KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. Nozzle Tips/Orientation:** ULV (adulicide): 8005 Tee Jet oriented straight down
- c. Number:** ULV: 18 8005s total (9 each side)
- e. Aircraft:** 89-9105
- f. Mission Identifier:** QZNRKA446176

**7. SPRAY PARAMETERS:**

**a. Adulicide**

- (1) **Area to be treated:** 11488 acres (Grand Forks AFB)
- (2) **Altitude:** 150' for Adulicide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION: Transportation 2 rental vans and 3 cars at Enterprise. Please call upon arrival and have the cars delivered to the visitor center on base.**

**Commercial: 701-775-3977**

**910 AW -- AERIAL SPRAY UNIT**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S POST-MISSION REPORT**  
**NAVAL SUBMARINE BASE, KINGS BAY, GA 25-29 June 2009**

**1. MISSION BASICS:**

- a. Installation Sprayed: Naval Submarine Base, Kings Bay, Georgia
- b. Mission Duration: 25-29 June 2009
- c. Purpose of Application: To control pestiferous populations of mosquitoes (specifically *Aedes taeniorhynchus*) and biting midges (*Culicoides* spp.)
- d. Application Date: 27 June 2009
- e. Time/s of Application (Zulu): 2315-0055 hrs
- f. Acres Treated: 4236 acres
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6), Public Works, Aerial Spray Coordinator, DSN (b) (6)
- h. Date Spray Map Last Approved: 26 June 2009
- i. Date of Waste Generation Letter: 30 October 2007
- j. Installation In-Briefing: (When/Where/Briefer/s): Sub Base commanders conference room, 26 June 2009. Briefed by Maj (b) (6)

**2. OPERATIONAL:**

- a. **Mission Commander:** Maj (b) (6)
- b. **Aircrew:**
  - (1) Pilots: LTC (b) (6) (A/C), MAJ (b) (6)
  - (2) Navigators: Maj (b) (6)
  - (3) Flight Engineers: MSG (b) (6)
  - (4) Spray Operators: SMSgt (b) (6), MSgt (b) (6)
- c. **Maintenance:**
  - (1) Spray Maintenance: TSgt (b) (6), SSgt (b) (6), MSGT (b) (6)
  - (2) Crew Chiefs: TSGT (b) (6), SRA (b) (6)
  - (3) Avionics: MSG (b) (6)
- d. **Entomologists:** Maj (b) (6) (b) (6) Maj (b) (6)
- e. **Flight Surgeon:** Maj (b) (6) (observer)
  - (1) Spray Sorties/Hours: 1/1.7
  - (2) Ferry Sorties/Hours: 2/5.3

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Trumpet® Concentrate
- b. EPA Registration Number: Trumpet® EC 59639-90-5481
- c. Formulation Sprayed: Concentrate (78% AI naled)
- d. Gallons Pesticide Loaded: 30 Gallons Trumpet®
- e. Gallons Pesticide Applied: 30 Gallon Trumpet®
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 50 gallons water
- h. Other Additives Used: None
- i. Application Rate: 0.90 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Tail Number: 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 20 oriented straight down
- f. Pressure: 46 p.s.i.
- g. Flow Rate: 7.4 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray Off-set: 4000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 220°/5 knots
  - (2) Release Altitude: 220°/10 knots
- b. Temperature (Degrees Fahrenheit): 90°F
- c. Relative Humidity: 75%
- d. Cloud Cover: 30%
- e. Source: Ground observations and aircraft SCNs

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: GPS system monitoring aircraft flight pattern. Direct field observations (Maj (b) (6) (b) (6) )
  - (2) Results: Excellent coverage through sprayed areas
- b. Effectiveness:
  - (1) Technique/s Used: New Jersey Light Trap collections and verbal reports before and after sprays
  - (2) Results: To be determined

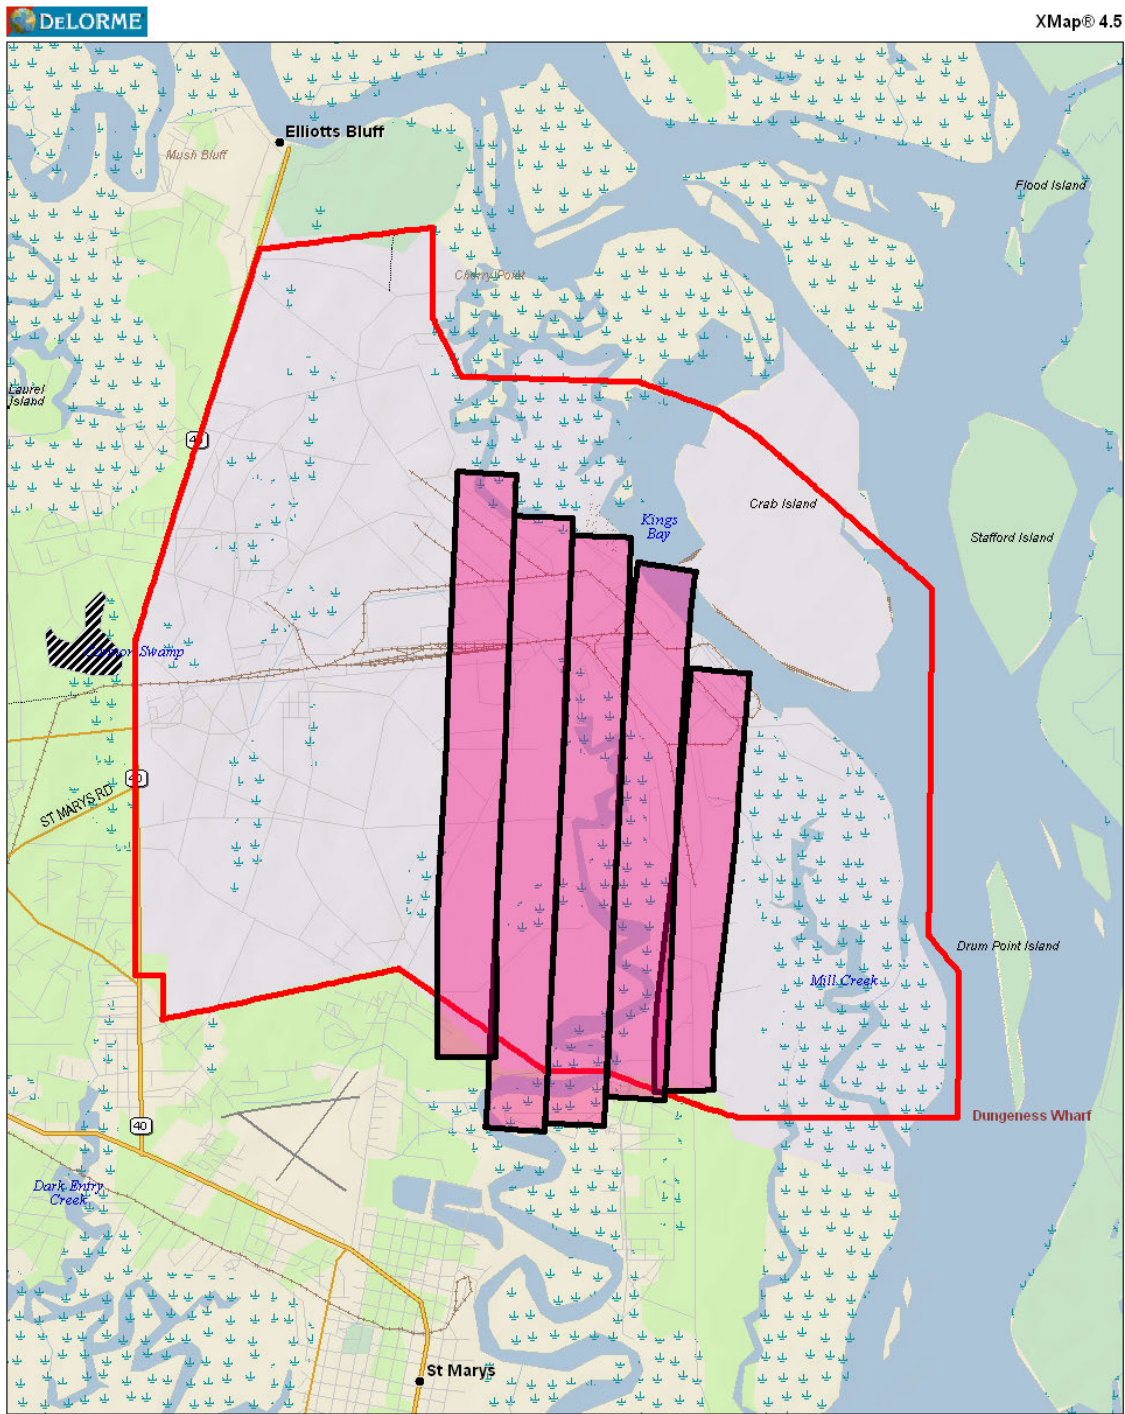

**8. REMARKS:** This mission was the second conducted at the request of NSB Kings Bay for 2009. This mission is still being conducted as a waived emergency spray. The installation is in the process of completing required documentation to become established as a pre-approved routine mission. Kings Bay had been experiencing significant mosquito activity, particularly adjacent to the dry docks and the waterfront. Unfortunately, the chemical order was misunderstood, and 3 Drums of Dibrom and 1 drum of Trumpet were delivered, when in fact 4 drums of Trumpet should have been delivered. Thus, only about one-third of the base was sprayed (see attachment), as the system on hand was only compatible with Trumpet. The project coordinator and the pest management professional targeted those areas hardest hit by mosquito populations in order to maximize effectiveness.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 25-28 Sep 06

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes around LFI and the surrounding communities.

**1. 910 AW PARTICIPANTS:**

**a. Aircrew:**

- (1) Mission Commander: Maj (b) (6) (b) (6)
- (2) Pilots: Maj (b) (6) (b) (6) CPT (b) (6) , 1LT (b) (6)
- (3) Navigator: LTC (b) (6)
- (4) Flight Engineers: SMS (b) (6) , MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6) MSG (b) (6) (b) (6)

**b. Maintenance:**

- (1) Spray Maintenance: TSG (b) (6) , MSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , TSG (b) (6)
- (2) Avionics: TSG (b) (6)

**c. Entomologists:** CPT (b) (6) MAJ (b) (6) (In place)

**d. Environmental:** (b) (6) (b) (6)

**d. Vehicles:**

- **Vehicle Dispatch:** Will supply us with 2x9pax vans and 2 cars
- **MC / Entomologist:** One Car
- **Ops:** One van (9 pax), one car
- **Mx:** One Van (9 Pax)

**e. Billeting Office:** COM: (757) 764-4667 POC TSG Cox

DSN 574-4667, EXT 2528; FAX 574-3038

**Holiday Inn - 1815 W Mercury Blvd**

- Non Available slips are in mission folder behind lodging info

**2. PPR: SPRAY01 0925TX01**

**3. SCHEDULE: (All times local)**

**25 SEP (Monday):**

- 1000: Show Time
- 1200 Take Off YNG
- 1330 Land KLF w/ Safety Briefing immediately following
- 1430: Installation Briefing
- 1500 Wx/Decision, load Dibrom
- 1650 Take off LFI
- 1854 Sunset

**26 SEP (Tuesday):**

- 1430 Show time
- 1500 Wx/Decision, load Dibrom
- 1650 Take off LFI
- 1853 Sunset

**27 SEP (Wednesday):**

- 1430 Show time
- 1500 Wx/Decision, load Dibrom
- 1650 Take off LFI
- 1852 Sunset

**28 SEP (Thursday):** Redeploy to YNG

- 1000: Show Time
- 1200: Take off KNBC
- 1400: Land KYNG

3. **ITEMS TO TAKE:**
  - a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
  - b. **Navigator:** Maps/Map Bag, Validation Map
  - c. **Spray Operator:** Safety Gear, Calibration Tables
  - d. **Spray Maintenance:** Deployment Kit/Supply Kit
4. **NOTIFICATION NECESSARY FOR THIS MISSION:**
  - a. **Langley Tower:** DSN 574-5326
  - b. **Langley Base Ops:** DSN 574-2504
5. **PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.
6. **RADIO FREQUENCIES:**
  - a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 25-28 SEP 2006

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: Col (b) (6) (b) (6) ??
- (2) Navigators: Maj (b) (6), LTC (b) (6)
- (3) Flight Engineers: MSG (b) (6)
- (4) Spray Operators: SMS (b) (6), Msg (b) (6), Msg (b) (6), Tsg (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6), MSG (b) (6), TSG (b) (6)
- (2) Crew Chiefs: MSG (b) (6), SSG (b) (6)
- (3) Avionics: MSG (b) (6)

##### c. Pest Management Professionals/Entomologist: CPT (b) (6) (b) (6) (In place)

Gov Vehicles provided by Parris Island MCRD: 2 Crew Vans & 1 Staff Car keys and vehicles at Base Ops.

#### 2. PPR REQUIREMENTS:

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

**25 SEP (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

- 1330: Show Time
- 1530 Take Off YNG
- 1700 Land KNBC
- 1800: Safety Briefing

Rifle Range No night fire planned any evenings

**26 SEP (Tuesday):**

Rifle Range: None

- 1430: Showtime
- 1500: Load Chemical/Wx Decision
- 1700: Take off KNBC
- 2005: Sunset

**27 SEP (Wednesday):** Wx back up, training, or redeploy to YNG Rifle Range None

- 1430: Showtime
- 1500: Load Chemical/Wx Decision
- 1700: Take off KNBC
- 2006: Sunset

**28 SEP (Thursday):**

- 1000: Show Time
- 1200: Take off KNBC
- 1400: Land KYNG

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) 20 Rooms reserved at Hampton Inn, ensure no rooms charged on Current Ops Credit card.
- (2) Mission Commander Cell Phone

##### b. Entomologist/CPMP:

- (1) Wind Gauge & Compass
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder

**c. Navigators:**

- (1) Maps
- (2) Templates

**d. Sprav Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**5. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 6 open for ULV spray; 6 8003's oriented straight down (3 per side)
- d. **Differential GPS:** Installed
- e. **Aircraft:** 89-9108
- f. **Mission Identifier:** QZNRKA296121

**6. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Anvil® 10+10
  - Sumithrin (synthetic pyrethrin) and Piperonyl Butoxide
  - Signal Word: Caution
  - Antidote: not applicable
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.62 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,400 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 2.25 gallons/Minute

**7. AMOUNT OF SPRAY MATERIAL AVAILABLE:** : There are approx. 50 gallons of Anvil available for this mission. We will spray 35 gallons per application. See entomologist for amount to load, it is possible that we may have to retreat the area during the mission.

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
 Hilton Head Arpt: 118.8 CTAF  
 Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

**10. TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

**11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**12. CONTACTS:**

- a. **Parris Island MCRD SC: (MCRD/MCAS Com: (843) 228-XXXX; Off Station Com: (843) 525-XXXX)**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT-Langley AFB 25-28 Sept 2006

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB, VA
- b. Mission Duration: 25—28 Sept 2006
- c. Purpose of Application: Control of adult mosquitoes transmitting arboviruses
- d. Application Dates: 25-27 Sept 2006
- e. Times of Application (Local): 1740-1915 (25 Sept); 1635-1910 (26 Sept); 1634-1835 (27 Sept)
- f. Acres Treated: 106383 total: 39,428 (25 Sept); 48,076 (26 Sept); 18,879 (27 Sept)
- g. Project Coordinator (Name, Phone #): (b) (6)
- h. Date Spray Map Last Approved: 25 September, 2006
- i. Date of Waste Generation Letter: 4 April 1996
- j. Installation In-Briefing: 1 CE Conference Room, Langley AFB; Maj (b) (6) Maj (b) (6)
- k. Mission identifier: QZNRKA199268

### 2. OPERATIONAL:

- a. Mission Commander: Maj (b) (6)
- b. Certified PMPs (Category 11): MAJ (b) (6)(b) (6) CPT (b) (6)
- c. Aircrew:
  - (1) Pilots: MAJ (b) ((b) (6) CPT (b) (6) , 1LT (b) (6)
  - (2) Navigator(s): LTC (b) (6)
  - (3) Flight Engineer(s): SMS (b) (6) , MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) MSG (b) (6) MSG (b) (6)(b) (6)
- d. Safety Briefer: CPT (b) (6)
- e. Spray Maintenance: MSG (b) (6) TSG (b) (6) , TSG(b) (6) , TSG (b) (6)(b) (6)
- f. Crew Chiefs: TSG (b) (6) , TSG(b) (6)
- g. Avionics: TSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 3/6.2
  - (2) Ferry Sorties/Hours: 2/3.1

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 368 (15 Aug); 180 (16 Aug); 90 (17 Aug)
- e. Gallons Pesticide Applied: 246 (15 Aug); 300 (16 Aug); 88 (17 Aug)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 18 gallons marvel oil
- h. Other Additives Used: n/a
- i. Application Rate: 0.8 oz/acre (25-26 Sept); 0.6 oz/acre (27 Sept)

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 90-9106
- b. Spray System (Modules Used) and System ID #: SP2G

- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles
- e. Nozzle Orientation & Number Used: 10 straight down (8 used 27 Sept)
- f. Pressure (PSI): 46-56 (25 Sept); 46-56 (26 Sept) & 40-60 (27 Sept)
- g. Flow Rate: 5.8 gpm (15-16 Aug); 4.4 gpm (17 Aug)

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 0 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): 260°/3 (25 Sept); 090°/5 (26 Sept); 090°/5 (27 Sept)
- b. Temperature (°F): 72 °F (25 Sept); 74 °F (26 Sept); 74 °F (27 Sept)
- c. Cloud Cover: Mostly Cloudy (25 Sept); Mostly Cloudy (26 Sept); Scattered clouds (27 Sept)
- d.. Source: Ground observations/at altitude during spray

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: Community of Hampton reported an 87% reduction at 4 locations in mosquito counts following the application. Langley pest management and City of Portsmouth reported good control, with no significant numbers of daylight-flying species having been caught. Ft. Eustis reported excellent control. No report was available from York County. However, the pest management POC for that area was extremely pleased with the work done.

**8. REMARKS:** Evidence of mosquito vectored viruses (namely Eastern Equine Encephalitis and West Nile Virus) has shown up in the tidewater area for the summer season 2006. In contrast to high levels of virus, mosquito populations had been lower than in previous years. In fact, this was the first spray of 2006, where in normal years the Langley peninsula receives 3-4 sprays per year. While popular local opinion related these depressed mosquito populations to the predaceous work of dragonflies, seen in abundance this year, it is more likely correlated with a much lower than average rainfall. Mosquito populations finally justified aerial application of pesticides following a significant rainfall event from tropical storm Ernesto. Outstanding levels of mosquito control were achieved and the customers were pleased with the application. We received excellent support from Langley AFB, 1 CES to make this mission a success.

//Signed//

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft available 25-29 JUN 2007

**3. Concept of Operations:**

**25 JUN (Monday)**

0900: Showtime

1100: Depart KYNG

1300: Land KGFK/Safety Briefing

1400: Spray In Brief (CPMP, MC, AC).

**26 JUN (Tuesday):**

1700: Show time

1730 Load Chemical

1930: Take off KRDR (Adulticide Spray Sortie)

Sunset: 2131

**27 JUN (Wednesday):**

1700: Show time

1730 Load Chemical

1930: Take off KRDR (Adulticide Spray Sortie)

Sunset: 2131

**28 JUN (Thursday):**

1700: Show time

1730 Load Chemical

1930: Take off KRDR (Adulticide Spray Sortie)

Sunset: 2131

**29 JUN (Friday):**

1130: Show time

1330: Take off KGFK

1730: Land KYNG

**4. Spray Parameters:**

**a. Adulticide**

- (1) Area to be treated:** 11488 acres (Grand Forks AFB)
- (2) Altitude:** 150' for Adulticide application
- (3) Swath Width.** 2000 feet
- (4) Flow Rate.** 7.26 gallons/minute ULV
- (5) Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) Ground Speed:** 200 Knots
- (7) Flush:** With water, triple rinse, then air purge

**5. Aircraft Commander:** COL (b) (6) (b) (6)

**6.** Support at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator.

**7.** HQ AFRC/DOOM approval via email.

# **910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT Grand Forks AFB, ND (25-29 June 2007)**

## **1. MISSION BASICS:**

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 25-29 June 2007
- c. Purpose of Application: Control nuisance and vector mosquitoes (adult stage)
- d. Application Date: 27-28 June 2007
- e. Time of Application (Local): 2015-2130 L (June 27); 1945-2100 L (June 28)
- f. Acres Treated: 29,888
- g. Project Coordinator (Name/Rank, Title, Phone #): Linda Fugelstad, Environmental Officer, DSN 362-4655
- h. Date Spray Map Last Approved: 25 June 2007
- i. Date of Waste Generation Letter: 22 June 2001
- j. Installation In-Briefing: (When/Where/Briefer/s): 27 June 2005; GF International Airport  
COL (b) (6) (b) (6) LTC (b) (6) (b) (6) MAJ (b) (6) Mr. (b) (6) , Mr. (b) (6)  
(b) (6) Mr.(b) (6) , TSGT (b) (6) SSGT (b) (6)

## **2. OPERATIONAL:**

- a. Mission Commander: LTC (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): MAJ (b) (6) MAJ (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: COL (b) (6) (b) (6)
  - (2) CoPilot: 1<sup>st</sup> LT (b) (6) (b) (6)
  - (3) Navigator: MAJ (b) (6)
  - (4) Flight Engineer(s): CMSGT (b) (6)
- d. Spray Operators: MSG (b) (6) , MSG (b) (6) (b) (6)
- e. Safety Briefer: MAJ (b) (6)
- f. Spray Maintenance: TSG (b) (6) , TSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- g. Spray Ground Monitors: MAJ (b) (6) (b) (6) MAJ (b) (6)
- h. Crew Chiefs: SSG (b) (6) , TSGT (b) (6)
- i. Avionics: TSG (b) (6)
- j. Flying Data:
  - (1) Spray Sorties/Hours: 2/3.2
  - (2) Ferry Sorties/Hours: 2/6.1

## **3. PESTICIDES:**

- a. Trade Name (% Active Ingredient): Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled)
- b. EPA Registration Number: Trumpet® EC 59639-90-548127
- c. Gallons Pesticide Loaded: 210 (27 June)
- d. Pesticide Applied: 210 (28 June)
- e. Other Additives Used: none
- f. Gallons and Name of Flush Used: 100 gallons water
- g. Application Rate: 1.0 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 909106
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005
- e. Nozzle Orientation & Number Used: 14 straight down
- f. Pressure (PSI): 47
- g. Flow Rate: 7.2 gallons per minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 knots (338 feet/second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):  
Ground: 310°/7 knots (June 27); 090°/3 knots (June 28)
- b. Temperature: 59 °F (June 27); 72 °F (June 28)
- c. Cloud Cover: Overcast
- d. Source: Ground/altitude observations

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

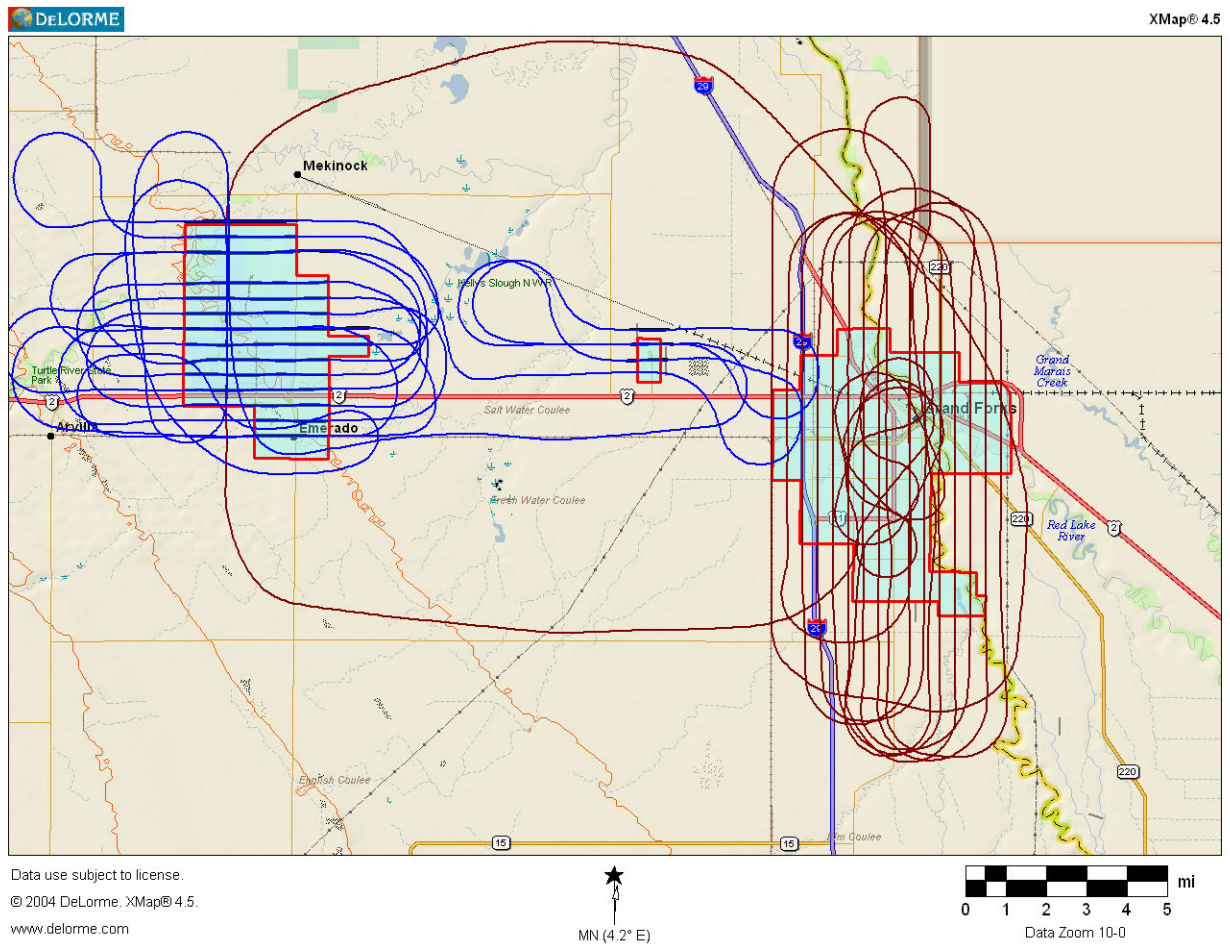

- a. Techniques and results:  
The City of Grand Forks (CGF) and the Air Force Base (GFAFB) conduct adult mosquito trapping. GFAFB public health reported trap counts of over 1000 mosquitoes prior to application in traps at locations on the base. Trap counts have submitted following the application at this time. The CGF reported the average mosquito counts exceeding 80 prior to application, with counts dropping to 17 immediately following application.

**8. REMARKS:** This spray is the first instance in some time that a calibration using actual chemical was conducted onsite prior to commencement of spray activities. Unfortunately, the first attempt at calibration revealed a faulty spray system, with no flow indication. The system was replaced on day 2 and a successful calibration was conducted. Special thanks to the members of spray maintenance for devising an ingenious method to conduct safe calibrations. Conditions on the first night of spray were sub-optimal, with colder temperatures(59 degrees F) and wind averaging 7 knots. Despite these conditions, there was still a significant amount of mosquito activity prior to the actual spray of the base. Conditions on the second night of spray (city of Grand Forks and East Grand Forks) were very optimal. Light wind (2-3 knots) from the east along with overcast conditions (little turbulence) undoubtedly resulted in good pesticide mixing in the atmosphere and uniform coverage. Ground sources reported good control of biting flies in the city of Grand Forks immediately following the application. Application rates were as planned, with 1.0 oz/acre chemical having been applied. It appears that this rate might be more effective than the lower rates used in years past.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 26-30 JUNE 2006 DRAFT

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: LTC (b) (6), MAJ (b) (6), 1LT (b) (6)
- 2) Navigators: , IN??, LTC (b) (6)
- 3) Flight Engineers: MSG (b) (6), MSG (b) (6)
- 4) Spray Operators: MSG (b) (6), MSG (b) (6), MSG (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: MSG (b) (6), TSG (b) (6), TSG (b) (6)
- 2) Crew Chief(s): MSG (b) (6), TSG (b) (6)
- 3) Avionics: TSG (b) (6)

##### c. Entomologists/Ground Support: CPT (b) (6), MAJ (b) (6) (6)

#### 2. SCHEDULE: (All Local Times) PPR: 062601DC

##### 26 JUN (Monday)

0900: Showtime  
1100: Depart KYNG  
1300: Land KGFK/Safety Briefing  
1400: Spray In Brief (CPMP, MC, AC).

##### 27 JUN (Tuesday):

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 28 JUN (Wednesday):

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 29 JUN (Thursday):

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 30 JUN (Friday):

1130: Show time  
1330: Take off KGFK  
1730: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 UHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit, Trakstar Receiver and Antenna

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

#### 4. PPR: 062601DC

#### 5. RADIO FREQUENCIES: Air To Ground Primary UHF 392.2; VHF 123.45

**6. CONFIGURATION: SP2G**

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down
- c. **Number:** ULV: 18 8005s total (9 each side)
- e. **Aircraft:** 89-9105
- f. **Mission Identifier:** QZNRKA541177

**7. SPRAY PARAMETERS:**

- a. **Adulticide**
  - (1) **Area to be treated:** 11488 acres (Grand Forks AFB)
  - (2) **Altitude:** 150' for Adulticide application
  - (3) **Swath Width.** 2000 feet
  - (4) **Flow Rate.** 7.26 gallons/minute ULV
  - (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
  - (6) **Ground Speed:** 200 Knots
  - (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION:** 3 x 6 Paks and 1 van provided by 319 CES. Transportation (bus) will be provided to the In-Brief, vehicles will be picked up there.

2106: Sunset

##### 31 JUL (Saturday)

1300: Show time  
1430: Take off KRDR  
1830: Land KYNG

#### 3. REQUIRED ITEMS

a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone

b. **Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
2 Toshiba Computers, 1 SATLOC Manual, Project Notebook,

2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna,  
Batteries, Kodak Camera

- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

**4. PPR:**

**5. RADIO FREQUENCIES:** Air To Ground Primary 392.2; VHF 123.45  
KRDR Tower 124.9 V; Grand Forks Int'l 118.4 V

**6. CONFIGURATION: SP2G**

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulticide): 8008 TeeJet oriented straight down
- c. **Number:** ULV: 8 8008s total (4 each side)
- d. **Booms:** Fuselage
- e. **Aircraft:** #9105
- f. **Mission Identifier:** QZNRKA530208

**7. SPRAY PARAMETERS:**

**a. Adulticide**

- (1) **Area to be treated:** To be determined
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet for ULV or as determined by the PMP
- (4) **Flow Rate.** 4.36 gallons/minute ULV
- (5) **Application Rate.** 0.60 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:**

The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION: 2 Vans & 1 Staff provided by 319 CES**

14 Jul 05

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft 89-9108 available 1-5 Aug 05

**3. Concept of Operations:**

**1 Aug (Monday)**

0900: Showtime

1100: Depart KYNG

1300: Land KGFK/Safety Briefing

1500: Spray In Brief (CPMP, MC, AC) Customs Bldg, where plane is parked.

**2 Aug (Tuesday):**

1630: Show time

1700 Load Chemical

1830: Take off KGFK (Adulticide Spray Sortie)

2102: Sunset

**3 Aug (Wednesday):**

1630: Show time

1700 Load Chemical

1830: Take off KGFK (Adulticide Spray Sortie)

2101: Sunset

**4 Aug (Thursday):**

1630: Show time

1700 Load Chemical

1830: Take off KGFK (Adulticide Spray Sortie)

2100: Sunset

**5 Aug (Friday):**

1000: Show time

1200: Take off KGFK

1500: Land KYNG

**1 Jul (Friday):**

0900: Show time

1100: Take off KGFK

1500: Land KYNG

**4. Spray Parameters:**

- a. **Altitude:** 150' AGL for Adulticide swaths when no trees are present.
- b. **Swath Width.** 2000 feet for ULV or as determined by the CPMP
- c. **Flow Rate.** 4.36 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 21,767 acres

**5. Mission Commander:**

**6. Aircraft Commander:**

7. Support including Security Forces for the aircraft parking at Grand Forks Intl Airport due to Grand Forks AFB runway closure required at Grand Forks AFB ND is coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6) (b) (6) DSN (b) (6)

// Signed //

(b) (6) (b) (6) Maj, USAFR  
AERIAL SPRAY CHIEF

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 27 Jun - 1 Jul 05

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: Maj (b) (6) (6)
- (2) Pilots: MAJ (b) (6) (6) MAJ (b) (6) (b) (6) MAJ (b) (6) (6)
- (3) Navigators: LTC (b) (6) (b) (6) Maj (b) (6) (6)
- (3) Flight Engineers: MSG (b) (6) (6), MSG (b) (6) (b) (6) (6)
- (4) Spray Operators: MSG (b) (6) (6), MSG (b) (6) (6) MSG (b) (6) (b) (6) (6) SSG (b) (6) (6)

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) (6), TSG (b) (6) (6), TSG (b) (6) (6)
- (2) Crew Chief(s): MSG (b) (6) (b) (6) (6) SRA (b) (6) (6)
- (3) Avionics: MSG Ron Snell

##### c. Entomologists/Ground Support: LTC (b) (6) (b) (6) (6) MAJ (b) (6) (6), CPT (b) (6) (6) CPT (b) (6) (6)

#### 2. SCHEDULE: (All Local Times) PPR: N/A

##### 27 Jun (Monday)

0900: Show at KYNG  
1100: Depart KYNG  
1300: Land KGFK/Safety Briefing  
1500: Spray In Brief (CPMP, MC, AC, Spray Maintenance)

##### 28 Jun (Tuesday):

1630: Show time  
1700 Load Chemical  
1830: Take off KGFK (Adulticide Spray Sortie)  
2130: Sunset

##### 29 Jun (Wednesday):

1630: Show time  
1700 Load Chemical  
1830: Take off KGFK (Adulticide Spray Sortie)  
2130: Sunset

##### 30 Jun (Thursday):

1630: Show time  
1700 Load Chemical  
1830: Take off KGFK (Adulticide Spray Sortie)  
2130: Sunset

##### 1 Jul (Friday):

1000: Show time  
1200: Take off KGFK  
1500: Land KYNG

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder, 1 UHF Radio, 1 Measuring wheel, Project Notebook, Entomologist's Tool Kit
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

**4. PPR: Not Required**

**5. RADIO FREQUENCIES: Air To Ground Primary** UHF 392.2; VHF 123.45  
KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. Nozzle Tips/Orientation:** ULV (adulticide): 8008 Tee Jet oriented straight down
- c. Number:** ULV: 7 8008s total (4 left; 3 right)
- e. Aircraft:** 89-9107
- f. Mission Identifier:** QZNRKA463178

**7. SPRAY PARAMETERS:**

**a. Adulticide**

- (1) **Area to be treated:** 23,500 acres (Grand Forks AFB, City of GF, and possibly East Grand Forks)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 4.36 gallons/minute ULV
- (5) **Application Rate.** 0.60 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**SPRAY TEST (Please note that this test will be done prior to the actual application):**

Test Protocols:

- a. Purpose: Swath Characterization for a 500 foot altitude release will be measured using Trumpet and the fuselage ULV configuration. Live mosquitoes will be deployed as bioassays to determine efficacy. Glass slides will be used to collect droplets to compare size and density of droplets with mosquito kill rate. Approximately 10 sampling stations will be setup on a road near to Grand Forks AFB. Direction of sampling line will depend on wind direction, we will adjust our fly over (spray) line to be perpendicular to the prevailing wind (this is a cross wind test). Offset will be 4000 ft. Additionally, we need the average winds to be below 10 mph.
- b. Aircrew: We need the system to have stabilized prior to reaching the sampling points. Thirty seconds prior to the sampling point and 30 seconds after should be sufficient (30 seconds total), please be advised that this value could change. Spray Operators: Please record the MASS pressure at 5 second intervals and total spray-on time for this test. Navigator: Please record winds at altitude every ten seconds during the spray-on period.
- c. Microscope slides will be retrieved 30 minutes after the plane has passed. Please allow 1 hour before initiating the actual spray application in the test area. Number and size of the droplets will be determined as well as mosquito mortality, the following day.

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION:** Some 5 vehicle combination of vans and 6 packs provided by 319 CES. Transportation provided to lodging, vehicles will be picked up there.

**10. LODGING:** Holiday Inn, 701-772-7131/Fax 701-780-9112

**Directions:** East on Hwy 2 for 5 miles, passing under I29 turn right on 43<sup>rd</sup> St, it's on the left, big white bldg.

**11. CONTACTS:**

**a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

- (1) **Base Operations:** Airfield Manager DSN 362-4409  
-- DSN 362-xxxx or (701) 747-xxxx
- (2) **Environmental Officer:** (b) (6) , DSN (b) (6) , FAX 6155
- (3) **Base Civil Engineer:**
- (4) **Pest Management:** DSN 362-4289, FAX 3432
- (5) **Public Affairs:** DSN 362-5608/5023 (off duty CP ext 6711)
- (6) **Weather:** DSN 362-4396
- (6) **Billeting:** DSN 362-7200 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844

**910 AW AERIAL SPRAY**  
**Army Corps of Engineers Williston, ND 27 May – 5 JUN 09**  
**PMP'S POST-MISSION REPORT**

**1. MISSION BASICS:**

- a. Installation Sprayed: Army Corps of Engineers property near Williston
- b. Mission Duration: 27 May – 5 Jun 2009
- c. Purpose of Application: Control nuisance and vector mosquitoes (larval stages)
- d. Application Dates: 28 May – 3 Jun 2009
- e. Times of Application: see attachment 1.
- f. Acres Treated: 6,733
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) (b) (6)
- h. Date Spray Map Last Approved: 26 May 2009 (electronically delivered)
- i. Date of Waste Generation Letter: 26 May 2009
- j. Installation In-Briefing: (When/Where/Briefer/s): 19 May, 2009; Williston ACE Conference Room, Maj (b) (6)

**2. OPERATIONAL:**

- a. Mission Commander: LtCol (b) (6)
- b. Certified PMP/Entomologists (Category 11): Maj (b) (6) Maj (b) (6)  
(b) (6) (safety briefer)
- c. Aircrew:
  - Pilots: Maj (b) (6) (b) (6) Maj (b) (6)
  - Navigators: LtCol (b) (6)
  - Flight Engineers: SrA (b) (6)
  - Spray Operators: MSgt (b) (6) MSgt (b) (6) SSgt (b) (6)
- d. Maintenance:
  - Spray Maintenance: TSgt (b) (6) TSgt (b) (6) SSgt (b) (6)  
(b) (6) SrA (b) (6)
  - Crew Chief(s): SSgt (b) (6) (b) (6) A1C (b) (6)
  - Avionics: TSgt (b) (6)
- e. Flying Data:
  - (1) Spray Sorties/Hours: 15 + 1 flush/25.1
  - (2) Ferry Sorties/Hours: 2/6.9

**3. PESTICIDES:**

- a. Trade Name (% Active Ingredient): Vectobac 12AS (1200 ITU/mg)
- b. EPA Registration Number: 73049-38
- c. Gallons Pesticide Loaded: 1,240
- d. Pesticide Applied: 1,240 gal
- e. Diluent: 25,676 gallons water and 1,000 gallons of water rinse and flush
- f. Other Additives Used: Poly Control® drift reduction agent (32oz/load; 5.8 gal total)
- g. Application Rate: 24 oz/acre Vectobac 12AS®

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 9107
- b. Spray System (Modules Used) and System ID #: 3
- c. Spray System Configuration: SP3-Module System/Fuselage Booms
- d. Nozzle Type/Size: Raindrop nozzles
- e. Nozzle Orientation & Number Used: 24- straight back
- f. Pressure (PSI): 59-60
- g. Flow Rate: 372 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 200'
- b. Spray Offset: none
- c. Spray Release Altitude: 100'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): variable conditions at speeds varying calm to 15 kts. Sprays were conducted into the wind.
- b. Temperature (Degrees Fahrenheit): 35-78° F
- c. Relative Humidity: 33-88%
- d. Cloud Cover: varied between cloudy to clear
- e. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Williston Vector Control & an Air Force entomologist flew over the Williston ACE property and marked flooded areas with GPS software. Areas were sampled using standard larval surveillance techniques to determine pest densities. Larval density ranged between 5-200 larvae per dip depending on location, all larval instars were represented and only a few pupae were observed. This indicated that Vectobac would be an appropriate larvicide to use.
- b. Effectiveness:
  - (1) Technique/s Used: Larval dip samples
  - (2) Results: Excellent results were encountered in treated areas. An example is given in Attachment 2.

8. **REMARKS:** This is the first application at the Williston Army Corps of Engineers (ACE) property near Williston ND. The Yellowstone/Missouri confluence has historically had mosquito problems with Lewis & Clark making comments about mosquitoes when they passed through. The target pest for this time of the year, *Aedes vexans*, lays eggs singly in moist soil that hatch the following season when flooding occurs; since river height fluctuates throughout the year, identification of breeding areas is challenging and requires significant surveillance. Identifying the breeding habitats and translating them into spray blocks that are functional for application with a C-130H is paramount to success in this particular program. The ACE received congressional funding for the project and Williston Vector Control District ((b) (6)) is the local technical advisor for the project. Attachment 3 shows the portion of the proposed spray blocks actually treated by the Air Force. Portions of the spray blocks were left for smaller aerial aircraft and priorities were determined daily by Williston VCD. Post-application sampling was very encouraging with greater than 95% reductions observed. We appreciate the support of all the agencies involved, including Minot AFB where the larvicide mixing took place. Special thanks go to the Minot AFB Pest Management Shop (Ms. (b) (6)) and 5CES who received and temporarily stored the larvicide. (b) (6) (Valent Biosciences) provided technical support. Adult mosquito control may occur at Williston during the 15-23 July mission to Minot AFB, if this can be coordinated.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## WILLISTON ARMY CORPS OF ENGINEERS, WILLISTON, ND

### 27 May – 5 JUN 09

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes, with larvicide, in order to improve working conditions and lower risk of vector-borne illness to individuals working and living in and around the City of Williston.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Pilots: LtCol (b) (6) (MC) Maj (b) (6) (b) (6) Maj (b) (6)
- (2) Navigators: Lt Col (b) (6)
- (3) Flight Engineers: SrA (b) (6)
- (4) Spray Operators: MSgt (b) (6), MSgt (b) (6), SSgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSgt (b) (6), TSgt (b) (6), SSgt (b) (6), SrA (b) (6)
- (2) Crew Chief(s): SSgt (b) (6), A1C (b) (6)
- (3) Avionics: TSgt (b) (6)

##### c. Entomologist: Maj (b) (6) (b) (6) (will be at Williston) & Maj (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 27 MAY (Wed):

0800 Show time  
1000 Depart KYNG  
1245 Land KMIB  
1330 Installation in-Brief, safety brief, and mission plan coordination briefings. No one leaves the aircraft area until cleared out.

##### 28 MAY (Thurs): \*As many sorties as wx permits each day

0400 Show time/WX Decision  
0430 Load water & Vectobac  
0545 Takeoff KMIB (larvicide Spray Sortie) at Williston ACE property (near KISN).  
0601 Sunrise

##### 29 MAY (Fri):

0430 Show time/WX Decision  
0430 Load Chemical  
0545 Takeoff KMIB  
0601 Sunrise

##### 30-31 May (Sat-Sun): Weekend ops hrs (0700-1700 hrs Local)

0530 Show time/WX Decision  
0530 Load Chemical  
0715 Takeoff KMIB  
0600 Sunrise

##### 1 Jun (Mon)

0430 Show time/WX Decision  
0430 Load Chemical  
0615 Takeoff KMIB (airfield opens at 0600)  
0559 Sunrise

##### 2-4 Jun (Tues-Thurs)

0400 Show time/WX Decision  
0430 Load water & Vectobac  
0545 Takeoff KMIB (larvicide Spray Sortie) at Williston ACE property (near KISN). Thurs will include flush sortie.  
0558 Sunrise

##### 5 June (Fri)

0700 Showtime  
0900 Depart KMIB  
1335 Land KYNG

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, Compass, Pest Safety Binder,  
1 VHF radio Project Notebook
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment

**4. KMIB PPR: 2701WX**

- 5. RADIO FREQUENCIES: Air To Ground Primary** UHF 392.2; VHF 123.45  
Minot AFB Tower 120.65 V, 236.6, 253.5; Minot International 118.2 V, 393.1 or Unicom 122.95

**6. CONFIGURATION: SP3G**

- a. **System:** 3-Module System/Fuselage Booms
- b. **Nozzle Tips/Orientation:**  
Larvicide: Raindrop nozzles straight back
- c. **Number:**  
Larvicide: fuselage only, 24 total (12 each side) straight back
- d. **Booms:** Fuselage
- e. **Aircraft:** 909107
- f. **Mission Identifier:** QZNRKA282147

**7. SPRAY PARAMETERS:**

- a. **Larvicide**
  - (1) **Area to be treated:** approx. 8,000 acres (plan on 16-17 sorties)
  - (2) **Altitude:** 100' for Larvicide application
  - (3) **Swath Width.** 200 feet
  - (4) **Flow Rate.** 372 gallons/minute \*\*Please spray out entire volume on each sortie!
- b. **Application Rate.** 4 gallons/acre (water with 1.5 pints of Vectobac®)
- c. **Ground Speed:** 200 Knots

- 8. SPRAY MIXING AND LOADING:** Plan to load 1800 gallons of water per lift.  
Full load will consist of 1800 gallons of water + 85 gallons of Vectobac AS + 4 gallons of Staput

Subsequent loads can be calculated by the following formulas:

Determine the volume remaining in MASS. Add water to give 1800 gallons total. Then add Vectobac at 0.05 gallons per gallon of water added; Staput is added at 0.00023 gallons per gallon of water added.

**9. TRANSPORTATION:**

Enterprise Rent a Car

# AERIAL SPRAY OPERATIONAL SCHEDULE

## AVON PARK, FL

### 27 NOV – 1 DEC 06

**PURPOSE/OBJECTIVE/BENEFIT:** Aircrew and Spray Maintenance will be conducting flight and ground training. Plan on both ULV and UHV configurations for Loadmaster training. Hot turn engine running re-supply training with spray maintenance will also be conducted during this mission. Copilot initial qualification training sorties will be conducted. Mission commander/AC will determine the priority and plan of training.

\*\*Airspace immediately around the airfield will be limited due to training with a UAV, but we can coordinate airspace issues with the tower/other unit using the range at that time to make the most of the range area.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

1. Pilots: LTC (b) (6) Cpt (b) (6) 1Lt (b) (6) (b) (6) 1LT (b) (6) (b) (6)
2. Navigators: LTC (b) (6) ,
3. Flight Engineers: Msgt (b) (6) (b) (6)
4. Spray Operators: Msgt (b) (6) , Msgt (b) (6) Msgt (b) (6) ,

##### b. Maintenance:

1. Spray Maintenance: Tsgt (b) (6) , Tsgt (b) (6) , Msgt (b) (6) ,  
Tsgt (b) (6)
2. Avionics: None
3. Crew Chiefs: Msgt (b) (6) (b) (6) Ssgt (b) (6) Sra (b) (6)

##### c. Entomologists: None

##### d. Admin Support: None

#### 2. SCHEDULE: (All time Local) All times and sequence of events are subject to change depending upon the needs of the testing and training.

27 NOV(MONDAY):

PPR # - Not Req since scheduled for range

0900: Show Time KYNG

1100: Depart KYNG

1400: Land KAGR

1500 FUEL (20K requested each day)

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **MCRD, PARRIS ISLAND, SC**

### **27-30 April 2009**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Pilots: MC: Maj (b) (6) (b) (6) LTC (b) (6) , Maj (b) (6) (b) (6)
- (2) Navigators: Maj (b) (6) (6)
- (3) Flight Engineers: CMSgt (b) (6)
- (4) Spray Operators: MSgt (b) (6) MSgt (b) (6) (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: TSgt (b) (6) , SSgt (b) (6) , TSgt (b) (6)
- (2) Crew Chiefs: TSgt (b) (6) MSG (b) (6)
- (3) Avionics: (b) (6)

##### **c. Entomologist:** Maj (b) (6)

#### **2. PPR REQUIREMENTS: 117-01 SPRAY07**

**3. PLANNED SEQUENCE OF EVENTS:** (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

##### **27 APR (Monday)**

1500 Show  
1700 Depart YNG  
1900 Land KNBC  
1915 Safety Brief

##### **28 APR (Tuesday)**

TBD Brief  
1630: Showtime  
1700: Wx Decision and Load Chemical  
Take off TBD (approx. 1850) or mission (Start Spray 1.0 hrs prior to Sunset)  
Sunset: 2002

##### **29 APR (Wednesday) Wx Backup or Training**

TBD Brief  
1630: Showtime  
1700: Wx Decision and Load Chemical  
Take off TBD (approx. 1850) or mission (Start Spray 1.0 hrs prior to Sunset)  
Sunset: 2003

##### **30 APR (Thursday) \*\*Departure time will slip depending upon Wednesday evening completion time.**

1000 Show  
1200 Depart KNBC  
1400 Land KYNG

#### **4. ITEMS TO TAKE/NOTES:**

##### **a. Mission Commander:**

- (1) Mission Commander Cell Phone

- b. **Entomologist:**
  - (1) Wind Gauge & Compass
  - (2) VHF Radios and Cellular Phone
  - (3) Pesticide Safety Binder
- c. **Navigators:**
  - (1) Maps
  - (2) Templates
- d. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

## 5. **SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** size = 8005; 7 open
- d. **Differential GPS:** Wingman Installed
- e. **Aircraft:** 90-9107
- f. **Mission Identifier:** QZNRKA121117

## 6. **SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: Marvel Mystery Oil
- b. **Application:** 0.75 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 8 Minutes
- h. **Flow Rate:** 2.7 gallons/Minute

7. **AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading 1.5 drums of Dibrom

8. **PARKING PLAN:** NAS Beaufort, SC. Please limit number of vehicles and trips on the flight line

## 9. **AIR TO GROUND RADIO FREQUENCIES:**

Beaufort Tower: 119.05 MCAS TWR  
 Beaufort Approach 123.7  
 Hilton Head Arpt: 118.975 Tower, 123.0 CTAF (tower open until 0100 hrs Z)  
 Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 123.4 V**

10. **TRANSPORTATION:** Parris Island will provide 3 vehicles for transportation to and from quarters and for messing. Vehicles will be at Base Operations.

11. **SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

**27-30 April, 2009**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island MCRD, South Carolina
- b. Mission Duration: 27-30 April 2009
- c. Purpose of Application: Control of biting midges and adult mosquitoes
- d. Application Dates: 28 April 2009
- e. Times of Application (Local): 1915-2020
- f. Acres Treated: 5903
- g. Project Coordinator (Name, Phone #): (b) (6) (b) (6)
- h. Date Spray Map Last Approved: 06 May 2008
- i. Date of Waste Generation Letter: 10 April 2000.
- j. Installation In-Briefing: None: Conducted previously by Maj. (b) (6) (b) (6)
- k. Mission identifier: QZNRKA121117

**2. OPERATIONAL:**

- a. Mission Commander: MAJ (b) (6) (b) (6)
- b. Certified PMPs (Category 11): MAJ (b) (6)
- c. Aircrew:
  - (1) Pilots: MAJ (b) (6) (b) (6) LTC (b) (6)
  - (2) Navigator(s): LTC (b) (6) (6)
  - (3) Flight Engineer: CMSGT (b) (6)
  - (4) Spray Operators: MSG (b) (6) MSG (b) (6) (b) (6) MSG (b) (6)
- d. Safety Briefer: MAJ (b) (6)
- e. Spray Maintenance: TSG (b) (6) TSG (b) (6) , SSG (b) (6)
- f. Crew Chiefs: TSG (b) (6) SSG (b) (6)
- g. Avionics: TSG (b) (6)
  - (1) Spray Sorties/Hours: 1/1.7 (28 April )
  - (2) Ferry Sorties/Hours: 2/2.2 (27 April), 2.0 (30 April)
  - (3) Training Sorties/Hours: 1/1.5 (29 April)

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 45
- e. Gallons Pesticide Applied: 39
- f. Gallons and Name Diluent Used: None
- g. Gallons and Name of Flush Used: None. Air Purge only
- h. Other Additives Used: n/a
- i. Application Rate: 0.84 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 90-9107
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV #4
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles
- e. Nozzle Orientation & Number Used: 9 straight down; 4 left, 5 right
- f. Pressure (PSI): 67
- g. Flow Rate: approx 3.0 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): Ground; 140@4.5 knots average; airplane 140 @ 8 knots average.
- b. Temperature (°F): Ground; 81° at 1700
- c. Humidity: Ground; 62% at 1700
- d. Cloud Cover: 10%
- e. Source: Ground observations/at altitude during spray

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on weather conditions.
- b. Effectiveness:
  - (1) Technique/s Used: CO2 traps were used to monitor biting midge and mosquito densities pre- and post-treatment. In addition, ground monitors confirmed midge and mosquito activity at time of spraying
  - (2) Results: Post mission trap counts are pending. Landing and biting counts were minimal the day following application.

- 8. REMARKS:** This second spray of the 2009 season was quite successful from an operational standpoint. There were no equipment failures of any kind. Weather conditions proved to be ideal for aerial spray on the planned application date. The acreage covered was less than originally planned because there was insufficient chemical to cover the final swaths. This is because the spray system was dispensing slightly more than anticipated. In future, ground calibration should be accomplished prior to aerial spray activities. Once again, thanks to (b) (6) of Parris Island MRD for excellent coordination.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 27-31 AUG 07

**Purpose/Objectives/Benefits:** Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes at LFI and the surrounding communities.

**1. 910 AW PARTICIPANTS:**

**a. Aircrew:**

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: Capt (b) (6) (b) (6) Maj (b) (6)
- (3) Navigator: Maj (b) (6)
- (4) Flight Engineers: MSG (b) (6), Ssgt (b) (6)
- (5) Spray Operators: Msg (b) (6), MSG (b) (6)

**b. Maintenance:**

- 1. Spray Maintenance: TSG (b) (6), Tsgt (b) (6) Tsgt (b) (6)
- 2. Crew Chiefs: SRA (b) (6), Tsgt (b) (6)
- 3. Avionics: (b) (6)

**c. Entomologists:** MAJ (b) (6) LTC (b) (6)

**d. Vehicles:**

- **Vehicle Dispatch:** Will supply us with 2x9pax vans and 2 cars
- **MC / Entomologist:** One Car
- **Ops:** One van (9 pax), one car
- **Mx:** One Van (9 Pax)

**e. Billeting Office:** COM: (757) 764-4667 POC TSG Cox  
DSN 574-4667, EXT 2528; FAX 574-3038  
**Clarion Hotel (757)838-5011**  
1809 W. Mercury Blvd

**2. PPR: 0827SF02**

**3. SCHEDULE: (All times local)**

**27 AUG (Monday):**

- 0900: Show Time
- 1100 Take Off YNG
- 1230 Land KLF w/ Safety Briefing immediately following
- 1400: Installation Briefing
- 1500 Calibrate system with Dibrom
- 1600 Chemical loaded/Wx Call
- 1745 Take off LFI
- 1942 Sunset

**28 AUG (Tuesday):**

- 1530 Show time
- 1600 Wx/Decision, load Dibrom
- 1745 Take off LFI
- 1940 Sunset

**29 AUG (Wednesday):** System clean up/wx backup/Training

- 1530 Show time
- 1600 Wx/Decision, load Dibrom
- 1745 Take off LFI
- 1939 Sunset

**30 AUG (Thursday):** System clean up/wx backup/return to YNG

- 1530 Show time
- 1600 Wx/Decision, load Dibrom
- 1745 Take off LFI
- 1937 Sunset

**31 AUG (Friday) Deploy to YNG**

- 1000: Show Time

1200: Take off KNBC

1400: Land KYNG

\*\*\*If mission is complete early, the mission will return early.

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 269.25, 248.2, 241.0**
  - (1) Ops phone DSN878-3588
  - (2) Tower phone DSN 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int: CTAF – 118.7 or 257.9(Operating Hours 1000Z-0200Z)**
  - (1) Ground – **121.9** or 348.6 (phone 877-0221 ops)
  - (2) Tower – **118.7** (phone DSN 877-2862) voice mail 7-2962
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
- c. **Langley AFB: Tower DSN 574-7999**
  - (1) Tower - **125.0** or 253.5
  - (2) Ground - **121.7** or 275.8
  - (3) Clearance – **118.85** or 257.625
  - (4) Metro - **239.8**
  - (5) ATIS – 270.1
- d. **Norfolk NAS (Chambers Fld): Tower –124.3, 379.15, Tower Supervisor DSN 262-3443**
- e. **Norfolk Approach: 125.7 or 335.625**
- f. **Spray Ground: Primary 392.2; Secondary: 308.6**

**7. IN-BRIEFING:** 1400 hrs; CE Conference Room

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** 9 8005 nozzles -- straight down (4 left - 5 right)
- c. **Aircraft:** 90-9107
- d. **Mission Identifier:** QZNRKA810239

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Potentially 125,000 acres on the peninsula but final acreage TBD
- g. **Swath Width:** 2000 foot

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 1600 hrs each day pending weather and heat index.\*\*Calibration performed unless otherwise

directed by the Entomologist or Mission Commander

**d. Furnished by Installation:**

- (1) Pesticide
- (2) Loading Equipment/Crew
- (3) Hazardous Waste Disposal
- (4) Two B-5 or B-1 Stands

**11. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT-Langley AFB 27-31 AUG 2007

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB and Craney Island, VA
- b. Mission Duration: 27-31 AUG 2007
- c. Purpose of Application: Control of adult mosquitoes transmitting arboviruses
- d. Application Dates: 28-30 AUG 07
- e. Times of Application (Local): 1700-1930 (28 AUG); 1645-1939 (29 AUG)
- f. Acres Treated: 99874 total: 52,824 (28 AUG); 47,290 (29 AUG)
- g. Project Coordinator (Name, Phone #): (b) (6)
- h. Date Spray Map Last Approved: 27 AUG, 2007
- i. Date of Waste Generation Letter: 4 April 1996
- j. Installation In-Briefing: 1 CE Conference Room, Langley AFB; 27 AUG 07; MAJ (b) (6)  
LTCOL (b) (6)
- k. Mission identifier: QZNRKA810239

### 2. OPERATIONAL:

- a. Mission Commander: LTCOL (b) (6)
- b. Certified PMPs (Category 11): MAJ (b) (6) (b) (6) LTCOL (b) (6)
- c. Aircrew:
  - (1) Pilots: CPT (b) (6) (b) (6) MAJ (b) (6)
  - (2) Navigator(s): MAJ (b) (6)
  - (3) Flight Engineer: MSG (b) (6)
  - (4) Spray Operators: MSG (b) (6) , MSG (b) (6) , MSG (b) (6)  
(b) (6)
- d. Safety Briefer: LTCOL (b) (6)
- e. Spray Maintenance: TSG (b) (6) , TSG (b) (6) TSG (b) (6)
- f. Crew Chiefs: SRA (b) (6) , TSG (b) (6)
- g. Avionics: (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 2/2.5 (28 AUG), 3.2 (29 AUG)
  - (2) Ferry Sorties/Hours: 2/1.6 (27 AUG), 1.6 (31 AUG)
  - (3) Training Sorties/Hours: 1/1.5 (27 AUG)

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom® Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom® Concentrate (neat)
- d. Gallons Pesticide Loaded: 270 (28 AUG); 120 (29 AUG)
- e. Gallons Pesticide Applied: 208 (28 AUG); 191 (29 AUG)
- f. Gallons and Name Diluent Used: 10 gallons marvel oil
- g. Gallons and Name of Flush Used:
- h. Other Additives Used: n/a
- i. Application Rate: 0.5 oz/acre

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 90-9107
- b. Spray System (Modules Used) and System ID #: SP2G MASS ULV
- c. Spray System Configuration: 2-Module System/Fuselage Booms
- d. Nozzle Type/Size: TeeJet 8005 flat fan nozzles

- e. Nozzle Orientation & Number Used: 9 straight down; 4 left, 5 right
- f. Pressure (PSI): 46
- g. Flow Rate: 3.63 gpm

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 2000 feet
- c. Spray Release Altitude: 150 feet
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed in knots): 70°/4 beginning dropping to 2 at 1900 on ground, 50° to 70°/7 at airplane (28 AUG); 70°/7 at airplane on Langley Peninsula, 110°/8 at Craney Island (29 AUG)
- b. Temperature (°F): 84° at 1735, dropping to 80° at 1900 (28 AUG)
- c. Cloud Cover: Clear (28 and 29 AUG)
- d.. Source: Ground observations/at altitude during spray

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: Community of Hampton reported an 87% reduction at 4 locations in mosquito counts following the application. Langley pest management and City of Portsmouth reported good control, with no significant numbers of daylight-flying species having been caught. Ft. Eustis reported excellent control. No report was available from York County. However, the pest management POC for that area was extremely pleased with the work done.

- 8. REMARKS:** Evidence of mosquito vectored viruses (namely Eastern Equine Encephalitis and West Nile Virus) has shown up in the tidewater area for the summer season 2007. This was the first spray of 2007, where in normal years the Langley peninsula receives 3-4 sprays per year. While popular local opinion related these depressed mosquito populations to the predaceous work of dragonflies, seen in abundance this year, it is more likely correlated with a much lower than average rainfall. Mosquito populations finally justified aerial application of pesticides following a significant rainfall event. Outstanding levels of mosquito control were achieved and the customers were pleased with the application. We received excellent support from Langley AFB, 1 CES to make this mission a success.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Langley AFB, VA.

1. Objective/Purpose/Benefits of the Spray Mission: Aerial application of insecticide to control the populations of nuisance and disease carrying mosquitoes around LFI and the surrounding communities.

2. Capability: Aerial Spray C-130 Aircraft available 27-31 AUG 07

3. Concept of Operations:

**27 AUG (Monday):**

1000: Show Time  
1200 Take Off YNG  
1330 Land KLF w/ Safety Briefing immediately following  
1430: Installation Briefing  
1500 Calibrate system with Dibrom  
1600 Chemical loaded/Wx Call  
1745 Take off LFI  
1942 Sunset

**28 AUG (Tuesday):**

1530 Show time  
1600 Wx/Decision, load Dibrom  
1745 Take off LFI  
1940 Sunset

**29 AUG (Wednesday):** System clean up/wx backup/Training

1530 Show time  
1600 Wx/Decision, load Dibrom  
1745 Take off LFI  
1939 Sunset

**30 AUG (Thursday):** System clean up/wx backup/return to YNG

1530 Show time  
1600 Wx/Decision, load Dibrom  
1745 Take off LFI  
1937 Sunset

**31 AUG (Friday) Deploy to YNG**

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

4. Spray Parameters:

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom<sup>®</sup> Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute
- f. **Acreage:** Approximately 125,000 acres on the peninsula
- g. **Swath Width:** 2000 foot

# **AERIAL SPRAY OPERATIONAL SCHEDULE**

## **PARRIS ISLAND MCRD, SC**

### **27-31 OCT 2002**

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### **1. 910 AW PARTICIPANTS:**

##### **a. Aircrew:**

- (1) Mission Commander: Maj (b) (6) (b) (6)
- (2) Pilots: Maj (b) (6) (b) (6) Lt (b) (6) , Lt Col (b) (6) (b) (6)
- (3) Navigators: Maj (b) (6) (b) (6) Lt Col (b) (6) (b) (6)
  - (a) Flight Engineers: SMS (b) (6) , MSG (b) (6)
  - (a) Spray Operators: MSG (b) (6) , TSG (b) (6)

##### **b. Maintenance:**

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6) , SSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , SSG (b) (6)
- (3) Avionics: TSG (b) (6)

##### **c. Pest Management Professionals/Entomologist:** Capt (b) (6) (b) (6)

##### **d. Public Affairs:** Lt (b) (6) (b) (6)

#### **2. PLANNED SEQUENCE OF EVENTS:** (All times local)

##### **27 OCT (Sunday):**

1300: Show Time  
1500: Take off KYNG  
1830: Land KNBC **PPR # 300-01**  
1900: Safety Briefing

##### **28 OCT (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

1300: Show Time  
1400: Load Chemical  
1545: Take off KNBC  
1737: Sunset  
1730: Land KNBC

##### **29 OCT (Tuesday):**

1300: Show Time  
1400: Load Chemical  
1545: Take off KNBC  
1737: Sunset  
1730: Land KNBC

##### **30 OCT (Wednesday):**

1300: Show Time  
1400: Load Chemical  
1545: Take off KNBC  
1736: Sunset  
1730: Land KNBC

##### **31 OCT (Thursday):**

0800: Show Time  
1000: Take off KNBC  
1200: Land KYNG

**3. ITEMS TO TAKE:**

**a. Entomologist/CPMP:**

- (1) Wind Gauge, Compass, and Signal Mirrors
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) Calibration Tables
- (5) DGPS Computers & Maps
- (6) Oil Sensitive Papers
- (7) Trackstar Equipment

**b. Navigators:**

- (1) Maps
- (2) Templates
- (3) Laptop Computer

**c. Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

**4. SPRAY CONFIGURATION: SP-2G**

- a. Mass:** 2-Module System (PI)
- b. Booms:** Stainless Steel ULV Wing Booms
- c. Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- e. Differential GPS:** Installed
- f. Aircraft:** 108; **Mission Identifier:** QZNRKA 019 293

**5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

**a. Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: HAN

- b. Application:** 1 Ounce Dibrom®/Acre
- c. Spray Altitude:** 150 Feet
- d. Swath Width:** 1,000 Feet
- e. Ground Speed:** 200 Knots (338 Feet/Second)
- f. Acreage:** 7,500 Acres
- g. Spray-On Time:** 16 Minutes
- h. Flow Rate:** 3.634 Gallons/Minute

- 6. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per mission and 25 gallons HAN in flush tank.

- 7. PPR REQUIREMENTS:** Required:

- 8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
Hilton Head Arpt: 123.0 UNI  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8**

- 10. TRANSPORTATION:** Parris Island will provide two vans for transportation to and from quarters and for messing. There will be an additional vehicle for the CPMP/Entomologists.

- 11. SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 27-31 Oct 2002
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 28 Oct & 30 Oct
- e. Time/s of Application (Local): 1540-1755 (28 Oct) & 1520-1745 (30 Oct)
- f. Acres Treated: 7680 (28 Oct & 30 Oct)
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) Environmental/Spray Coordinator, DSN(b) (6)
- h. Date Spray Map Last Approved: 7 April 2002
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 28 Oct, Office of the Assistant Chief of Staff I & L, LTC (b) (6) & CAPT (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: MAJ (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): CAPT (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: MAJ (b) (6) (b) (6)
  - (2) Co-pilot: Lt (b) (6)
  - (3) Navigator(s): LTC (b) (6) (b) (6) MAJ (b) (6) (6)
  - (4) Flight Engineer(s): SMS (b) (6)
  - (5) Spray Operators: MSG (b) (6), TSG (b) (6)
- d. Safety Briefer: CAPT (b) (6) (b) (6)
- e. Spray Maintenance: SMS (b) (6), TSG (b) (6), SSG (b) (6)
- f. Spray Ground Monitors: CAPT (b) (6) (b) (6)
- g. Crew Chiefs: TSG (b) (6), SSG (b) (6)
- h. Avionics: TSG (b) (6)
- i. Public Affairs: Lt (b) (6) (b) (6)
- j. Flying Data:
  - (1) Spray Sorties: 2 sorties; 4.7 hours
  - (2) Ferry Sorties: 2 sorties; 5 hours

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup> (28 & 30 Oct)
- e. Gallons Pesticide Applied: 60 Gal Dibrom<sup>®</sup> (28 & 30 Oct)
- f. Gallons and Name of Flush Used: 15 gal VM & P NAPHTHA (28 & 30 Oct)
- g. Other Additives Used: None
- h. Application Rate: 1 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 40-70 psi
- g. Flow Rate: 3.6 GPM

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off Set: 1000' - 3000' depending on wind speed
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 3.7-7.0 Knots (28 Oct & 30 Oct)
  - (2) Release Altitude: 6.0-7.0 Knots (28 Oct & 30 Oct)
- b. Temperature (Degrees Fahrenheit): 78-75°F (28 Oct); 82-78 °F (30 Oct)
- c. Relative humidity: 83-94% (28 Oct); 52-60% (30 Oct)
- d. Cloud Cover: mostly cloudy (28 Oct & 30 Oct)
- e. Source: Ground observations at the MCRD Marina and Rifle Range

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1 meter dowels
  - (2) Results: The majority of cards showed coverage within the spray area.
- b. Effectiveness:
  - (1) Technique/s Used: Trapping midges and mosquitoes using carbon-dioxide baited traps.
  - (2) Results: Significant drop in nuisance flies on Parris Island (see remarks).

**8. REMARKS:**

This autumn marked one of the worst years on record for nuisance mosquitoes, so much so that the presence of mosquitoes overshadowed the biting midge problem, which is normally quite noticeable in the fall at Parris Island. A combination of drought-like conditions during the summer and storms later in the fall were to blame for these outbreaks. Thus, climatic factors were just right for the proliferation of mosquitoes rather than any point source increase in their production. The application on 28 Oct was extremely successful. The primary target pest for this spray was the salt marsh mosquito *Ochrotatus taeniorhynchus*, which hosts seeks at the target time of our sprays. The overall numbers of this mosquito were lowered significantly by the aerial spray application, bringing much needed relief to members operating at PIMCRD. For example, a trap near the rifle range collected 2144 mosquitoes the week prior to the spray and only 24 mosquitoes during the same trapping period following the spray. This represents a reduction of 98.9% of mosquitoes; subsequently, the midges at this site were reduced by 98% as well. Finally, the Assistant Chief of Staff I & L, COL (b) (6) expressed an interest in additional spray dates for the coming year, so we will try and accommodate his request.

(b) (6)

(b) (6) (b) (6) Capt, USAFR  
Certified Pest Management Professional

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 28 Jul – 1 Aug 2008

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks and Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: LTC (b) (6) , Maj (b) (6) Capt (b) (6) (MC)
- 2) Navigators: LTC (b) (6)
- 3) Flight Engineers: MSgt (b) (6) SSgt (b) (6)
- 4) Spray Operators: MSgt (b) (6) TSgt (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: TSgt (b) (6) MSgt (b) (6) TSgt (b) (6) TSgt (b) (6)
- 2) Crew Chief(s): TSgt (b) (6) SSgt (b) (6)
- 3) Avionics: SSgt (b) (6)

##### c. Entomologists/Ground Support: Maj (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 28 JUL (Monday)

- 0930: Show time
- 1130: Depart KYNG
- 1330: Land KRDR/Safety Briefing
- 1430: Spray In Brief (CPMP, MC, AC)

##### 29 JUL (Tuesday):

- 1700: Show time/WX decision
- 1730: Load Chemical
- 1915: Takeoff KRDR (Adulticide Spray Sortie)
- Sunset: 2107

##### 30 JUL (Wednesday):

- 1630: Show time
- 1700: Load Chemical
- 1845: Takeoff KRDR (Adulticide Spray Sortie)
- Sunset: 2106

##### 31 JUL (Thursday):

- 1630: Show time
- 1700: Load Chemical
- 1845: Takeoff KRDR (Adulticide Spray Sortie)
- Sunset: 2104

##### 1 AUG (Friday):

- 1000: Show time
- 1200: Takeoff KRDR
- 1600: Land KYNG

\*\*If the application is completed, we will return early.

#### 3. ITEMS TO TAKE

- a. **Mission Commander:** Cellular Phone, Mission Folder
- b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder, 1 VHF Radio, Water Sensitive Cards, Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors, Project Notebook, Entomologist's Tool Kit
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

#### 4. PPR: 082801JM

#### 5. RADIO FREQUENCIES: Air To Ground Primary VHF 123.45 KRDR Tower 124.9 V; Grand Forks International 118.4 V

## 6. CONFIGURATION: SP2G

- a. **System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. **Nozzle Tips/Orientation:** ULV (adulicide): 8005 Tee Jet oriented straight down
- c. **Number:** ULV: 18 - 8005 total (9 each side)
- e. **Aircraft:** 90-9108
- f. **Mission Identifier:** QZNRKA974210

## 7. SPRAY PARAMETERS:

### a. Adulicide

- (1) **Area to be treated:** 11518 acres (Grand Forks AFB), 18346 (Grand Forks) and 877 (Grand Forks Intl)
- (2) **Altitude:** 150' for Adulicide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

## 8. SPRAY MIXING AND LOADING: The amount of Trumpet to load will be determined on site

## 9. TRANSPORTATION: Trans provided by CE, POC MSgt (b) (6) (DSN (b) (6) ): 4 six pax trucks (2 OPS, 2 MX), one 1.5 ton truck (spray MX). Vehicles at base ops with the exception of Trumpet loaded truck

## 10. LODGING: 16 rooms reserved at the Ramada: 1205 N. 43<sup>rd</sup> St, (701) 775-3951. Directions in mission folder Grand Forks AFB Lodging: (701) 747-3844 DSN 362-7200 or (701) 594-8431, FAX 362-3069

## 11. CONTACTS:

15 JUL 2008

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks and Grand Forks AFB ND.

**2. Capability:** Spray Aircraft available 28 July – 1 August 2008

**3. Concept of Operations:**

**28 JUL (Monday)**

0930: Showtime

1130: Depart KYNG

1330: Land KRDR/Safety Briefing

1430: Spray In Brief (CPMP, MC, AC)

**29 JUL (Tuesday):**

1630: Show time/WX decision

1700: Load Chemical

1900: Take off KRDR (Adulticide Spray Sortie)

Sunset: 2107

**30 JUL (Wednesday):**

1630: Show time

1700: Load Chemical

1900: Take off KRDR (Adulticide Spray Sortie)

Sunset: 2106

**31 JUL (Thursday):**

1630: Show time

1700: Load Chemical

1900: Take off KRDR (Adulticide Spray Sortie)

Sunset: 2104

**1 AUG (Friday):**

1300: Show time

1500: Take off KRDR

1900: Land KYNG

**4. Spray Parameters:**

**a. Adulticide**

- (1) **Area to be treated:** 18,400 acres (Grand Forks) and 11,488 acres (Grand Forks AFB)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**5. Aircraft Commander:** LTC (b) (6)(5)

**6.** Support at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator.

**7.** HQ AFRC/DOOM approval via email.

// Signed //

(b) (6) (b) (6) CAPT, USAFR  
757 Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 28 Aug – 1 Sep 06

**Purpose/Objectives/Benefits:** 500' spray characterization and aircrew training. Currently LFI and the surrounding areas are not needing aerial spray application, but be prepared to spray if the need develops prior to arrival. All changes to itineraries will be coordinated through the MC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6)
- (2) Pilots: Maj (b) (6) (b) (6) Capt (b) (6) , 1LT (b) (6) (b) (6)
- (3) Navigator: LTC (b) (6)
- (4) Flight Engineers: Msgt (b) (6) , Msgt (b) (6)
- (5) Spray Operators: CMsgt (b) (6) , Msgt (b) (6) , Msgt (b) (6) , Msgt (b) (6)  
McNeilly

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: Msg (b) (6) rgroff, SRA (b) (6)
- (3) Avionics: MSGT (b) (6)

##### c. Entomologists: CPT (b) (6) LTC (b) (6) (in place) and MAJ (b) (6) (b) (6) (in place)

##### d. Vehicles:

- **Vehicle Dispatch:** Will supply us with 2 VANS and 2 Pick up trucks
- **Ops:** One van (7 pax) and One Pick up
- **Mx:** One Van (15 Pax)
- **Entomologist:** One Pick Up

##### f. Billeting Office: COM: (757) 764-4667 POC Tsgt (b) (6) DSN 574-4667, EXT 2528; FAX 574-3038 **Holiday Inn 1815 W Mercury Blvd** - Mission Commander has Non Available slips

#### 2. PPR: 0828TP01

#### 3. SCHEDULE: (All times local)

##### 28 AUG (Monday):

- 1000: Show at KYNG
- 1200: Depart KYNG
- 1330: Land KLFI
- 1330: Mission Safety Briefing
- 1430: Spray In-Briefing
- 1600: Showtime, Weather Decision, Load Dibrom
- 1730: Take off KLFI (Adulticide Spray Sortie)
- 1940: Sunset

##### 29 AUG (Tuesday):

- 1530: Showtime, Weather Decision, Load Dibrom
- 1730: Take off KLFI (Adulticide Spray Sortie)
- 1800-2000: Quiet hours at Langley
- 1939: Sunset

##### 30 AUG (Wednesday):

- 1530: Showtime, Weather Decision, Load Dibrom
- 1730: Take off KLFI (Adulticide or Spray Training Sortie)
- 1937: Sunset

##### 31 Aug (Thursday):

- 1530: Showtime, Weather Decision, Load Dibrom
- 1730: Take off KLFI (Adulticide or Spray Training Sortie)
- 1936: Sunset

**1 SEP (Friday):**

1000: Show time Hotel Lobby  
1200: Take off for KYNG  
1315: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass, PCM Card, Pest Safety Binder, UHF Radios, Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit/Supply Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Taxi Way Foxtrot or as directed by Transient Alert.

**7. IN-BRIEFING:** 1430 hrs; CE Conference Room

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms
- b. **Nozzle Tips/Orientation:** Twenty 8005 nozzles -- straight down
- c. **Aircraft:** 89-9105
- d. **Mission Identifier:** QZNRKA072240

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 1.0 oz/acre
- e. **Flow Rate:** 7.2 Gallons/Minute
- f. **Acreage:** Configuration for testing only. In event of actual peninsula spray, see ento. for configuration.
- g. **Swath Width:** 2000 foot

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Taxi Way F Aero Club Ramp
- c. **When:** 1600 hrs each day pending weather and heat index.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

## August 2006 Langley Testing Mission Protocols

**Purpose:** To determine the effectiveness and swath characterization of a 500' release of adulticide (Dibrom) using a bioassay and spinning droplet impingers. These tests will be a continuation of tests conducted in early 2006 at Avon Park, FL in an effort to determine the feasibility of night spray operations at 500 feet.

### Proposed methods:

10 Sampling stations will be placed along a 5 mile transect. Sampling stations will be located approximately ½ mile apart. Each sampling station will be composed of a slide spinner mounted on a wood dowel pole, equipped with 2 teflon slides. In addition, each sampling station will be equipped with a mosquito cage containing 20 field collected adult mosquitoes.

Two trials will be conducted. Both trials will be conducted at the high rate of application. Dibrom will be dispensed at a flow rate resulting in an application rate of 1.0 ounce per acre (based on a 2000 foot swath). This translates into flow rate of 7.2 gallons per minute. The sampling transect will be positioned parallel to the prevailing wind and the flight path of the aircraft will be perpendicular to the transect. Depending on prevailing wind velocity, the flight path (offset) of the aircraft will be from 1000 to 2000 feet upwind of the first sampling station.

TeeJet nozzles (8005) will be used for both trials. In both tests, fluorescent dye will be added to the spray tanks (0.25% Uvitex OB) to facilitate droplet counting and sizing using UV microscopy. Spray will be turned on 30 seconds prior to coming abeam of the sampling line and will be turned off 30 seconds after coming abeam of the sampling line. Bioassay controls will be placed in a nontreated area for the duration of the test. 30 minutes after each application, cages and slides will be collected and returned to the laboratory. Caged mosquitoes will be transferred to clean holding containers furnished with sugar water. Mortality counts will be conducted at 2, 12, and 24 hour intervals. Spray droplets will be counted and sized with a UV microscope equipped with a reticle. 100 drops (if available) will be counted on each slide and the total area counted will be calculated.

### Materials/Resources required:

240 adult mosquitoes/trial. Total=480 mosquitoes  
10.8 gallons Dibrom plus provisions for boom charging  
Readily accessible, fairly open 5 mile long transects (N-S and E-W)  
24 insect cages with hairclips  
25 insect cups  
10 spinners/20 teflon slides/10 wooden dowels  
UV microscope  
Mosquito aspirators (2)  
5-10 collaborators  
2-3 large coolers

**MEMORANDAM FOR HQ AFRC/DOOM**

**FROM:** 757 AS/DOS

**SUBJECT:** Concept of Operations for Aerial Spray at Langley AFB, Hampton, Ft Eustis, VA

1. **Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites and mosquito borne diseases. Secondary mission is to determine the effectiveness and swath characterization of a 500' release of adulticide (Dibrom) using a bioassay and spinning droplet impingers.
2. **Capability:** Spray Aircraft 89-9106 Available 28 Aug- 1 SEP 06.
3. **Concept of Operations:**
  - SCHEDULE: (All times local)**
  - 28 AUG (Monday):**
    - 1000: Show at KYNG
    - 1200: Depart KYNG
    - 1330: Land KLFI
    - 1330: Mission Safety Briefing
    - 1430: Spray In-Briefing
    - 1600: Showtime, Weather Decision, Load Dibrom
    - 1730: Take off KLFI (Adulticide Spray Sortie)
    - 1940: Sunset
  - 29 AUG (Tuesday):**
    - 1530: Showtime, Weather Decision, Load Dibrom
    - 1730: Take off KLFI (Adulticide Spray Sortie)
    - 1800-2000: Quiet hours at Langley
    - 1939: Sunset
  - 30 AUG (Wednesday):**
    - 1530: Showtime, Weather Decision, Load Dibrom
    - 1730: Take off KLFI (Adulticide or Spray Training Sortie)
    - 1937: Sunset
  - 31 Aug (Thursday):**
    - 1530: Showtime, Weather Decision, Load Dibrom
    - 1730: Take off KLFI (Adulticide or Spray Training Sortie)
    - 1936: Sunset
  - 1 SEP (Friday):**
    - 1000: Show time Hotel Lobby
    - 1200: Take off for KYNG
    - 1315: Land KYNG
4. **Spray Parameters:**
  - Spray Application:**
    - a. **Altitude:** 150' AGL for Adulticide swaths.

- b. **Swath Width:** 2000 feet for ULV or as determined by the CPMP
- c. **Flow Rate:** 3.6 gallons/minute ULV
- d. **Application Rate:** 0.50 oz/acre Dibrom® Concentrate
- e. **Ground Speed:** 200 Knots
- f. **Proposed spray area:** Approximately 125,000 acres

**500' Test:**

- a. Testing will use same parameters as above with exception of 500' AGL.
5. **Mission Commander:** LTC (b) (6)
6. **Aircraft Commander:** Maj (b) ((b) (6)
7. Any questions concerning this mission please contact the Aerial Spray Office, DSN (b) (6) .

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.

**2. Capability:** Spray Aircraft Available 28 Jun 2002 (A/C #107, MSN ID: QZNRKA983179)

**3. Concept of Operations:**

**28 JUNE (Friday)**

0800: Show at KYNG  
1100: Depart KYNG  
1330: Land KRDR/Safety Briefing  
1430: In-brief

**29 JUNE (Saturday):**

0500: Show time/weather decision/load chemical  
0532: Sunrise  
0640: Take off KRDR  
2131: Sunset

**30 JUNE (Sunday):**

0500: Show time/weather decision/load chemical  
0532: Sunrise  
0640: Take off KRDR  
2131: Sunset

**1 JUL (Monday):**

0533: Sunrise  
1700: Showtime/weather decision/load chemical  
1830: Take off KRDR  
2131: Sunset

**2 JUL (Tuesday):**

TBA: Out-brief  
1100: Take Off KRDR  
1500: Land KYNG

**4. Spray Parameters:**

**a. Altitude:** 150' AGL for Adulticide swath when no trees are present.

- b. Swath Width.** 1500 feet for ULV or as determined by the PMP
- c. Flow Rate.** 3.3 gallons/minute ULV
- d. Application Rate.** 0.60 oz/acre Trumpet<sup>®</sup>), ULV
- e. Ground Speed:** 200 Knots
- f. Proposed spray area:** Approximately 1790 acres

**5. Mission Commander:** Lt Col (b) (6) (b) (6)

**6. Aircraft Commander:** Maj (b) (6) (b) (6)

**7.** Support required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6) (b) (6) DSN (b) (6)

**8.** HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

1300: Land KRDR/Safety Briefing  
1430: In-brief

##### **29 JUNE (Saturday):**

0533: Sunrise  
1600: Showtime/weather decision/load chemical  
1800: Take off KRDR  
2131: Sunset

##### **30 JUNE (Sunday):**

0532: Sunrise  
Larvicide application planned: exact timeframe for evening application TBA.  
2131: Sunset

##### **1 JUL (Monday):**

0532: Sunrise  
Larvicide application planned: exact timeframe TBA.  
2131: Sunset

##### **2 JUL (Tuesday):**

TBA: Out-brief  
1100: Take Off KRDR  
1500: Land KYNG

### 3. ITEMS TO TAKE:

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
  - b. **Entomologist:** 1 Cellular Phones, Wind Gauge, 2 Compasses, Pest Safety Binder, 2 Signal Mirrors, 1 UHF Radio, 10 Packs Water Sensitive Cards, 3 Boxes Card Holders with Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Toshiba Computers, 1 SATLOC Manual, Project Notebook, 2 Anemometers, Entomologist's Tool Kit, Trakstar Receiver and Antenna, Batteries, Kodak Camera
  - c. **Navigator:** Maps/Map Bag, Validation Map
  - d. **Spray Operator:** Safety Gear, Calibration Tables
  - e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®
4. **PPR:** Not required weekdays
5. **RADIO FREQUENCIES:** Air To Ground Primary 392.2; VHF 123.45

### 6. CONFIGURATION:

- a. **System:** 2-Module System/Stainless Steel ULV Wing Booms and Fuselage Booms
- b. **Nozzle Tips/Orientation:**  
ULV (adulticide): 8008 TeeJet oriented straight down  
Larvicide: Raindrop nozzles straight back
- c. **Number:**  
ULV: wing only, 8 8008s total (4 each side)  
Larvicide: fuselage only, 10 total (5 each side) straight back
- d. **Booms:** Full Wing and fuselage
- e. **Aircraft:** #107
- f. **Mission Identifier:** QZNRKA983179

### 7. SPRAY PARAMETERS:

- a. **Adulticide**
  - (1) **Area to be treated:** 40,000 acres
  - (2) **Altitude:** 150' for Adulticide application
  - (3) **Swath Width.** 2000 feet for ULV or as determined by the PMP
  - (4) **Flow Rate.** 4.35 gallons/minute ULV
  - (5) **Application Rate.** 0.60 oz/acre Trumpet, ULV
  - (6) **Ground Speed:** 200 Knots
- b. **Larvicide**
  - (1) **Area to be treated:**
  - (2) **Altitude:** 100' for Larvicide application
  - (3) **Swath Width.** 200 feet
  - (4) **Flow Rate.** 186 gallons/minute
- c. **Application Rate.** 2 gallons/acre (water with 0.75 oz of Altosid®)
- d. **Ground Speed:** 200 Knots

## 8. SPRAY MIXING AND LOADING:

a. **Adulticide:** The amount of Trumpet® to load will be determined on site

b. **Larvicide:**

-- **Composition of each Gallon:**

- (1) 0.375 ounces of Altosid® 20
- (2) 0.08 ounces of Control® drift retardant
- (3) Water

-- **Typical load:** (2 tanks of 450 gallons each)

Fill with 450 gallons of water/tank. Total water in tanks = 900 gal.

Total water added = 900 gallons

Add 1.32 gallons of Altosid® per tank (2.64 gallons total).

Add 1 bottle of Control®/tank while agitating approximately 15 min

Total quantity mix. 903 gallons

-- **Final Load for complete flush**

Fill tanks with the amount of water necessary for a proper system flush

-- **Mixing Instructions:**

SHAKE WELL BEFORE USING. Altosid® may separate on standing and must be thoroughly agitated prior to dilution.

PRECAUTIONARY STATEMENT: Spray solution should be used within 48 hours; always agitate before spraying.

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT

### 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB, ND
- b. Mission Duration: 28 Jun – 2 Jul 2002
- c. Purpose of Application: Control nuisance and vector mosquitoes
- d. Application Date: 1 Jul 2002
- e. Time/s of Application (Local): 0525-0906 & 1105-1235 L
- f. Acres Treated: 39,893 (Trumpet) & 446 (Altosid)
- g. Project Coordinator/s (Name/Rank, Title, Phone #): (b) (6) (b) (6) Environmental Officer, DSN (b) (6) and SSG (b) (6), NCOIC Pest Management Shop, DSN (b) (6)
- h. Date Spray Map Last Approved: 28 Jun 02
- i. Installation In-Briefing: (When/Where/Briefer/s): 28 Jun 2002; CE Conference Room, LTC (b) (6) & LTC (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): LTC (b) (6) (b) (6) Capt (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: Maj (b) (6) (b) (6)
  - (2) Pilot(s): Maj (b) (6) (b) (6) Maj (b) (6) (b) (6)
  - (3) Navigator(s): LTC (b) (6) (b) (6)
  - (4) Flight Engineer(s): SMS (b) (6), MSG (b) (6)
  - (5) Spray Operators: CMS (b) (6), MSG (b) (6)
- d. Safety Briefer:
- e. Spray Maintenance: TSG (b) (6), TSG (b) (6), SSG (b) (6), SSG (b) (6) (b) (6)
- f. Spray Ground Monitors: LTC (b) (6) (b) (6) Capt (b) (6) (b) (6)
- g. Crew Chiefs: TSG (b) (6) (b) (6) SSG (b) (6)
- h. Avionics: TSG (b) (6) lonen
- i. Flying Data:
  - (1) Spray Sorties/Hours: 4 sorties/5.9 hours
  - (2) Ferry Sorties/Hours: 2 sorties/6.4 hours

### 3. PESTICIDES:

- a. Trade Name (% Active Ingredient): Trumpet® EC (78% AI naled); Altosid® Liquid Larvicide Concentrate (20% methoprene)
- b. EPA Registration Number: Trumpet® EC 59639-90-548127; Altosid® 2724446
- c. Gallons Pesticide Loaded: 187 (Trumpet® EC); 2.5 (Altosid®) in 854 gallons water
- d. Gallons Pesticide Applied: 187 (Trumpet® EC); 2.5 (Altosid®)
- e. Gallons and Name of Flush Used: 50 gallons water for Trumpet® EC & 400 gallons water with Altosid®
- f. Other Additives Used: 0.08 oz of Control-brand drift reduction agent per gallon of water
- g. Application Rate: 0.6 oz/acre (Trumpet® EC); 2 gallons/acre (0.375 oz/acre A.I.) Altosid®

### 4. APPLICATION EQUIPMENT:

- a. Aircraft Type (Tail Number): 909107 (Mission Identification # QZNRKA983179)
- b. Spray System (Modules Used) and System ID #: Modules 1 and 2 of SP2G ULV
- c. Spray System Configuration: 2-Module System/Stainless Steel Wing & Fuselage Booms
- d. Nozzle Number & Orientation Used: 8 8008s 4 each side Trumpet; straight down; Raindrop 10, 5 each side Altosid®; straight back
- e. Pressure (PSI): 37-65
- h. Flow Rate: 0.60 oz/acre Trumpet; 186 gal/min Altosid®

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000' (Trumpet); 200' (Altosid®)
- b. Spray Off Set: 2000' (Trumpet); 50' (Altosid®)
- c. Spray Release Altitude: 150' (Trumpet); 100' (Altosid®)
- d. Ground Speed: 200 Knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - 1) Ground: 4-6 knots @ 110-160°
  - 2) Release Altitude: 8-12 knots @ 110-160°
- b. Temperature (Degrees Fahrenheit): 61-83°
- c. Cloud Cover: Partly cloudy
- d. Relative humidity: 77% at start 55% at finish
- e. Source: Direct observation

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

The Grand Forks AFB Public Health Unit and Pest Management conduct adult mosquito trapping and larval sampling to monitor mosquito densities on base.

- b. Effectiveness:
  - (1) Technique/s Used: Mosquito traps
  - (2) Results: Significant decrease in mosquito activity following application

**8. REMARKS:**

The decision to spray for adult mosquitoes at the first opportunity was made during the in-briefing. Our first opportunity to spray was on the morning of 29 Jun. Unfortunately, the DGPS navigation system had a processor problem and the sortie was scratched. The unit was field repaired with some excellent work by avionics technician TSG (b) (6) to prevent a long delay and the plane was available again 12 hours later. Adverse weather conditions prevailed until the morning of 1 Jul when an application of Trumpet EC was made. A second sortie was flown later that morning once the plane was reconfigured to apply larvicide in order to control developing mosquito larvae. The number of mosquitoes collected in surveillance traps dropped significantly following the spray. A reduction of approximately 80% was observed comparing the overall number of adult mosquitoes collected on 27 Jun to those collected on 2 Jul. Trapping mosquitoes or measuring biting rates to ascertain efficacy is an important part of the mosquito control program and we appreciate the pest surveillance efforts of the public health personnel on base. While the evening following the spray was effectively mosquito-free, a noticeable number of mosquitoes were present the next morning. Collection reports for the week following the spray are not available yet. Recommendations for a more successful mosquito control using aerial spray include: raising the application rate above the minimum label rate, making an additional treatment a few days after the first, and/or applying a different chemical. The next application is scheduled for 5-11 August 2002.

# **910 AW AERIAL SPRAY**

## **PMP'S POST-MISSION REPORT – LANGLEY AFB 28 Sep – 3 Oct 03**

### **1. MISSION BASICS:**

- a. Installation Sprayed: Langley AFB
- b. Mission Duration: 28 Sep – 3 Oct 2003
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date(s) and time(s) (Local): 29 Sep (1700-1905); 30 Sep (1655-1836); 1 Oct (1550-1836)
- e. Acres Treated: 29 Sep, 49,383; 30 Sep, 58,800; 1 Oct, 24,887 (Total = 133,070 acres)
- f. Project Coordinator/s (Name/Title, Phone #): (b) (6)
- g. Date Spray Map Last Approved: 25 Aug 2003
- h. Date of Waste Generation Letter: 4 April 1996
- i. Installation In-Briefing: 1 CE Conference Room, Langley AFB; Lt Col (b) (6) Maj (b) (6)  
Maj (b) (6) Maj (b) (6) Maj (b) (6) & Capt (b) (6)

### **2. OPERATIONAL:**

- a. Mission Commander: MAJ (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): LTC (b) (6) (b) (6) MAJ (b) (6) (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander/Pilot: MAJ (b) (6) (b) (6)
  - (2) Co-Pilot(s): LT (b) (6) (b) (6)
  - (3) Navigator: MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: CMS (b) (6) , MSG (b) (6)
- d. Safety Briefer: Maj (b) (6) (b) (6)
- e. Spray Maintenance/Pesticide Loaders: MSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- f. Crew Chief(s): SGT (b) (6) , SSG (b) (6)
- g. Avonics: MSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 2 Sorties in FY 03 (29-30 Sep), 4.8 Hours; 1 Sortie in FY 04 (1 Oct), 2.8 Hours
  - (2) Ferry Sorties/Hours: 1 Ferry in FY 03 (28 Sep), 1.6 Hours; 1 Ferry in FY 04 (2 Oct) 1.7 Hours

### **3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 189 (29 Sep); 230 (30 Sep); 108 (1 Oct)
- e. Gallons Pesticide Applied: 189 (29 Sep); 230 (30 Sep); 108 (1 Oct)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: 15 Gallons HAN (29 Sep-1 Oct)
- h. Other Additives Used: n/a
- i. Application Rate: 0.667 oz/acre at Craney Island & 0.5 oz/acre elsewhere

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99108)
- b. Spray System (Modules Used) and System ID #: System SP2G - MASS ULV; Modules 1 and 2
- c. Spray System Configuration: ULV Wing Booms; Modules 1 and 2/MASS ULV
- d. Nozzle Type/Size: 8008 TeeJet<sup>®</sup> Flat Fan
- e. Nozzle Orientation & Number Used: 8 8008's oriented straight down
- f. Pressure: 29-37 psi
- g. Flow Rate: 3.6 gallons/minute on the peninsula; 3.7 gallons/minute at Craney Island

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1500 ft at Craney Island & 2000 ft on Langley Peninsula
- b. Spray Off Set: 2000-4000 depending on wind speed
- c. Spray Release Altitude: 150 feet AGL
- d. Ground Speed: 200 knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Speed/Direction): 6 mph/310 929 Sep); 5 mph/320 (30 Sep); 0-2/Var (1 Oct)
- b. Temperature (Degrees Fahrenheit): 72°F (29-30 Sep); 65°F (1 Oct)
- c. Relative Humidity: 62%, 29 Sep; 40%, 30 Sep; 670%, 1 Oct
- d. Cloud Cover: sunny/Haze 29 Sep; partly cloudy 30 Sep; overcast 1 Oct
- e. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
  - (2) Results: DGPS shows spray block completed.
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: Final reports have not been received from Langley AFB and cooperating cities at this time, however, preliminary feedback from Langley AFB on 3 Oct indicated that the spray mission was possibly one of the most effective ever.

**8. REMARKS:**

This was the second spray of the season following one of the peninsula's wettest summers in years and approximately ten days after Hurricane Isabel (Category 1) hit the peninsula. Several pest mosquito species were present (i.e., salt marsh/container breeding). The area was surveyed on the ground and by air prior to the application. A total of 133,070 acres were sprayed during the week including Naval Weapons Station Yorktown and Cheatham Annex Naval Supply Depot. The greatest control was seen in the freshwater species, but reductions were seen for all mosquito species. Positive community feedback was near an all-time high after this mission due to the continuing impacts of Hurricane Isabel on military and local civilian populations.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 28 SEP- 3 OCT 2003

**Purpose/Objectives/Benefits:** control nuisance and vector mosquitoes in order to improve working conditions and lower the incidence of arthropod borne illness for members operating at Langley AFB and surrounding communities.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6) (5)
- (2) Pilots: MAJ (b) (6) (b) (6) LT (b) (6) (b) (6)
- (3) Navigators: MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: CMS (b) (6) , TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: SGT (b) (6) SSG (b) (6)
- (3) Avonics: MSG (b) (6)

##### c. Certified Pest Management Professionals: LTC (b) (6) MAJ (b) (6) (b) (6)

##### d. Observer: 2LT (b) (6)

**Gov Vehicles: 2 ea 9 pax van, 1 staff, 1 pick-up truck provided by Langley AFB**

#### 2. SCHEDULE: (All time Local)

##### 28 SEP (Sunday):

**PPR # 0928MV01**

1500: Show at KYNG  
1700: Depart KYNG  
1830: Land KLFJ  
1845: Safety Briefing

##### 29 SEP (Monday):

1000: In-Briefing at CE Conference Room  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1600: Spray Sortie  
1852: Sunset

##### 30 SEP (Tuesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1600: Spray Sortie  
1850: Sunset

##### 1 OCT (Wednesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1600: Spray Sortie  
1849: Sunset

**2 OCT (Thursday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1600: Spray Sortie  
1847: Sunset

**3 OCT (Friday):**

0800: Report  
TBA: Outbrief  
1000: Depart KLFI  
1130: Land KYNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass,  
Pest Safety Binder, UHF Radio,  
Satloc Ground Tracker and Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops phone 878-3588
  - (2) Tower phone 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int:** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9 or 348.6** (phone 877-0221 ops)
  - (2) Tower – **124.9 or 280.1** (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - (4) CTAF – **118.7**
- c. **Langley AFB:** Tower OIC MSG (b) (6) Lt (b) (6) 1st OSS SQ
  - (1) Tower - **125.0 or 253.5** (phone 4-5326)
  - (2) Ground - **121.7 or 275.8**
  - (3) Clearance – **118.85 or 271.3**
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld):** Tower - **124.3, 126.375, 340.2, 318.7**
- e. **Spray Ground:** Primary 392.2; Secondary: 308.6

**7. IN-BRIEFING:** Required; IAW the Schedule above.

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Modules 1 and 2 (system #4)
- b. **Nozzle Tips/Orientation:** 8 8008's for 2000' swathes and 6 8008's for 1500' swathes oriented straight down.

c. **Aircraft:**

9. **SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 2.7 Gallons/Minute at Craney Island; 3.6 Gallons/Minute at Langley areas
- f. **Acreage:** Approximately 110,000 Acres
- g. **Swath Width:** 1,500 Feet at Craney Island; 2,000 Feet at Langley areas.

10. **PESTICIDE LOADING:**

- a. **How Much Pesticide:** 430 Gallons for 110,000 acres sprayed.
- b. **Where:** Aero Club Ramp
- c. **When:** 1430 hrs each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

11. **SPRAY MONITORING OR TESTING:**

The local mosquito control districts and Langley Pest Control will conduct mosquito surveillance using either trapping or biting count pre- and post-spray data to determine spray effectiveness. Oil sensitive cards will be used to confirm application within the spray blocks.

12. **CONTACTS:** LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX

MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)

FROM: 757 AS/DOS ~~(b) (6)~~ (b) (6) FAX 346-1616)

SUBJECT: Capability and Concept of Operations for Aerial Spray at Langley AFB

1. **Purpose/Objectives/Benefits:** Control nuisance and vector mosquitoes in order to improve working conditions for members operating at Langley AFB VA.
2. **Capability:** Spray Aircraft Available 28 Sep-3 Oct 2003.
3. **Concept of Operations:**
  - a. **28 Sep (Sunday):**
    - 1500 Show at KYNG
    - 1700 Take-Off KYNG
    - 1930 Land KLFI
    - 1845 Safety Brief
  - b. **29 Sep (Monday):**
    - 0900 In-Briefing with Langley AFB, CE Conference Room
    - 1400 Show Time/Weather Decision
    - 1430 Load Chemical
    - 1645 Spray Sortie, Spray Areas Designated by PMP (land by 1845)
    - 1852 Sunset
  - c. **30 Sep (Tuesday):**
    - TBA Daily meeting for PMP/MC in the hotel lobby
    - 1400 Show Time/Weather Decision
    - 1430 Load Dibrom
    - 1645 Take-Off KLFI, Spray Areas Designated by PMP (land by 1845)
    - 1850 Sunset
  - d. **1 Oct (Wednesday):**
    - TBA Daily meeting for PMP/MC in the hotel lobby
    - 1400 Show Time/Weather Decision
    - 1430 Load Dibrom
    - 1645 Depart KLFI, Spray Areas Designated by PMP (Land by 1845)
    - 1850 Sunset

**e. 2 Oct (Thursday):**

TBA Daily meeting for PMP/MC in the hotel lobby  
1400 Show Time/Weather Decision  
1430 Load Dibrom  
1645 Depart KLFI, Spray Areas Designated by PMP (Land by 1845)  
1847 Sunset

**f. 3 Oct (Friday):**

0800 Report  
TBA Outbrief  
1000: Depart KLFI  
1130: Land KYNG

**4. Spray Parameters:**

- a. Acreage: approximately 86,000 Acres
- b. Altitude: 150 Ft AGL
- c. Ground Speed: 200 Knots
- d. Pesticide: Dibrom® Concentrate
- e. Application Rate: 0.5 Ounce per Acre
- f. Flow Rate: 1.8 Gal per Minute at Craney Island; 3.6 Gallons per Minute for Langley AFB designated areas
- g. Swath Width: 1000' swaths at Craney Island; 2000' to 2500' swaths at Langley AFB
- h. System: SP2G – MASS ULV; Modules 1 and 2
- i. Nozzle Tips/Number/Orientation: 8008/8 oriented straight down for 2000' swaths; 8008/4 oriented straight down for 1000' swaths oriented straight down
- j. Aircraft Tail Number: 99106; Mission Identifier: QZNRKA
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Aircraft/Mission Commander: Major (b) (6) (b) (6)**

**6. Support required at Langley AFB has been requested via FAX message.**

**7. If you have any questions concerning this mission please contact the Aerial Spray Office, DSN (b) (6)**

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 29 Jun – 2 Jul 2009

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks and Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) Pilots: LTC (b) (6) Maj (b) (6)
- 2) Navigators: LTC (b) (6) (b) (6)
- 3) Flight Engineers: CMSG (b) (6)
- 4) Spray Operators: MSgt (b) (6) (b) (6) SSgt (b) (6) , MSG (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: TSgt (b) (6) MSgt (b) (6) , TSgt (b) (6)
- 2) Crew Chief(s): MSG (b) (6) , SRA (b) (6)
- 3) Avionics: TSgt (b) (6)

##### c. Entomologists/Ground Support: Maj (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 29 JUN (Monday):

0900: Showtime  
1100: Depart KYNG  
1300: Land KGRDR/Safety Briefing  
1430: Spray In-brief (CPMP, MC, AC)

##### 30 JUN (Tuesday):

1700: Show time  
1730: Load Chemical  
1930: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 1 JUL (Wednesday):

1700: Show time  
1730 Load Chemical  
1930: Takeoff KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 2 JUL (Thursday):

0900: Show time  
1100: Depart KRDR  
1500: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 VHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

#### 4. PPR: 06-29-01/RH

#### 5. RADIO FREQUENCIES: Air To Ground Primary VHF 123.45 KRDR Tower 124.9 V; Grand Forks International 118.4 V

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. Nozzle Tips/Orientation:** ULV (adulticide): 8005 Tee Jet oriented straight down
- c. Number:** ULV: 18 8005s total (9 each side)
- e. Aircraft:** 90-9108
- f. Mission Identifier:** QZNRKA485180

**7. SPRAY PARAMETERS:**

**a. Adulticide**

- (1) **Area to be treated:** 11,518 acres (Grand Forks AFB), 18,346 (Grand Forks) and 877 (Grand Forks Intl)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION:** Transportation provided by base (DSN362-3976): One 16 pax van (OPS), three 6 pax trucks (MC, OPS, MX), one 1.5 ton truck (spray MX). Vehicles at base ops with the exception of Trumpet loaded truck

**10. LODGING: Onbase Billeting :** DSN 362-7200 or (701) 594-8431, FAX 362-3069 15 Rooms Reserved  
-- Prime Knight DSN 362-3844 or (701) 747-3844

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 29 Jun – 3 Jul 2008

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks and Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- 1) MC: Capt (b) (6)
- 2) Pilots: LTC (b) (6) Maj (b) (6)
- 3) Navigators: LTC (b) (6)
- 4) Flight Engineers: CMSG (b) (6)
- 5) Spray Operators: MSG (b) (6) MSG (b) (6)

##### b. Maintenance:

- 1) Spray Maintenance: TSG (b) (6) MSG (b) (6) TSG (b) (6) SRA (b) (6)
- 2) Crew Chief(s): TSG (b) (6) SRA (b) (6)
- 3) Avionics: SSG (b) (6)

##### c. Entomologists/Ground Support: MAJ (b) (6)

#### 2. SCHEDULE: (All Local (b) (6))

##### 29 JUN (Sunday)

1200: Showtime  
1400: Depart KYNG  
1600: Land KGRDR/Safety Briefing

##### 30 JUN (Monday):

1430: Spray In Brief (CPMP, MC, AC).  
1700: Show time  
1730: Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 1 JUL (Tuesday):

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

##### 2 JUL (Wednesday):

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2130

##### 3 JUL (Thursday):

1130: Show time  
1330: Take off KRDR  
1730: Land KYNG

#### 3. ITEMS TO TAKE

a. **Mission Commander:** Cellular Phone, Mission Folder

b. **Entomologist:** Cell Phone, Wind Gauge, 2 Compasses, Pest Safety Binder,  
1 VHF Radio, Water Sensitive Cards, Card Holders with  
Index Cards, 2 Spotlights, 1 Measuring wheel, 2 Signal Mirrors,  
Project Notebook, Entomologist's Tool Kit

c. **Navigator:** Maps/Map Bag, Validation Map

d. **Spray Operator:** Safety Gear, Calibration Tables

e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

#### 4. PPR: 062901/CB

**5. RADIO FREQUENCIES: Air To Ground Primary VHF 123.45 KRDR Tower 124.9 V; Grand Forks International 118.4 V**

**6. CONFIGURATION: SP2G**

- a. System:** 2-Module System/Stainless Steel ULV Fuselage Booms
- b. Nozzle Tips/Orientation:** ULV (adulthoodicide): 8005 Tee Jet oriented straight down
- c. Number:** ULV: 18 8005s total (9 each side)
- e. Aircraft:** 90-9108
- f. Mission Identifier:** QZNRKA708181

**7. SPRAY PARAMETERS:**

**a. Adulthoodicide**

- (1) **Area to be treated:** 11518 acres (Grand Forks AFB), 18346 (Grand Forks) and 877 (Grand Forks Intl)
- (2) **Altitude:** 150' for Adulthoodicide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**8. SPRAY MIXING AND LOADING:** The amount of Trumpet to load will be determined on site

**9. TRANSPORTATION: Transportation provided by base (DSN362-3976): One 16 pax van (OPS), three 6 pax trucks (MC, OPS, MX), one 1.5 ton truck (spray MX). Vehicles at base ops with the exception of Trumpet loaded truck**

**10. LODGING: Onbase Billeting :** DSN 362-7200 or (701) 594-8431, FAX 362-3069 15 Rooms Reserved  
-- Prime Knight DSN 362-3844 or (701) 747-3844

**11. CONTACTS:**

**a. 319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks AFB ND 58205**

- (1) **Base Operations:** Airfield Manager DSN 362-4409  
-- DSN 362-xxxx or (701) 747-xxxx20
- (2) **Pest Management:** TSgt (b) (6) or Ssgt (b) (6) DSN (b) (6) , FAX 3432
- (3) **Base Civil Engineer:** Lt Col (b) (6)
- (4) **Environmental Officer:** (b) (6) , DSN (b) (6) FAX 6155
- (5) **Public Affairs:** DSN 362-5608/5023 (off duty CP ext 6711)
- (6) **Weather:** DSN 362-4396
- (6) **Billeting:** DSN 362-3070/6189/7200 or (701) 594-8431, FAX 362-3069  
-- Prime Knight DSN 362-3844 or (701) 747-3844

13 JUN 2008

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Grand Forks AFB ND

**1. Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks and Grand Forks AFB ND.

**2. Capability:** Spray Aircraft available 29 June – 3 July 2008

**3. Concept of Operations:**

**29 JUN (Sunday)**

0900: Showtime  
1100: Depart KYNG  
1300: Land KRDR/Safety Briefing  
1400: Spray In Brief (CPMP, MC, AC).

**30 JUN (Monday):**

1700: Show time  
1730: Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

**1 JUL (Tuesday):**

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2131

**2 JUL (Wednesday):**

1700: Show time  
1730 Load Chemical  
1930: Take off KRDR (Adulticide Spray Sortie)  
Sunset: 2130

**3 JUL (Thursday):**

1130: Show time  
1330: Take off KRDR  
1730: Land KYNG

**4. Spray Parameters:**

**a. Adulticide**

- (1) **Area to be treated:** 18,400 acres (Grand Forks) and 11,488 acres (Grand Forks AFB)
- (2) **Altitude:** 150' for Adulticide application
- (3) **Swath Width.** 2000 feet
- (4) **Flow Rate.** 7.26 gallons/minute ULV
- (5) **Application Rate.** 1.0 oz/acre Trumpet, ULV
- (6) **Ground Speed:** 200 Knots
- (7) **Flush:** With water, triple rinse, then air purge

**5. Aircraft Commander:** Capt (b) (6) (b) (6)

**6.** Support at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator.

**7.** HQ AFRC/DOOM approval via email.

# 910 AW AERIAL SPRAY - PMP'S POST-MISSION REPORT

## Parris Island MCRD, SC 29 April- 3 May 2001

### 1. MISSION BASICS:

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 29 April – 3 May 2001
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 30 April & 2 May 2001
- e. Time/s of Application (Local): 1750-2015L (30 April) & 1800-2015L (2 May)
- f. Acres Treated: 7680 (30 April & 2 May); 15,360 total
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) Environmental/Spray Coordinator, DSN(b) (6)
- h. Date Spray Map Last Approved: 2 April 2001
- i. Date of Waste Generation Letter: 10 April 2000
- j. Installation In-Briefing: (When/Where/Briefer/s): 29 April/NREAEO office/1LT (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6)
- b. Certified PMP/s (Category 11): 1LT (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: LTC (b) (6)
  - (2) Pilots: MAJ (b) (6) (b) (6) & CAPT (b) (6) (b) (6)
  - (3) Navigator(s): LTC (b) (6) , MAJ (b) (6) (b) (6) & MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6) , MSG (b) (6)
  - (5) Spray Operators: SMS (b) (6) , MSG (b) (6) , TSG (b) (6) , and MSG (b) (6)
- d. Safety Briefer: 1LT (b) (6) (b) (6)
- e. Spray Maintenance: SMS (b) (6) , TSG (b) (6) , TSG (b) (6) (b) (6) & SSG (b) (6)
- f. Spray Ground Monitors: LT (b) (6) (b) (6) & 2LT (b) (6)
- g. Crew Chiefs: SSG (b) (6) , SRA (b) (6)
- h. Avionics: TSG (b) (6)
- i. Flying Data:
  - (1) Spray Sorties/Hours: 2 Spray Sorties/4.7 Hrs
  - (2) Ferry Sorties/Hours: 2 Ferry Sorties/4.4 Hrs

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate
- d. Gallons Pesticide Loaded: 60 Gal Dibrom<sup>®</sup> (30 Apr & 2 May); 120 gallons total
- e. Gallons Pesticide Applied: 60 Gal Dibrom<sup>®</sup> (30 Apr & 2 May); 120 gallons total
- f. Gallons and Name of Flush Used: VM & P NAPHTHA
- g. Other Additives Used: None
- h. Application Rate: 1 Oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99108
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8008 Flat Fan
- e. Nozzle Orientation & Number Used: 6 oriented straight down
- f. Pressure: 90 (30 Apr) & 75 (2 May) PSI
- g. Flow Rate: 3.6 GPM

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 1000'
- b. Spray Off Set: 2000' (30 Apr); 3000' (2 May)
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

**6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed): 90-110° (30 Apr) & 80-110° (2 May)
  - (1) Ground: 4-7 Knots
  - (2) Release Altitude: 8-15 Knots
- b. Temperature (Degrees Fahrenheit): 70° (10 Apr) & 70° (2 May)
- c. Dew Point: 59°F (30 Apr) & 57°F (2 May)
- d. Cloud Cover: Partly Cloudy (30 April & 2 May)
- e. Source: Ground observations at the MCRD Marina and Rifle Range.

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Oil Sensitive Cards (OSC) wrapped on 1 meter dowels, spinners (rotating microscope slides)
  - (2) Results: Good coverage throughout spray area, as determined by OSC cards and spinners. Our spinners also showed good coverage and proper droplet size was obtained even inside the tree canopy.
- b. Effectiveness:
  - (1) Technique/s Used: Landing counts taken at 7 localities between 26 April & 2 May. Trapping midges on a nightly basis using carbon dioxide.
  - (2) Results: Following the first spray sortie, no biting midges were found at 6 of the seven survey locations. The seventh site showed a 65% reduction in midge landing frequency. A minimum reduction of 85% in midge densities was determined from trapping data. The efficacy of the final spray will be reported by the MCRD's Environmental Coordinator and trap contents. This spray is expected to be favorable based on the coverage observed on the indicator cards.

**8. REMARKS:** The next actual spray mission is scheduled 21-26 October 2001.

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 29 APR - 4 MAY 2001

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCRD, SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LtC (b) (6)
- (2) Pilots: LtC (b) (6), Maj (b) (6) (b) (6) (29-2), Cpt (b) (6) (b) (6) & Cpt (b) (6) (b) (6) (1-4)
- (3) Navigators: Maj (b) (6) (b) (6), Maj (b) (6), LtC (b) (6) (1-4 May)
- (4) Flight Engineers: MSG (b) (6), MSG (b) (6)
- (5) Spray Operators: MSG (b) (6), MSG (b) (6) (29 Apr-1 May), TSG (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: SMS (b) (6), TSG (b) (6), TSG (b) (6), SSG (b) (6)
- (2) Crew Chiefs: SSG (b) (6), SRA (b) (6)
- (3) Avionics: TSG (b) (6)

##### c. Ground Support: 1Lt (b) (6) (b) (6) (25 Apr – 4 May), 2Lt (b) (6)

#### 2. PLANNED SEQUENCE OF EVENTS: (All times local)

##### 29 APR (Sunday):

- 1500: Take off KYNG
- 1700: Land KNBC
- 1730: Safety Briefing

**PPR # 119-01**

##### 30 APR (Monday):

- 1400: Load Chemical
- 1630: Take off KNBC HAN pre-spray boom flush.
- 1900: Land KNBC
- 2002: Sunset

##### 01 MAY (Tuesday):

- 1400: Load Chemical
- 1630: Take off KNBC
- 1900: Land KNBC
- 2003: Sunset

##### 02 MAY (Wednesday):

- 1400: Load Chemical
- 1630: Take off KNBC
- 1900: Land KNBC
- 2004: Sunset

##### 03 MAY (Thursday):

- 1400: Load Chemical
- 1630: Take off KNBC
- 1900: Land KNBC
- 2005: Sunset

##### 04 MAY (Friday):

- 1200: Take off KNBC
- 1400: Land KYNG

#### 3. ITEMS TO TAKE:

##### a. Entomologist/CPMP:

- (1) Wind Gauge, Compass, and Signal Mirrors
- (2) UHF/VHF Radios and Cellular Phone
- (3) Pesticide Safety Binder
- (4) Calibration Tables
- (5) DGPS Computers, Trackstar Equipment & Maps
- (6) Oil Sensitive Papers

##### b. Navigators:

- (1) Maps
- (2) Templates
- (3) Laptop Computer
- c. **Spray Maintenance:**
  - (1) Spill Kit
  - (2) Safety Equipment
  - (3) Loading and Clean-up Equipment and Supplies

**4. SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Wing Booms
- c. **Nozzles:** Open for ULV spray; 6, 8008's oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft Tail #:** 108
- f. **Mission Identifier:** QZNRKA784129

**5. SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

- a. **Pesticide:**
  - Dibrom® Concentrate (naled)
  - Organophosphate Insecticide
  - Signal Word: Danger
  - Antidote: Atropine, 2-PAM
  - Flushing Agent: HAN
- b. **Application:** 1 Ounce Dibrom®/Acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,000 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 3.634 Gallons/Minute

**6. AMOUNT OF SPRAY MATERIAL AVAILABLE:** Load 60 gallons of Dibrom® Concentrate per sortie and 25 gallons HAN in flush tank.

**7. PPR REQUIREMENTS:** Required: PPR # 119-01

**8. PARKING PLAN:** Beaufort MCAS Ramp

**9. AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
 Hilton Head Arpt: 123.0 UNI  
 Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary 392.2; Secondary 340.8 UHF, 123.4 VHF**

**10. TRANSPORTATION:** Parris Island will provide two vans for transportation to/from quarters and dining. An additional vehicle will be available for the CPMP/Entomologists/Ground Support personnel.

**11. SPRAY MONITORING OR TESTING:** CPMP and Parris Island MCRD Project Coordinator.

## 12. CONTACTS:

MEMORANDUM FOR HQ AFRC/DOOM (FAX DSN 497 -0198)

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Grand Forks AFB  
ND Control of Mosquitoes

1. **Objective/Purpose/Benefit:** Control nuisance and vector species of mosquitoes with aerial spray application to reduce negative impact of insect bites during outdoor activities at Grand Forks AFB ND.
2. **Capability:** Spray Aircraft Available 29 Jun-3 Jul 2001
3. **Concept of Operations:**
  - 29 JUNE (Friday):
    - 0800: Show time
    - 1100: Depart KYNG
    - 1330: Land KRDR/Safety Briefing
    - 1400: In-Brief
  - 30 JUNE (Saturday):
    - 1730: Show time
    - 1930: Take Off KRDR
    - 2131: Sunset
    - 2245: Land KRDR
  - 1 JULY (Sunday):
    - 1730: Show time
    - 1930: Take Off KRDR
    - 2131: Sunset
    - 2245: Land KRDR
  - 2 JULY (Monday):
    - 1730: Aircrew Report
    - 1930: Take Off KRDR for Flush
    - 2130: Sunset
    - 2245: Land KRDR
  - 3 JULY (Tuesday):
    - 1000: Take Off KRDR
    - 1400: Land KYNG
4. **Spray Parameters:**
  - a. **Acreage:** 20,000 Acres with Adulticide (Only areas determined by PMP)
  - b. **Altitude:** 150 Ft ULV
  - c. **Pesticide:** Trumpet (Adulticide)
  - d. **Deploy:** 3.3 Hrs
  - e. **Re-Deploy:** 3.0 Hrs

- f.      **Spray Time:** Will be determined by PMP
5.      **Mission Commander:** LtC (b) (6)      (b) (6)
6.      **Aircraft Commander:** LtC (b) (6) (b) (6)
7.      Support required at Grand Forks AFB ND has been coordinated with the organization's Environmental/Spray Coordinator Ms (b) (6) (b) (6) DSN (b) (6) .
8.      HQ AFRC/DOOM approval may be FAX'd to DSN 346-1616, ATTN: 757 AS/DOS.

Chief, Aerial Spray Operations

# AERIAL SPRAY OPERATIONAL SCHEDULE

## GRAND FORKS AFB, ND

### 29 JUNE- 3 JULY 2001

**Purpose/Objectives and Proposed Benefits:** To control nuisance and vector mosquitoes in order to improve working conditions for members operating at Grand Forks AFB, North Dakota.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6) (b) (6)
- (2) Pilots: LTC (b) (6) (b) (6) MAJ (b) (6) (b) (6)
- (3) Navigators: LTC (b) (6) (b) (6) MAJ (b) (6)
- (4) Flight Engineers: MSG (b) (6)
- (5) Spray Operators: MSG (b) (6) , MSG (b) (6) , TSG (b) (6) (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: TSG (b) (6) , TSG (b) (6) , SSG (b) (6)
- (2) Crew Chief(s): TSG (b) (6) SSG (b) (6)
- (3) Avionics: MSG (b) (6)

##### c. Entomologists/Ground Support: LTC (b) (6) LTC (b) (6) (b) (6) MAJ (b) (6) (b) (6)

#### 2. SCHEDULE: (All Local Times)

##### 29 JUNE (Friday)

0800: Show at KYNG  
1100: Depart KYNG  
1330: Land KRDR/Safety Briefing  
1400: In-brief

##### 30 JUNE (Saturday):

1730: Show time  
1930: Take Off KRDR  
2131: Sunset  
2245: Land KRDR

##### 1 JULY (Sunday):

1730: Show time  
1930: Take Off KRDR  
2131: Sunset  
2245: Land KRDR

##### 2 JULY (Monday):

1730: Aircrew Report  
1930: Take Off KRDR for Flush  
2130: Sunset  
2245: Land KRDR

##### 3 JULY (Tuesday):

1000: Take Off KRDR  
1400: Land KYNG

#### 3. ITEMS TO TAKE:

- a. **Mission Commander:** Hand Held GPS, 1 Cellular Phone
- b. **Entomologist:** 1 Cellular Phone, Wind Gauge, 2 Compasses,  
Pest Safety Binder, 2 Signal Mirrors, 1 UHF Radio,  
2 Spotlights, 1 Measuring wheel,  
1 SATLOC Manual, Project Notebook,  
Entomologist's Tool Kit, Trakstar Receiver and Antenna,  
Batteries, Kodak Camera
- c. **Navigator:** Maps/Map Bag, Validation Map
- d. **Spray Operator:** Safety Gear, Calibration Tables
- e. **Spray Maintenance:** Deployment Kit, Support Equipment, Control®

4. **PPR:** Not required weekdays

5. **RADIO FREQUENCIES:** Air To Ground Primary UHF 392.2; VHF 123.45

#### 6. **SPRAY CONFIGURATION:**

- a. **System:** 2-Module System/Stainless Steel ULV Wing Booms  
**Nozzle Tips/Orientation:** 8008 TeeJet oriented straight down  
(1) **Number:** Wing only, 6 8008s total (3 each side)
- d. **Booms:** Wing Booms as required (see above)
- e. **Aircraft:** 106; **Mission Identifier:** QZNRKA561180

#### 7. **SPRAY PARAMETERS:**

- a. **Altitude:** 150' for ULV application
- b. **Swath Width.** 1500 feet for ULV or as determined by the PMP
- c. **Flow Rate.** 3.3 gallons/minute ULV
- d. **Application Rate.** 0.60 oz/acre Trumpet, ULV
- e. **Ground Speed:** 200 Knots

#### 8. **SPRAY MIXING AND LOADING:**

The amount of Trumpet to load will be determined on site

#### 9. **CONTACTS:**

- a. **319 CES/CEVP, 525 6<sup>th</sup> Ave, Grand Forks ND 58205**

# 910 AW AERIAL SPRAY PMP'S POST-MISSION REPORT

## 1. MISSION BASICS:

- a. Installation Sprayed: Grand Forks AFB ND
- b. Mission Duration: 29 Jun 01 – 3 Jul 01
- c. Purpose of Application: Mosquito Control
- d. Application Date(s) and time(s) (Local): 1 Jul 01; 1930-2130 L
- e. Acres Treated: 28,800
- f. Project Coordinator/s (Name/Rank, Title, Phone #):
  - (b) (6) (b) (6) Environmental Officer, DSN (b) (6)
  - (b) (6) (b) (6) Ssg, Pest Management, DSN (b) (6)
- g. Date Spray Map Last Approved: 29 Jul 01
- h. Date of Waste Generation Letter: 22 Jun 01
- i. Installation In-Briefing: (When/Where/Briefer/s): 29 Jul/CE Conference Room, 1400 L/Grand Forks AFB, LTC (b) (6) (b) (6) LTC (b) (6)

## 2. OPERATIONAL:

- a. Mission Commander: LTC (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): LTC (b) (6) LTC (b) (6) (b) (6) CAPT (b) (6) (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander: LTC (b) (6) (b) (6)
  - (2) Co-Pilot(s): MAJ (b) (6) (b) (6)
  - (3) Navigator(s): LTC (b) (6) (b) (6) MAJ (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6)
  - (5) Spray Operators: MSG (b) (6) , MSG (b) (6) , TSG (b) (6)
- d. Safety Briefer: LTC (b) (6)
- e. Spray Maintenance/Pesticide Loaders: TSG (b) (6) , TSG (b) (6) , SSG (b) (6)
- f. Crew Chief(s): TSG (b) (6) mez, SSG (b) (6)
- g. Avonics: MSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 1 Sortie; 2.9 Hours
  - (2) Ferry Sorties/Hours: 2 Ferries; 6.0 Hours
  - (3) Flush Sorties/Hours: 1 Sortie; 1.9 Hours

## 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Trumpet<sup>®</sup> EC (78% AI naled)
- b. EPA Registration Number: Trumpet<sup>®</sup> EC 59639-90-5481
- c. Formulation Sprayed: EC 78% AI naled
- d. Gallons Pesticide Loaded: 135
- e. Gallons Pesticide Applied: 135
- f. Gallons and Name Diluent Used: N/A
- g. Gallons and Name of Flush Used: 80 gallons water with 0.8 gallons Remove<sup>®</sup>
- h. Other Additives Used: None
- i. Application Rate: 0.6 oz/acre

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (909106)
- b. Spray System (Modules Used) and System ID #: Modules 1 and 2 of SP2G - MASS ULV
- c. Spray System Configuration: ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® Flat Fan 8008
- e. Nozzle Orientation & Number Used: Straight down; 8 nozzles
- f. Pressure: 40 p.s.i.
- g. Flow Rate: 4.35 gallons/minute

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 feet
- b. Spray Off Set: 3000 feet
- c. Spray Release Altitude: 150 feet AGL
- d. Ground Speed: 200 knots ground speed

**6. WEATHER OBSERVATIONS:**

- a. Wind speed: 5 knots on the ground and 8 knots at release altitude.
- b. Wind direction: 160
- c. Temperature 68 degrees F.
- d. Humidity 65 %
- e. Cloud cover 75%

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- (1) Technique/s Used: Relied upon Grand Forks AFB Pest Management Shop and the Public Health Unit for monitoring of efficacy on base.
- (2) Results: The Grand Forks AFB Pest Management Shop is coordinating with the Public Health Unit to ensure that surveillance is conducted following the application. The results will be available after surveillance is completed.

- 8. REMARKS:** Adequate cleaning of Trumpet® EC from the spray tanks and booms takes longer than for Dibrom® Concentrate, thus, we flew a sortie the day following application to flush the system. Remove® was mixed at a rate of 1 gallon per 100 gallons of water to flush and clean the system.

**CERTIFIED PEST MANAGEMENT PROFESSIONAL**

**910 AW AERIAL SPRAY UNIT**  
**CERTIFIED PEST MANAGEMENT PROFESSIONAL'S POST-MISSION REPORT**  
**PARRIS ISLAND MCRD, SC 30 APR – 3 MAY 2007**

**1. MISSION BASICS:**

- a. Installation Sprayed: Parris Island Marine Corps Recruit Depot, South Carolina
- b. Mission Duration: 30 APR – MAY 3 2007
- c. Purpose of Application: Biting Midge (*Culicoides* spp.)/Mosquito Control
- d. Application Date/s: 1 MAY 2007
- e. Time/s of Application (Local): 1820 – 1952
- f. Acres Treated: 7,465 acres
- g. Project Coordinator (Name/Rank, Title, Phone #): (b) (6) DSN (b) (6)
- h. Environmental/Spray Coordinator, DSN (b) (6)
- i. Date Spray Map Last Approved: 24 APR 07
- j. Date of Waste Generation Letter: 10 APR 2000
- k. Installation In-Briefing: (When/Where/Briefer/s): 24 APR; Assistant Chief of Staff, Installations and Logistics Conference Room, (b) (6) (b) (6) briefed by COL (b) (6) MAJ (b) (6)

**2. OPERATIONAL:**

- a. Mission Commander: LTC J.D. Williams
- b. Aircrew:
  - (1) Pilots: CAPT (b) (6) (b) (6) MAJ (b) (6) CAPT (b) (6)
  - (2) Navigators: LTC (b) (6)
  - (3) Flight Engineers: CMSGT (b) (6)
  - (4) Spray Operators: MSGT (b) (6) MSGT (b) (6)
- b. Maintenance:
  - (1) Spray Maintenance: TSG (b) (6) TSG (b) (6) TSG (b) (6) CMSGT (b) (6) (b) (6)
  - (2) Crew Chiefs: TSG (b) (6) SRA (b) (6)
  - (3) Avionics: (b) (6)
- c. Entomologist: LTC (b) (6)
- d. Flying Data:
  - (1) Spray Sortie on 1 MAY/Hours: 3 (1.3 training, 1.7 spray – spray on time was 16.1 minutes)
  - (2) Training Sortie on 2 MAY/2 hours
  - (3) Ferry Sorties/Hours: 2/4.0 on 30 APR and 3 MAY

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom® Concentrate
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Concentrate (87.4 % AI)
- d. Gallons Pesticide Loaded: 60 Gal Dibrom® (1 MAY)
- e. Gallons Pesticide Applied: 43
- f. Gallons and Name Diluent Used: N/A
- g. Gallons and Name of Flush Used: None
- h. Other Additives Used: None
- i. Application Rate: 0.75 oz/acre

4. APPLICATION EQUIPMENT:

- a. Aircraft Tail Number: 99107
- b. Spray System (Modules Used) and System ID #: [REDACTED]
- c. Spray System Configuration: 2-Module System/ ULV Fuselage Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 8 oriented straight down
- f. Pressure: 33 p.s.i. (probably could have reached 40 p.s.i. if used 7 nozzles instead of 8)
- g. Flow Rate: 2.7 gallons per minute

(b) (5)

(b) (5)

5. APPLICATION PARAMETERS:

- a. Swath Width Flown: 1000'
- b. Spray Off-set: 2000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

6. WEATHER OBSERVATIONS:

- a. Winds (Direction/Speed):
  - (1) Ground: 175 /6 knots at 1820; 175 /5 knots at 1832; 180 /6.6 knots at 1910
  - (2) Release Altitude: 180 /12 knots gusting to 15 knots
- b. Temperature (Degrees Fahrenheit): 76 F at 1820; 74 F at 1910
- c. Relative Humidity: 64% at 1820; 70% at 1910
- d. Cloud Cover: None
- e. Source: Ground observations at the MCRD Rifle Range at 1810 and 1832; Marina at 1910; air observations taken at aircraft

7. SPRAY MONITORING (Pre- and Post-Treatment):

- a. Deposition Pattern:
  - (1) Technique/s Used: visual observation of aircraft course (GPS); 2 Bald eagle's nests were given a 0.5 mile radius for no-fly
  - (2) Results: Good coverage throughout spray area
- b. Effectiveness:
  - (1) Technique/s Used: Weekly collections of midges and mosquitoes with light traps and landing rates in regions frequented by recruits involved in training
  - (2) Results: Control efficacy will be determined by Parris Island MCRD staff.

8. REMARKS: Biting midge (sandflea) activity levels were moderate based on personal observations; deer flies (*Chrysops* sp.) and mosquitoes were also present. Landing counts for biting midges at the rifle range were 7 per minute at 1800. The application was confined to 1.7 hours prior to sunset to correspond with peak flight period of the pests. The path of the aircraft was east – west. Two bald eagle nest sites were purposefully avoided by a 0.5 radius. The relative efficacy will be determined by trap collections but highly conducive metrological conditions suggest that the result should be excellent. Post flight data was called into the AFRC Command Post after the mission. Sixty gallons of Dibrom® were loaded and 43 sprayed. The remainder was downloaded and will be used on the next Parris Island spray mission.

MEMORANDUM FOR HQ AFRC/DOOM

FROM: 757 AS/DOS

SUBJECT: Concept of Operations for Aerial Spray at Parris Island MCRD SC for Control of Sand fly and Mosquitoes

1. Objective/Purpose/Benefits of the Spray Mission. Spray Parris Island MCRD SC for control of biting midges and mosquitoes. Control nuisance biting midges with aerial spray application to reduce negative impact of insect bites on outdoor training at Parris Island MCDR SC at the request of the Parris Island MCRD/MCAS Environmental Coordinator.

2. Capability: Spray Aircraft available on 30 Apr – 3 May 07

3. Concept of Operations:

**30 APR (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

Check Rifle Range: None

1500: Show Time  
1700: Take Off YNG  
1900: Land KNBC

**1 MAY (Tuesday):** Wx back up, training,

1300: Safety Briefing  
1430: Installation in-brief  
1500: Showtime  
1530: Load Chemical/Wx Decision  
1745: Take off KNBC (Training, Then Spray)  
1959: Sunset

**2 MAY (Wednesday):** Wx back up, training, or redeploy to YNG

1500: Showtime  
1530: Load Chemical/Wx Decision  
1745: Take off KNBC (Training, then Spray)  
1959: Sunset

**3 MAY (Thursday):**

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

4. Spray Parameters:

- a. Acreage: 7,500 Acres (Only areas determined by PMP)
- b. Altitude: 150 Ft AGL
- c. Pesticide: Dibrom® Concentrate
- d. Deploy: 2.0 Hrs
- e. Re-Deploy: 2.0 Hrs
- f. Spray Time: 16 Minutes per Sortie (or as called by PMP)

5. Aircraft Commander: Capt (b)(6)(b)(6)

6. Mission Commander: LCT(b) (6)

7. Support required at Parris Island MCRD SC has been coordinated with Parris Island MCRD Environmental/Spray Coordinator Mr. (b) (6) DSN (b) (6)

Assistant Chief Aerial Spray

# AERIAL SPRAY OPERATIONAL SCHEDULE

## PARRIS ISLAND MCRD, SC

### 30 Apr – 3 May 2007 Change 2

**OBJECTIVE/PURPOSE AND BENEFIT:** Control nuisance biting midges and mosquitoes with aerial spray insecticide applications to reduce negative impact of insect bites on outdoor training at Parris Island MCRD SC.

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: LTC (b) (6) (b) (6)
- (2) Pilots: Capt (b) (6) (b) (6) Maj (b) (6) , Capt (b) (6)
- (3) Navigators: LTC (b) (6) omis
- (4) Flight Engineers: Cmsgt (b) (6)
- (5) Spray Operators: Msgt (b) (6) Msgt (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: Tsgt (b) (6) Tsgt (b) (6) , Tsgt (b) (6) , Cmsgt (b) (6)
- (2) Crew Chiefs: Tsgt (b) (6) SRA (b) (6)
- (3) Avionics: (b) (6)

##### c. Pest Management Professionals/Entomologist: LTC (b) (6) (in place 30 Apr)

Gov Vehicles provided by Parris Island MCRD

#### 2. PPR REQUIREMENTS: 120-01

#### 3. PLANNED SEQUENCE OF EVENTS: (All times local) Times may vary from schedule depending upon weather, effectiveness of spray, etc. All changes to the planned itinerary will be coordinated through the mission commander.

**30 APR (Monday):** see [www.beaufort.usmc.mil](http://www.beaufort.usmc.mil) for weather, etc

1500: Show Time  
1700: Take Off YNG  
1900: Land KNBC; Safety Briefing

**1 MAY (Tuesday):** Check Rifle Range schedule

1430: Weather decision (b) (6) will be off station Mr. (b) (6) is POC for this mission contact info is below)  
1500: Showtime (Note that no in-brief is necessary as all msn condition remain the same; e.g, spray area, etc)  
1530: Load Chemical/Wx Decision (plan on loading 2 drums; wait for approval by PMP/MC)  
1715: Take off KNBC (Training, then spray: Begin spray no sooner than 1850 hrs!!)  
1959: Sunset

**2 MAY (Wednesday):** Wx back up, training, or redeploy to YNG

1500: Showtime  
1530: Load Chemical/Wx Decision  
1715: Take off KNBC (Training, then spray: Begin spray no sooner than 1850 hrs!!)  
1959: Sunset

**3 MAY (Thursday):**

1000: Show Time  
1200: Take off KNBC  
1400: Land KYNG

#### 4. ITEMS TO TAKE/NOTES:

##### a. Mission Commander:

- (1) Mission Commander Cell Phone

##### b. Entomologist/CPMP:

- (1) Wind Gauge & Compass
- (2) VHF Radio and Cellular Phone

(3) Pesticide Safety Binder

c. **Navigators:**

- (1) Maps
- (2) Templates

d. **Spray Maintenance:**

- (1) Spill Kit
- (2) Safety Equipment
- (3) Loading and Clean-up Equipment and Supplies

5. **SPRAY CONFIGURATION: SP-2G**

- a. **Mass:** 2-Module System (PI)
- b. **Booms:** Stainless Steel ULV Fuselage Booms
- c. **Nozzles:** 14 flat fan 8005 nozzles (7 per side) oriented straight down
- d. **Differential GPS:** Installed
- e. **Aircraft:** 90-9108
- f. **Mission Identifier:** QZNRKA030113

6. **SPRAY PARAMETERS: (PARRIS ISLAND MCRD SC)**

a. **Pesticide:**

Dibrom® Concentrate (naled)  
Organophosphate Insecticide  
Signal Word: Danger  
Antidote: Atropine, 2-PAM  
Flushing Agent: Marvel Mystery Oil

- b. **Application:** 1.0 oz/acre
- c. **Spray Altitude:** 150 Feet
- d. **Swath Width:** 1,500 Feet
- e. **Ground Speed:** 200 Knots (338 Feet/Second)
- f. **Acreage:** approx. 7,500 Acres
- g. **Spray-On Time:** 16 Minutes
- h. **Flow Rate:** 5.4 gallons/Minute

7. **AMOUNT OF SPRAY MATERIAL AVAILABLE:** Plan on loading two drums of Dibrom

8. **PARKING PLAN:** Beaufort MCAS Ramp

9. **AIR TO GROUND RADIO FREQUENCIES:**

Air Traffic Control: 119.05 Beaufort MCAS TWR  
**Hilton Head Arpt:** Get Tower Freq from App Plate.  
Beaufort Co Arpt: 122.7 UNI  
**Spray Ground: Primary V 123.45; Secondary:** use cell phone

10. **TRANSPORTATION:** Parris Island will provide two vans and staff car for transportation to and from quarters and for messing.

11. **SPRAY MONITORING/TESTING:** Ground monitoring by CPMP & Parris Island MCRD Project Coordinator.

12. **CONTACTS:**

DEPARTMENT OF THE AIR FORCE  
HEADQUARTERS 910<sup>TH</sup> AIRLIFT WING

19 Aug 2004

**MEMORANDUM FOR HQ AFRC/DOOM (FAX: 497-0198)**

**FROM:** 757 AS/DOS (346-1965/1412; FAX 346-1616)

**SUBJECT:** Ch1, Capability and Concept of Operations for Aerial Spray Characterization at Langley AFB

1. **Purpose/Objectives/Benefits:** Characterize Ultra Low Volume (ULV) spray with fuselage configuration for control of mosquitoes operating at Langley AFB VA.

2. **Capability:** Spray Aircraft Available 30 Aug-3 Sep 2004.

3. **Concept of Operations:**

**30 Aug (Monday):**

0800: Show at KYNG  
1000: Depart KYNG  
1130: Land KLFI  
TBA: In-brief with Langley Staff  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1630: Spray Sortie  
1936: Sunset  
2000: Land

**31 Aug (Tuesday):**

No flying per Wing CC, Langley AFB due to base concert.

**1 Sep (Wednesday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1630: Spray Sortie  
1936: Sunset  
2000: Land

**2 Sep (Thursday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1630: Spray Sortie  
1936: Sunset  
2000: Land

**3 Sep (Friday):**

0930: Show Time  
1130: Depart Langley  
1245: Land YNG

**4. Spray Parameters:**

- a. Booms -- Fuselage only.
- b. Nozzles -- 8008 TeeJet
- c. Number of Nozzles -- 4 on left side and 3 on right side ( 7 total) oriented straight down
- d. Airspeed -- 200 knots ground speed.
- e. Altitude -- 150' above ground level.
- f. Wind --Crosswind component.
- g. Flow Rate -- 3.6 gallons/minute
- j. Aircraft Tail Number: 99106; Mission Identifier: QZNRKA908242
- k. Deploy/Re-Deploy Time: 3.2 hrs
- l. Spray Time: 3.50 hrs (or as called by PMP)

**5. Aircraft/Mission Commander: MAJ (b) (6)(5)**

**6.** Support required at Langley AFB has been requested via FAX message.

**7.** If you have any questions concerning this mission please contact the Aerial Spray Office, DSN (b) (6) .

AERIAL SPRAY CHIEF

# AERIAL SPRAY OPERATIONAL SCHEDULE

## LANGLEY AFB, VA

### 30 Aug-3 Sept 2004

**Purpose/Objectives/Benefits:** Characterize Ultra Low Volume (ULV) spray with fuselage configuration for control of mosquitoes operating at Langley AFB VA

#### 1. 910 AW PARTICIPANTS:

##### a. Aircrew:

- (1) Mission Commander: MAJ (b) (6) (5)
- (2) Pilots: LTC (b) (6) (b) (6) MAJ (b) (6) (b) (6) CPT (b) (6) (b) (6)
- (3) Navigators: LTC (b) (6)
- (4) Flight Engineers: MSG (b) (6) , MSG (b) (6)
- (5) Spray Operators: TSG (b) (6) TSG (b) (6) (b) (6)

##### b. Maintenance:

- (1) Spray Maintenance: MSG (b) (6) , TSG (b) (6) , TSG (b) (6)
- (2) Crew Chiefs: TSG (b) (6) , TSG (b) (6)
- (3) Com Nav: MSG (b) (6)

##### c. Certified Pest Management Professionals: LTC (b) (6) (b) (6) Maj (b) (6) (b) (6) Capt (b) (6) SSGT (b) (6) (YARS -- pest management – observer)

**Gov Vehicles: 2 ea 9 pax van, 1 staff, 1 pick-up truck provided by Langley AFB**

#### 2. SCHEDULE: (All times local)

##### 30 Aug (Monday):

1000: Show at KYNG  
1200: Depart KYNG  
1315: Land KLF  
1400: In-brief with Langley Staff  
1500: Show Time / Weather Decision  
1530: Load Dibrom  
1700: Spray Sortie  
1936: Sunset  
2000: Land

##### 31 Aug (Tuesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1936: Sunset  
2000: Land

##### 1 Sep (Wednesday):

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1936: Sunset

2000: Land

**2 Sep (Thursday):**

TBA: Daily meeting for PMP/MC in the hotel lobby  
1400: Show Time / Weather Decision  
1430: Load Dibrom  
1700: Spray Sortie  
1936: Sunset  
2000: Land

**3 Sep (Friday):**

0930: Show Time  
1130: Depart Langley  
1245: Land YNG

**3. ITEMS TO TAKE:**

- a. **Entomologist:** Kestrel Weather Monitor, Compass,  
Pest Safety Binder, UHF Radio,  
Satloc Ground Tracker and Laptop Computer
- b. **Navigator:** Maps/Map Bag, Validation Map, Laptop Computer
- c. **Spray Operator:** Safety Gear, Calibration Tables
- d. **Spray Maintenance:** Deployment Kit

**4. NOTIFICATION NECESSARY FOR THIS MISSION:**

- a. **Langley Tower:** DSN 574-5326
- b. **Langley Base Ops:** DSN 574-2504

**5. PARKING PLAN:** Langley Aero Club ramp or as directed.

**6. RADIO FREQUENCIES:**

- a. **Felker AAF Tower (Ft Eustis): 126.3, 248.2, 241.0**
  - (1) Ops phone 878-3588
  - (2) Tower phone 878-3530
  - (3) Flight Service 122.2
- b. **Newport News-Williamsburg Int:** (Operating Hours 1000Z-0200Z)
  - (1) Ground – **121.9 or 348.6** (phone 877-0221 ops)
  - (2) Tower – **124.9 or 280.1** (phone 877-2962)
  - (3) FSS – 122.1R, 122.2, 122.65, OR 124.9
  - (4) CTAF – **118.7**
- c. **Langley AFB:** Tower SMSgt. (b) (6) 4-2591
  - (1) Tower - **125.0 or 253.5** (phone 4-5326)
  - (2) Ground - **121.7 or 275.8**
  - (3) Clearance – **118.85 or 271.3**
  - (4) Metro - **239.8**
- d. **Norfolk NAS (Chambers Fld):** Tower - **124.3, 126.375, 340.2, 318.7**
- e. **Spray Ground:** Primary **392.2**; Secondary: **308.6**

**7. IN-BRIEFING:** TBA

**8. SPRAY CONFIGURATION:**

- a. **System:** SP2G - MASS ULV; Fuselage booms

- b. **Nozzle Tips/Orientation:** Eight (8) 8008's oriented straight down
- c. **Aircraft:** 89-9106
- d. **Mission Identifier:** QZNRKA908242

**9. SPRAY PARAMETERS:**

- a. **Altitude:** 150' AGL
- b. **Ground Speed:** 200 KNOTS
- c. **Pesticide:** Dibrom® Concentrate
- d. **Application Rate:** 0.5 oz/acre
- e. **Flow Rate:** 3.6 Gallons/Minute at Langley and Craney island areas
- f. **Acreage:** 125008 Ac peninsulas; 4904 Ac Craney Island
- g. **Swath Width:** 2,000 Feet

**10. PESTICIDE LOADING:**

- a. **How Much Pesticide:** see entomologist
- b. **Where:** Aero Club Ramp
- c. **When:** 1430 hrs each day.
- d. **Furnished by Installation:**
  - (1) Pesticide
  - (2) Loading Equipment/Crew
  - (3) Hazardous Waste Disposal
  - (4) Two B-5 or B-1 Stands

**11. CONTACTS: LANGLEY (757)-764-XXXX & FT EUSTIS (757)-878-XXXX**

- a. **LANGLEY AFB VA:**
  - Wing Commander: Col. (b) (6) , DSN (b) (6)
  - Mission Support Group Commander: Col. (b) (6) DSN (b) (6)
  - Civil Engineer: Col. (b) (6) DSN (b) (6)

# 910 AW AERIAL SPRAY

## PMP'S POST-MISSION REPORT – LANGLEY AFB

### 1. MISSION BASICS:

- a. Installation Sprayed: Langley AFB
- b. Mission Duration: 30 Aug-3 Sept, 2004
- c. Purpose of Application: Adult Mosquito Control
- d. Application Date(s) and time(s) (Local): 31 Aug (1700-1930); 01 Sept (1655-1936); 02 Sept (1700-1830)
- e. Acres Treated: 31 Aug, 33409; 01 Sep, 56532; 02 Oct, 33280 (Total = 123221 acres)
- f. Project Coordinator/s (Name/Title, Phone #): (b) (6) (b) (6)
- g. Date Spray Map Last Approved: 31 Aug 2004
- h. Date of Waste Generation Letter: 4 April 1996
- i. Installation In-Briefing: 1 CE Conference Room, Langley AFB; Lt Col (b) (6) Maj (b) (6)  
LTC (b) (6) LTC (b) (6) Maj (b) (6) & Capt (b) (6)

### 2. OPERATIONAL:

- a. Mission Commander: Maj (b) (6) (b) (6)
- b. Certified PMP/s (Category 11): Lt Col (b) (6) (b) (6) Maj (b) (6) (b) (6) Capt (b) (6)
- c. Aircrew:
  - (1) Aircraft Commander/Pilot: LTC (b) (6) (b) (6)
  - (2) Co-Pilot(s): Capt (b) (6) (b) (6)
  - (3) Navigator: LTC (b) (6)
  - (4) Flight Engineer(s): MSG (b) (6) ,, MSG (b) (6) , MSG (b) (6)
  - (5) Spray Operators: TSG (b) (6) TSG (b) (6) (b) (6)
- d. Safety Briefer: Maj (b) (6) (b) (6)
- e. Spray Maintenance/Pesticide Loaders: TSG (b) (6) TSG (b) (6) , MSG (b) (6)
- f. Crew Chief(s): TSG (b) (6) , TSG (b) (6) (b) (6)
- g. Avionics: MSG (b) (6)
- h. Flying Data:
  - (1) Spray Sorties/Hours: 3 Sorties: 31 Aug – 2 Sep.
  - (2) Ferry Sorties/Hours: 2 Sorties (3.3 Hours)

### 3. PESTICIDE:

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 210 (31 Aug); 130 (01 Sep); 130 (02 Sep)
- e. Gallons Pesticide Applied: 130.5 (31 Aug); 220 (01 Sep); 130 (02 Sep)
- f. Gallons and Name Diluent Used: n/a
- g. Gallons and Name of Flush Used: Marvel mystery oil (25 gallons) (02 Sep)
- h. Other Additives Used: n/a
- i. Application Rate: 0.5 oz/acre on the peninsula and Craney Island

**4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): C-130 (99106)
- b. Spray System (Modules Used) and System ID #: System SP2G - MASS ULV; Modules 1 and 2
- c. Spray System Configuration: ULV Fuselage Booms; Modules 1 and 2/MASS ULV
- d. Nozzle Type/Size: 8008 TeeJet<sup>®</sup> Flat Fan
- e. Nozzle Orientation & Number Used: 8 8008's oriented straight down
- f. Pressure: 29-37 psi
- g. Flow Rate: 3.6 gallons/minute on the peninsula and Craney Island

**5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000 ft on Langley Peninsula
- b. Spray Off Set: 2000'
- c. Spray Release Altitude: 150 feet AGL
- d. Ground Speed: 200 knots

**6. WEATHER OBSERVATIONS:**

- a. Winds (Speed/Direction): 3 mph/250 (31 Aug); 5 mph/240 (01 Sep); 11 mph/260 (02 Oct)
- b. Temperature (Degrees Fahrenheit): 78°F (31 Aug-01 Sep); 82°F (02 Aug)
- c. Source: Ground observations/aircraft

**7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Deposition Pattern:
  - (1) Technique/s Used: Normal projected off-sets based on MASS system characterization
  - (2) Results: DGPS shows spray block completed.
- b. Effectiveness:
  - (1) Technique/s Used: carbon dioxide-baited traps were used to monitor mosquito densities pre- and post-treatment
  - (2) Results: Final reports have not been received from Langley AFB and cooperating cities at this time, however, preliminary feedback from Langley AFB on 02 Sept indicated that the spray mission was very successful.

**8. REMARKS:**

This spray was one of the first conducted at Langley this year and followed a period of excessive moisture following several significant storm events. Several pest mosquito species were present (i.e., salt marsh/container breeding). The area was surveyed on the ground and by air prior to the application. A total of 123221 acres were sprayed during the week including Naval Weapons Station Yorktown and Cheatham Annex Naval Supply Depot. Positive community feedback was near an all-time high after this mission due to the continuing impacts of nuisance and disease-causing mosquitoes on military and local civilian populations.

**3. PESTICIDE:**

- a. Trade Name (% Active Ingredient): Dibrom<sup>®</sup> Concentrate (87.4% Naled)
- b. EPA Registration Number: 59639-16-2A
- c. Formulation Sprayed: Dibrom<sup>®</sup> Concentrate (neat)
- d. Gallons Pesticide Loaded: 130 gal (2 Sept); 120 gal (3 Sept); 250 total
- e. Gallons Pesticide Applied: 93 gal (2 Sept), 12 gal (3 Sept), & 112 gal (4 Sept); 217 total
- f. Gallons and Name Diluent Used: none
- g. Gallons of Flush Used: 15 gal marvel oil, collected as waste
- h. Other Additives Used: None
- i. Application Rate: 0.5 oz/acre

#### **4. APPLICATION EQUIPMENT:**

- a. Aircraft Type (Tail Number): 99105
- b. Spray System (Modules Used) and System ID #: 2
- c. Spray System Configuration: 2-Module System/Stainless Steel ULV Wing Booms
- d. Nozzle Type/Size: TeeJet® 8005 Flat Fan
- e. Nozzle Orientation & Number Used: 9-8005s (2&3 Sept) 11 (4 Sept) oriented straight down
- f. Pressure: 45-90 psi
- g. Flow Rate: 3.6 gallons per minute

#### **5. APPLICATION PARAMETERS:**

- a. Swath Width Flown: 2000'
- b. Spray offset: 2000'
- c. Spray Release Altitude: 150'
- d. Ground Speed: 200 Knots (338 Feet/Second)

#### **6. WEATHER OBSERVATIONS:**

- a. Winds (Direction/Speed):
  - (1) Ground: 2 knots @ 250° (2 Sept), 2 knots @ 050° (3 Sept), & 2 knots @ 040° (4 Sept)
  - (2) Release Altitude: 5 knots @ 250° (2 Sept), 4 knots @ 050° (3 Sept), & 8 knots @ 040° (4 Sept)
- b. Temperature (Degrees Fahrenheit): 82-80° (2 Sept), 78° (3 Sept), & 75° (4 Sept)
- c. Relative humidity: 81-88% (2 Sept), 86% (3 Sept), & 89-91% (4 Sept)
- d. Cloud Cover: Scattered clouds, mostly cloudy, thunderstorms
- e. Source: Ground observations and aircraft

#### **7. SPRAY MONITORING (Pre- and Post-Treatment):**

- a. Monitoring was done by Miami Dade Mosquito Control using landing counts and carbon dioxide-baited traps at 8 treatment areas and 2 control sites outside the spray areas.
- b. Monitoring data showed that mosquito landing counts dropped measurably in areas treated with decreases between 90-100% (Attachment 1). In addition, the primary target pest (*Aedes taeniorhynchus*) populations were decreased by 85-95%, while populations in areas not sprayed remained at largely at pre-spray levels.

#### **8. REMARKS:**

a. Homestead AFB received aerial applications for mosquito control for years until Hurricane Andrew devastated the area in 1992. This application marked the return of the Air Force Aerial Spray Flight to this base. Lt Col (b) (6) initiated the process and Dr. (b) (6) wrote the environmental assessment. Miami Dade Co. Mosquito Control Division of Public Works, offered technical expertise and pesticide for areas of Miami Dade County which were treated. This follows a model of training and function that has been a mutually beneficial for the Spray Unit and various host installations around the country.

b. A wet summer season left south Florida with several hatches of salt marsh mosquitoes and trap numbers easily met the prescribed minimum to trigger the potential for adult mosquito control. Since this was the first application in recent memory, a thorough discussion was performed at the in-brief for all partners/collaborators prior to flying. We received excellent support from all sections including 482<sup>nd</sup> PA, CES, and the TA folks. Thunderstorms prompted a weather cancellation on 2 Sept and delayed take-off times on other days. A small amount of pesticide dripped from an internal section of the MASS onto absorbent but was sufficient to force a shortened sortie for safety reasons on 3 Sept. The problem was quickly fixed by Spray Maintenance. The Mission Commander coordinated with all parties for an extended spray period and the entire crew agreed to stay over on Friday evening to complete the spray area. The Spray Unit has done well controlling this species of salt marsh mosquito and this application was no exception. The County Mosquito Control personnel reported mosquito numbers dropped by 85-95% in all treated areas while counts remained stable in un-sprayed areas. Areas sprayed are shown in Attachment 2.

c. Special thanks are given to Miami Dade County for providing outstanding support in the form of mosquito surveillance data both pre- and post-spray. This was the last application for the year in which we had an aircraft scheduled at Homestead ARB. However, depending on mosquito levels and aircraft/personnel availability, an additional application may be possible. We hope that Homestead finds the application effective and will request dates for next year's program.

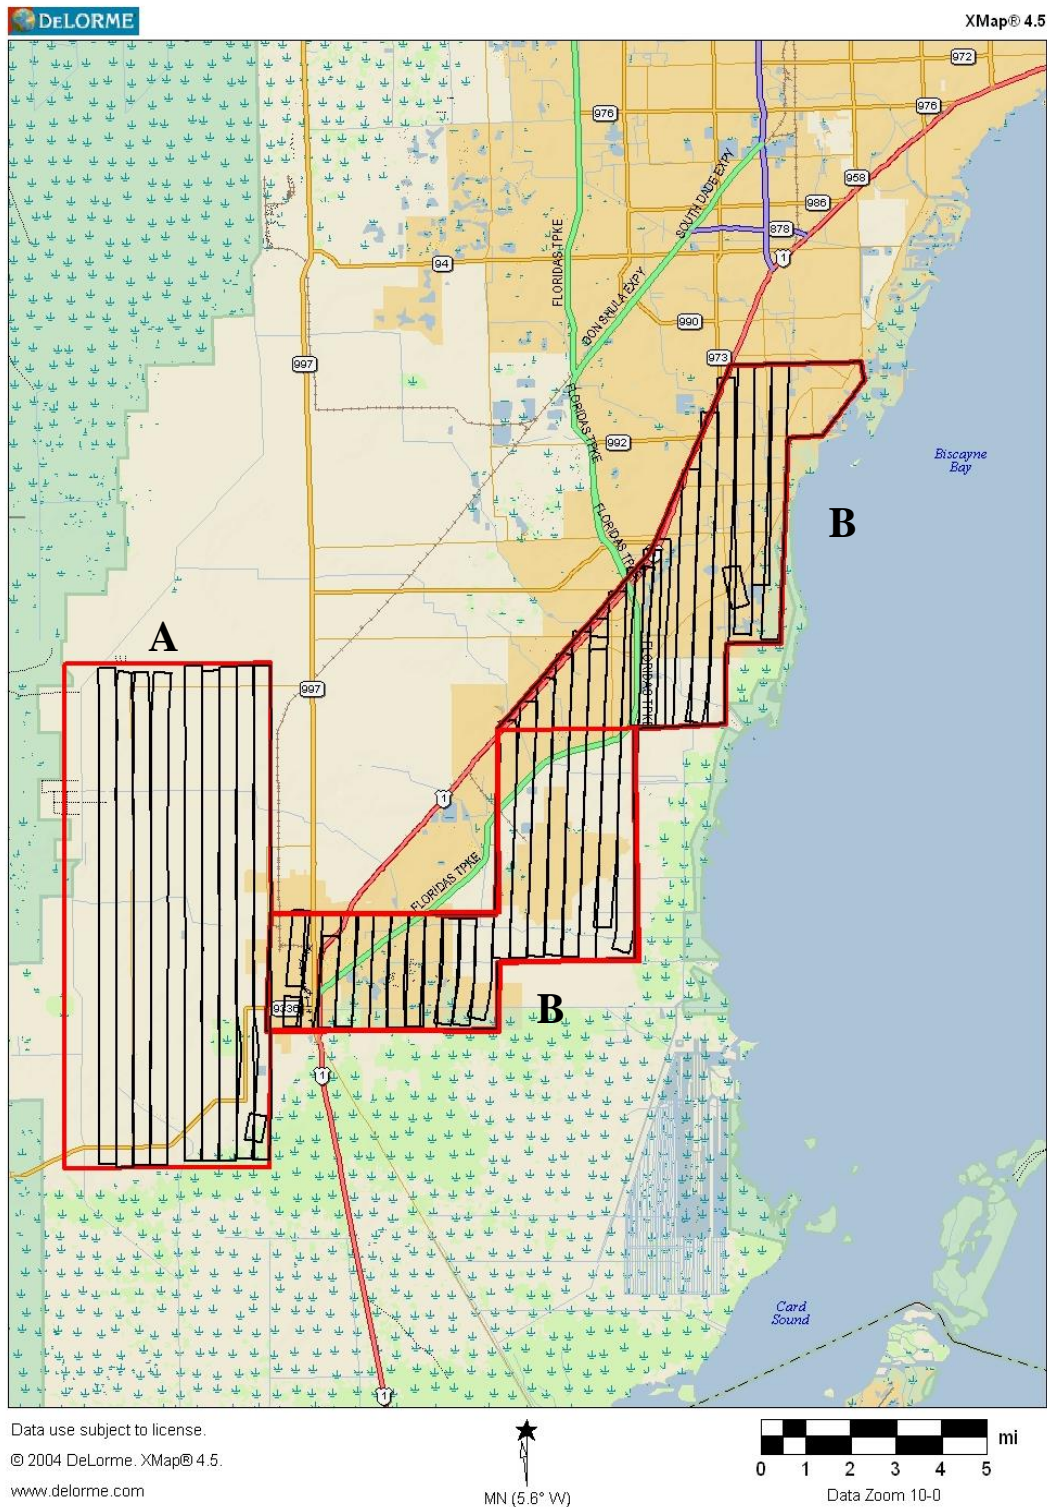

//signed//

MEMORANDUM FOR HQ AFRC/DOOM

2 Mar 06

FROM: 757 AS/DOS

SUBJECT: Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT  
Annual Weed Control Spray Mission on the Utah Test and Training Range (UTTR)  
Enroute mission for Spray Static Display at Texas Mosquito Control Association

1. **Capability:** Two aircraft will be available: 99105 from 29 Mar – 9 Apr, 99107 from 31 Mar- 9 Apr for the requested spray missions.

2. **Concept of Operations:**

a. **Aircraft 99105:**

**29 Mar (Wednesday): Preposition for Static Display enroute to KHIF**

1700Z Spray Aircraft 99105 Depart KYNG

2100Z Land KLBX

**30 Mar (Thursday)**

Static Display at Texas Mosquito Control Association meeting

**31 Mar (Friday) Continue to KHIF**

1630Z Depart KLBX

2030Z Arrive KHIF

**Aircraft 99107 and support aircraft**

**31 Mar (Friday) Spray plane and support plane to KHIF**

1500Z 99107 Depart YNG

1505Z Support aircraft depart YNG

2130Z 99107 Arrive KHIF

2135 Support arrive at KHIF

b. **1 Apr (Saturday) – 7 Apr (Friday):** Schedule of daily events will be determined by the Mission Commander as required.

**(Range times 0700-1500 local times at KHIF)**

0430 Ground Support Team departs for UTTR

0515 FEs, Crew Chiefs, & Spray MX report and Mix/Load Chemical

0630-1200 Target areas sprayed as designated by PMP

c. **7 (Friday) or 8 Apr (Saturday):**

Flush and clean up day.

Schedule of daily events will be determined by the Mission Commander as required. Support

Aircraft returns to Hill AFB.

**d. 8(Saturday) or 9 Apr (Sunday):**

0700 Aircrew report for duty

0730 All personnel report

0900-0915 Spray Aircrafts & Support aircraft take-off

1600-1700 Mission completed, all personnel and aircraft arrive at KYNG

**3. Spray Parameters and Sequencing:**

**a. SEQUENCING:**

1. Target 21

2. Target 24

3. NORDLZ

Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling.

**b. SPRAY PARAMETERS:**

1. **Herbicide:** Krovar 1DF®

2. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)

3. **Acreage:** 1,283 Acres (Targets 21, 24 and a couple passes on Nord LZ)

4. **Ground Speed:** 200 Knots (337.55 ft/sec)

5. **Spray Altitude:** 100 Feet AGL

6. **Swath Width:** 35 Feet

7. **Flow Rate:** 366.1 Gallons/Minute

4. **Mission Commander:** LTC (b) (6) (b) (6)

5. **Aircraft Commanders:** Maj's (b) (6) (b) (6) (b) (6) (b) (6) Capt (b) (6) (b) (6)

6. **Support required at Hill AFB and the UTTR has been completed.**

**6. IN-BRIEFING: (UTTR Staff)**

- a. **When/Time:** 31 Mar 2006 , 1400
- b. **Where:** Air Freight Terminal
- c. **Who:** EVERYONE!!
- d. **Briefing Plan**
  - a. Billeting- See item g below
  - b. Vehicles- See item h below
  - c. Schedule of events
  - d. Weather call
  - e. Cellular Phone numbers for all personnel

**7. PLANNED SEQUENCE OF EVENTS:** Hill AFB Tower Control and Runway Hours 24/7

**NOTE:** Scheduling reflects no weather or maintenance delays. In the event of weather or maintenance delays, the missions will be adjusted as required.

**ALL TIMES MAY BE ADJUSTED BY MISSION COMMANDER.  
DUTY DAY FOR CIVILIANS WILL BE STD DAY (8 HOURS).  
MILITARY STATUS PERSONNEL WILL WORK AS  
REQUIRED WITHIN CREW REST CONSTRAINTS.**

**Tower Control, Runway & Airfield hours 24/7**

**UTTR RANGE TIMES: 0600-1500L**

**END OF EACH DAY LOAD GROUND TANKS WITH THE APPROPRIATE MIX.**

**ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS PRE-  
FLIGHTED FOR THE NEXT DAY OR RELEASED BY THE AIRCRAFT  
COMMANDER.**

**\*\*If mission is completed early, expect an early return to YNG. 1 Airplane  
may return on 7 April if mission is complete.**

**1<sup>st</sup> Spray aircraft: Tail#: 899105 MI: QZNRKA007088**

**29 Mar (Wed)**

**1000 Show at YNG**

**1200 Depart YNG**

**1500 Arrive LBX (Brazoria County Airport)**

**30 Mar (Thur) Static Display Spray Convention**

**31 Mar (Fri)**

**0900 Show at LBX**

**1030 Depart LBX (Time to arrive at Hill by 1330)**

**1330 Arrive HIF**

**2<sup>nd</sup> Spray Plane 899108 (MI: QZNRKA008090) and Support aircraft:**

**31 Mar (Fri):**

**0800 Show at KYNG**

**0810 Mission Brief**

1000 Aircraft 08 Take off  
1005 Support aircraft Take off – AFRC Support plane  
1330 Arrive Hill AFB  
1400 Mission Commander/Safety Briefing

**1 – 7 APR (Sat-Fri):** (First Spray Sortie, Range Times 0700-1500 (1200Z-2100Z 1-9 Apr)

0500: Spray Maintenance starts on first full day of mission and adjust as directed  
0500: Show time, aircrew Spray 05  
0530: Show time, aircrew Spray 08  
0611: Sunrise (see attach Sunrise/Sunset Chart in mission folders)  
0700: Spray 05 Take off  
0730: Spray 08 Take off  
0700-1700: Spray 05 & 08 spray UTTR Targets as directed by the MC  
**\*NOTE: Spray 05 & 08 will alternate show/take off each day**  
**\*\* NOTE: First crew to base ops files flight plans and gets weather brief for second crew**

**7+8 APR (Fri+Sat):** Weather Back-up/Flush, Clean Up; Support Aircraft arrives at Hill

0530: Show time aircrew Spray 05  
0600: Show time aircrew Spray 08  
0715-1200 Spray 07 & Spray 08 Flush sorties, plan 2 sorties each pending spray mx

**8 or 9 Apr (Sat or Sun):** All personnel and aircraft return to YNG

0700: All Aircrew report  
0730: All Personnel report  
0900: Aircraft 05 Takes off  
0905: Aircraft 08 Takes off  
0910: Support airplane Takes off  
1600: Lands YNG

**8. ITEMS TO TAKE:**

- a. PMP:**
  - (1) Project Notebook with Recording Sheets and Maps
  - (2) Laptop Computer and Batteries
  - (3) 2 Compasses and Stop Watch
  - (4) 2 Signal Mirrors and 2 Spot Lights
  - (5) Measuring Wheels and Tape
  - (6) Entomologists' Tool Kit
  - (7) UHF/VHF Radios and VHF Radios
  - (8) Cellular Phone
- b. Mission Commander:** Cellular Phone, Mission Info
- c. Navigator:** Maps
- d. Spray Maintenance:**
  - (1) MASS Spares and Spill Kit
  - (2) Tools and Other Equipment
  - (3) Herbicide Safety Binder
  - (4) Safety Equipment
- e. Maintenance:** Applicable Equipment

**9. SPRAY CONFIGURATION: SP3G**

- a.** Two Aircraft, Systems 3 and 5
- b.** MASS Modules 1, 2 and 3
- c.** UHV Fuselage booms oriented straight back

**10. PPR REQUIREMENTS:** All required, see Form 33 setup sheets for aircraft

**11. PARKING PLAN:** Air Freight Ramp – on West side of the airfield, Spots 11/12  
Alternate Spot 10 for support aircraft

**12. RADIO FREQUENCIES:**

- **Clover Range Control:** UHF 285.65, 275.9, 361.4
- **Eagle Tower:** UHF 351.0; Mawk 4 ((b) (6) )
- **Diddle Knoll & Spray Ops Freq:** UHF 398.1 (Primary), 383.2 (Back-up); VHF 134.1, 118.45
- **Spray Inter plane:** UHF 237.05 / VHF 138.375
- **Spray Ground to Spray Maintenance:** See Iridium Phones
- **Base OPS:** 139.3
- **HF Operations:** 04912.35 (p), 10923.35, 12208.35, 14827.35
- **Communications Ground Freq:** LMR nets are trunked at Hill.

**- IRIDIUM PHONES**

- Mission Commander ((b) (6))
- Maintenance Supervisor ((b) (6))
- Entomologist/Pest Management ((b) (6))

**13. SPRAY PARAMETERS:**

- a. **Herbicide:** Krovar 1DF®
- b. **Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. **Acreage:** 1,283 Acres (Targets 21, 24 and a couple passes on Nord LZ)
- d. **Ground Speed:** 200 Knots (337.55 ft/sec)
- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

**14. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

**b. When:** Start at 0515 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be furnished by installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**15. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**16. CONTACTS:** (Commercial prefix (801) 777-XXXX; DSN 777-xxxx

**17. SEQUENCING:**

- a.** Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling.
- b.** Spray ops aircraft must stay south of Base Leg Knoll during turns on north run on Target 21. Coordination with range control is essential to assure that this portion of the range is released for air operations.
- c.** When winds blow directly from one side of the target to the middle of the target or during early morning when wind speed is low, ground monitors will direct the “dress up” of the target edges.
- d. Spraying Priorities:**
  - (1) Target 21
  - (2) Target 24
  - (3) NORDLZ
- g. Multiple-Target Alignments for Possible Future Operations.**

Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required).

  - (1) The west edges of Targets 21 & 24 are contiguous and can be treated on the same pass with a spray-off gap between targets.

**18. GENERAL TARGET INFORMATION:**

- a. Target 21:**
  - (1) Dimensions: 4,980' X 7,770'

- (2) Acreage: 888
- (3) Acres Sprayed in 2004: 888
- (4) Aircraft Loads: 18,869 Gal
- (5) Sorties: 17
- (6) Passes (35' Swath): 157
- (7) Spray-On Time/Pass: 23 Seconds
- (8) Spray Heading: 00/180

**b. Target 24:**

- (1) Dimensions: 1,600' X 6,080'
- (2) Acreage: 223
- (3) Acres Sprayed in 2004: 223
- (4) Aircraft Loads: 5,263 Gal
- (5) Sorties: 7
- (6) Passes (35' Swath): 47
- (7) Spray-On Time/Pass: 18 Seconds
- (8) Spray Heading: 00/180

### **UTTR GEOGRAPHIC LOCATION**

Target areas on UTTR are geographically located in northwestern Utah, directly west of the Great Salt Lake and Hill Air Force Base. The complex is positioned between 40 and 41 degrees north latitude and close to 113 degrees ten minutes west longitude. The targets are within range 12 west and Township two and three north, Salt Lake Baseline Meridian.

**DEPARTMENT OF THE AIR FORCE**  
**AIR FORCE RESERVE COMMAND (AFRC)**

19 Mar 09

**MEMORANDUM FOR HQ AFRC/DOOM**

**FROM:** 757AS/DOS  
3976 King Graves Rd  
Vienna Ohio 44473-0910

**SUBJECT:** Capability and Concept of Operations for Aerial Spray at Hill AFB/UTTR UT

1. Aerial Spray flight proficiency training will be accomplished on targets 21, 24, and Wildcat at the Utah Test and Training Range(UTTR) applying Krovar controlling vegetation (i.e Halogenton) growth aiding bombing mission test evaluations and unexploded ordinance recovery. One C-130 will be available 31 March – 11 April 09 for the requested spray mission. This mission normally uses two C-130's, but due to the current C-130 wing limitations only 1 airframe is available for the mission. A second crew will attend this mission flying the additional sorties each day with a single airframe to complete the desired area.

2. Concept of Operations:

- a. 31 March (Tuesday)
  - 0500 Show KYNG
  - 0800 Depart KYNG with extra crew, maintenance, and support equipment
  - 1130 Land KHIF drop off extra crew, maintenance, and support equipment
  - 1330 Depart KHIF
  - 2000 Land KYNG
- b. 1 April (Wednesday)
  - 0800 Show KYNG load spray module
  - 1000 Depart KYNG
  - 1330 Land KHIF
- c. 2-9 April (Thursday-Friday)
  - 0500 Show KHIF
  - 0745 Depart KHIF
  - 1300 Land KHIF
- d. 10 April (Friday)
  - 0700 Show KHIF

0900 Depart KHIF with spray module  
1600 Land KYNG download spray module  
1730 Depart KYNG  
2030 Land KHIF

- e. 11 April (Saturday)  
0800 Show KHIF  
1000 Depart KHIF with extra crew, maintenance, and support equipment  
1600 Land KHIF mission complete

3. Capt (b) (6) (b) (6) will act as Mission Commander.
4. Maj (b) (6) (b) (6) will act as Aircraft Commander
5. Support required at Hill AFB and the UTTR has been completed.

(b) (6) (b) (6) Capt, USAFR  
Assistant Chief of Aerial Spray

# SPRAY OPERATIONAL SCHEDULE

## UTAH TEST AND TRAINING RANGE MISSION

### 31 MARCH 11 APRIL 2009

**PURPOSE/BENEFIT/OBJECTIVE:** Aerial spray herbicide mission controlling Halogeton on Targets 21, 24, and Wildcat at the Utah Test and Training Range(UTTR) aiding vegetation control for bombing mission test evaluations and unexploded ordnance recovery.

#### **1. AIRCREW1: AC 108-CALL SIGN: SPRAY 06**

- a. **Pilots:** MAJ (b) (6) (b) (6) MAJ (b) (6)
- b. **Navigators:** MAJ (b) (6) (b) (6)
- c. **Flight Engineers:** MSgt (b) (6)
- d. **Spray Operators:** SMS (b) (6) , MSgt (b) (6) , Ssgt (b) (6)
- e. **Crew Chiefs:** Msgt (b) (6) , Sra (b) (6)

#### **AIRCREW 2: AC 108- CALL SIGN: SPRAY 08**

- f. **Pilots:** MAJ (b) (6) , MAJ (b) (6) , Maj (b) (6)
- g. **Navigators:** LTC (b) (6) (b) (6)
- h. **Flight Engineers:** MSgt (b) (6)
- i. **Spray Operators:** MSgt (b) (6) MSgt (b) (6) (b) (6)
- j. **Crew Chiefs:** Msgt (b) (6) , Sra (b) (6)

#### **2. MISSION SUPPORT:**

- a. **Mission Commander:** Capt (b) (6) (b) (6)
  - 1. Makes final decision on all changes to the schedule
  - 2. Confirm all hotel information is correct upon check in
  - 3. Report flight data to AFRC daily (See contact info on reporting sheet)
- b. **Entomologists:** Maj (b) (6) (b) (6)
- c. **ARMS:** SMS (b) (6)

#### **3. UTTR GROUND PARTY:**

- a. **Entomologist/Pest Management Professional(s):** \*LTC (b) (6) (b) (6) (Commercial air out), LTC (b) (6) (b) (6) , Smsgt (b) (6) (b) (6)

#### **4. MAINTENANCE:**

- a. **910 MX Supervisor:** \*SMSgt (b) (6) (27 Mar 09);
- b. **910 Spray MX:** Tsgt (b) (6) (27 Mar 09), Tsgt (b) (6) (27 Mar 09), Tsgt (b) (6) (b) (6) (27Mar09), Ssgt (b) (6) ,SRA (b) (6) , Tsgt (b) (6) (1 Apr), Tsgt (b) (6) (1 Apr)
- c. **Instruments/Avionics:** Tsgt (b) (6) (b) (6) Tsgt (b) (6)
- d. **Hydraulics/Electrician:** Tsgt (b) (6) , Ssgt (b) (6)
- e. **Engine:** Tsgt (b) (6) ,

#### **5. COMM: None**

#### **6. IN-BRIEFING: (UTTR Staff)**

- a. **When/Time:** 31 Mar 2009 , 1230
- b. **Where:** Air Freight Ramp/Base Operations
- c. **Who:** EVERYONE!! Do Not leave area until cleared out by the MC.
- d. **Briefing Plan**
  - a. Vehicles- See item 16.h below
  - b. FLT Line Driving
  - c. Schedule of events
  - d. Billeting- See item 16.g below
  - e. Weather call

- f. Cellular Phone numbers for all personnel

**7. PLANNED SEQUENCE OF EVENTS: Hill AFB Tower Control and Runway Hours 24/7**

**NOTES:**

1. Scheduling reflects no weather or maintenance delays. In the event of weather or maintenance delays, the missions will be adjusted as required. **ALL TIMES SUBJECT TO ADJUSTMENT BY MISSION COMMANDER**
2. **DUTY DAY FOR CIVILIANS WILL BE AS REQUIRED WITHIN CREW REST CONSTRAINTS.**
3. Tower Control, Runway & Airfield hours 24/7
4. **UTTR RANGE TIMES: 1500-2000Z**
5. **ALL MX & A/C PERSONNEL WILL REMAIN ON DUTY UNTIL AIRCRAFT IS PRE-FLIGHT COMPLETE AND RELEASED BY THE MISSION COMMANDER.**

**a. 31 March (Tuesday)**

**Spray 06 MI: QZNRKA906090 PPR: AS3101**

0600 Show KYNG

0900 Depart KYNG with extra crew, maintenance, and support equipment

1200 Land KHIF drop off extra crew, maintenance, and support equipment

1330 Depart KHIF

2000 Land KYNG

**Spray 08 MI: QZNRKA963090 PPR: TM3102**

0600 Show KYNG

0905 Depart KYNG

1205 Land KHIF

**\*\*All personnel driving on the flight line will need to attend the flight line drivers briefing @ 1230 or ASAP after landing from base operations personnel.**

**b. 1 April (Wednesday) PPR: AS0101**

1000 Show KYNG load spray module

1200 Depart KYNG

1530 Land KHIF

**\*\*Time will be adjusted based on crew rest requirements.**

**c. 2-3 April (Thursday-Friday) As many sorties as wx permits each day.**

0500 Show KHIF crew 2; 0545 Crew 1 (Alternating daily)

0700 Depart KHIF

1300 Land KHIF

**\*\*Weekend is unavailable due to range funding. If wx delayed, then weekend operations will be considered as a last resort per Hill AFB.**

**d. 6-9 April (Monday-Thursday) As many sorties as wx permits each day.**

0500 Show KHIF

0745 Depart KHIF

1300 Land KHIF

**e. 10 April (Friday) Both aircrews**

0700 Show KHIF

1000/1005 Depart KHIF with spray module

1600/1605 Land KYNG download spray modules  
1730 Crew 2 Depart KYNG  
2030 Crew 2 Land KHIF

**f. 11April (Saturday)**

0800 Show KHIF

1000 Depart KHIF with extra crew, maintenance, and support equipment

1600 Land KHIF mission complete

\*\*If completed early, the aircrews and airframes may return early. TBD by the mission commander.

**8. ITEMS TO TAKE:**

**a. PMP:**

- (1) Project Notebook with Recording Sheets and Maps
- (2) Laptop Computer and Batteries
- (3) 2 Compasses and Stop Watch
- (4) 2 Signal Mirrors and 2 Spot Lights
- (5) Measuring Wheels and Tape
- (6) Entomologists' Tool Kit
- (7) UHF/VHF Radios and VHF Radios
- (8) Cellular Phone

**b. Mission Commander:** Mission Folder, Cellular Phone

**c. Navigator:** Maps

**d. Spray Maintenance:**

- (1) MASS Spares and Spill Kit
- (2) Tools and Other Equipment
- (3) Herbicide Safety Binder
- (4) Safety Equipment

**e. Maintenance:** Applicable Equipment

**9. SPRAY CONFIGURATION: SP3G**

- a.** Two Aircraft and Systems
- b.** MASS Modules 1, 2 and 3
- c.** UHV Fuselage booms oriented straight back

**10. PPR REQUIREMENTS:** All required, see Form 33 setup sheets for aircraft

**11. PARKING PLAN:** Air Freight Ramp

**12. RADIO FREQUENCIES:**

- **Clover Range Control:** UHF 285.65, 275.9, 361.4 (p)
- **Eagle Tower:** UHF 351.0; Mawk 4 ((b) (6) )
- **Diddle Knoll & Spray Ops Freq:** UHF 398.1 (Primary), 383.2 (Back-up); VHF 134.1, 118.45
- **Spray Inter plane:** UHF 237.05 / VHF 138.375
- **Spray Ground to Spray Maintenance:** See Iridium Phones
- **Base OPS:** 139.3
- **HF Operations:** Designated by Comm. See attached list.
- **Communications Ground Freq:** LMR nets are trunked at Hill.

**- IRIDIUM PHONES**

- Mission Commander 8816763366637
- Entomologist/Pest Management at UTTR 8816763366636

**13. SPRAY PARAMETERS:**

- a. Herbicide:** Krovar 1DF®
- b. Application Rate:** 22.5 gal/acre (10 lbs of Krovar in 22.4 gal of water)
- c. Acreage:** 1,283 Acres (Targets 21, 24 and a couple passes on Nord LZ)
- d. Ground Speed:** 200 Knots (337.55 ft/sec)

- e. **Spray Altitude:** 100 Feet AGL
- f. **Swath Width:** 35 Feet
- g. **Flow Rate:** 366.1 Gallons/Minute

**14. HERBICIDE LOADING: (For Partial Loads Use Table on Last Page)**

**a. Sequence for Loading 1,000 Gallon Mixing Tank:**

- (1) Fill with water up to 750 Gallon Mark, then add:
  - (a) 450 Pounds of Krovar 1DF® (9 bags, 50 # each)
  - (b) 4.0 Gallons (15,140 ml) of StaPut®
  - (c) 64 Ounces (1,892 ml) of Foam Fighter F®
  - (d) 200 Ounces (5,913 ml) Hi-Light® Dye
  - (e) Add Water to 1,000 Gallon Mark and Agitate for 30 Minutes

- b. When:** Start at 0530 Hours on first full day of spraying and adjust as necessary through end of the daily mission as called by Mission Commander.

**c. Items to be furnished by installation:**

- (1) Krovar 1 DF® (12,660 pounds)
- (2) Foam Fighter F® (15 gallons)
- (3) StaPut® Additive (114 gallons)
- (4) Hi-Light® Dye (45 gallons)
- (5) Remove Nutra-Sol Tank Cleaner
- (6) Loading Personnel and All Loading Equipment
- (7) All Necessary Cleanup and Hazardous Waste Disposal
- (8) Aircraft Support Equipment and TA Support
- (9) Wash Rack and Fuel Priority

**15. SPRAY MONITORING AND TESTING.** By CPMP & ground support personnel

**16. CONTACTS:** Commercial prefix (801) 777-XXXX; DSN 777-xxxx

  - Spray Maintenance: (b) (6) (Sms (b) (6))

**17. SEQUENCING:**

- a. Target sequencing is determined by UTTR personnel based upon EOD clearance schedule and airspace scheduling.
- b. Spray ops aircraft must stay south of Base Leg Knoll during turns on north run on Target 21. Coordination with range control is essential to assure that this portion of the range is released for air operations.
- c. When winds blow directly from one side of the target to the middle of the target or during early morning when wind speed is low, ground monitors will direct the “dress up” of the target edges.
- d. **Spraying Priorities:**
  - (1) Target 21
  - (2) Target 24
  - (3) Wildcat (Rinse/excess material)
- k. **Multiple-Target Alignments for Possible Future Operations.**  
Whenever possible, multiple in line targets will be treated on the same pass to facilitate aircraft line-up and turning efficiency (in which case two separate ground-monitoring and marking parties will be required).
  - (1) The west edges of Targets 21 & 24 are contiguous and can be treated on the same pass with a spray-off gap between targets.

**18. GENERAL TARGET INFORMATION:**

- a. **Target 21:**
  - (1) Dimensions: 4,980' X 7,770'
  - (2) Acreage: 888
  - (3) Acres Sprayed in 2004: 888
  - (4) Aircraft Loads: 18,869 Gal
  - (5) Sorties: 17
  - (6) Passes (35' Swath): 157
  - (7) Spray-On Time/Pass: 23 Seconds
  - (8) Spray Heading: 00/180
- b. **Target 24:**
  - (1) Dimensions: 1,600' X 6,080'
  - (2) Acreage: 223
  - (3) Acres Sprayed in 2004: 223
  - (4) Aircraft Loads: 5,263 Gal
  - (5) Sorties: 7
  - (6) Passes (35' Swath): 47
  - (7) Spray-On Time/Pass: 18 Seconds
  - (8) Spray Heading: 00/180
- c. **WildCat**  
Box coordinates:

## Aerial Spray Mission Set up Check list

### Pre Planning:

2 Months out:

1. Confirm Dates with Entos
2. Request Range Times

1-2 Months out:

3. Arrange Cars/Hotels

Hampton Inn – 14 Rooms 17-20 April

Hampton Inn- 20 Rooms 1-4 May

1. Concept Message sent to AFRC DOOM.
2. Set up flights
  - a. Flying Planner
  - b. Aircraft Scheduled – Ext 1672
  - c. Input Flights into SMS
  - d. Add Mission ID's to Local Flying Schedule- Send to Current Ops
  - e. Email to : (b) (6) (757 orderly room), (b) (6) (TMO), (b) (6), (b) (6), (b) (6) Plans Contact list.: MSN ID, Rental Car Info
3. Build Mission Plan:
  - a. Contact Spray/Maintenance: (b) (6) (spray), (b) (6) (Maint/crew chiefs), (b) (6) (b) (6) (avionics)
  - b. Arrange Billeting
  - c. Arrange Vehicles/transportation
  - d. Arrange for Ravens when needed ((b) (6) ) N/A for NBC
4. Contact Plans and set up a concept briefing:
  - a. Send copy of Mission Plan to the Plans office
  - b. Plans will coordinate with Maint, SF, etc. to be at meeting
5. Build Folders:
  - a. Setup sheet/Form 33
  - b. Suitability reports
  - c. Billeting Letters
  - d. mission notes
  - e. Sunrise/Sunset tables

## Aerial Spray Mission Set up Check list

### Pre Planning:

- a. Setup sheet/Form 33
  - b. Suitability reports
  - c. Billeting Letters
  - d. mission notes
  - e. Sunrise/Sunset tables

## August 2006 Langley Testing Mission Protocols

**Purpose:** To determine the effectiveness and swath characterization of a 500' release of adulticide (Dibrom) using a bioassay and spinning droplet impingers. These tests will be a continuation of tests conducted in early 2006 at Avon Park, FL in an effort to determine the feasibility of night spray operations at 500 feet.

### Proposed methods:

10 Sampling stations will be placed along a 5 mile transect. Sampling stations will be located approximately ½ mile apart. Each sampling station will be composed of a slide spinner mounted on a wood dowel pole, equipped with 2 teflon slides. In addition, each sampling station will be equipped with a mosquito cage containing 20 field collected adult mosquitos.

Two trials will be conducted. The first trial will be a low rate single pass application. Dibrom will be dispensed at a flow rate resulting in an application rate of ½ ounce per acre (based on a 2000 foot swath). This translates into flow rate of 3.6 gallons per minute. The second trial will be a high rate single pass application dispensed at a rate of 1.0 ounces per acre (based on a 2000 foot swath). This translates into a flow rate of 7.2 gallons per minute. The sampling transect will be positioned parallel to the prevailing wind and the flight path of the aircraft will be perpendicular to the transect. Depending on prevailing wind velocity, the flight path (offset) of the aircraft will be from 1000 to 2000 feet upwind of the first sampling station.

TeeJet nozzles (8005) will be used for both trials. In both tests, fluorescent dye will be added to the spray tanks (0.25% Uvitex OB) to facilitate droplet counting and sizing using UV microscopy. Spray will be turned on 30 seconds prior to coming abeam of the sampling line and will be turned off 30 seconds after coming abeam of the sampling line. Bioassay controls will be placed in a nontreated area for the duration of the test. 30 minutes after each application, cages and slides will be collected and returned to the laboratory. Caged mosquitoes will be transferred to clean holding containers furnished with sugar water. Mortality counts will be conducted at 2, 12, and 24 hour intervals. Spray droplets will be counted and sized with a UV microscope equipped with a reticle. 100 drops (if available) will be counted on each slide and the total area counted will be calculated.

### Materials/Resources required:

240 adult mosquitoes/trial. Total=480 mosquitoes  
10.8 gallons Dibrom plus provisions for boom charging  
Readily accessible, fairly open 5 mile long transects (N-S and E-W)  
24 insect cages with hairclips  
25 insect cups  
10 spinners/20 teflon slides/10 wooden dowels  
UV microscope  
Mosquito aspirators (2)  
5-10 collaborators  
2-3 large ice chests

## **Safe Seas 2006**

### **HAZMAT Schedule for the Week of August 7, 2006**

#### **August 7 - Monday**

## **Directions to the Gulf of the Farallones National Marine Sanctuary Office**

Phone: (415) 561-6625

**Building 991 (Old U. S. Coast Guard Building) The Presidio of San Francisco, San Francisco CA 94129**

### **Entering the Presidio from Downtown or East Bay from Hwy 101-North, or Marina Boulevard going west (towards the Golden Gate Bridge):**

- Take 101-North (LOMBARD Street) through the Marina/Cow Hollow District. Turn right on DIVISADERO St.
- Go towards SF Bay, about 5 blocks, and take a left on MARINA Blvd.
- Drive west on MARINA Blvd. staying in the right lane, to its end at the BAKER St. stop signal, at the Palace of Fine Arts.
- Keep to the RIGHT, going straight into the Presidio along MASON St. (If you accidentally get onto the freeway approach Doyle Dr., just keep going toward the Golden Gate Bridge and take the last SF exit before the toll plaza, and refer to the directions for "Entering the Presidio from Doyle Drive.")
- Proceed west on MASON about 1.5 miles, past a stop sign.
- Continue straight, all the way to the end of the greenbelt.
- Turn right at the green-sided warehouse, and drive toward the Bay for about 500 yards.
- Turn right at the concrete tire stop, drive across the walking path (WATCH FOR PEDESTRIANS) and on the paved road marked "Authorized Vehicles Only."
- Continue into parking lot.
- There are two white buildings on the waterfront. Building 991 is the larger and has a square cupola on top.
- Enter on Bay side of building
